## PART A – PROGRAMME REGULATIONS AND CURRICULUM

# 1. Vision & Mission of the University and the School / Department:

## 1.1 Vision of the University:

To be a Value-driven Global University, excelling beyond peers and creating professionals of integrity and character, having concern and care for society.

## 1.2 Mission of the University:

- Commit to be an innovative and inclusive institution by seeking excellence in teaching, research and knowledge-transfer.
- Pursue Research and Development and its dissemination to the community, at large.
- Create, sustain and apply learning in an interdisciplinary environment with consideration for ethical, ecological and economic aspects of nation building.
- Provide knowledge-based technological support and services to the industry in its growth and development.
- To impart globally-applicable skill-sets to students through flexible course offerings and support industry's requirement and inculcate a spirit of new-venture creation.

#### 1.3 Vision of the School:

To inspire and develop responsible leaders who generate meaningful and lasting impact on businesses, communities, and society

#### 1.4 Mission of the School:

Our mission is to provide students with the knowledge, skills, and ethical foundation needed to lead with integrity and drive sustainable change in business and society

# 2. Preamble to the Program Regulations and Curriculum

This is the subset of Academic Regulations and it is to be followed as a requirement for the award of Master of Business Administration (MBA) Degree.

The Curriculum is designed to take into the factors listed in the Choice Based Credit System (CBCS) with focus on Social Project Based Learning, Industrial Training, and Internship to enable the students to become eligible and fully equipped for employment in industries, choose higher studies or entrepreneurship.

In exercise of the powers conferred by and in discharge of duties assigned under the relevant provision(s) of the Act, Statutes and Academic Regulations of the University, the Academic Council hereby makes the following Regulations.

## 3. Short Title and Commencement:

- a. These Regulations shall be called the Master of Business Administration (MBA) Program Regulations and Curriculum 2023-2025.
- b. These Regulations are subject to, and pursuant to the Academic Regulations.

- c. These Regulations shall be applicable to the ongoing Master of Business Administration (MBA) Programs of the 2023-2025 batch, and to all other Master of Business Administration (MBA) Programs which may be introduced in future.
- d. These Regulations shall supersede all the earlier Master of Business Administration (MBA) Program Regulations and Curriculum, along with all the amendments thereto.
- e. These Regulations shall come into force from the Academic Year 2023-2024.

#### 4. Definitions

In these Regulations, unless the context otherwise requires:

- a. "Academic Calendar" means the schedule of academic and miscellaneous events as approved by the Vice Chancellor;
- b. "Academic Council" means the Academic Council of the University;
- c. "Academic Regulations" means the Academic Regulations, of the University;
- d. "Academic Term" means a Semester or Summer Term;
- e. "Act" means the Presidency University Act, 2013;
- f. "AICTE" means All India Council for Technical Education;
- g. "Basket" means a group of courses bundled together based on the nature/type of the course;
- h. "BOE" means the Board of Examinations of the University;
- i. "BOG" means the Board of Governors of the University;
- j. "BOM" means the Board of Management of the University;
- k. "BOS" means the Board of Studies of a particular Department/Program of Study of the University;
- "CGPA" means Cumulative Grade Point Average as defined in the Academic Regulations;
- m. "Clause" means the duly numbered Clause, with Sub-Clauses included, if any, of these Regulations;
- n. "COE" means the Controller of Examinations of the University;
- o. "Course In Charge" means the teacher/faculty member responsible for developing and organizing the delivery of the Course;
- p. "Course Instructor" means the teacher/faculty member responsible for teaching and evaluation of a Course;
- q. "Course" means a specific subject usually identified by its Course-code and Course-title, with specified credits and syllabus/course-description, a set of references, taught by some teacher(s)/course-instructor(s) to a specific class (group of students) during a specific Academic Term;
- r. "Curriculum Structure" means the Curriculum governing a specific Degree Program offered by the University, and, includes the set of Baskets of Courses along with minimum credit requirements to be earned under each basket for a degree/degree with specialization/minor/honors in addition to the relevant details of the Courses and Course catalogues (which describes the Course content and other important information about the Course). Any specific requirements for a particular program may be brought into the Curriculum structure of the specific program and relevant approvals should be taken from the BOS and Academic Council at that time.
- s. "DAC" means the Departmental Academic Committee of a concerned

- Department/Program of Study of the University;
- t. "Dean" means the Dean / Director of the concerned School;
- u. "Degree Program" includes all Degree Programs;
- v. "Department" means the Department offering the degree Program(s) / Course(s) / School offering the concerned Degree Programs / other Administrative Offices;
- w. "Discipline" means specialization or branch of MBA Degree Program;
- x. "HOD" means the Head of the concerned Department;
- y. "L-T-P-C" means Lecture-Tutorial-Practical-Credit refers to the teaching learning periods and the credit associated;
- z. "MOOC" means Massive Open Online Courses;
- aa. "MOU" means the Memorandum of Understanding;
- bb. "NPTEL" means National Program on Technology Enhanced Learning;
- cc. "Parent Department" means the department that offers the Degree Program that a student undergoes;
- dd. "Program Head" means the administrative head of a particular Degree Program/s;
- ee. "Program Regulations" means the Master of Business Administration Degree Program Regulations and Curriculum 2023-2025;
- ff. "Program" means the Master of Business Administration (MBA) Degree Program;
- gg. "PSOM" means the Presidency School of Management;
- hh. "Registrar" means the Registrar of the University;
- ii. "School" means a constituent institution of the University established for monitoring, supervising and guiding, teaching, training and research activities in broadly related fields of studies;
- jj. "Section" means the duly numbered Section, with Clauses included in that Section, of these Regulations;
- kk. "SGPA" means the Semester Grade Point Average as defined in the Academic Regulations;
- II. "Statutes" means the Statutes of Presidency University;
- mm. "Sub-Clause" means the duly numbered Sub-Clause of these Program Regulations;
- nn. "Summer Term" means an additional Academic Term conducted during the summer break (typically in June-July) for a duration of about eight (08) calendar weeks, with a minimum of thirty (30) University teaching days;
- oo. "SWAYAM" means Study Webs of Active Learning for Young Aspiring Minds.
- pp. "UGC" means University Grants Commission;
- qq. "University" means Presidency University, Bengaluru; and
- rr. "Vice Chancellor" means the Vice Chancellor of the University.

# **5. Program Description:**

The Master of Business Administration (MBA) Program Regulations and Curriculum 2023-2025 are subject to, and, pursuant to the Academic Regulations. These Program Regulations shall be applicable to the following ongoing Master of Business Administration (MBA) Programs of 2023-2025 offered by the Presidency School of Management (PSOM):

- 1. MBA
- 2. MBA (Business Analytics)
- 3. MBA (Digital Marketing)
- 4. MBA (Marketing & Finance)
- 5. MBA (Banking & Finance Management)
- **5.1** These Program Regulations shall be applicable to other similar programs, which may be introduced in future.
- **5.2** These Regulations may evolve and get amended or modified or changed through appropriate approvals from the Academic Council, from time to time, and shall be binding on all concerned.
- **5.3** The effect of periodic amendments or changes in the Program Regulations, on the students admitted in earlier years, shall be dealt with appropriately and carefully, so as to ensure that those students are not subjected to any unfair situation whatsoever, although they are required to conform to these revised Program Regulations, without any undue favor or considerations:

#### 6. Minimum and Maximum Duration:

- Master of Business Administration (MBA) Degree Program is a Two-Year, Full-Time Semester based program. The minimum duration of the MBA Program is two (02) years and each year comprises of two academic Semesters (Odd and Even Semesters) and hence the duration of the MBA. program is four (04) Semesters.
- 6.2 A student who for whatever reason is not able to complete the Program within the normal period or the minimum duration (number of years) prescribed for the Program, may be allowed a period of two years beyond the normal period to complete the mandatory minimum credits requirement as prescribed by the concerned Program Regulations and Curriculum. In general, the permissible maximum duration (number of years) for completion of Program is 'N' + 2 years, where 'N' stands for the normal or minimum duration (number of years) for completion of the concerned Program as prescribed by the concerned Program Regulations and Curriculum.
- **6.3** The time taken by the student to improve Grades/CGPA, and in case of temporary withdrawal/re-joining (Refer to Clause **Error! Reference source not found.** of Academic Regulations), shall be counted in the permissible maximum duration for completion of a Program.
- **6.4** In exceptional circumstances, such as temporary withdrawal for medical exigencies where there is a prolonged hospitalization and/or treatment, as certified through hospital/medical records, women students requiring extended maternity break (certified by registered medical practitioner), and,

outstanding sportspersons representing the University/State/India requiring extended time to participate in National/International sports events, a further extension of one (01) year may be granted on the approval of the Academic Council.

6.5 The enrolment of the student who fails to complete the mandatory requirements for the award of the concerned Degree (refer Section 19.Error! Reference source not found. of Academic Regulations) in the prescribed maximum duration (Sub-Clauses 18.1 and 18.2 of Academic Regulations), shall stand terminated and no Degree shall be awarded.

# 7. Programme Educational Objectives (PEO)

After two years of successful completion of the program, the graduates shall be:

**PEO1:** Industry ready graduates having high integrity, social responsibility & leadership capabilities.

**PEO2:** Enhanced with analytical skills and design thinking approach to solve business problems.

**PEO3:** Able to foster entrepreneurial mind set through creativity and innovation.

**PEO4:** Enabled graduates to engage in and benefit from lifelong learning.

#### 8. Programme Outcomes (PO) and Programme Specific Outcomes (PSO)

# 8.1 Programme Outcomes (PO)

On successful completion of the Program, the students shall be able to:

- **PO1:** An ability to lead themselves and others to achieve organizational goals contributing effectively to a team environment.
- **PO2:** An ability to integrate functional knowledge and apply managerial skills in changing business environment.
- **PO3:** An ability to identify real life problems in different management functions and solve them through strategic planning, critical thinking and innovation.
- **PO4:** An ability to identify and evaluate business ideas and opportunities.
- **PO5:** An ability to make data driven decisions and effectively communicate to different stakeholders.
- **PO6:** An ability to evaluate and integrate ethical and societal considerations when making business decisions.
- **PO7:** An ability to demonstrate commitment to continuous learning.

#### 8.2 Program Specific Outcomes [PSOs]:

On successful completion of the Program, the students shall be able to:

On successful completion of the Master of Business Administration (MBA) program from Presidency University, the student shall possess:

- **PSO1** Demonstrate advanced domain specific knowledge to make informed business decisions.
- **PSO2** Apply management theories and tools to solve complex marketing, financial, HR and operational problems.
- **PSO3** Develop and implement business plans that include marketing, financial, HR and operational strategies.
- **PSO4** Demonstrate proficiency in formulating business strategies that align with organizational goals.
- **PSO5** Assess the long-term impacts of business decisions on the environment and society, and to integrate sustainable practices into core business operations to drive innovation and value creation

# 9. Admission Criteria (as per the concerned Statutory Body)

The University admissions shall be open to all persons irrespective of caste, class, creed, gender or nation. All admissions shall be made on the basis of merit in the qualifying examinations; provided that forty percent of the admissions in all Programs of the University shall be reserved for the students of Karnataka State and admissions shall be made through a Common Entrance Examination conducted by the State Government or its agency and seats shall be allotted as per the merit and reservation policy of the State Government from time to time. The admission criteria to the MBA Program is listed in the following Sub-Clauses:

- **9.1** An applicant must have a graduation degree in any field from a recognized university with a minimum of 50% marks in the qualifying examination for the general category or 45% marks for SC/ST and other reserved categories and must have appeared in any national or state-level entrance examination such as CAT, XAT, MAT, CMAT, ATMA, or KMAT.
- **9.2** Reservation for the SC / ST and other backward classes shall be made in accordance with the directives issued by the Government of Karnataka from time to time.
- **9.3** Admissions are offered to Foreign Nationals and Indians living abroad in accordance with the rules applicable for such admission, issued from time to time, by the Government of India.
- **9.4** Candidates must fulfil the medical standards required for admission as prescribed by the University.
- 9.5 If, at any time after admission, it is found that a candidate had not in fact fulfilled all the requirements stipulated in the offer of admission, in any form whatsoever, including possible misinformation and any other falsification, the Registrar shall report the matter to the Board of Management (BOM), recommending revoking

the admission of the candidate.

**9.6** The decision of the BOM regarding the admissions is final and binding.

# 10.Transfer of student(s) from another recognized University to the 2<sup>nd</sup> year (3<sup>rd</sup> Semester) of the MBA Program of the University

A student who has completed the 1<sup>st</sup> Year (i.e., passed in all the Courses / Subjects prescribed for the 1<sup>st</sup> Year) of the MBA Two-Year Degree Program from another recognized University, may be permitted to transfer to the 2<sup>nd</sup> Year (3<sup>rd</sup> Semester) of the MBA Program of the University as per the rules and guidelines prescribed in the following Sub-Clauses:

- **10.1.1** The student shall submit the Application for Transfer along with a non-refundable Application Fee (as prescribed by the University from time to time) to the University no later than July of the concerned year for admission to the 2<sup>nd</sup> Year (3<sup>rd</sup> Semester) MBA Program commencing on August on the year concerned.
- **10.1.2** The student shall submit copies of the respective Marks Cards / Grade Sheets / Certificates along with the Application for Transfer.
- **10.1.3** The transfer may be provided on the condition that the Courses and Credits completed by the concerned student in the 1<sup>st</sup> Year of the MBA Two Degree Program from the concerned University, are declared equivalent and acceptable by the Equivalence Committee constituted by the Vice Chancellor for this purpose. Further, the Equivalence Committee may also prescribe the Courses and Credits the concerned students shall have to mandatorily complete, if admitted to the 2<sup>nd</sup> Year of the MBA Program of the University.
- **10.1.4** The Program / Discipline allotted to the student concerned shall be the decision of the University and binding on the student.

#### 11. Change of Program

A student admitted to a particular Program of the MBA Program will normally continue studying in that Program till the completion of the program. However, the University reserves the right to provide the option for a change of Program, or not to provide the option for a change of Program, at the end of 1<sup>st</sup> Year of the MBA Program to eligible students in accordance with the following rules and guidelines: framed by the University from time to time.

**11.1** Normally, only those students, who have passed all the Courses prescribed for the 1<sup>st</sup> Year of the MBA. Program and obtained a CGPA of not less than 6.00 at the end of the 2<sup>nd</sup> Semester, shall be eligible for consideration for a change of Program.

- **11.2** Change of Program, if provided, shall be made effective from the commencement of the 3<sup>rd</sup> Semester of the MBA Program. There shall be no provision for change of Program thereafter under any circumstances whatsoever.
- 11.3 The student provided with the change of Program shall fully adhere to and comply with the Program Regulations of the concerned Program of the MBA Program, the Fee Policy pertaining to that Program of the MBA Program, and, all other rules pertaining to the changed Program existing at the time.
- **11.4** Change of Program once made shall be final and binding on the student. No student shall be permitted, under any circumstances, to refuse the change of Program offered.
- **11.5** The eligible student may be allowed a change in Program, strictly in order of *inter* se merit, subject to the conditions given below:
  - **11.5.1**The actual number of students in the 3<sup>rd</sup> Semester in any particular Program to which the transfer is to be made, should not exceed the intake fixed by the University for the concerned Program;
  - **11.5.2**The actual number of students in any Program from which transfer is being sought does not fall below 75% of the total intake fixed by the University for the concerned Program.
  - **11.5.3**The process of change of Program shall be completed within the first five days of Registration for the 3<sup>rd</sup> Semester of the MBA Program.
- 12. Specific Regulations regarding Assessment and Evaluation including the Assessment Details of NTCC Courses, Weightages of Continuous Assessment and End Term Examination for various Course Categories
  - **12.1** The academic performance evaluation of a student in a Course shall be according to the University Letter Grading System based on the class performance distribution in the Course.
  - 12.2 Academic performance evaluation of every registered student in every Course registered by the student is carried out through various components of Assessments spread across the Semester. The nature of components of Continuous Assessments and the weightage given to each component of Continuous Assessments (refer Clause 0) shall be clearly defined in the Course Plan for every Course, and approved by the DAC.
  - **12.3** Format of the End-Term examination shall be specified in the Course Plan.
  - **12.4** Grading is the process of rewarding the students for their overall performance in each Course. The University follows the system of Relative Grading with

statistical approach to classify the students based on the relative performance of the students registered in the concerned Course except in the following cases:

- Non-Teaching Credit Courses (NTCC)
- Courses with a class strength less than 30

Absolute grading method may be adopted, where necessary with prior approval of concerned DAC.

