## 17. Practical/Skill based Courses – Internships/Thesis/Dissertation/Capstone Project Work/Portfolio/Mini project:

Practical / Skill based Courses like internship, project work, capstone project, research project / dissertation, and such similar courses, where the pedagogy does not lend itself to a typical L-T-P-C Structure as defined in Clause 5.1 of the Academic Regulations, are simply assigned the number of Credits based on the quantum of work / effort required to fulfill the learning objectives and outcomes prescribed for the concerned Courses. Such courses are referred to as Non-Teaching Credit Courses (NTCC). These Courses are designed to provide students with hands-on experience and skills essential for their professional development. These courses aim to equip students with abilities in problem identification, root cause analysis, problem-solving, innovation, and design thinking through industry exposure and project-based learning. The expected outcomes are first level proficiency in problem solving and design thinking skills to better equip Law graduates for their professional careers. The method of evaluation and grading for the Practical / Skill based Courses shall be prescribed and approved by the concerned Departmental Academic Committee (refer Annexure A of the Academic Regulations). The same shall be prescribed in the Course Handout.

#### 17.1 Internship

A student may undergo an internship for a period of 20 weeks in an industry / company or Courts during the Semester Break, subject to the following conditions:

- **17.1.1** The Internship shall be in conducted in accordance with the Internship Policy prescribed by the University from time to time.
- **17.1.2** The number of Internships available for the concerned Academic Term. Further, the available number of internships shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry / Company or academic / research institution providing the Internship, as stated in Sub-Clause 2.6.1.2 above.
- 17.1.3 A student may opt for Internship in an Industry / Company or Courts as per her / his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her / his own. Provided further, that the Industry / Company or Courts offering such Internship confirms to the University that the Internship shall be conducted in accordance with the Program Regulations and Internship Policy of the University.
- **17.1.4** A student selected for an Internship in an industry / company or Courts shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.

#### 17.2 Dissertation

A student has to complete their Dissertation during the final year in the university under the supervision of the allotted faculties or as per the rules of the University Department(s) as an equivalence of Capstone Project, subject to the following conditions:

- 5.1.1 The Dissertation shall be approved by the concerned Dean and be carried out under the guidance of a faculty member.
- 5.1.2 The Dissertation shall confirms in accordance with the Program Regulations and requirements of the University.

Description	practice of constitutional law in India. The course provides a critical look at the development of constitutional law, and the bearing that these developments have on ome of the grave political questions of our times. This course intends to familiarise the students with knowledge on Fundamental Rights, Fundamental Duties, the Directive Principles of State Policy. The course will be largely structured around a critical reading of court judgments, supplemented at times with critical commentary. We will place the study of legal doctrines within the framework of contemporary disputes, and will engage the class in discussion about how to apply the doctrines to real problems. Constitutional Law in itself considered to be the coundation and basis for all laws in India. Consequently, this course will lay down the foundations that every present law student and future lawyer requires.

