PART A - PROGRAM REGULATIONS

1. Vision & Mission of the University and the School / Department

1.1 Vision of the University

To be a Value-driven Global University, excelling beyond peers and creating professionals of integrity and character, having concern and care for society.

1.2 Mission of the University

- Commit to be an innovative and inclusive institution by seeking excellence in teaching, research and knowledge-transfer.
- Pursue Research and Development and its dissemination to the community, at large.
- Create, sustain and apply learning in an interdisciplinary environment with consideration for ethical,
 ecological and economic aspects of nation building.
- Provide knowledge-based technological support and services to the industry in its growth and development.
- To impart globally-applicable skill-sets to students through flexible course offerings and support industry's requirement and inculcate a spirit of new-venture creation.

1.3 Vision of Presidency- School of Design

To become a value-based, Innovation-driven School of Design, transforming students into visionary designers, who shape the world with creative and socially sustainable solutions.

1.4 Mission of Presidency- School of Design

- Inspire and train students to be creative Thinkers and Designers.
- Empower students with design knowledge to address social, technical and economic challenges with innovative solutions.
- Sensitize students to embrace lifelong learning in a technology-enabled environment.
- Foster strategic alliances between Society and Academia for Research and its practical application.
- Instill Entrepreneurial and Leadership Skills to address social, environmental and community needs.

2. Preamble to the Program Regulations and Curriculum

This is the subset of Academic Regulations and it is to be followed as a requirement for the award of **B.Des** degree.

The Curriculum is designed to take into the factors listed in the Choice Based Credit System (CBCS) with focus on Social immersion, Project Based Learning, Studio Based Courses, Workshops, Field visits, Interdisiplinary Projects, International Immersion, Live Projects, Internship and Portfolio to enable the

students to become eligible and fully equipped for employment in industries, choose higher studies or entrepreneurship.

In exercise of the powers conferred by and in discharge of duties assigned under the relevant provision(s) of the Act, Statutes and Academic Regulations of the University, the Academic Council hereby makes the following Regulations.

3. Short Title and Applicability

- a. These Regulations shall be called the **Bachelor of Design** Degree Program Regulations and Curriculum 2024-2028.
- b. These Regulations are subject to, and pursuant to the Academic Regulations.
- c. These Regulations shall be applicable to the ongoing Bachelor of Design Degree Programs of the 2024-2028 batch, and to all other Bachelor of Design Degree Programs which may be introduced in future.
- d. These Regulations shall supersede all the earlier **Bachelor of Design** Degree Program Regulations and Curriculum, along with all the amendments thereto.
- e. These Regulations shall come into force from the Academic Year 2024-2025.

4. Definitions

In these Regulations, unless the context otherwise requires:

- a. "Academic Calendar" means the schedule of academic and miscellaneous events as approved by the Vice Chancellor;
- b. "Academic Council" means the Academic Council of the University;
- c. "Academic Regulations" means the Academic Regulations, of the University;
- d. "Academic Term" means a Semester or Summer Term;
- e. "Act" means the Presidency University Act, 2013;
- f. "AICTE" means All India Council for Technical Education;
- g. "Basket" means a group of courses bundled together based on the nature/type of the course;
- h. "BOE" means the Board of Examinations of the University;
- i. "BOG" means the Board of Governors of the University;
- j. "BOM" means the Board of Management of the University;
- k. "BOS" means the Board of Studies of a particular Department/Program of Study of the University;
- I. "CGPA" means Cumulative Grade Point Average as defined in the Academic Regulations;
- m. "Clause" means the duly numbered Clause, with Sub-Clauses included, if any, of these Regulations;
- n. "COE" means the Controller of Examinations of the University;