Grading shall be done at the end of the Academic Term by considering the aggregate performance of the student in all components of Assessments prescribed for the Course. Letter Grades (Clause **Error! Reference source not found.**) shall be awarded to a student based on her/his overall performance relative to the class performance distribution in the concerned Course. These Letter Grades not only indicate a qualitative assessment of the student's performance but also carry a quantitative (numeric) equivalent called the Grade Point.

# 12.5 Assessment Components and Weightage Table 12.5.1: Assessment Components and Weightage for different category of Courses

	Theory Courses - Weightage - 60: 40											
	Cont											
				Midterm	End term	Tota						
Assessment 1	Assessment	Assessment	Assessment 4	25%	50%	100%						
	2	3										

	Conti	nuous Assess	ment* - 10	00%		
Practice	Practice	Practice	Practice	Assessment	4	Total
Assessment 1	Assessment	Assessment				100%
	2	3				100/0

<sup>\*</sup>Minimum 03 assessments.

**Skill based Courses** like Industry Internship, Capstone project, Research Dissertation, Integrative Studio, Interdisciplinary Project, Summer / Short Internship, Social Engagement / Field Projects, Portfolio, and such similar Non-Teaching Credit Courses, where the pedagogy does not lend itself to a typical L-T-P structure.

Guidelines for the assessment components for the various types of Courses, with recommended weightages, shall be specified in the concerned Program Regulations and Curriculum / Course Plans, as applicable.

The exact weightages of Evaluation Components shall be clearly specified in the concerned PRC and respective Course Plan.

Normally, for Practice/Skill based Courses, without a defined credit structure (L-T-P) [NTCC], but with assigned Credits (as defined in Clause **Error! Reference source not found.** of the Academic Regulations), the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous Assessments, the distribution of weightage among such components, and the method of evaluation/assessment, shall be as decided and indicated in the Course Plan/PRC. The same shall be approved by the respective DAC.

### 12.6 Minimum Performance Criteria:

# 12.6.1 Theory only Course and Lab/Practice Embedded Theory Course

- A student shall satisfy the following minimum performance criteria to be eligible to earn the credits towards the concerned Course:
  - a. A student must obtain a minimum of 30% of the total marks/weightage assigned to the End Term Examinations in the concerned Course.
  - b. The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of the components of Continuous Assessments, Mid Term Examinations and End Term Examinations in the concerned Course.

# 12.6.2 Lab/Practice only Course and Project Based Courses

The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of all assessment components in the concerned Course.

above in a Course shall be declared as "Fail" and given "F" Grade in the concerned Course. For theory Courses, the student shall have to re-appear in the "Make-Up Examinations" as scheduled by the University in any subsequent semester, or, re-appear in the End Term Examinations of the same Course when it is scheduled at the end of the following Semester or Summer Term, if offered. The marks obtained in the Continuous Assessments (other than the End Term Examination) shall be carried forward and be included in computing the final grade, if the student secures the minimum requirements (as per Clause 12.6.1, 12.6.2) in the "Make-Up Examinations" of the concerned Course. Further, the student has an option to re-register for the Course and clear the same in the summer term/ subsequent semester if he/she wishes to do so, provided the Course is offered.

# 13 Additional clarifications - Rules and Guidelines for Transfer of Credits from MOOC, etc. - Note: These are covered in Academic Regulations.

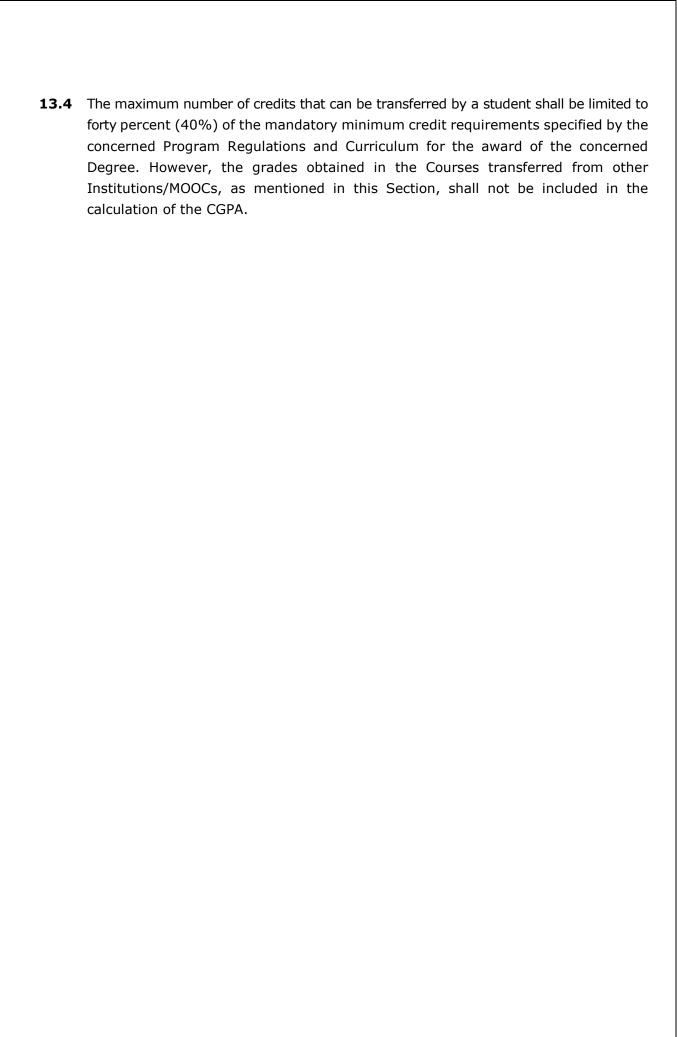

The University allows students to acquire credits from other Indian or foreign institutions and/or Massive Open Online Course (MOOC) platforms, subject to prior approval. These credits may be transferred and counted toward fulfilling the minimum credit requirements for the award of a degree. The process of transfer of credits is governed by the following rules and guidelines:

- **13.1** The transfer of credits shall be examined and recommended by the Equivalence Committee (Refer **Error! Reference source not found.**) and approved by the Dean Academics.
- **13.2** Students may earn credits from other Indian or foreign Universities/Institutions with which the University has an MOU, and that MOU shall have specific provisions, rules and guidelines for transfer of credits. These transferred credits shall be counted towards the minimum credit requirements for the award of the degree.
- 13.3 Students may earn credits by registering for Online Courses offered by Study Web of Active Learning by Young and Aspiring Minds (SWAYAM) and National Program on Technology Enhanced Learning (NPTEL), or other such recognized Bodies/ Universities/Institutions as approved by the concerned BOS and Academic Council from time to time. The concerned School/Parent Department shall publish/include the approved list of Courses and the rules and guidelines governing such transfer of credits of the concerned Program from time to time. The Rules and Guidelines for the transfer of credits specifically from the Online Courses conducted by SWAYAM/ NPTEL/ other approved MOOCs are as stated in the following Sub-Clauses:
  - 13.3.1 A student may complete SWAYAM/NPTEL/other approved MOOCs as mentioned in Clause and transfer equivalent credits to partially or fully complete the mandatory credit requirements of Discipline Elective Courses and/or the mandatory credit requirements of Open Elective Courses as prescribed in the concerned Curriculum Structure. However, it is the sole responsibility of the student to complete the mandatory credit requirements of the Discipline Elective Courses and the Open Elective Courses as prescribed by the Curriculum Structure of the concerned Program.
  - **13.3.2** SWAYAM/NPTEL/ other approved MOOCs as mentioned in Clause shall be approved by the concerned Board of Studies and placed (as Annexures) in the concerned PRC.
  - **13.3.3** Parent Departments may release a list of SWAYAM/NPTEL/other approved MOOCs for Pre-Registration as per schedule in the Academic Calendar or through University Notification to this effect.

- **13.3.4** Students may Pre-Register for the SWAYAM/NPTEL/other approved MOOCs in the respective Departments and register for the same Courses as per the schedule announced by respective Online Course Offering body/institute/university.
- **13.3.5** A student shall request for transfer of credits only from such approved Courses as mentioned in Sub-Clause, above.
- **13.3.6** SWAYAM/NPTEL/other approved MOOCs Courses are considered for transfer of credits only if the concerned student has successfully completed the SWAYAM/NPTEL/other approved MOOCs and obtained a certificate of successful/satisfactory completion.
- 13.3.7 A student who has successfully completed the approved SWAYAM/NPTEL/ other approved MOOCs and wants to avail the provision of transfer of equivalent credits, must submit the original Certificate of Completion, or such similar authorized documents to the HOD concerned, with a written request for the transfer of the equivalent credits. On verification of the Certificates/Documents and approval by the HOD concerned, the Course(s) and equivalent Credits shall have forwarded to the COE for processing of results of the concerned Academic Term.
- 13.3.8 The credit equivalence of the SWAYAM/NPTEL/other approved MOOCs are based on Course durations and/or as recommended by the Course offering body/institute/university. The Credit Equivalence mapped to SWAYAM/ NPTEL approved Courses based on Course durations for transfer of credits is summarized in Table shown below. The Grade will be calculated from the marks received by the Absolute Grading Table.

Table 13.3.2: Durations and Credit Equivalence for Transfer of Credits from SWAYAM-NPTEL/ other approved MOOC Courses									
SI. No.	Course Duration	Credit Equivalence							
1	4 Weeks	1 Credit							
2	8 Weeks	2 Credits							
3	12 Weeks	3 Credits							

- **13.3.9** The maximum permissible number of credits that a student may request for credit transfer from MOOCs shall not exceed 20% of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of the concerned Degree.
- **13.3.10** The University shall not reimburse any fees/expense; a student may incur for the SWAYAM/NPTEL/other approved MOOCs.

#### PART B- PROGRAM STRUCTURE

# 14 Structure/Component with Credit Requirements Course Baskets and Minimum Basket Wise Credit Requirements:

The Master of Business Administration (MBA) Program Structure (2023-2025) totaling 102 credits. Table 14.1.3 summarizes the type of baskets, number of courses under each basket and the associated credits that are mandatorily required for the completion of the Degree.

	Table 14.1.3: Master of Business Administration (MBA) Program Structure 2023-2025: Summary of Mandatory Courses and Minimum Credit Contribution from various Baskets									
SI. No.	Baskets	Credit Contribution								
1	SCHOOL CORE	29								
2	PROGRAM CORE	33								
3	DISCIPLINE ELECTIVE	34								
4	OPEN ELECTIVE	6								
	Total Credits	102 (Minimum)								

In the entire Program, the practical and skill based course component contribute to an extent of approximately 57% out of the total credits of 102 for Master of Business Administration (MBA) program of two years' duration.

# 15 Minimum Total Credit Requirements of Award of Degree:

As per the AICTE guidelines, a minimum of 102 credits is required for the award of a Master of Business Administration (MBA) degree.

# 16 Other Specific Requirements for Award of Degree, if any, as prescribed by the Statutory Bodies.

- 16.1 The award of the Degree shall be recommended by the Board of Examinations and approved by the Academic Council and Board of Management of the University.
- 16.2 A student shall be declared to be eligible for the award of the concerned Degree if she/he:
  - a. Fulfilled the Minimum Credit Requirements and the Minimum Credits requirements under various baskets;
  - b. Secure a minimum CGPA of 5.00 in the concerned Program at the end of the Semester/Academic Term in which she/he completes all the requirements for the award of the Degree as specified in Sub-Clause a of Academic Regulations;

C.	No dues to the University, Dep Centers/ Departments of the Un		, and any other such
d.	No disciplinary action is pending	g against her/him.

# 18 Practical/Skill based Courses – Internships/Thesis/Dissertation/Capstone Project Work/Portfolio/Mini project:

Practical / Skill based Courses like internship, project work, capstone project, research project / dissertation, and such similar courses, where the pedagogy does not lend itself to

a typical L-T-P-C Structure as defined in Clause 5.1 of the Academic Regulations, are simply assigned the number of Credits based on the quantum of work / effort required to fulfill the learning objectives and outcomes prescribed for the concerned Courses. Such courses are referred to as Non-Teaching Credit Courses (NTCC). These Courses are designed to provide students with hands-on experience and skills essential for their professional development. These courses aim to equip students with abilities in problem identification, root cause analysis, problem-solving, innovation, and design thinking through industry exposure and project-based learning. The expected outcomes are first level proficiency in problem solving and design thinking skills to better equip MBA graduates for their professional careers. The method of evaluation and grading for the Practical / Skill based Courses shall be prescribed and approved by the concerned Departmental Academic Committee (refer Annexure A of the Academic Regulations). The same shall be prescribed in the Course Handout.

## 18.1 Internship

A student may undergo an internship for a period of 4-6 weeks in an industry / company or academic / research institution during the Semester Break between  $2^{nd}$  and  $3^{rd}$  Semesters, subject to the following conditions:

- **18.1.1** The Internship shall be in conducted in accordance with the Internship Policy prescribed by the University from time to time.
- **18.1.2** The number of Internships available for the concerned Academic Term. Further, the available number of internships shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry / Company or academic / research institution providing the Internship, as stated in Sub-Clause 2.6.1.2 above.
- 18.1.3 A student may opt for Internship in an Industry / Company or academic / research institution of her / his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her / his own. Provided further, that the Industry / Company or academic / research institution offering such Internship confirms to the University that the Internship shall be conducted in accordance with the Program Regulations and Internship Policy of the University.
- **18.1.4** A student selected for an Internship in an industry / company or academic / research institution shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.

### 18.2 Dissertation

A student may opt to do a Research Project / Dissertation for a period of 6-8 weeks in an Industry / Company or academic / research institution or the University Department(s) as an equivalence of Capstone Project, subject to the following conditions:

**18.2.1** The Research Project / Dissertation shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.

The student may do the Research Project / Dissertation in an Industry / Company or academic / research institution of her / his choice subject to the above mentioned condition (Sub-Clause 2.6.4.1). Provided further, that the Industry / Company or academic / research institution offering such Research Project / Dissertation confirms to the University that the Research Project / Dissertation work will be conducted in accordance with the Program Regulations and requirements of the University.

Version No.	1.1		<u> </u>			I							
Course Pre-requisites	Completion of General subject in Ent General Management	repreneurship	and Business	Ethics	and	basics of							
Anti-requisites	NIL												
Course Description	The purpose of this course is to explore business creation and growth as a multidimensional phenomenon in both independent and corporate (Entrepreneurship) settings. By linking theory and practice the course aims to provide students an entrepreneurial perspective and a hands-on experience in the development of new business ventures.  The students are given the right exposure to Business ethics, corporate governance & social responsibility, which help them understand new concerns and expectations from various stakeholders in the context of large scale industrial change due to globalization. Opportunities for career progression can happen when there is application of ethical values in everything that one does, which means maintaining transparency and being socially responsible.												
Course Outcomes  On successful completion of the course the students shall be able to:  CO 1. Identify the entrepreneurial journey. [Knowledge]  CO 2. Develop business plan using business model canvas. [Application]  CO 3. Examine the role of technology in business. [Comprehension]  CO 4. Understand the social responsibility of corporate towards society.  [Comprehension]  Course Objective:  The course is designed to enhance the skill of entrepreneurship and develop the self-

1. Students who apply to MBA programs must take the Graduate Management Admission Test (GMAT). University admissions committees use the GMAT score as one of the critical indicators of how well a student is likely to perform in the MBA program. However, the GMAT may not be a very strong indicator for all MBA programs. Suppose that an MBA program designed for middle managers who wish to upgrade their skills was launched 3 years ago. To judge how well the GMAT score predicts MBA performance, a sample of 12 graduates was taken. Their grade point averages in the MBA program (values from 0 to 12) and their GMAT score (values range from 200 to 800) are listed here. Compute the coefficient of correlation and Interpret your findings.