## Course Code: Course Title: Society and Law 4 0 0 4 BAL4002 L- T- P-C **Type of Course:** Liberal Discipline Core and Theory only Constitutional law Course Prerequisites Nil **Anti-requisites Course Description** Law is a common yet distinct aspect of everyday life in modern societies. This course examines the central features of law as a social institution and as a feature of popular culture. We will explore the nature of law as a set of social systems, central actors in the systems, legal reasoning, and the relationship of the legal form and reasoning to social change. The course emphasizes the relationship between the internal logic of legal devices and economic, political and social processes. Emphasis is placed upon developing a perspective which views law as a practical resource, a mechanism for handling the widest range of unspecified social issues, problems, and conflicts, and at the same time, as a set of shared representations and aspirations. We will explore the range of experiences of law for its ministers (lawyers, judges, law enforcement agents and administrators) as well as for its supplicants (citizens, plaintiffs, defendants). A set of topics has been selected to develop understanding of the situational and systemic demands within which actors in the legal system operate and perform their roles; at the same time, will try to discover systematic patterns in the uses and consequences of law. Throughout the course there is concern for understanding what we mean by legality and the rule of law. Course Objectives This course is designed to improve the learners' Employability Skills by using Participative Learning techniques. Course Out Comes On successful completion of the course the students shall be able to: **CO1**- To provide an extensive career-oriented course for achieving proficiency in the Law and Society. Course Description	It aims to provide a comprehensive understanding of the recent legal reforms and innovations introduced in the Indian criminal justice system. This new legislative framework seeks to address the evolving needs of society, enhance the efficiency and effectiveness of legal processes, and ensure the protection of citizens' rights. By studying BNSS 2023, students and legal professionals can gain insights into the modern principles and methodologies adopted to tackle contemporary criminal issues. The study encompasses analyzing the procedural improvements, understanding the rationale behind new legal provisions, and evaluating the impact of these changes on the overall justice delivery system. Additionally, it promotes critical thinking and fosters a deeper appreciation for the balance between safeguarding individual freedoms and maintaining public order. This holistic approach not only equips learners with updated legal knowledge but also prepares them to contribute effectively to the legal field, advocating for justice and the rule of law in India.						
Course Outcomes	On successful completion of the course the students shall be able to:  CO1- To provide students with a comprehensive understanding of the Bharatiya Nagarik Suraksha Sanhita 2023 and its significance within the Indian legal system.  CO2- To compare and contrast BNSS, 2023 with the previous Criminal Procedure Code (CrPC), 1973.  CO3- To study the rights of the accused and victims under BNSS, 2023.  CO4- To explore the procedural aspects of investigation, arrest, bail, and trial under BNSS 2023.  CO5- To understand the roles and responsibilities of law enforcement agencies and the judiciary under the new code.  CO6- To develop legal research skills and the ability to interpret and apply statutory provisionseffectively.

Course Description	The Labour and Industrial Law course offers an insightful exploration into various legislative frameworks governing labor relations within industrial settings. Students delve into ranging from wage regulations and payment structures to social security provisions and maternity benefits. Through a comprehensive examination of these laws, students gain a profound understanding of the rights and responsibilities of both employers and employees. The course is designed to foster critical thinking and analytical skills, the course emphasizes an examination of labor legislations from constitutional perspectives. By dissecting legal frameworks through this lens, students develop the ability to assess the implications of labor laws within the broader context of constitutional principles and societal values. The Labour and Industrial Law course equips students with the knowledge and skills necessary to navigate the complex landscape of labor relations, empowering them to contribute meaningfully to the legal and regulatory

Course Description	The course will look into the Statutory interpretation is the process by which legislative instruments are given meaning so that they can be understood and applied. This subject will systematically examine the body of law that is relevant when determining the intention of Parliament as expressed in legislative instruments. The rules, approaches and practices required by statute or developed at common law are considered and applied to both state and federal legislation. In addition to developing students, interpretation skills the subject will also focus on legal research and opinion writing. The course will familiarize students with the way interpretation of statutes is done in the country. It will equip students to gain a basic understanding of the legal system, the institutions, the nature of legal rules, the technique of legal and logical reasoning and analysis. The course focuses on path of students to legal studies from the point of view of concepts which expose to the guiding principles and applicable doctrines applicable for understanding the subject. This course also deals with legal and judicial process which equip with the intellectual tools necessary to properly conceptualize and analyze Law relating to interpretation and the principles of Legislation.							
Course Objectives	The objective of the course is <b>Skill Development</b> of students by using <b>Experiential Learning</b> techniques.

