possibility of online courses, this avenue must be considered far more seriously. The education ministry also needs to get on with the HECI Bill (to establish the proposed Higher Education Council of India) to provide a credible legal framework for foreign universities to open campuses in India.

**Q What are your thoughts on CUET?**

**A** CUET was a much-needed change. Standards of grading in India vary so widely across institutions that basing decisions on a comparison of the marks received is highly problematic. CUET may not solve all the problems, but it represents a marked improvement over the existing practice.

**Q The pandemic exacerbated the skill gap among students? What can be done to improve the situation?**

**A** If our system had been more flexible, we could have offered additional courses to different students as per their interest and willingness to make up for the lost learning. This becomes harder in our current one-size-fits-all system. Whatever standardised intervention you design will prove too little or too much for a large majority of the students.

**Q NEP 2020 aims to address some of the issues you mentioned. What are your views on it? Is there a similar system in the west?**

To improve the Indian education sector, we must move from large fragments of higher education institutes towards large, multidisciplinary universities; have more emphasis on the development of cognitive skills and learning outcomes; move towards faculty and institutional autonomy and have a single regulatory body for higher education.

About 43 per cent of STEM graduates in India are women, higher than in developed countries like Canada, the US and the UK. Many educational institutions and policymakers have implemented educational reforms to make STEM education more inclusive and appealing. Overall, STEM offers diverse, rewarding and well-paid career prospects to women.

To improve the Indian education sector, it is crucial to focus on enhancing access to quality education, invest in infrastructure development, and update the curriculum to align with industry needs. To improve the research ecosystem, there should be increased funding for research and better support and resources for researchers.

Students should select the course that is of interest to them. Also, the institute offering the course is more important than the course itself. In order to improve education in India, there should be investment in manpower with a focus on skilling. Research should be applied research.