GMAT and GPA Scores for 12 MBA Students

GMAT 599 689 584 631 594 643 656 594 710 611 593 683

GPA 9.6 8.8 7.4 10.0 7.8 9.2 9.6 8.4 11.2 7.6 8.8 8.0

A hypermarket made a test to see if there was a correlation between the shelf space of a special brand of raison bread and the daily sales. The following is the data that was collected over a 1-month period collected over a 1-month period

Shelf space	Daily sales
(m2)	units
0.25	12
0.50	18
0.75	21
0.75	23
1.00	18
1.00	23
1.25	25
1.25	28
2.00	30
2.00	34
2.25	32
2.25	40

#### Required

- 1. Illustrate the relationship between the sale of the bread and the allocated shelf space.
- 2. Develop a linear regression equation for the daily sales and the allocated shelf space. What are your conclusions?
  - 3. If the allocated shelf space was 1.50m2, what is the estimated daily sale of this bread?
- 4. If the allocated shelf space was 5.00m2, what is the estimated daily sale of this bread? What are your comments about this forecast?

requisites								
Course Description	This course introduces students, to modern Information Technology as applicable in organizations today. Starting with basics of Information Technology, definitions, Management Information Systems, Emerging Technology and how managers can use IT to enable success in modern disruptive markets. The course gives an overview of key organizational systems like Customer Relationship Management. Enterprise							
Course Outcomes	On completion of this course, the student will be able to:  1. Understand Information Technology concepts [Knowledge]  2. Discuss key IT systems and their role in Organizations [Comprehension]  3. Describe how IT Systems can be used for competitive advantage [Comprehension]							
Course Objective	selection, design and support of Management of Information Technology. To focus on the Information							
Module 1	Basics of Information Technology in business	QUIZ (E- review fro m library)	Classroom Discussion and Online Resources	8 Hour s				
Topics:								
introduction, wh	ny IT, business IT interface, SDLC, Agile, busine 	ess process man	agement, role of IT & CTO	7				
Module 2	Key IT systems applications in business	Analysis & demos	Demonstration of key systems using videos & demos.	Hour s				
Topics:								
_	Management Information System, Overview of ERP, HRM, CRM, SCM, E-Business systems. How these systems help build and grow organizations.							

Topics:

Module 3

Covers emerging technologies like database management, blockchain, IoT, AI&ML, ARVR, cloud, cyber security, quantum computing, space & biotechnology.

Case

demos

Analysis &

**Demonstration of key systems** 

using online videos & demos.

Hour

	Managing technological disruptions in key	Case	Classroom Discussion and Online	8
Module 4	industries	Analysis &	Resources	Hour
	illuustiles	demos	nesources	S

How IT enables business value. How to manage disruption caused by these. Basics of Digital Transformation.

## **Targeted Application & Tools that can be used:**

Advantage

Students would be encouraged to take up projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand Marktech and Adtech.

Professionally Used Software: KNimbus library access, Online AI&ML tools, YouTube videos

# **Project work/Assignment:**

- 1. Lectures (30 Hours), review and bridging (6 Hours)
- 2. 3 Quizes
- 3. Hands-on demo on live tools and assignment with project presentations.

Emerging Tech and IT for Competitive

4. Assignment & project presentation

Course Description	This course is an application-driven introduction to Business analytics. Every field of study and area of business has been affected as people increasingly realize the value of the incredible quantities of data being generated. But to extract value from those data, one needs to be trained in the proper data analytics skills. The R programming language has become the de facto entry level programming language for beginners in data analytics. Its flexibility, powerful and expressive, which have made it an invaluable tool for data analyst around the world. This course will introduce students to this rapidly growing field and equip them with some of its basic principles and tools as well as its general mindset. Students will learn concepts, techniques and tools they need to deal with various facets of data analytics practice, including data collection and integration, exploratory data analysis, predictive modeling, descriptive modeling, evaluation, and effective communication. The focus in the treatment of these topics will be on breadth, rather than depth, and emphasis will be placed on

Module 3	Business Valuation and Consideration Paid in M&A	Assign ment	Participative Learning	11 Hours

Apply business valuation concepts, to M & A – DCF, FCF, EVA, Residual income, relative valuation Consideration paid, Fundamental value and acquisition premium. Efficiency gain, synergy gain, opportunity cost, non-operating assets, Intangible asset. M & A Integration - Due diligence, Post-Merger Integration, Factors Affecting Integration, Functional Integration

Module 4 Share Exchange Ratio Assignment Participative 12 Hours
Learning

Cost and Benefit analysis of merger, Share exchange ratio- problems on calculation of pre and post-merger performances.

Targeted Application & Tools that can be used:

Exposure to the various mergers and acquisition in past few years in India.

Post-merger integration issues.

Project work/Assignment:

Project/ Assignment:

Assignment:

- 1] Refer to recent articles on Mergers and Acquisition surveys and analyse the critical factors responsible for banking management. (Kindly note: Student should visit PU library and access the online resources for the same and incorporate the assignment as well as attach the photo of log in and log out in person in the end of the assignment file.)

  Assignment:
- 2] Identify a successful merger organization and bring out the various strategies involved in M & A business. (This assignment has to be done in group. All the members of the group have to contribute and submit the PPT and do presentation.)
  Assignment:
- 3] Collecting the data of mergers and acquisition in the recent past. Submit the summary report of the discussion (Experiential Learning).

Date of Approval by the Academic Council	Academic Council Meeting No. 2024

Course Code: MBA3082	Course Title: FinTech Type of Course: Discipline Elective	L- T-P- C	3	0	0	3		
Version No.	1.1							
Course Pre-requisites	NIL	NIL						
Anti-requisites	NIL							
Course Description	This course is for students wishing to explore the ways in which new technologies are disrupting the financial services industry—driving material change in business models, products, applications and customer user interface. Amongst the significant technological trends affecting financial services into the 2020's, the class will explore AI, deep learning, blockchain technology, and open APIs.							
Course Outcomes	<ol> <li>Have a broader overview of Fintech</li> <li>Understand the basics of B</li> </ol>	On completion of this course, the student will be able to:  1. Have a broader overview of Fintech and the key technologies and interface  2. Understand the basics of Blockchain and Cryptocurrency						
Course Objective:	The aim of this course is to develop employability skills of the students based on the shifting nature of the financial sector and gain a holistic understanding of the technologies set to shape the future of finance and business.							
Module 1	Fintech Introduction e reading based on the topics and thereafter classroom discussion				11 H	Hours		

Topics: BFSI Value chain- How FinTech changed BFSI- Modern Banking Landscape- Introduction to BankTech-Introduction to InsureTech. Introduction to the Fintech landscape- FinTech Architecture- FinTech Technologies- Latest Trends and future of FinTech- Applications of FinTech- Use cases of FinTech in banks- Fintech startups- Fintech unicorns and business models. Introduction to Machine Learning - Introduction to Cloud Computing

Module 2	Blockchain for fintech &	e Study	11 Hours
	applications		

Topics: Blockchain Foundations- Blocks and Blockchain, the Chain, Nodes and Network- Blockchain in Use, Concepts of Blockchain, Types – Private, Public and Federated blockchain, Cryptography in Blockchain - Encryption, Key, Decryption, Cryptography - Application to Blockchain- Hash Functions- Public Key Cryptography and Signing - Use cases and applications. Understand smart contracts - Computational model of Smart contracts- Ethereum and Working with Smart Contracts - Hyperledger Architecture- Hyperledger Blockchain Technology - Use cases of Smart contracts

Module 3	Payments, crypto- currencies & alternative finance	Project	dit Risk Modelling/Credit Card Fraud Detection	11 Hours
----------	--	---------	---	----------

Topics: Cryptocurrencies Introduction- Bitcoin and Applications- Cryptocurrencies and Digital Crypto Wallets- Types of Cryptocurrencies- Cryptocurrencies and Applications- What is an ICO? - Importance of ICO in Alternative Finance-Regulations for Cryptos and tokens, Central Bank Digital Currency (CBCD). Global Payment Ecosystem- Payments Architecture and Setup- Innovation in Consumer and Retail payments- Popular Payments Technology- Blockchain and Cryptocurrencies in Payments- Payment Stacks in India- Innovative Products in Mobile based, Credit Cards, POS based ecosystem. P2P and Marketplace Lending- P2P Infrastructure and technologies- Concept of Crowdfunding.

,				
	Banktech, Insurtech	Project	Risk based pricing	12 Hours
NA politica A	& Regtech		<ul><li>Algorithm</li></ul>	
Module 4			based	

BANKTECH- Regulatory Framework for Product Pricing, loan origination and servicing- Social media-based profiling, comparison tools and aggregators- Dynamic credit rating, Risk management & underwriting- Using Credit Counsellor Robo/Bot for faster approvals & funding- Utilizing data science tools and machine learning for data mining/ cross sale-Hybrid Lending Products. INSURTECH- How does InsurTechwork- Business model disruption- Aggregators- Al/ML in InsurTech- IoT and InsurTech - Risk Modeling- Fraud Detection-Processing claims and Underwriting- REGTECH- Evolution of RegTech- RegTechEcosystem- Smart Regulation

Targeted Application & Tools that can be used: Exposure to the payment business models.

### Project work/Assignment:

- 1. Credit Risk Modelling/Credit Card Fraud Detection
  - 2. Crypto currency Trading
  - 3. Risk based pricing using ML

Course Description	providing opportunit additional risks in the ir goods and services invo- currency for anothe understanding of f contracts to mini The course is designed international financial	Globalization has thrown open the doors of international expansion to businesses, thereby providing opportunity to reap rich rewards. At the same time it also exposes business to additional risks in the international arena. This course provides understanding of exchange of goods and services involving payments and receipts between countries and exchange of one currency for another. The course aims to equip future finance managers with a sound understanding of functioning of foreign exchange markets, exchange rate and swap contracts to minimize the loss due to interest rate and currency rate fluctuations. The course is designed to provide practical use of financial concepts and reasoning in solving international financial problems. This course enables students to understand the nature of international financial markets, economic and financial challenges faced by multinational companies and various methods of coping with them, so as to achieve corporate goals.						
Course Objective		signed to enhance the EM PARTICIPATIVE LEARNI	PLOYABILITY SKILL					
Course Outcomes	On successful completion of the course the students shall be able to:  1. Have an understanding of the International Financial Environment [Comprehension].  2. Course Code: MBA3102	Course Title: Taxation Type of Course: Disci		L-T- P- C	3	0	0	3
Version No.						<u> </u>	
Course Pre-requisites	Students required to and finance	have1) Basic computationa	al skills and 2) Basic	underst	andir	ng of	accounting
Anti-requisites							
Course Description	both. Under direct ta indirect taxes domai students to gain a b	ndow to see the tax law. The domain it will include per it will include Goods are asic understanding of the nowledge will be explained	ersonal income taxe nd Services tax and tax system and pro	s and co Custom ocedure	rpora s du s. Th	ate ta ity. It e cha	axes. Under t will equip aracter and
Course Outcomes	On completion of this course, the student will be able to:  1. Compute Personal taxable income and tax payable thereon [Application]  2. Explain different types of return and assessments [Comprehension]  3. Explain types of corporate taxes and tax rates [Application]  4. Explain basic provisions of GST and Customs duty [Comprehension]						
Course Objective:							
Module 1	Module 1 - Personal income taxes	Quiz	M	CQ base	d		11 Hours
Assessment year, Previou	s year, computation of	of individuals and incidenc taxable income under five gement regarding persona	heads of income a				
Module 2	Module 2 – Return of income and Assessments	Research paper review	Classroom D	iscussio	n		11 Hours
• •	•	ed return and belated return					-
forms of income tax retur	ns and documents need	ded to file income tax retur	rns. Assessments un	aer inco	me t	ax ar	ia its types-

Self assessment, Summary assessment, Regular assessment, Scrutiny assessment, Best judgment assessment and income escaping assessment.

Module 3 Odule 3 - Corporate taxes Project Data Collection and Analysis 11 Hours

Meaning of domestics and foreign company, its residential status, Taxable income and applicable tax rates, Minimum Alternative Tax (MAT) and Book profit, Dividend distribution tax (DDT), Carry-forward and set-off of Depreciation and losses for companies, Tax Planning for Amalgamation

Module 4 — Goods and Services tax and Customs duty

Project Data Collection and Analysis 12 Hours

Introduction to GST and constitutional amendments, Acts passed under GST, tax rates, Taxable event under GST, concept of supply, supply of goods vs. supply of services, Concept of Composite and Mixed supply, time of supply under GST, Input tax credit, TDS, TCS and Reverse charge, Registration and types of returns, Anti-profiteering measures under GST, Introduction of custom duty-features objects and types

Targeted Application & Tools that can be used:
Exposure to the MACRO Excel,
Professionally Used Software: NSE/BSE, CMIE Prowess IQ, CAPITALINE

sed Software. NSL/DSL, CIVIL Frowess IQ, CAFITALIN

Project work/Assignment:

## Project/ Assignment:

ASSIGNMENT-1] MCQ based quiz will be conducted for 45min through Outlook forms covering Module I and II. ASSIGNMENT-2] Research paper Review- Here the students will be given a research paper, they are required to review it

ASSIGNMENT: 3] Student has to collect taxation data from RBI for the last 5-10 years for direct taxes and last 4-5 years for indirect taxes from CBIC web site. The students shall analyze the trends of collection of both direct and indirect taxes and find the ground realities and problems. All the members of the group have to contribute and submit the PPT and do presentation.) (Kindly note: Student should visit PU library and access the online resources for the same and incorporate the assignment as well as attach the photo of log in and log out in person in the end of the assignment file.)