Course Description	The purpose of this course is to introduce the topic of biodiversity conservation, the course aims to develop the ability of students to analyze ethical issues through the incorporation of case discussion and case writing. The ethical analysis of biodiversity conservation requires an inquiry into past, present, and possible future frameworks for conservation, and their ethical, social, economic, legal, political, and ecological implications. It also requires recognition of the fact that social and cultural values influence the research and adoption of certain conservation tools and methods over others, as much as biodiversity and ecosystem conditions drive social and cultural changes.							
Course Objective	This course is designed to improve the learners' <b>Employability Skills</b> by using <b>Experiential Learning</b> techniques. The students would be assessed on the basis of group assignments and Case Study Presentation.

Course Description	It aims to provide a comprehensive understanding of the recent legal reforms and innovations introduced in the Indian criminal justice system. This new legislative framework seeks to address the evolving needs of society, enhance the efficiency and effectiveness of legal processes, and ensure the protection of citizens rights. By delving into BNSS 2023, students and legal professionals can gain insights into the modern principles and methodologies adopted to tackle contemporary criminal issues. The study encompasses analyzing the procedural improvements, understanding the rationale behind new legal provisions, and evaluating the impact of these changes on the overall justice delivery system. Additionally, it promotes critical thinking and fosters a deeper appreciation for the balance between safeguarding individual freedoms and maintaining public order. This holistic approach not only equips learners with updated legal knowledge but also prepares them to contribute effectively to the legal field, advocating for justice and the rule of law in India.

Course Description	This course explores the intersection of artificial intelligence (Artificial Intelligence) and law, examining how emerging Artificial Intelligence technologies interact with legal principles, regulatory frameworks, and ethical considerations. It provides an indepth analysis of global Artificial Intelligence regulations, legal aspects such as liability, intellectual property, and criminal justice, as well as future challenges in Artificial Intelligence governance. Through a comparative study of international approaches, students will develop a critical understanding of Artificial Intelligence's legal implications and its role in shaping modern societies.							
Course Objective	<ul> <li>This course is designed to improve the learners' Employability Skills by using Experiential Learningtechniques. By the end of this course, students will:</li> <li>1. Develop a foundational understanding of Artificial Intelligence technologies and their interaction with legal systems.</li> <li>2. Examine and compare national and international Artificial Intelligence regulations, assessing their effectiveness and challenges.</li> <li>3. Investigate key legal concerns such as liability, intellectual property, privacy, and criminal justice, along with ethical considerations.</li> <li>4. Formulate informed legal and policy recommendations to address Artificial Intelligence's regulatory and governance challenges.</li> </ul>							
Course Out				able to:				
Comes	On successful completion of the course the students shall be able to:  CO1 Compare and evaluate Artificial Intelligence regulatory frameworks and policies across different countries  CO2 Examine Key Legal Issues Related To Artificial Intelligence And Propose Solutions Within Existing Legal Frameworks.  CO3 Identify and Analyze Current And Emerging Legal Trends Affecting The Artificial Intelligence Industry.  CO4 Understand the core technology underlying the modern development of artificial intelligence, the existing and newly developing legal and regulatory frameworks that might apply to the development and use of artificial intelligence  CO5 Identify and analyze some of the core legal and ethical issues at play in the development, deployment and use of artificial intelligence capabilities across a range of contexts and use cases							
Course Content:								
Module 1	Fundamentals of Artificial Intelligence	CO1	Lectures Conceptual Discussions	•	& 10	Session	ıs	

Introduction To Artificial Intelligence – History, Evolution, And Key Concepts; Types Of Artificial Intelligence – Narrow Artificial Intelligence, General Artificial Intelligence, And Superintelligence; Machine Learning, Deep Learning, And Neural Networks – An Overview; Artificial Intelligence Technologies – Natural Language Processing, Computer Vision, Robotics; Artificial Intelligence Applications In Governance, Healthcare, Finance, And Law; The Role Of Data In Artificial Intelligence –

Big Data, Algorithmic Decision-Making, And Bias; Challenges And Limitations Of Artificial Intelligence – Explain, Ability, Accountability, And Control

