about.

PRESIDENCY SCHOOL OF LAW

Presidency School of Law, located in Bangalore, is well known for its legal education that aims to nurture future leaders and professionals in the field of law. With a focus on delivering a comprehensive and contemporary legal education, the school offers 5 years integrated undergraduate programs with specializations in Constitutional Law, Business Law, International Trade Law, Crime and Criminology, International Law and Intellectual Property Law as well as postgraduate programs with specializations in IPR and Technology Law, International Law, Criminal Law, Corporate Law and Constitutional and Administrative Law, including doctoral programs designed to meet the evolving demands of the legal profession.

The curriculum at Presidency School of Law blends theoretical knowledge with practical skills, fostering critical thinking, ethical understanding, and a deep sense of social justice. The school boasts an experienced faculty, well-equipped legal research centers, moot court facilities, and various dynamic committees creating an environment conducive for hands-on learning. Students are encouraged to engage in internships, legal research, moot court competitions, and other extracurricular activities to gain real-world experiences and enhance their professional development.

With a strong emphasis on interdisciplinary learning, legal research, and social responsibility, Presidency School of Law prepares students to navigate complex legal landscapes and contribute meaningfully to the profession. Its commitment to academic excellence, ethical values, and societal impact makes it a leading destination for aspiring legal professionals.

Environmental Law &

Climate Change Committee

PRESIDENCY UNIVERSITY, BANGALORE

The Environmental Law and Climate Change Committee (ELCCC) at Presidency School of Law, Bengaluru, serves as a pivotal platform for students and faculty dedicated to addressing pressing environmental issues through a legal lens. The committee focuses on fostering awareness, advocacy, and research on environmental protection, sustainable development, and climate crisis mitigation. By integrating law with environmental science, the ELCCC encourages critical analysis of current environmental laws and their global implications, particularly in the context of climate change. The committee also emphasizes the role of human rights law in shaping climate policies, promoting academic discourse and practical solutions to combat the climate emergency. Through these initiatives, the ELCCC aims to empower students to contribute meaningfully to environmental law and policy.

CONFERENCE

The global climate crisis poses one of the most significant threats to humanity and the planet today. It impacts all aspects of life, from health and security to economic and social stability. In response, the United Nations adopted the Sustainable Development Goals (SDGs) in 2015, aiming to address these complex and interconnected issues. However, the climate crisis continues to exacerbate existing inequalities and presents substantial challenges to achieving the SDGs. It is crucial to examine these challenges through a human rights perspective to ensure that efforts to combat climate change and achieve sustainable development are just, equitable, and inclusive. Further, the goal to achieve a sustainable future is largely contingent on policies on green energy, technology transfer, trade regulations, intellectual property barriers etc. In this backdrop, it is imperative to engage the stakeholders in relevant debates and deliberations that can mark the dawn of a change in India. The Conference provides an interdisciplinary platform to revisit sustainability dialogues in the anthropogenic era.

OBJECTIVES

The National Conference on "Sustainable Futures: Navigating Climate Crisis in the Anthropogenic Era" invites industry experts, policymakers, academicians, scholars, and students from different disciplines to explore and unravel material research questions at the intersection of climate change, human rights, and sustainable development. The conference seeks to:

- 1 Analyze the Impact of Climate Change on Human Rights: Discuss how climate change affects fundamental human rights, including the right to life, health, water, food, and shelter, and explore legal frameworks to protect these rights.
- 2 Evaluate the Role of SDGs in Addressing the Climate Crisis: Examine the effectiveness of SDGs in combating climate change and promoting sustainable development, with a focus on their alignment with human rights principles.
- 3 Identify Challenges and Opportunities: Highlight the challenges in implementing climate action and achieving the SDGs, particularly in vulnerable communities, and identify opportunities for strengthening legal and policy responses.
- 4 Promote Multidisciplinary Approaches: Encourage collaboration across disciplines to address the multifaceted nature of climate change and sustainable development, integrating perspectives from law, environmental science, economics, and social sciences.
- 5 Develop Policy Recommendations: Formulate actionable recommendations for policymakers, practitioners, and other stakeholders to enhance climate resilience and promote sustainable development while safeguarding human rights.

THEMES & SUB-THEME

The conference will focus on the following key themes and sub-themes, however the following list is not exhaustive:

Climate Change & Human Rights: Legal and Policy Dimensions

1. Climate Change as a Human Rights Issue
2. The Right to a Healthy Environment and Climate Justice
3. International Legal Frameworks on Climate and Human Rights
4. Indigenous People's Rights and Climate Change
5. Environmental Displacement and Climate Refugees
6. Corporate Accountability for climate change and human rights violations.
7. Children's Rights and Future Generations in the context of climate change.
8. Human rights approaches in climate litigation
9. Gender, Climate Change and Human Rights
10. Role of national courts and human rights institutions in climate change accountability.

SDGs and Climate Action: Aligning Development with Environmental Sustainability

1. Climate Change as a Human Rights Issue
2. The Right to a Healthy Environment and Climate Justice