## **Course Description** This course describes how individuals and firms make financial decisions, and how those decisions might deviate from those predicted by traditional financial or economic theory. It provides an overview of an exciting new and fast-growing area in finance, which takes as its premise that investment decision-making and investor behavior are not necessarily driven by 'rational' considerations but by aspects of personal and market psychology. It examines how the insights of behavioral finance complements the traditional finance paradigm. Further, it explains on cognitive biases, and discusses the impact of such biases on the financial decisionmaking, and explores the behavior of individual investors, fund managers and corporate managers. The objective of the course is to make the students explore the existence of psychological biases in financial decision-making, and examine the impacts of these biases in financial markets and other financial settings. It equips the students to improve investment performance and corporate performance by recognizing the cognitive biases and applying appropriate 'debiasing' techniques. Also, students understand the insights of behavioral finance theories and shed light on the behavior of investors in investment decision-making. **Course Objective** To acquaint students for exposure to modern interpretation of management through behavioural analytical techniques of management issues **Course Out Comes** On successful completion of this course the students shall be able to: CO01: Describe the concepts of behavioural Finance[Knowledge] CO02: Interpret Modern portfolio theories[Application] CO03: Discuss the behavioural aspects of investing [Comprehension] **Course Content:** Case study and class discussion Management Module 1 Case study on Managerial Skills/ 10 Hours Introduction Management Objectives Topics: Introduction to Behavioral Finance; Intellectual Underpinnings; The Rise of the Rational Markets Hypothesis; Impact On Wall Street and The Corporate; The Challenges of Behaviouralists; Synthesis and Future Horizons. Course Description	Talent management course will help students to understand, recruit and develop a workforce that is productive and likely to stay with their organizations long term. When implemented strategically, this process helps in improving overall performance of the business and ensure that it remains competitive. Students would be able to comprehend how to attract and retain talent which is a big challenge ahead of HR professionals. This course would lead to explore the competition and quality of the workforce which enforce the companies to revisit their talent acquisition practices. Organizations face challenges in expanding their global footprint and it requires that as partners, HR professionals should help organizations to tackle this challenge. Through accessing the local talent and nurturing them to meet the global standards, these challenges can be addressed. Through this process, organizations realize that to gain competitive advantage, building and managing talent pools are of paramount importance. This course deals with the set of procedures, systems and processes that translate the organizational talent creed and strategy into a diagnostic and implementation program for investing in employees who

Course Code: MBA3066	Code: MBA3066 Course Title: Compensation Management Type of Course: Discipline Elective		3	0	0	3	
Version No.		L	-				
Course Pre-requisites	Completion of core subject in Human Resource N	Management an	d basio	cs of Ma	nageme	nt	
Anti-requisites							
Course Description	Compensation practices influence an organization's ability to recruit and retain a qualified workforce and to motivate productive employees. Equitable compensation is the bedrock of union-avoidance programs. Compensation and benefits, however, represent one of the highest costs for most organizations; therefore, competitive compensation programs must be developed within the context of the overall business plan. The course provides each student with an opportunity to develop the managerial skills necessary to design and understand the performance based compensation and benefit programs for an organization. Further, the course will enable the students to understand the relationship between compensation strategy and other business strategies. The institutional and legal constraints on compensation comprehend the processes used to determine internal and external pay equity, get familiar with the variables that enter into compensation decisions, know benefits as a component of compensation and appreciate the importance of individual as well as group						
Course Outcomes	<ul> <li>equity in pay, incentive and benefits.</li> <li>On completion of this course, the student will be able to:         <ul> <li>Describe compensation management theories. (Knowledge)</li> <li>Identify the internal and external environmental factors that have an impact on the structure of an organization. (Comprehension)</li> <li>Demonstrate an understanding of the process of designing a pay structure tak account of the company environment. (Application )</li> <li>Interpret the alignment of the compensation system with strategies of organisatic (Application)</li> </ul> </li> </ul>						
Course Objective:	The course is designed to enhance the skill of experiential learning, participative learning and to				ty skills	through	

	oduction	to	ignment	(Participative

irse Description	Learning and Development (L&D) plays a vital role in building the human capital of any organization. Each organization draws upon its own unique requirements of their manpower and devises ways in which they wish to enhance the growth of their employees, be it in functional domain or in personal growth areas. Organizations need to train employees to work with persons from different culture. Many organizations now recognize that learning through training, development, and knowledge management helps employees to enhance and nurture their skills directly impacting their job performance, satisfaction, and career advancement. Training has moved from an emphasis of a onetime event to the creation of conditions for learning that can occur through collaboration, online learning, traditional classroom training, or a combination of these methods. The course deals with the basic concepts, functions and processes of training and development. The course helps the									
irse Outcomes	students to have an understanding of the methods of training used by organizations.  On completion of this course, the student will be able to:  1. Explain learning process using different learning theories. [Bloom's Level: Comprehension]  2. Illustrate the complete training cycle, from identifying the training needs to follow up and support. [Bloom's Level: Application]  3. Discuss essential ingredients of employee development. [Bloom's Level: Comprehension]  4. Interpret the future trends that are likely to influence training departments and trainers. [Bloom's Level: Application]									
irse Objective:	This course will enhance the organizate through experiential learning that will be training need analysis, training strate	e helpful for mana	aging or	ganizatio	ons by w	orking on				

developing the human resources in the organization.							
Module 1	Introduction to	Assignment (Participative	Data Collection and	Analysis	12 Hours

Training for Sustainability, Increased Use of New Technologies for Training Delivery and Instruction, Breakthroughs in Neuroscience About Learning, Increased Emphasis on Speed in Design, Focus on Content and Use of Multiple Delivery Methods. [8 Hours] [Bloom's Level: Application]

geted Application & Tools that can be used:

osure to the different training tools and softwares of various organizations.

Professionally Used Software: Articulate Storyline, TalentLMS, SAP Litmos

## ject work/Assignment:

Assignment 1: Group Assignment - Identify any one global organization and interact with few employees and do the training need analysis in an informal way. Develop a training module after interacting with a few employees and working on TNA. Submit a report as a group with details of the organization, Training Need Analysis Sheet and Training Modules. Student groups should do a presentation on the same. Each group should have a different set of employees. (Participative Learning)

Assignment 2: Individual Assignment -Refer to few research articles on informal learning behaviors and submit a report with the summary of reviewed articles. (Review of digital/e-resource from Presidency University – Link is mentioned in references section. Mandatory to submit screenshot of accessing digital resource. Otherwise, it will not be evaluated). (Participative Learning)

Course Description	This course introduces students to the change interventions used to improve organizational effectiveness. It focuses on the philosophy, history, and evolving approaches associated with organizational change and development, with special focus on initiating and managing change. The course introduces the methods used to identify development needs, understand the underlying causes for these problems, and collect information and data about the causes or problems, and present diagnostic results.  In this course, students will examine theories and applications associated with organizational development and change with specific focus on improving organizational effectiveness. The concepts include managing the challenges of planned and unplanned, changing organizational cultures with an understanding of ethical and value considerations, role of the organizational development practitioner, processes associated with organizational change, employee empowerment, developing high performance teams and systems, learning organizations,

Course Description	More than 80% of all diseases and illnesses have a stress component. The World Health Organization calls stress "the health epidemic of the 21st Century".  Organizational stress is directly related to organizational performance and is inevitable part. The application of effective strategies for stress reduction is a very important component of employees' and organizational health. Therefore the organizations have to design strategies that can manage stress and check burnout segment. While helping to identify the causes of stress, counseling can also help to manage stress.  This course is designed to foster creative thinking about how social, psychological and organizational systems interact to produce stress and affect health of employees; and to investigate critically and experientially different interventions aimed at managing stress. The learning activities of the course are both theoretical and experiential.

# **MARKETING DISCLIPLINE ELECTIVES**

Course Code: MBA2030	Course Title: Consumer I Type of Course: Disciplin	Behaviour e Core Theory Only Course	L-T-P-C	3	0	0	3	
Version No.	1.0							
Course Pre- requisites	Fundamentals of Market Fundamentals of Sales	ing						
Anti-requisites	NA							
Course Description	Consumer is the centre of all marketing actions. For a brand or a product to be able to appeal to the consumer and gain their loyalty, it is imperative that the it is not only created/designed but also marketed taking into serious consideration the interests, aspirations, and preferences of the consumer. Therefore, a clear understanding of Consumer Behaviour is indispensable to successful marketing action. The course provides students with a deep understanding of the concepts of consumer behaviour and to help them use this understanding to make better marketing decisions. The students will learn the key concepts and theories of consumer behavior, identify applications of these concepts and theories to real world consumer behavior problems and show how behavioral evidence can be used to evaluate alternative marketing strategies based on insights that can be used to drive innovation across industries.							
Course Out Comes	1] Explain the importa (Comprehension) 2] Apply the concepts making. (Application) 3] Apply the concepts of	n of the course the students ance and the inter-discipli of Motivation, Personality Learning and Attitude in con Sociological influences on Co	nary nature and Percepti sumer decision	of Con in	consume king. Module 3	Consumer Learning, Attitude, Memory and Information processing	Case Study LEARNING)	(EXPERIENTIAL	Flip classroom/Experiential Learning through activity and assignment	11 Hours

Elements of Consumer Learning – motives, cues, responses, reinforcement, Reinforcement, Classical conditioning, S-R theory, Observational learning, Information processing – Short term, long term, perception v/s attitude, attitude formation, tri component model of attitude, TRA – Theory of reasoned action, ELM Model - The elaboration likelihood model, cognitive dissonance, Absolute Threshold / Just Noticeable Difference, Applications of Perception, Consumer Profiling, Psychographics

Module 4	Sociological Influences on Consumer Behaviour and Consumer behavior models	Term paper/Assignment/Case Study (EXPERIENTIAL LEARNING)	Field research	12 Hours
----------	--	---	----------------	-------------

Social Comparison, Informational Social influence, Conformity & Norms, EKB Model, Howard Sheth Model, Family Decision-making Model, Pavlovian Model and Economic Model, Consumerism, Consumer protection Act (CPA-2019) in light of e commerce and digitization, Types of Decisions and Decision Making, Consumer Decision Making Influencers, Role of Culture in Decision Making, Experiential Utility

Role of Emotions in Decision Making, Motivation and Emotion, Social Judgement Theory

Targeted Application & Tools that can be used: Students would be encouraged to take up live projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand consumer minds.

# Project work/Assignment:

1] Field project (Group): Select a Product/Brand of your choice and complete the following task:

Provide a brief introduction to the product/Retailer/Organisation and explain what would attract the consumers to this brand from the category.

Write in brief about any two external /internal factors which would influence the consumer on his purchase decision (keeping in mind the type of buying process involved for the product).

Collect Primary Data from customers of the selected Product/brand about the factors you have considered important for their purchase and also the level of satisfaction (Post Purchase)

Analyse the collected primary data by listing/interpreting your findings.

Conclude your report with valid suggestions and or recommendations.

(Kindly note: Student should visit PU library and access the online resources for the same and incorporate the assignment as well as attach the photo of log in and log out in person in the end of the assignment file.)

2] Group Assignment: Imagine you are a consumer who needs to buy any one of the following product:

A Sports utility vehicle

A luxury farmhouse

A high-end mobile phone

A motorbike/scooter

While making the purchase decision you have to keep in mind the following and explain your choice based on: TRIO of NEEDS

**Motivation Process** 

Brand Personality vs SELF IMAGE

Keeping in mind the above factors explain:

The buying process (selecting whether it is EPS, LPS, RPS).

Apply the IPO (Input Process and Output)

In completing the above task don't forget to

Your written report should be backed up with relevant academic literature review as it is an open book term paper

and a conclusion. (Kindly note: Student should visit PU library and access the online resources for the same and incorporate the assignment as well as attach the photo of log in and log out in person in the end of the assignment file.)

The gral part of ole of sales
	Retailing is concerned with how goods and services are actually delivered to consumers. Even so, retailers engage in the production of retail services that affect the utility that consumers derive from the good and services. This course will examine how retailers participate in this and what strategies make sense. As intermediaries they take as given the strategies of upstream members to be thought of as manufacturers and must then decide how best to address customer demand. Retail strategies therefore must account for consumer preferences, strategies of manufacturers and the actions of competitors. Innovations play a crucial role but the innovations are not directly with respect to the products they carry but with respect to the retail services they produce.				consumers in this and upstream scustomer rategies of nnovations
Course Outcomes	On successful completion of this course the students shall be able to:  1. Explain nature and importance of sales management, types and skills of sales managers.  2. Demonstrate the personal selling process.  3. Discuss sales forecasting methods, allocation of sales budget, management of sales territories and sales quotas.  4. Classify types of retailers, types of retail locations, retail growth strategies.

WIDAS123	Type of Course: Discipline Elective Theory Only	2-0-0-2		
Version No.	1.0			
Course Pre- requisites Marketing Management				

Anti-requisites	NIL			
Course Description	MarkTech (Marketing Technology): MarkTech refers to specific software applications used to build, automate, track, and enhance marketing efforts. It empowers marketers to streamline their work across various channels and gain valuable insights into campaign success. Al&ML has brought in huge disruption especially with the latest GenerativeAl tools. With nearly 10,000 applications across 49 categories, MarTech continues to expand rapidly. Some common MarkTech tools are:  • Machine Learning in Marketing, • Al for Content Creation and Management, • Customer segmentation, • Recommendation systems, • Store management • Price optimization, etc.  AdTech (Advertising Technology): focuses on technology used in advertising and media. It includes tools for programmatic advertising, data-driven targeting, and ad campaign optimization, media planning, audience measurement, ad operations, new age advertising including Outdoor, events and experiential marketing. AdTech professionals analyze data to create effective ad strategies. Key areas include:  • Programmatic Advertising: Automated buying and selling of ad space. • Data Analytics and Targeting: Using data to reach the right audience. • Ad Campaign Optimization: Maximizing ad performance.  Both MarTech and AdTech play pivotal roles in modern marketing, making them essential topics for MBA students aiming to excel in the dynamic digital landscape.			
Course Outcomes	On completion of this course, the student will be able to:  1) Describe the Value chain & functions of Marketing & Advertising industry [Comprehension]  2) Apply online tools and platforms to solve marketing & advertising use cases [Application]  3) Analyse real-life Marketing & Advertising campaigns and recommend actions. [Analysis]			
Course Objective	The course aims at <b>EMPLOYABILITY</b> with respect to Marketing Strategies with <b>PARTICIPATIVE</b> learning activities.			
Module 1	Marktech use cases and tools	Hands on use of online tools	Quiz and projects based on online	10 Hours

Discuss functions and use cases of Marketing technology. Familiarize students with online tools like Google Advertising. Facebook Ad manager, recommendation engines, sentiment analysis, Goolge Analytics etc.

Module 2 Adtech use cases and tools	Quiz by Quiz and demos of online resources online platfor	ased on 10 Hours
-------------------------------------	---	------------------

# Topics:

- 1. Understanding the traditional & digital Advertising Industry value chain
- 2. Key trends impacting advertising industry
- 3. Audience measurement in TV & Broadcasting industry
- 4. Media planning and management
- 5. Tools for Optimizing advertising spends
- 6. Technology transforming Outdoor, events etc.

Module 3 Practical Applications Marktech & Adtech.  Demos, videos & online platform to demonstrate tools and techniques.  Analytics, Google Ads, Facebook Ad Manager, etc.	Module 3			Google Ads, Facebook Ad	10 Hours
--	----------	--	--	----------------------------	----------

Hands-on experience with Google Analytics, Google Ads, Facebook Ad Manager, generative Al content creation tools. Tools like SCANPRO to optimize ad spend etc. Segmentation, Sentiment Analysis & other tools to enhance marketing effectiveness.

## Targeted Application & Tools that can be used:

Students would be encouraged to take up projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand Marktech and Adtech.

Professionally Used Software: KNimbus library access, Online AI&ML tools, YouTube videos

## Project work/Assignment:

- 1. Lectures (22 Hours), review and bridging (4 Hours)
- 2. 2 Quizes
- 3. Industry free certification in GoogleAds Professional
- 4. Hands-on demo on live tools and assignment with project presentations.
- 5. Datasets & coding for segmentation, recommendation engines,

Course Code:	Course Title: Neuro Marketing in D	igital Age		L	т	Р	С
MBA3140	Type of Course: Discipline Elective T	Discipline Elective Theory Only Course			0	0	2
Version No.	1.0						
Course Pre- requisites	Basic understanding of biology, chemistry, and psychology recommended.  Proficiency in using Research Methods, and Experimental Design Ethical issues related to neuroscience research, so an understanding of ethical principles.  No prior knowledge of neuroscience is required.						
Anti-requisites	NIL						
Course Description	This course introduces the interdisciplinary field of neuroscience, focusing on the structure and function of the nervous system, from the cellular level to complex brain networks. Students will explore the fundamental principles governing neural communication, sensory and motor systems, cognition, and behavior.					will	
Course Outcomes	On completion of this course, the student will be able to: CO1) Students gain a deeper understanding of how the brain processes information, makes decisions, and responds to marketing stimuli. [Knowledge] CO2) Gain insights into consumer behaviour by understanding the subconscious drivers behind purchasing decisions. [Comprehension] CO3) Develop practical skills such as designing experiments, analyzing data, and interpreting results. [Application]					hind	
Course Objective	This course is designed for students;  To demonstrate an understanding of the basic anatomy and physiology of the nervous system.  Students should be able to identify the emotional triggers that drive consumer preferences, including how advertising, branding, and product design evoke specific feelings and associations.  To develop critical thinking skills by evaluating and interpreting scientific literature and experimental data in the field of neuroscience.  Students should be able to identify key brain regions involved in segmentation and positioning.						
Module 1	Exploring the Brain	Assignment	Nervous System		10 H		

#### **Topics**

Functions of the Nervous System - Peripheral Nervous System - Central Nervous System (CNS) - Anatomy and the Functional Structure of the Brain - Cerebellum - Brain Stem - Neurons and Signal Transmission - Senses - Complexity of Perception - Cognition, Memory, Learning - Types of Memory - Conscious and Unconscious Brain - Emotions and Motivations - Emotional Arousal - Brain Research Methods.