Module 2	Legal Frameworks for Artificial Intelligence	(C()2	Case-Based Learning	12 Sessions
----------	--	-------	------------------------	-------------

Overview Of Global Artificial Intelligence Regulations – UN, OECD, And G7 Frameworks; Comparative Study: EU Artificial Intelligence Act, UK Artificial Intelligence Strategy, Indian Artificial Intelligence Strategy, Chinese Artificial Intelligence Regulations; Sector-Specific Artificial Intelligence Regulations – Healthcare, Finance, And Autonomous Vehicles; Liability In Artificial Intelligence Systems – Product Liability, Civil And Criminal Responsibility; Regulatory Challenges – Compliance, Enforcement, And Global Harmonization

Module 3	Artificial Intelligence and Legal Aspects	CO3	Problem-Based Learning, Simulations & Experiential Learning	14 Sessions
----------	---	-----	---	-------------

Artificial Intelligence And Legal Personality – Can Artificial Intelligence Have Rights And Duties;

Artificial Intelligence And Intellectual Property – Copyright, Patents, And Artificial Intelligence-Generated Works;

Artificial Intelligence In The Criminal Justice System – Predictive Policing, Bias In Artificial Intelligence Sentencing;

Artificial Intelligence And Privacy Laws – Data Protection, Gdpr, And Artificial Intelligence-Driven Surveillance;

Artificial Intelligence And Contract Law – Smart Contracts And Automated Decision-Making;

Artificial Intelligence In Dispute Resolution – Online Dispute Resolution And Artificial Intelligence In Courts:

Artificial Intelligence in Administrative Law – Government Use of Artificial Intelligence in Public Decision-Making

Module 4	Operation of Artificial Intelligence and technology in the legal sphere and its impact	( '( )4	Lectures & Discussions	12 Sessions
----------	--	---------	---------------------------	-------------

Documenting and scrutinizing the operation of Artificial Intelligence And Tech In The Legal Sphere; Analysing Emerging Legal Issues In Artificial Intelligence Deployment In The Legal Sector Legal Personhood – Accountability And Responsibility

The Impact Of Artificial Intelligence On Rights And Liberties Broadly – (Use Cases: Predictive Algorithms, Predictive Policing)

Artificial Intelligence Crimes; Artificial Intelligence's Interference With The Due Process And Access To Justice; Artificial Intelligence's Interference With Democracy; Artificial Intelligence's Interference With The Rule Of Law

Module 5	Ethical and Future Considerations	ICO5	Research-Oriented Approach	12 Sessions
----------	--------------------------------------	------	-------------------------------	-------------

Artificial Intelligence Ethics – Justice & Fairness, Bias And Discrimination In Artificial Intelligence; Privacy & Surveillance

Artificial Intelligence And Human Rights – Right To Explanation, Digital Autonomy, And Artificial Intelligence's Impact On Freedoms;

Artificial Intelligence and Democracy – Disinformation, Artificial Intelligence-Generated Content, And Political Manipulation;

The Future Of Artificial Intelligence Regulation – Global Cooperation And Emerging Trends;Balancing Innovation, Ethics, And Legal Control Of Artificial Intelligence

	The course on Election Laws provides an in-depth understanding of the legal and constitutional framework governing the electoral process in India. It examines the intricate relationship between democracy and elections, focusing on the mechanisms and laws that ensure free and fair elections. The course explores the roles and responsibilities of the Election Commission, electoral disputes, and the legal provisions laid down in the Representation of People Act. It also delves into contemporary issues such as state funding, electoral reforms, and the emerging concept of political accountability. Students will analyze the nuances of voting rights, qualifications and disqualifications of candidates, and electoral offences. The course emphasizes the importance of electoral reforms and the evolving dynamics of democracy, empowering students to critically assess the challenges and reforms in the Indian electoral system. Through a comprehensive study of election laws, students will develop the skills necessary to contribute to legal and policy discourses on electoral practices and reforms.