- o. "Course In Charge" means the teacher/faculty member responsible for developing and organising the delivery of the Course;
- p. "Course Instructor" means the teacher/faculty member responsible for teaching and evaluation of a Course;
- q. "Course" means a specific subject usually identified by its Course-code and Course-title, with specified credits and syllabus/course-description, a set of references, taught by some teacher(s)/course-instructor(s) to a specific class (group of students) during a specific Academic Term;
- r. "Curriculum Structure" means the Curriculum governing a specific Degree Program offered by the University, and, includes the set of Baskets of Courses along with minimum credit requirements to be earned under each basket for a degree/degree with specialization/minor/honours in addition to the relevant details of the Courses and Course catalogues (which describes the Course content and other important information about the Course). Any specific requirements for a particular program may be brought into the Curriculum structure of the specific program and relevant approvals should be taken from the BOS and Academic Council at that time.
- s. "DAC" means the Departmental Academic Committee of a concerned Department/Program of Study of the University;
- t. "Dean" means the Dean / Director of the concerned School;
- u. "Degree Program" includes all Degree Programs;
- v. "Department" means the Department offering the degree Program(s) / Course(s) / School offering the concerned Degree Programs / other Administrative Offices;
- w. "Discipline" means specialization or branch of B.Tech. Degree Program;
- x. "HOD" means the Head of the concerned Department;
- y. "Specialization Incharge" means the person who is responsible for each specialization;
- z. "L-T-P-C" means Lecture-Tutorial-Practical-Credit refers to the teaching learning periods and the credit associated;
- aa. "MOOC" means Massive Open Online Courses;
- bb. "MOU" means the Memorandum of Understanding;
- cc. "NPTEL" means National Program on Technology Enhanced Learning;
- dd. "Parent Department" means the department that offers the Degree Program that a student undergoes;
- ee. "Program Head" means the administrative head of a particular Degree Program/s;
- ff. "Program Regulations" means the Bachelor of Design Degree Program Regulations and Curriculum, 2024-2028;

- gg. "Program" means the Bachelor of Design (B.Des.) Degree Program;
- hh. "PSOD" means the Presidency School of Design;
- ii. "Registrar" means the Registrar of the University;
- ij. "School" means a constituent institution of the University established for monitoring, supervising and guiding, teaching, training and research activities in broadly related fields of studies;
- kk. "Section" means the duly numbered Section, with Clauses included in that Section, of these Regulations;
- II. "SGPA" means the Semester Grade Point Average as defined in the Academic Regulations;
- mm. "Statutes" means the Statutes of Presidency University;
- nn. "Sub-Clause" means the duly numbered Sub-Clause of these Program Regulations;
- oo. "Summer Term" means an additional Academic Term conducted during the summer break (typically in June-July) for a duration of about eight (08) calendar weeks, with a minimum of thirty (30) University teaching days;
- pp. "SWAYAM" means Study Webs of Active Learning for Young Aspiring Minds.
- qq. "UGC" means University Grant Commission;
- rr. "University" means Presidency University, Bengaluru; and
- ss. "Vice Chancellor" means the Vice Chancellor of the University.

5. Program Description

The **Bachelor of Design** Degree Program Regulations and Curriculum 2024-2028 are subject to, and, pursuant to the Academic Regulations. These Program Regulations shall be applicable to the following ongoing **Bachelor of Design (B.Des)** Degree Programs of 2024-2028 offered by the Presidency School of Design (PSOD) with the following Specialisation:

- 1. Fashion Design
- 2. Communication Design
- 3. Product Design
- 4. Space Design
- 5. Game Design
- 5.1 These Program Regulations shall be applicable to other similar Specialisations, which may be introduced in future.
- 5.2 These Regulations may evolve and get amended or modified or changed through appropriate approvals from the Academic Council, from time to time, and shall be binding on all concerned.

5.3 The effect of periodic amendments or changes in the Program Regulations, on the students admitted in earlier years, shall be dealt with appropriately and carefully, so as to ensure that those students are not subjected to any unfair situation whatsoever, although they are required to conform to these revised Program Regulations, without any undue favour or considerations.

6. Minimum and Maximum Duration

- 6.1 **Bachelor of Design** Degree Program is a Four-Year, Full-Time Semester based program. The minimum duration of the B.Des. Program is four (04) years and each year comprises of two academic Semesters (Odd and Even Semesters) and hence the duration of the **B.Des**. program is eight (08) Semesters.
- 6.2 A student who for whatever reason is not able to complete the Program within the normal period or the minimum duration (number of years) prescribed for the Program, may be allowed a period of two years beyond the normal period to complete the mandatory minimum credits requirement as prescribed by the concerned Program Regulations and Curriculum. In general, the permissible maximum duration (number of years) for completion of Program is 'N' + 2 years, where 'N' stands for the normal or minimum duration (number of years) for completion of the concerned Program as prescribed by the concerned Program Regulations and Curriculum.
- 6.3 The time taken by the student to improve Grades/CGPA, and in case of temporary withdrawal/rejoining (Refer to Clause **Error! Reference source not found.** of Academic Regulations), shall be counted in the permissible maximum duration for completion of a Program.
- 6.4 In exceptional circumstances, such as temporary withdrawal for medical exigencies where there is a prolonged hospitalization and/or treatment, as certified through hospital/medical records, women students requiring extended maternity break (certified by registered medical practitioner), and, outstanding sportspersons representing the University/State/India requiring extended time to participate in National/International sports events, a further extension of one (01) year may be granted on the approval of the Academic Council.
- 6.5 The enrolment of the student who fails to complete the mandatory requirements for the award of the concerned Degree (refer Section 19.Error! Reference source not found. of Academic Regulations) in the prescribed maximum duration (Clauses 18.1 and 18.2 of Academic Regulations 2025), shall stand terminated and no Degree shall be awarded.