Module 2	Consumption as Feelings	Assignment	10 Hours

## Topics:

From the Concept of Need to the Construct of Pleasure and Reward - Pleasure - Neuroscience and Yearning for Comfortable Life - Brain Reactions to Food Consumption, Patterns of Liking and Preference - On Beauty - Coordinated Role of Senses in Enhancing Positive Experience - Emotions, Mood and Behavior - Decision Processing Systems - Moods - Anticipating Emotions.

Module 3	Risk	Handling,	Developing	Assignment	Regret	and	Post	10 Hours
	Prefere	nce and Choos	sing.		Decision	Evalua	ation	10 110013

#### Topics

Cognitive Processing - Neural Aspects of Decision-Making: Coping with Risk - Mathematical Mind - Trouble with Gauging - The Choice Dilemma - Memory-Learning Connection - Intuition and Decisions - Feeling the Pinch: Paying the Price - Social Contributions to Opinion Forming - Brand and the Brain.

## Targeted Application & Tools that can be used:

Students would be encouraged to take up live projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand project management.

Professionally Used Software: MRI/fmri, FBA, NIRS, PET, Eye Tracking and Face Reading

Project work/Assignment:

Assignment 1: Describe how your neuromarketing strategies will be implemented across various channels, such as digital advertising, social media, point-of-sale displays, and product placement.

Assignment 2: Develop marketing stimuli (e.g., advertisements, packaging, branding) that are designed to activate the desired emotional responses in consumers. Utilize principles of sensory marketing, storytelling, and persuasive communication.

Assignment 3: Identify emotional triggers that are likely to resonate with your target audience and drive their purchasing decisions. Consider factors such as pleasure, reward, social connection, and fear avoidance.

#### Project 1:

Develop a concept for your marketing campaign based on your product and target audience. Brainstorm ideas for messaging, branding, visuals, and experiences that align with neuroscience principles and are likely to resonate with consumers.

The International Marketing course is designed to equip aspiring business leaders with a comprehensive understanding of the complexities and nuances involved in conducting marketing activities on a global scale. Through a strategic and interdisciplinary approach, this course explores the challenges and opportunities presented by diverse international markets, addressing key topics such as cross-cultural consumer behavior, market entry strategies, global branding, and the impact of geopolitical factors on marketing decisions. Students will engage in case studies and collaborative projects to develop critical thinking and decision-making skills essential for steering the dynamic landscape of international business. By the end of the course, students would have gained the knowledge and analytical tools necessary to formulate effective global marketing strategies that align with the ever-evolving demands of the international marketplace.  On successful completion of this course the students shall be able to:  CO1) Comprehend the interconnectedness of economies and the importance of adapting marketing strategies in various international contexts.  CO2) Interpret the nuances of International Trade & effective Cross-Cultural Marketing.  CO3) Demonstrate proficiency in developing strategic market entry plans for global markets.  CO4) Analyze Integrated Global Marketing Campaigns  This course is designed to enhance employability and skill development by using participative and experiential learning methods.  Introduction to Classroom Lecture & Participative Hands-on Experience + Cases Marketing  Learning

Course Description	concerned with any business strategy to protect the environmental im damaging products and service Marketing which involves a communication that aims to involve the strategy of the service of the servi	Modern day governments and societies have become increasingly aware of environmental issues oncerned with any business. This has lead to a trend of Green Marketing used by the firms as a trategy to protect the environment on the one side as well as make their business distinct. The word ireen Marketing has been used to describe marketing activities which attempt to reduce the negative ocial and environmental impacts of existing products and production systems which promote less amaging products and services. A shift to Green Marketing requires certain changes in all P's of Marketing which involves redefining the product. In terms of product promotion, it involves ommunication that aims to inform rather than just impress. It is about focus beyond customer needs. It is a powerful tool for marketers to associate and brand their business in tune with environment

Version No.	1.0	1.0					
Course Pre- requisites	Production and Logistics Management						
Anti-requisites	NIL						
Course Description							
Course Outcomes	After completing this course, the student should be able to:  1. Understand the concepts of logistics  2. Describe the various industries aligned with logistics  3. Depict the various utilities of logistics in customer satisfaction.						

	This course aims to present an insight of the principles of logistics management and provide a basic understanding of the logistics operations in a business. The course also creates an awareness about the various avenues of logistics management. This course covers broadly the fundamentals of logistics management such as 7 Rs of logistics management, various objectives management, various transportation modes, fundamental concepts related to packing, various types of warehouses, time management, roles of intermediaries in logistics, containerization, palletization and various document requirements.						
Course Content:							
Module 1	INTRODUCTION	Assignment		11 Hours			
Definition of Logistics -	– Logistics Flow- Logistics cost – Shipper		ent in Trade- Objectiv	es of Logistics			
Management – 7Rs of	Logistics – 5Ps of Logistics – Internation	nal Commercial Terms	;				
Module 2	Logistics and Documentation	Mini-Project		10 Hours			
_	ntation – Documentation for Exports- Tr		sTransportation Mar	nagement –			
Carriage of Goods by L	and – Motor Vehicles Act – Carriage of	T	Т .				
Module 3	Shipping Formalities	Assignment	Conceptual Knowledge	12 Hours			
Shipping Formalities –	Shipping Intermediaries – Containerisa	tion – Inland Containe		ner Freight			
Stations.							
Module 4	Role of Airline industry in Logistics	Mini-project	Data Analysis	12 Hours			
	in Logistics – Air Cargo Management -		thods of Air Freigh, R	everse Logistics -			
	nunication Management in Logistics Ma	anagement.

Course Pre- requisites	Basics of Production a	asics of Production and Logistics management						
Anti-requisites	Nil							
Course Description	industries practices in team. The course prim manufacturing firm. It quantitative tools in so introduces students to	the course introduces the students to the theory and practical application of manufacturing industries practices in making a product from the time the product is envisioned by the design eam. The course primarily discusses the principles, concepts and basic problems affecting the manufacturing firm. It also includes the methods, strategies and application of various uantitative tools in solving the production planning and control related problems. The course introduces students to problems and analysis related to the production, planning and control spects of operations. The course also is a practical and experiential learning for students opwards employability.						
Course Out Comes	On successful completion of the course the students shall be able to:  1] Explain concepts pertaining to Production Planning and Control functions. [Bloom-Comprehension]  2] Apply the concepts of Work study, Time and Motion Study required in improving efficiency. [Bloom – Application]  3] Analyze the problems in product and process planning. [Bloom – Analysis]  4] Calculate the optimum processing time of sequencing multiples jobs on multiple machines. [Bloom – Analysis]							
Course Objective	The course aims at EM PARTICIPATIVE learnin	PLOYABILITY with respect g activities.	to Production	on Planning a	and Con	trol through		
Course Content:								
Module 1	Introduction to PPC	Assignment – Participative learning	Case study		Hours 10			
job – batch and conti aspect – Durability ar	nuous – Product develo	and control – Functions of pment and design – Market – aesthetic aspect. Profit of mics of a new design.	ting aspect -	- Functional	aspects	– Operational		
Module 2	Work Study	Assignment – Participative learning	Case study		Hours 12	;		
Topics: Method study, basic procedure – Selection – Recording of process, method study Symbols, recording techniques for method study – Critical analysis, Flow Process Chart, Flow Diagram, String Diagram, Therbligs and its significance, Chronocycle and Travel chart, Development – Implementation – Micro , Steps in Time Study, Number of cycles to be timed, motion and memo motion study – work measurement, Techniques of work measurement – Time study – Production study – Work sampling – Synthesis from standard data – Predetermined motion time standards (PMTS), Case study on standard time and production rate.								
Module 3	Product and process planning	Assignment – Participative learning	Case study		Hours 12	;		
Functional analysis, Frequisite information	ning, Steps in product p AST diagrams, Problems needed for process pla	lanning – Extending the or s in lack of product plannir nning – Steps in process p process capability, Analys	ng – Process Ianning, min	planning and imum cost a	l routin nd max	g – Pre imum profit		
Module 4	Production Scheduling	Case Study– Participative learning	Modelling a	_	Hours 11	<u> </u>		
Topics: Production	-	ng and scheduling – Maste				Canalla de anto		

Topics: Production Control Systems – Loading and scheduling – Master Scheduling – Scheduling rules – Gantt charts – Perpetual loading – Basic scheduling problems – scheduling rules, scheduling n jobs on one machine, scheduling n jobs on two machines, Johnsons rule, n jobs on 3 machines, Line of balance – Flow production scheduling, Batch scheduling, Aggregate run out method (AROT), Dispatching, Techniques for aligning completion times and due dates. Case Study

Targeted Application & Tools that can be used:

Above concepts are helpful in understanding the concepts related to production planning and control functions. Students will be able to apply the techniques of work study, time and motion study and understand how efficiency can be improved. Students will learn to analyze product and process planning and calculate the optimal utilization of time for processing. Spreadsheets will also be used to analyze larger problems.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Assignment type: Case study on various aspects of production planning and control, problem solving using spreadsheet for sequencing and scheduling the jobs and applying the concepts of work and motion study to analyze cases.

Course Code: MBA3091	Course Title: Operations Analytics Type of Course: Discipline Elective	L 3	T 0	P 0	C 3		
Version No.	2.0						
Course Pre-requisites	Students are expected to know: The basics of Spreadsheets, Production & Logistics Management, probability basics.						
Anti-requisites	Nil						
Course Description	The course deals with the analytics pertaining to Business Operations management. Knowledge of Production and Operations Management along with the practical applications of various problem solving techniques will help the student get a complete understanding of the Operations Analytics. This course aims at providing knowledge on practical applications and problem solving techniques. This course focusses on how the data can be used to optimally match the supply with demand. Through this course, students shall also learn how to model future demand uncertainties, formulating models, predict outcomes and interpret practical solutions using Spreadsheets.						
Course Out Comes	On successful completion of the course the students shall be able to:  1] Explain the concepts of analytics in decision theory. [Bloom – Comprehension]  2] Analyze the range of optimality and feasibility. [Bloom – Analysis]  3] Analyze trans-shipment problems. [Bloom – Analysis]  4] Interpret various strategies using game payoffs. [Bloom – Application]						

Course Objective	The course aims at EMPLOYABILITY with respect to Operations Analytics with PARTICIPATIVE learning activities.				
Course Content:					
Module 1	Selection of Operations Strategy	Assignment – Participative learning	Case analysis using spreadsh eet	11 Hours	

Topics: Selection of a suitable strategy under High Uncertainty, Business Operations Decision making under uncertainty, Understand application of uncertainty criterions Maximax, Maximin, Minimax, H-Alpha approach, Regret, P' approach and 'O' approach, Decision Trees, Problems related to stocking policy, Payoff analysis for selecting best alternative, Exercise.

Module 2	Optimality and Feasibility Analysis	Case Study– Participative learning	Modellin g and solving using spreadsh	12 Hours
			eet	

Topics: LP modelling of problems related to production and operations, Graphical Solution, Solving problems related to Minimization and Maximization, Infeasibility & Degeneracy in LP, range of optimality and range of feasibility analysis, exercise using spreadsheet Solver, Duality and Sensitivity, Exercise and Case Study.

	Trans-shipment	Case Study-	Case	
Module 3	Modelling and	Participative		12 Hours
	Analysis	learning	analysis	

Topics: Matching Supply with Demand in Transportation, IBFS by VAM, Degeneracy check, Optimal Analysis –UV method, Trans-shipment, Modelling trans-shipment problems, Analysis, Applications using Spreadsheet. Exercise and Case study.

			Assignment/Case		
Module 4	Madula 4	Carra Araak sia	Study	Case	10 Hours
	Module 4	Game Analysis	Participative	analysis	10 Hours
			learning		

Topics: Game analysis for multiple strategies between 2 business competitors, 2-person-zero-sum game, Graphical Method, for Mx2 and 2xN problems, MxN problems, Oddments, Vonn Neumann method, Saddle points. Maximin and Minimax criterion, Mixed and Pure strategy problems, analysis using Spreadsheet, Case Study.

Targeted Application & Tools that can be used: [Mention here the application area of the contents of the Module and the name of any specialized professionally used tools (Like software, Hard ware, any other form of tool) relevant to the contents of the module.]

Above concepts are helpful in understanding the analytics in operations. Various examples related to production and manufacturing from different industries will be discussed through cases studies. Solving the problems using spreadsheets will be explained. Solver will be used.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Assignment type: Case study on various operations related to production, transportation, decision making using spreadsheets.

Course Description	This subject examines the impact of the international political, economic, monetary and culturalroles on the functions of operations management. For the operational aspects, special emphasis will be made on the orchestration of the business operational activities in a global value-chain for sustaining competitiveness.						
Course Outcomes	<u> </u>						
Course Objectives  Course Content:	Objective of this course is to enhance Skill Development using Experiential Learning methods.  a. Properly understand the operations management issues in business internationalization as well as global value-chain for sustaining competitiveness.  b. Understand the applications and implications of technologies in the international business environment  c. Demonstrate how to solve business management issues by appropriately applying operations management theory and method to improve operations competitiveness in a global business environment.  d. Understand how to adjust the product global supply chain management according to different regional business environments  e. Correctly identify the operations issues when conducting production or providing service in different countries						
course content.							
Module 1	INTRODUCTION	Assignment				L0 Hoι	
macro-economic environme	nvironments - Globalization of induents of international business and t						
norm and their impact on the	ie busiliess operation						

Monetary and exchange rate and their impact on the business operation - Technology and their impact on the business operations Global Integration and Competitiveness - Global value chain view of the international operations. International operations Assignment Conceptual Module 3 12 Hours strategy Knowledge International operations strategy and firm competitiveness - International market entry consideration Orchestrating Firm Value-chain Functions in the International Marketplace - International market and pricing issues -Foreign exchange risk and international procurement. Module 4 **Network Models** Mini-project Data Analysis 12 Hours Outsourcing and contract manufacturing services - Managing for quality in international operations - Global distribution and customer service management - Facility location for integrated global operations - Sustainability issues in global operations.

Targeted Application & Tools that can be used:

Course is applied to different areas of the management. The broad areas of applications are marketing research, financial markets, behavioural economics, human resources, etc. & Professionally Used Software: MS-Excel

Course Description	Lean management has become a universal management tool for delivering value and optimizing work processes. Lean management is an approach to managing an organization that supports the concept of continuous improvement, a long-term approach to work that systematically seeks to achieve small, incremental changes in processes in order to improve efficiency and quality. The primary purpose of lean management is to produce value for the customer through the optimization of resources and create a steady workflow based on real customer demands. It seeks to eliminate any waste of time, effort or money by identifying each step in a business process and then revising or cutting out steps that do not create value.						

Course Outcomes	The primary purpose of lean manager optimization of resources and create a seeks to eliminate any waste of time, process and then revising or cutting o	a steady workfl effort or mone	ow based on real custor y by identifying each ste	ner demands. It

Course Code: MBA4026	Course Title: LEAN SIX SIGMA Type of Course: Discipline Elective and Theory only  L- T- P-C  2 0 2
Version No.	1.0
Course Pre- requisites	<ol> <li>Basics of Statistics and Probability distribution</li> <li>Basics of Production and operations management</li> </ol>
Anti-requisites	Nil
Course Description	The course is designed to help the students master the lean and Six sigma principles and methodologies. Organizations strive for continuous improvement and seek management professionals that can employ problem solving and business know how to enhance internal processes. It will help students to take a lead in quality management projects. It will orient students towards optimization of end-to-end processes to increase quality. After completing the course students will be confident in becoming a Lean Six Sigma expert and take up certification on becoming Lean Six Sigma Black Belt.

Course Out Comes	On successful con	npletion of the course th	ne students shall be able to	o:
	CO1) Explain t Comprehension]	he concepts of DMAIC a	nd DMADV related to Lear	n Six Sigma. [Bloom –
	·	oblems related to qualit	y improvements using stat	istical methods. [Bloom-
	CO3 ) Calculate	e optimal units in transp	ortation and assignment p	roblems. [Bloom Analysis]
Course Objective	The objective of t	his course is to make th	e students understand var	ious aspects of Lean Six

Course Description	Product Innovation and Development This course introduces students to comprehend Product Innovation and Development and its commercial viability for manufacturing. The focus is on evaluating products and how they have transformed technologically over time and have provided to market needs. The course also emphasizes on the significance of production and process planning. It also enables students to map product and market needs onto a need based matrix. The course helps students to gain knowledge on the significance of costing, product making process and how it associates with concept generation, screening and selection. Students will comprehend the process of concept development, prototyping, product architecture, product development economics and feasibility in terms of design for manufacturing. The significance of new manufacturing techniques, information systems, value co-creation and open innovation enabled by information and communication technologies such as the Internet, mobile and social networks and how they are transforming innovation in products and services are discussed. The course will discuss about how to get Patent for new products developed. The students will benefit in practical and experiential learning by taking this course which will lead towards employability.					ing d	
Course Outcomes	On successful completion of this course the students shall be able to:  CO1 Explain the product innovation process and its economic viability for manufacturing. Bloom level (Knowledge).  CO2 Comprehend how design and continuous improvements add value for better product innovation. Bloom level (Comprehension).  CO3: Identify the different product development project types, how multi-functionality features enhance products, market segmentation's, technology road maps. Bloom level (Analysis).						
Course Objective	This course aims to enhance employability s	skills by experiential le	earning .				
Course Content:							
Module 1		ourse Initiation				10 Hours	S
	duct Innovation and Development. An overvi on and its relevance in the industry. Timeline	•		•	•		

service innovation.				
Module 2	_The Product Innovation Development process	Case Study/Article review and	Experiential Learning -group presentation	10 Hours

Introduction to Product Innovation and Development. An overview of the product innovation development process and the role of innovation and its relevance in the industry. Timeline, cost economics and challenges involved in product and service innovation.

Module 3 Product Planning Process and Testing Group Assignment Article Analysis 10 Hours

Identify concepts, Evaluation and Prioritization of Projects. Discuss about strategies, market segmentation, technologies involved, product platform planning and the opportunities for new products and portfolio range. The significance of resource management, planning, staffing, project timeline and project management. Product specifications and need mapping. The relevance using a Business Model Canvas. The significance of measuring customer responses on using a product or service and the relevance of product architecture and designs. The need for Industrial design and prototyping.

requisites	Students	should	d have comp	leted Fundamentals of Busine	ss Ana	lytic	s in S	em 2	
Anti-requisites	Nil								
Course Description	data, with an emploommitted to data enhance the problem Business Analytics to extract, analyze data-driven busined decisions in the special will develop basic of the second seco	Business analytics (BA) is the practice of iterative, methodical exploration of an organization's data, with an emphasis on statistical analysis. Business analytics is used by companies committed to data-driven decision-making. The curriculum is designed to tap into and enhance the problem-solving and critical thinking skills for those students specializing in Business Analytics. Graduates of this applied business analytics degree program are prepared to extract, analyze and interpret data to help and support for effective decision-making within data-driven business environments. Data analysts describe, predict, and inform business decisions in the specific areas of marketing, human resources, finance, and operations, which will develop basic data literacy and an analytic mind-set that will help the students to take strategic decisions based on data.							
Course Out Comes	On successful com CO1) Recall various CO2) Understand p [Comprehension] CO3) Demonstrate [Application]	On successful completion of the course the students shall be able to: CO1) Recall various data analysis tools and techniques for business problems [Knowledge] CO2) Understand processes to implement Business Analytics tools & techniques. [Comprehension] CO3) Demonstrate how various tools like Excel, R & Python are used in the industry.							
Course Objective:				OPMENT through EXPERIENT

MBA3017	Type of Course: Discipline Elective Theory only	L-1-P-C	3	U	U	3
Version No.	1.0					
Course Pre-requisites	Production and Logistics Management					
Anti-requisites	NIL					
Course Description						
Course Outcomes	This course 'business forecasting' will help learners to gain the proficiency in predictive analytics applications and develop the skills to analyze historical data for future demand planning and resource allocation.  It will help to understand the key role of forecasting in business planning; understand and know					

	when to use various mode	els of forecasting; the an	alysis of time series da	ata into various		
	components such as seaso	components such as seasonality, trend, and cyclical forecast; understand both qualitative and				
	quantitative forecasting a	quantitative forecasting approaches and several business applications of forecasting in				
	marketing, inventory and	marketing, inventory and supply chains, project management, finance and retailing.				
Course Objectives	Objective of this course is	to enhance Skill Develop	oment using Experient	tial Learning methods.		
	After completing this coul	After completing this course, the student should be able to:				
	Business forecasting is the	e technique used to cast	the foremost business	s scenarios to ease out		
	the business decisions and	d management in future.	. The ongoing develop	ment in the field of		
	predictive analytics using	data analytics and mach	ine learning technique	es helps to shape and		
	analyze the historical data	a to know the future busi	iness possibilities. Util	izing the power of		
	business forecasting allow	s organizations to handl	e the uncertainty bett	ter and find new		
	possibilities for sustainabl	e growth of business.				
Course Content:						
Module 1	INTRODUCTION	Assignment		10 Hours		
Introduction to Busi	ness forecasting - Data Driven De	cision Making and Essen	tials of Predictive Ana	lytics-Types of		
Forecasting: Qualita	tive Approaches and Quantitative	e Approaches.				
Module 2	Waiting Line Models	Mini-Project		11 Hours		
Components of a Tir	me Series and Measures of Foreca	ast Accuracy -Moving Ave	erage Methods: Simpl	e, Weighted, and		
<b>Exponential Moving</b>	Average -Exponential Smoothing	-Trend Projections and H	lolt Model-Regression	Analysis- Measure of		
Goodness and Stand	lard Error.					
Module 3	Simulation:	Assignment	Conceptual	12 Hours		
Widule 5	Sillidiation.		Knowledge	12 Hours		
Seasonality, Seasonal Index, and Quarterly Average Method-Seasonality and Trend: Holt Winter Method-Decomposition						
Method-ACF and PACF-ARIMA.						
Module 4	Network Models	Network Models Mini-project Data Analysis 12 Hours				
Introduction to Ma	chine Learning-Logistic Regressio	n-Human Judgement in <sup>-</sup>	Time Series Analysis-N	Nonte Carlo Simulation		

and Risk Analytics-Predictive Analytics using @Risk software/Python. Targeted Application & Tools that can be used:

Course is applied to different areas of the management. The broad areas of applications are marketing research, financial markets, behavioural economics, human resources, etc. & Professionally Used Software: MS-Excel

MBA3054	A3054 Type of Course: Discipline Elec	line Elective	3	0	0	3
Version No.	2.0			-	1	ı
Course Pre- requisites	Technology Foundations for Business MBA 1018 (Semester 2) Basic understanding of Data and DBMS					
Anti-requisites	NIL					
Course Description	The Database Management Course is an industry oriented course focused on providing Data Management and Data world insights. The learner is equipped with Data Management practices and trends in the Industry. Database Management is about monitoring, administration, of databases and data left. Database management involves Data Architecture, Design, Implementation and Support of data. The course involves theory and practical perspective of data management aspects. Open Source tools will be provided for Data Management activities. The lab activities will be performed in the Open Source tool.					
Course Objectives	The Course promotes learners' employability skills through the understanding and application of Relational Database Management Systems (RDBMS), Industry applications in managing data in all business functions across Industry sectors. Laboratory Assignments/ real time Use Cases will be simulated and resolved during the Hours. This will involve hands-on experiential learning in the complex datasets in determining probable outcome.					
Course Out Comes	On successful completion of the course the learners are able to: CO1) Describe complex data repositories in organizations [Comprehension] CO2) Apply SQL syntax for desired outcomes. [Apply] CO3) Illustrate usage of tools to create reporting dashboards and dataplots [Apply] CO4) Analyse Databases (including Big Data) as deployed in various industries [Analysis]					
Course Content:						
Module 1	Introduction to Database Management Systems (DBMS)  Case Study (participative learning)  Case Study (participative learning)  Case study: DBMS in organizations					

## Topics:

Introduction to Database Management Systems – Types and Definitions, Data Normalization, Database architecture, Data mirroring, Role of a DBA,

Module 2	Overview of Structured Query Language (SQL), Normalization	Assignment and Case Study (participative learning)	Case Study: Creation of Tables, Managing data and interrelation Students who complete the course will be equipped to write SQL queries,	12 Hours
----------	---	--	---	-------------

#### Topics:

Overview of SQL. Installation of Work Packages, Module 2: Building the Database Schema; Creating tables and columns; Building tables with CREATE TABLE; Modifying table structure with ALTER TABLE; Adding columns to an existing table; Removing tables with DROP TABLE

Models & Database Design (Logical and Module 3 Conceptual), Database Objects, Big Data overview	Assignment and Case Study (Experiential learning)	A Case Study	12 Hours
---	---	--------------	-------------

## Topics:

Relational Model, Entity Relationship Model, Database design and ER Model: overview, ER-Model, Constraints, ER-Diagrams, ERD Issues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML Relational database model: Logical view of data, keys, integrity rules. Relational Database design: features of good relational database design, atomic domain, Normalization (1NF, 2NF, 3NF, BCNF). Big Data – characteristics, tools to manage Big Data.

Module 4	Data Modeling Constraints & Data Manipulation; Big Data overview	Assignment and Case Study & Project	Students are assigned a project to work using DMBS tools and techniques.	11 Hours
----------	--	-------------------------------------	--	-------------

#### Topics:

What are constraints, types of constrains, Integrity constraints, Views: Introduction to views, data independence, security, updates on views, comparison between tables and views, Big Data – characteristics, tools to manage Big Data.

List of Experiments (Embedded Lab - Student's self-study): Practical exercises are done using

- 1. Creation of Dataset, Tables.
- 2. Building Data Repositories, Roll Back and Data Updation.
- 3. Relation building between Dataset, Tables,
- 4. DBMS Projects Hospital, Library, School, Salary, Hotel, Pharmacy, Student, Payroll, Employee

Targeted Application & Tools that can be used:

Open Source DMBS & SQL Tools

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course:

Building Databases, Data Structures for these sectors – Education, Banking, Airlines, Universities, Manufacturing and selling, Human resources

# List of Laboratory Tasks:

Experiment No 1: Connect to data and edit the connection properties

reports, dashboards.

Level 1: with connections to a flat file using live connection and rename the canvas connection

Level 2: with connection to a flat file using extract and rename through edit connection

Experiment No 2: For the given business data related to sales of cycles across the world

Level 1: Create a calculated field on single sheet-based data from within data source

Level2: Create a calculated field based on a multiple data source

Tableau & PowerBI.

Targeted Application & Tools that can be used: Tableau Desktop, Tableau Public, Tableau online, Tableau and PowerBI. Please note – only free trial versions will be installed in lab computers and not paid versions. IT support and help must be provided to ensure effective delivery of the course using authorized software.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

- 1. Assignment1: Collect data from open source data sites for a typical business event and apply visualization and analytics techniques
- 2. Assignment2: Prepare Dashboard report on stock profitability for a given stock exchange
- 3. Analyzing data for Customer Analytics, Pricing Analytics, Churn etc.
- 4. Presentation on effective dashboards using Tableau and PowerBI.

Using NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit learn or any other relevant Libraries to arrive at a model, students can employ the dataset which shall either be publicly available or primary in nature. The learners can use any algorithm for modelling
Project work/Assignment: Mention the Type of Project /Assignment proposed for this course
The MT & ET evaluations will be based on the two Individual Projects on modelling with presentation. The Project and the Presentation will have 70:30 split in the evaluation in this respect.  The Project should be original and shall be using any dataset either secondary or primary source. However, the process of analysis and the conclusions should be original. The Project shall foot on either classification or regression problems. Project can include self learning components depending on the project but should be related to Business and Analytics domain. Students are encouraged to choose topics relevant to their specialization and are not allowed to take up any project that is not related to Business.

Course Pre- requisites	<ul> <li>Students should have the completed Fundamenta</li> <li>Students should have completed Programming for python programming knowledge</li> </ul>			-		
Anti-requisites	Nil					
Course Description	The objective of a deep learning course is to equip MBA stutools and techniques that are taking the world by storm are foundational understanding of how neural networks work, that are applied in basic deep learning models. The will be datasets effectively using Deep Learning tools like TensorFl behind Computer Vision, Large Language Models, applicating Throughout the course, students explore various deep lear related to natural language processing (NLP) and neural neworking with publicly available libraries and datasets, which independent research and study.  Understand the basics of Deep Learning: MBA students we learning, including binary classification, logistic regression, graphs, and vectorization. This foundational knowledge he deep learning techniques.	the coable to able to low, Ke ons to ching co twork h help ould le gradie	upting in oncepts, o apply the eras, Pyto various oncepts, s. 	Implementing simple Deep Learning Models: MBA students would gain practical experience by implementing various deep learning models to solve real-world problems. They would learn how to apply these models effectively, analyse optimization techniques, and understand generalization principles.  Practical Aspects and Applications: MBA students would explore practical aspects of deep learning, such as handling train/dev/test sets, addressing bias/variance trade-offs, regularization, and dealing with vanishing/exploding gradients. Additionally, they would delve into specific applications like logistic regression, convolutional neural networks (CNNs), recurrent neural networks (RNNs), and backpropagation.						
Course Objectives		tes learners' employability skills using ex python code and online resources and h

Course Content:							
Module 1	Introduction	Demonstration of Computer Vision (Experiential Learning)	Students are taught how Deep Learning works and asked to summarize their understanding	10 Hours			
including neural	Topics: Introduction to Deep Learning and Neural Networks: learn the history, definitions and basics of deep learning, including neural network mathematics, activation functions, and backpropagation. Topics covered include feedforward neural networks, gradient descent, and the role of deep learning in business applications						
Module 2	Recurrent Neural Networks (RNN), and Natural Language	Lab & Theory (Problem Solving)	Using public datasets and python codes to build basic models for RNNs & NLP	10 Hours			

Topics: RNNs are essential for sequence data, such as time series or text. In this module, students would delve into RNN architectures and their applications.

NLP techniques, including word embeddings, sentiment analysis, and chatbots, would also be covered. Overview of Transformers & Generative Pretrained Transformers.

Module 3	ion Lab Experiments	le 3 Computer Vision	Using public datasets and python codes to build basic models for CNNs	10 Hours
----------	---------------------	----------------------	---	-------------

Topics: Convolutional Neural Networks (CNNs) for Image Analysis: This module focuses on CNNs, which are widely used for image classification, object detection, and other visual tasks.

Also Single Shot Detectors, GANs. YOLO and other real time computer vision techniques.

## Targeted Application & Tools that can be used:

Python, TensorFlow, Keras (GoogleColab), PyTorch

Processing (NLP)

## Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

- Taking up publicly available datasets like MNIST, image datasets etc. for Computer Vision
- Realtime traffic identification using YOLO etc.
- Demonstration of NLP Tools like sentiment analysis on YouTube comments etc.
- Using RNNs and LSTM on forecasting stock prices, crypto currencies etc.

Course Code:	Course Title: Digital Transformati	ion	L	Т	P	С	
MBA3122	Type of Course: Discipline Elective		2	0	0	2	
Version No.	1.0						
Course Pre-requisites	Technology Foundations for Busine	SS					
Anti-requisites	NIL						
Course Description	is focused on real world examples of Transformation. It covers why and linternet of things, 3D printing, etc.) products or services around the wollinks business strategy, business mostrategy and execution skills and crithem with simple tools to manage lines.	This course introduces business strategy and fundamentals of Digital Transformation. This is focused on real world examples of digital disruption and a playbook with tools for Digital Transformation. It covers why and how digital technologies (mobile, social, cloud, big data, internet of things, 3D printing, etc.) are reshaping value creation, growth, and delivering products or services around the world and how to master Digital Disruption. This course links business strategy, business models and digital features to develop students' business strategy and execution skills and critical thinking embedding digital knowledge and equips them with simple tools to manage Digital Disruption. The spread and scale of the topic is so significant that digital acumen is nowadays a core component of business strategy.					
Course Outcomes	CO1) Describe impact of digital tech CO2) Apply frameworks and tools to	On completion of this course, the student will be able to: CO1) Describe impact of digital technologies on organizations [Comprehension] CO2) Apply frameworks and tools to effectively plan Digital Transformation [Application] CO3) Outline the steps to effectively manage Digital Transformation [Analysis]					
Course Objective	This course promotes learners' employability skills using experiential learning with an understanding on the power and impact of digital for strategy analysis, design and execution, and equips learner with tools to manage business disruption in an organization. Digital Transformation is taught through Assignments/ Exercises/ Case Studies/ Projects.						
Module 1	Key trends in Emerging Tech	Quiz (E-review from resources)	Assignmer and online demos		10 Ho	urs	

Topics: Introduce the latest advances in technology and implications, applications for business and SDLC. High level overview of disruptive technologies like mobile, social, AIML, cloud, big data, internet of things, AR&VR, 3D printing, Fintech, Blockchain, Marktech, Quantum Computing, Space, Biotech etc. Explain key reasons and drivers behind the rise of emerging technology. Discuss application and use cases of Al&ML in organization.

			Practical tools	
Module 2	Business Value Disruption	Case Analysis	for Managing	10 Hours
Wodule 2	Business value disruption	(Experiential learning)	Digital	10 Hours
			Disruption	

Topics: Driving Digital Strategy. Harness Customer Networks, Build Platforms - Not Just Products, Turn Data Into Assets, Innovate by Rapid Experimentation, Adapt Your Value Proposition- Model of business value - VRIO framework, Mastering Disruptive Business Models.

Module 3	Managing Tech based Digital Transformation.	Case Analysis	Strategy and the Internet (hbr.org)	10 Hours
----------	---	---------------	-------------------------------------	----------

Topic: Framework for Reinventing Your Business - Reimagine your business, Re-evaluate your value chain, Reconnect with your customer & Rebuild your Organization.

#### Targeted Application & Tools that can be used:

Students would be encouraged to take up live projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand project management.

Professionally Used Software: KNimbus library access, Online AI&ML tools

#### Project work/Assignment:

- 1. Lectures (20 Hours), review and bridging (4 Hours)
- 2. Assignment 1 with Project Presentations
- 3. Assignment 2 with Project Presentations
- 4. Case studies & how to use tools for Managing Digital Transformation

Course Description	MarkTech (Marketing Technology): MarkTech refers to specific software applications used to build, automate, track, and enhance marketing efforts. It empowers marketers to streamline their work across various channels and gain valuable insights into campaign success. Al&ML has brought in huge disruption especially with the latest GenerativeAl tools. With nearly 10,000 applications across 49 categories, MarTech continues to expand rapidly. Some common MarkTech tools are:  • Machine Learning in Marketing,  • Al for Content Creation and Management,  • Customer segmentation,  • Recommendation systems,  • Store management  • Price optimization, etc.  AdTech (Advertising Technology): focuses on technology used in advertising and media. It includes tools for programmatic advertising, data-driven targeting, and ad campaign optimization, media planning, audience measurement, ad operations, new age advertising including Outdoor, events and experiential marketing. AdTech professionals analyze data to create effective ad strategies. Key areas include:  • Programmatic Advertising: Automated buying and selling of ad space.  • Data Analytics and Targeting: Using data to reach the right audience.  • Ad Campaign Optimization: Maximizing ad performance.  Both MarTech and AdTech play pivotal roles in modern marketing, making them essential topics for MBA students aiming to excel in the dynamic digital landscape.						
Course Outcomes	2) Apply online tools and platf	the student will be able to: functions of Marketing & Adver forms to solve marketing & adve & Advertising campaigns and re	ertising use ca	ises [A	pplica	tion]	
Course Objective	segmentation, creating and op understanding the workflow a much more effective advertisi	and frameworks for MarkTech li otimizing campaigns, marketing and technologies used in Adverti ng campaigns. Understanding th n evergreen areas of Marketing	spends, price ising, and how hese technolo	e disco v tech ogies c	unts e nology	tc. Also is enabling	
Module 1	Marktech use cases and tools	Hands on use of online tools	Quiz and pr based on or platforms	-		10 Hours	
Topics: Discuss function	s and use cases of Marketing tec			ols like	e Goog	le Advertisir	ng,
Facebook Ad ma	anager, recommendation engine	s, sentiment analysis, Goolge Ar	nalytics etc.				

	resources	platforms	
Topics:			

- 7. Understanding the traditional & digital Advertising Industry value chain
- 8. Key trends impacting advertising industry
- 9. Audience measurement in TV & Broadcasting industry
- 10. Media planning and management
- 11. Tools for Optimizing advertising spends
- 12. Technology transforming Outdoor, events etc.

Ī		Practical Applications Marktech & Adtech.	Demos, videos & online	Google Analytics,	
Module 3	Module 3		platform to demonstrate	Google Ads, Facebook	10 Hours
			tools and techniques.	Ad Manager, etc.	

Hands-on experience with Google Analytics, Google Ads, Facebook Ad Manager, generative AI content creation tools. Tools like SCANPRO to optimize ad spend etc. Segmentation, Sentiment Analysis & other tools to enhance marketing effectiveness.

## Targeted Application & Tools that can be used:

Students would be encouraged to take up projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand Marktech and Adtech.

Professionally Used Software: KNimbus library access, Online AI&ML tools, YouTube videos

## Project work/Assignment:

- 6. Lectures (22 Hours), review and bridging (4 Hours)
- 7. 2 Quizes
- 8. Industry free certification in GoogleAds Professional
- 9. Hands-on demo on live tools and assignment with project presentations.
- 10. Datasets & coding for segmentation, recommendation engines,

This	and		
Course Outcomes	On completion of this course, the student will be able to:  1) Describe the pivotal role of modern technologies including analytics in Healthcare & Pharmaceutical industry. [Comprehension]  2) Apply tools to various functions and use cases in Healthcare & Pharmaceutical Industry. [Application]  3) Analyze real case studies where IT & Analytics have transformed small & large firms in							
Course Objective	Healthcare & Pharmaceuticals. [Analysis]  This Healthcare and Pharma IT & Analytics elective, gives students a blend of knowledge, practical experiences and hands-on training in tools, frameworks and techniques in applying the latest IT platforms and tools to enhance business efficiency and success of Healthcare & Pharmaceutical organizations. This course is meant to skill professionals with conceptual, technical and managerial skill sets that give their future careers in Healthcare & Pharma industries, the growth it needs.					_		
Module 1	Core functions of Healthcare and Pharma organizations	Quiz (E-review from resources)	Assignme online dei		10 Hou	rs		

#### Topics:

Core functions and processes in Healthcare & Pharma Industry and how latest technologies are being used to enhance patient outcomes, enhance efficiency, reduce cost and provide healthcare to the vulnerable population.

Module 2	Digital Innovation in Healthcare and Pharma	Case Analysis (experiential learning)	Practical tools for Managing Digital Disruption	10 Hours
----------	--	---------------------------------------	---	----------

## Topics:

- Pharmaceutical Analytics: Drug Discovery and Development: Data analytics accelerates drug discovery by identifying promising compounds from vast chemical collections. Machine learning and AI analyze biological data to pinpoint potential drugs that precisely target diseases. For example, Insilico Medicine used AI to advance the first AI-designed drug into clinical trials for Idiopathic Pulmonary Fibrosis (IPF) within 18 months1.
- 2. Clinical Trial Optimization: Predictive analytics tools analyse patient data (genetic information, clinical outcomes, biomarkers) to design more targeted and effective clinical trials, reducing time and costs.
- 3. Clinical Trials: Patient Recruitment and Trial Optimization: Data analysts use real-time monitoring through IoT devices (wearables) to optimize clinical trials. This streamlines drug development process.
- 4. Success Rate Prediction: Predictive analytics helps estimate clinical trial success rates, aiding in decision-making and resource allocation.
- 5. Disease Trend Prediction: Healthcare Data Analytics: By analysing patterns in healthcare data, pharma companies can predict disease trends. This enables better preparation for future health challenges and effective resource allocation2.

Module 3	Practical frameworks & tools to implement IT & Analytics in Healthcare & Pharma.	Demos, videos & datasets with code to demonstrate IT & analytics.	Kaggle and other online resources to demonstrate these concepts.	10 Hours
----------	--	---	--	----------

Use of Analytics for predictive healthcare use cases, study of various frameworks and platforms in healthcare, overview of AI&ML application in genomics & drug discovery, application of CRISPR and other cutting-edge technologies.

Targeted Application & Tools that can be used:

Students would be encouraged to take up projects and through experiential learning activities in the class they will imbibe the cognitive approaches to understand and apply factors effective to understand project management.

Professionally Used Software: KNimbus library access, Online AI&ML tools, YouTube videos

## Project work/Assignment:

- 1. Lectures (22 Hours), review and bridging (4 Hours)
- 2. 2 Quizes
- 3. Assignment with Project Presentations
- 4. Datasets & coding for disease prediction

Course Pre- requisites	Digital Marketing	g Course					
Anti-requisites	NIL	IIL					
Course Description	Web analytics course covers the basics concepts of digital marketing, eCommerce and drives students into learning digital analytics from both a managerial and technical perspective. It examines a variety of digital tools, definitions, techniques and properties that can be applied across various channels including Google Analytics web platform other online tools including Adobe Analytics.  Students will be assigned topics on which they will provide analytics using Adobe and Google Analytics software and create use cases for analytics. The course will consist of both lectures and hands on project. Students will learn essential and advanced areas in web analytics dealing with set-up, implementation, tag management, funnels, KPI's, conversions and campaign tracking and best practices. Students will be encouraged to complete Google Ads Measurement course online & get certified.						
Course Outcomes	On completion o CO1) Describe ba CO2) Apply web	f this course, the student will be asic measures and concepts of w analytics tools for various real-w site metrics using Google Analyti	eb Analy orld busi	nes	s cas	es. [Applicat	ion]
Course Objective:	The course web a tools including ex specific products	aims to enhance Employability S kample of analytical tools used to to the customers who are most fic customer is most likely to pur	o serve a likely to	s a b buy	ousin ther	ess metric f n and to det	or promoting ermine which
Module 1	Introduction: Definition and concepts	Interactive Discussion and Online Resources	https:// e.com/	'skill	shop	.withgoogl	10 Hours

Course Code: MBA3155	Course Title: Text Mining Type of Course: Lab Based Course	L- T-P- C	3	0	0	3
						<u> </u>
Version No.	1.1					
Course Pre- requisites	NIL. Students are expected to have numerical ability and understanding of Basic Statistics and either R or Python Code					
Anti-requisites	NIL					
Course Description	This course will cover the major techniques for mining and analyzing text data to discover interesting patterns, extract useful knowledge, and support decision making, with an emphasis on statistical approaches that can be generally applied to arbitrary text data in any natural language with no or minimum human effort. Detailed analysis of text data requires an understanding of natural language text, which is known to be a difficult task for computers. However, a number of statistical approaches have been shown to work well for the "shallow" but robust analysis of text data for pattern finding and knowledge discovery. You will learn the basic concepts, principles, and major algorithms in text mining and their potential applications					
Course Objective	This course will enhance EMPLOYABILITY	Y through EXPERENTIAL LE	ARNING throug	h lab tu	itorial	S.
Course Out Comes	On successful completion of the course the students shall be able to: CO1) Describe how text is handled in Python[Comprehension] CO2) Apply basic natural language processing methods [Application] CO3) Illustrate text-based advanced data processing and visualization.[Application] CO4) Analyse how latest Al tools are being used in Industry [Analysis]

Social Loafing and other counterproductive work behaviors, Reasons for a team failure. (Bloom's Level- Evaluate)

Targeted Application & Tools that can be used:

This course help the students to learn the skills to be a good team player as well as team leader and empower them to work with and manage a highly diversified and geographically dispersed teams.

Tools: Resources that employers use to improve team development and collaboration. Employee Engagement Platforms, Brainstorming & Collaboration Team Building, Goal Setting, Virtual Meeting Platforms, Joint Calendars, Paperless Post, Activities, Intentional Encouragement & Google Forms.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course: Participative Learning Assignment 1(Individual): Identify any two organizations and compare the team structures with detailed analysis between those organizations and submit a report.

Assignment 2: (Group) Prepare a poster presentation on effective team building theme with your group by working on creative ideas and submit. Presentation is mandatory from entire group.

Assignment 3: Refer to any one research article from the list in the reference and write a review report on the referred

article and submit. (Review of e-resource from Presidency University – Link is mentioned in references section. Mandatory to submit screenshot of accessing digital resource. Otherwise, it will not be evaluated).

Version No.	1.0	
	Economics	
Course	Statistics for Research	
Pre-requisites	Quantitative Techniques	
Anti-requisites	NIL	
Course Description	Game theory is the study of strategic decision-making used to analyze competit scenarios among individuals or organizations. This course provides students with the tools interactions involving multiple decision-makers, emphasizing its practical application as market competition, negotiations, pricing strategies, and decision-makers.	to evaluate and strategize ations in business contexts
	On successful completion of this course, students will be able to:	
Course Outcomes	CO1: Explain fundamental concepts of game theory and their applications in bus CO2: Analyze and solve strategic decision-making scenarios using game theory p CO3: Develop optimal strategies in complex and uncertain environments using the equilibrium and Bayesian games (Application Level).  CO4: Critically evaluate cooperative and competitive interactions to improve bus Level).	rinciples (Analysis Level). ools such as Nash
Course Objective	<ol> <li>Introduce students to the fundamental concepts and tools of game theory.</li> <li>Enhance students' analytical and strategic thinking abilities to evaluate complete.</li> <li>Provide experiential learning opportunities through case studies and simulation real-world business contexts.</li> </ol>	

	Assignment (Participative	Hands-on learning	09 Hours
	Learning)		

#### Topics:

Introduction to strategic thinking, Interdependence in decision-making, Types and elements of games,

Simultaneous-move games (Prisoner's Dilemma, Dominated Strategies), Best Responses, and Iterated Elimination.

Case Studies: Analyzing market competition scenarios.

Delivery: Lecture, Case Study Analysis, Group Activities.

Module 2	Assignment (Participative	Hands-on projects	12 Hours
	Learning)		

#### Topics:

Topics: Coordination challenges, Sharing the Pie, Assurance Game, Payoff Dominant Equilibria, Cooperative Games, Chicken Game, Hawk-Dove Game. Application of game theory in pricing strategies and resource sharing.

Hands-On Activities: Role-playing games to understand payoff structures.

	Randomized Strategies and	Assignment	Workshops	
Module 3	Mixed Strategies	(Participative Learning)		12 Hours

Topics: Randomized Strategies in games, Expected Value Calculation, Mixed and Pure Strategy Equilibria, Strategic Randomization, Monitoring Games, War of Attrition. Case Studies: Game-based decision-making under uncertainty.

	Dynamic Sequential-Move	Assignment	Simulation exercises	
Module 4	and Bayesian Games	(Participative		12 Hours
		Learning)		

Topics: Game Tree Structures, Subgame Perfect Nash Equilibrium, Sequential-Move Games, Bayesian Games, Risk Sharing, Limit Pricing Strategies. Application in business scenarios such as market entry and pricing wars.

Activities: Simulation exercises and real-world application projects.

#### Targeted Application & Tools that can be used:

Students would be encouraged to take up live projects and through experiential learning activities in the classroom.

Professionally Used Software: N/a

**Delivery Procedure:** This course follows a student-centric pedagogy involving interactive Hours, case-based learning, and experiential projects.

Methods include:

- 1. Conceptual Lectures: Introduction to theoretical frameworks.
- 2. Case Studies: In-depth analysis of real-world applications.
- 3. Group Discussions: Collaborative learning and problem-solving.
- 4. Simulation Exercises: Hands-on activities to practice game theory applications.
- 5. Project Work: Individual projects focusing on competitive strategies using game theory.

## Project work/Assignment:

## Assignment 1:

Ptalk.com conducted;

- a) Ad campaign of  $180 \times 150$  banner size to its client Whitefield Volkswagen Bangalore and the Cost per 1000 impression is  $R_s$ . 25 and the impressions to be served is 600000, what will be the actual cost to the advertiser?
- b) Ptalk.com did an Ad campaign having 728 × 90 banner size having served 20000 impressions and has generated 200 clicks, calculate the CTR of that Ad?
- C) Ptalk.com is ready to spend Rs.20000 for Display Ad campaign having 160 × 600 size banner with number of clicks the Adgenerated is 200, so what will be the Cost per Click?
- d) If Ptalk.com PPC is worth Rs.10, number of Impressions is 20000, CTR is 6% and CR is 3%. Calculate the CPA to an advertiser?
- e) Ptalk.com spends Rs.10,000 and media buy at Rs.10 CPM, to serve 500000 impressions and CTR on the ad is 0.1% with Landing

Page Conversion Rate = 10%, calculate the number of leads and CPL? Assignment 2:

Amazon.com conducted a Ad campaign of 200 × 180 banner size to its client Whitefield Volkswagen Bangalore and the Cost per 5000 impression is Rs.15 and the impressions to be served is 900000, what will be the actual cost to the advertiser?

- b) Amazon.com did an Ad campaign having 900 × 100 banner size having served 40000 impressions and has generated 500 clicks, calculate the CTR of that Ad?
- c) Amazon.com is ready to spend Rs.80000 for Display Ad campaign having 260 × 900 size banner with number of clicks the Ad generated is 900, so what will be the Cost per Click?
- d) Amazon.com PPC is worth Rs.40, number of Impressions is 80000, CTR is 8% and CR is 5%. Calculate the CPA to an advertiser?
- e) Amazon.com spends Rs.50,000 and media buy at Rs.50 CPM, to serve 500000 impressions and CTR on the ad is 0.5% with Landing Page Conversion Rate = 50%, calculate the number of leads and CPL?

Anti-requisites	NIL					
Course Description	One of the key skills of Managers is to be able to collate, analyse and present data to accurately reflect the state of the business, take decisions based on data and finally present highly impactful visualizations of the state of business and its future. The course will aim to provide necessary skills to students of Analytics to be able to collate, clean data, derive insights and present compelling visualizations, dashboards using industry top software like Tableau and PowerBI. These are very valuable skills for any Business Analytics professional today. All participants who successfully complete this course will get a certificate of participation by KPMG.					
Course Out Comes	On successful completion of the course the students shall be able to:  CO1) Identify right business issues & data required to solve these [Knowledge]  CO2) Describe relevant aspects of business for management action. [Comprehension]  CO3) Prepare impactful management reports, dashboards using Tableau and PowerBI. [Apply]  CO4) Evaluate various business solutions using data and recommend action. [Analyze]

Introduction to Powe	rBI Interface, Connecting dat	ta sources in PowerBI and I	Key compone	nts, filters	- visual leve	l, page level

Introduction to PowerBI Interface, Connecting data sources in PowerBI and Key components, filters - visual level, page level and report level, Charts- Line and stacked column chart, Line and clustered column chart, Doughnut chart, Heat map, Histogram, pareto, Box and Whiskers, Scatter plot, bubble chart, Text tables, Scatter chart, Map, Filled Map, Gauge, Card

	Data cleansing and			
Module 2	Dashboard using	Assignment	10 Hours	Comprehension
	PowerBI			

Data cleaning in power BI, report building using Power BI, DAX expression and Dashboard Creation in PowerBI

Module 3	Data Visualization,	Practical	12 Hours	Application
	Charts using Tableau	Tractical		Application

Introduction and Importance of Data Visualization, Introduction to Tableau Interface, creating user profiles and cloud interface, Connecting data sources in Tableau. Types of charts in visualization (Line and stacked column chart, Line chart, Area chart, Histogram)

Module 4	Building Advance Charts& Dashboard	Assignment	11 Hours	Analysis
	using Tableau			

Types of charts in visualization (pareto, Box and Whiskers, Scatter plot, bubble chart, Text tables), Basic and advanced filters in Tableau, Creating calculated fields, Parameters, sets and groups in Tableau, Data joins and Data blending, Dashboard Creation in Tableau (Layout, Designs, Elements, Objects, filters on dashboard) Story cards in Tableau

## **List of Laboratory Tasks:**

Experiment No 1: Connect to data and edit the connection properties

Level 1: with connections to a flat file using live connection and rename the canvas connection

Level 2: with connection to a flat file using extract and rename through edit connection

Experiment No 2: For the given business data related to sales of cycles across the world

Level 1: Create a calculated field on single sheet-based data from within data source

Level2: Create a calculated field based on a multiple data source

**Targeted Application & Tools that can be used:** Tableau Desktop, Tableau Public, Tableau online, Tableau and PowerBI. Please note – only free trial versions will be installed in lab computers and not paid versions. IT support and help must be provided to ensure effective delivery of the course using authorized software.

## Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

- 1. Assignment1: Collect data from open source data sites for a typical business event and apply visualization and analytics techniques
- 2. Assignment2: Prepare Dashboard report on stock profitability for a given stock exchange
- 3. Analyzing data for Customer Analytics, Pricing Analytics, Churn etc.
- 4. Presentation on effective dashboards using Tableau and PowerBI.

Course Pre-requisites	Knowledge of basic concepts of Economics and business management is an advantage.						
Anti-requisites	NIL						
Course Description	This course provides an overview of topics related to business sustainability with a focus on how environmentally sustainable approaches can create value for the firm. We will explore trends in corporate practices and consider specific examples to examine the interactions between the firm and the environment. This course has three objectives: to increase students' knowledge of sustainability practices and their impact on firm performance; to teach students to think strategically and act entrepreneurially on environmental issues; to help students design business approaches to improve environmental outcomes, while simultaneously creating value.						
Course Objectives	This course is designed to improve the learners' <b>ENTREPRENUERSHIP SKILLS</b> by using <b>PARTICIPATIVE LEARNING</b> techniques.						
Course Outcomes	On successful completion of this course the students shall be able to: (1) Discuss important topics associated with Sustainability, Business and Policies for sustainable business 2) Apply the environmental impact assessment on real-time problems 3] Estimate climate-based risk to the business sector and strategize adaptation and resilient measures 4] Summarize the circular economy concept for eco-entrepreneurship						
Course Content:							
Module 1	Sustainability, Business, and Public Policy	Assignment (Participative Learning)	Track your carbon footprint for a week.	10 Hours			

Topics: Basic concept of Sustainability, Sustainable business, policy initiatives at the international and national level, Definition of sustainability in the business context, Triple Bottom Line (TBL): Economic, Environmental, and Social Sustainability, The global sustainability agenda: UN SDGs and the role of business, Concepts and approaches for accessing the sustainability of Business, Sustainability Metrics, Sustainable competitive advantage: theory and practice, The role of leadership in driving sustainability

## Topics:

Understanding the environmental impact of business operations, Concepts in measuring the environment value. Benefit-Cost Analysis, Contingent Valuation Method: Travel Cost Method, Hedonic Price method, Preventive Expenditure method, Surrogate Markets, Property Value method, Wage-differential Approach, and Opportunity Cost Method, Assessing environmental risk and the cost of inaction, Sustainable competitive advantage: theory and practice, Companies successfully using sustainability as a competitive tool.

Module 3	Managing Climate Risks	QUIZ	Climate adaptation	13
Wiodule 3	Ivianaging Climate Nisks		strategy	Hours

## Topics:

Climate change preparedness and Business sector, Types of risks, resource depletion, and biodiversity loss Economic risk of climate change, Climate Adaptation and Resilience, Crisis Management and Communication, Managing climate risks, Enterprise risk management, Financial risk management, climate risk mitigation strategies, Adaptation strategies, Policy engagement and advocacy, KPI's for managing climate risks, Tools and frameworks for managing climate risks.

Module 4 The Circular Economy	Mini Project (Experiential Learning)	Eco- entrepreneurship Business Idea challenge	12 Hours
-------------------------------	---	--	----------

Topics: Basic Concepts of circular economy and business reality, Linear Vs circular economy model, Value propositions generation and creation, Design Innovation and Eco-entrepreneurship, Challenges of eco-entrepreneurship. Opportunities for eco entrepreneurship, Sustainable Business Model- Product-service systems, cradle-to-cradle, and B Corp models, Sustainable competitive advantage: theory and practice, Value creation through eco-efficiency and innovation, Corporate Social Responsibility (CSR) and its evolution to strategic sustainability.

Targeted Application & Tools that can be used:

Application Area is SMEs, Large corporates and Social Entrepreneurship

Course Objective	The main objective of the	e course is to develop be	oth employability and entrepre earning using case study and ar	neurial skills
Module 1	Introduction and pavement to Industry 4.0	Quiz	Smart Business Transformation, Internet of Things (IoT), Industrial Internet of Things (IIoT)	09 Hours
Forces of Industry 4.0, 1.2 Trends on Smart Bu (IoS), Internet of People	The Journey so far: Developn isiness Transformation, Inter	nents in India, USA, Chin net of Things (IoT), Indu g (IoE), Smart Manufacti echnology.	orked Economy, Drivers, Enable ia, European and other countric strial Internet of Things (IIoT), I uring, Smart Logistics, Smart De	es. nternet of Services
Module 2	Technologies Enabling Industry 4.0	Articles & Case Study Discussion	Link in the Reference description below	12 Hours
(Fundamentals), Collab <b>2.2</b> Digital Technologies Blockchain, Augmented	orative Platform and Produc s - Robotics, Robotic Process I Reality (AR) and Virtual Rea	t Lifecycle Management Automation, Data Analy lity (VR), 3D Printing, 50	tecture & Infrastructure, Cloud in Industry 4.0 rtics, Artificial Intelligence and I i Net, and Cyber Security, Disru le, Industry 4.0 Value Creation	Machine Learning, ptive Inventions
Module 3	Role of Data, Information, and Knowledge in Industry 4.0 World and Application Domains of Industry 4.0	Assignment	Report Writing on Application Domains of Industry 4.0 with reference to any industry as specified below.	12 Hours
Sharing Knowledge in C <b>3.2</b> Application Domain	ce-Based View of a Firm, Dat Organizations, Linked with Clo	oud Computing. ig, Design and Developm	Resource for Organizations, Hanest, Sales, Inventory Managen	_
Module 4	Opportunities, Challenges and Strategies in Industry	Experiential Learning	Interacting with industry technology experts and submitting report on	12 Hours
	<del></del>	76	·	

4.0 and Future	Strategies for Competing in an
Industrial Revolution	Industry 4.0 World, Skills for
5.0	Workers in the Industry 4.0 &
	5.0

**4.1** Opportunities and Challenges, Strategies for Competing in an Industry 4.0 World, Skills for Workers in the Industry 4.0

4.2 Concept on Future Industrial Revolution (Industry 5.0), Future of Works and Skills for Workers in the Industry 5.0 era

#### Targeted Application & Tools that can be used:

This course helps in understanding contemporary aspects of innovation for business to sustain in the market.

# Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Assignment based on self-study topics (Articles & Case Analysis as shown in the course handouts)

Course Code: MBA3170	Course Title: PYTHON Type of Course: OPEN ELECTIVE L- P-T-C 3 0 0 (Theory with Embedded Lab)				0	3
Version No.	1.0					
Course Pre- requisites	Fundamentals of Business Analytics is inclusive Critical thinking, reasoning, and analytical skills	•		Course. In	addition,	
Anti-requisites	NIL					

Course Description	The course "Python" is designed to equip participants with essential Python programming			
	skills tailored for data-driven decision-making. This comprehensive course spans from			
	fundamental programming concepts to advanced analytical techniques, enabling learners to			
	effectively utilize Python in a business analytics context. Participants will gain hands-on			
	experience with Python's data handling and visualization libraries, building a strong foundation			
	in data structures, control statements, functions, and packages. The curriculum includes data			
	wrangling, exploratory data analysis, and visualization techniques, empowering learners to			
	interpret complex datasets and present insights effectively. Additionally, the course delves			
	into specialized topics such as web scraping, API integration, sentiment analysis, and time-			
	series trend modeling, preparing participants to tackle real-world challenges in data analytics.			
	Through a blend of theory, practical exercises, and real-world case studies, participants will			
	develop competencies to analyze trends, extract actionable insights, and create impactful			
	visualizations. The course culminates in a capstone project, providing an opportunity to			
	integrate learned concepts and showcase practical skills in a business scenario.			
Course Objectives	The Python course develops EMPLOYABILITY SKILLS through EXPERIENTIAL LEARNING methods			
-				
Course Out Comes	On successful completion of the course the students shall be able to:			
	CO1 Demonstrate basic programming skills in Python for business analytics.			
	CO2 Solve messy data problems across data structures using Pandas and Numpy			
	CO3 Develop Visualization using Python			
	CO4 Solve a business problem using NLP			

#### 

Python and Programming concepts, Exploring IDE , Syntax, semantics and tokens, Data types and operations, Data structures and CRUD, Execution flow control statement, Loop and Loop control statement, Functions, Packages.

Module 2	Packages For Data	Assignment and Case	Data Wrangling	12 Hours
Module 2	Handling	Study	Data wrangiing	12 Hours

Introduction to Numpy and Pandas, Numpy Fundamentals, Pandas Basics, Data Wrangling with Pandas, Advanced Numpy for Data handling, Exploratory data analysis with pandas

Data Wrangling and transformation, Integrating Numpy and Pandas, Real World case studies and projects on sales data

Module 3	Packages For Data	Experiential Learning	Modelling Project	12 Hours
····oudic o	Visualization	Experiencial Learning	modelling i roject	

Matplot lib plotting functions, modules and toolkits, plots and charts using matplot lib Matplot lib exercises, Pandas plotting functions, modules and extensions, plots and charts using matplot lib, Pandas plotting exercises, Introduction to Seaborn, plots and charts using Seaborn, Plotly and other packages.

Module 4	Packages For Trends And	Experiential Learning	Capstone Project	12 Hours
	Sentiments			

Data Collection using webscraping, API integration, surveys and feedbacks, Natural Language Processing, Emotion detection, Sentiment Analysis, Time series analysis, understanding trends for predictive modelling, Case study on website traffic trend, Capstone project

# **List of Experiments (Embedded Lab - Student's self-study): These experiments can be done using** Python - NumPy, Pandas and Matplotlib

Lab Experiments are to be conducted on the following topics

Experiment1: Understanding data types

Experiment2:The basics of Numpy Arrays

Experiment3:Computation on arrays

Experiment4:Introduction to pandas

Experiment5:Data indexing and selection

Experiment6: Working with Strings, Date and Time

Experiment7:Data Wrangling

Experiment8:Modelling

The Experiments can be reorganized as per requirements. If Project based learning is implemented the above sequence acts as a scope and not actual experiment

# Targeted Application & Tools that can be used:

Using NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit learn or any other relevant Libraries to arrive at a model, students can employ the dataset which shall either be publicly available or primary in nature. The learners can use any algorithm for modelling

# Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

The MT & ET evaluations will be based on the two Individual Projects on modelling with presentation. The Project and the Presentation will have 70:30 split in the evaluation in this respect.

The Project should be original and should be using any dataset either secondary or primary source. However, the process of analysis and the conclusions should be original. The Project shall foot on either classification or regression problems. Project can include self-learning components depending on the project but should be related to Business and Analytics domain. Students are encouraged to choose topics relevant to their specialization and are not allowed to take up any project that is not related to Business.