7 Programme Educational Objectives (PEO)

After four years of successful completion of the program, the graduates shall be able to:

- **PEO 1** Become a professional Designer in the area of Fashion design, Space design, Product design, Communication Design and Game Design .
- **PEO 2** Engage in active research in the specialized domain of Design.
- **PEO 3** Evolve as an Entrepreneur/Consultant/Design Practitioner.

8 Programme Outcomes (PO) and Programme Specific Outcomes (PSO)

8.1 Programme Outcomes (PO)

On successful completion of the Program, the students shall be able to:

- **PO 1** Apply knowledge of fundamental principles of design.
- **PO 2** Design and conduct experiments, as well as analyse and interpret design data.
- PO 3 Design a system, program, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- **PO 4** Operate on multidisciplinary teams.
- **PO 5** Identify, formulate and solve design problems.
- **PO 6** Demonstrate professional and ethical responsibility.
- **PO 7** Interpret effectively.
- PO 8 Evaluate the impact of design solutions in a global, economic, environmental and societal context.
- PO 9 Recognize the need for and an ability to engage in lifelong design learning.
- PO 10 Identify contemporary design issues.
- **PO 11** Apply the techniques, skills, and modern design tools necessary for design practice.
- **PO 12** Apply the design principles and management principles to manage the project of multidisciplinary nature.

8.2 Program Specific Outcomes (PSOs):

On successful completion of the Program, the students shall be able to:

- **PSO 1** Identify and examine raw materials and constituents required for design innovation and development
- **PSO 2** Demonstrate skills in ideation, conceptualization and production of design solutions for manufacturing organizations and design houses
- **PSO 3** Apply creative skills for the production of sustainable, social and environmental-friendly products and processes

9 Admission Criteria (as per the concerned Statutory Body)

The University admissions shall be open to all persons irrespective of caste, class, creed, gender or nation. All admissions shall be made on the basis of merit in the qualifying examinations; Provided that forty percent of the admissions in all Programs of the University shall be reserved for the students of Karnataka State and admissions shall be made through a Common Entrance Examination conducted by

the State Government or its agency and seats shall be allotted as per the merit and reservation policy of the State Government from time to time.

The admission criteria to the B.Des Program is listed in the following Sub-Clauses:

- 9.1 An applicant who has successfully completed a Pre-University course or Senior Secondary School course (+2) or equivalent such as (11+1), 'A' level in Senior School Leaving Certificate Course from a recognized University of India or outside or from Senior Secondary Board or equivalent, constituted or recognized by the Union or by the State Government of that Country for the purpose of issue of qualifying certificate on successful completion of the course, may apply for and be admitted into the course.
- 9.2 Provided further, the applicant can be from any discipline and must have completed and passed the Pre-University/Higher Secondary / (10+2) / (11+1) examination, and, the applicant must have obtained a minimum of 45% of the total marks (40% in case of candidates belonging to the Reserved Category as classified by the Government of Karnataka) in these subjects taken together.
- 9.3 The applicant must clear the Design Entrance Examinations of the University.
- 9.4 Reservation for the SC/ST and other backward classes shall be made in accordance with the directives issued by the Government of Karnataka from time to time.
- 9.5 Admissions are offered to Foreign Nationals and Indians living abroad in accordance with the rules applicable for such admission, issued from time to time, by the Government of India.
- 9.6 Candidates must fulfil the medical standards required for admission as prescribed by the University.
- 9.7 If, at any time after admission, it is found that a candidate had not in fact fulfilled all the requirements stipulated in the offer of admission, in any form whatsoever, including possible misinformation and any other falsification, the Registrar shall report the matter to the Board of Management (BOM), recommending revoking the admission of the candidate.
- 9.8 The decision of the BOM regarding the admissions is final and binding.

10 Lateral Entry / Transfer Students requirements

- 10.1.1 The University admits students directly to the second year (3rd Semester) of the B.Des Degree Program as per the provisions and/or regulations of the Government of Karnataka pertaining to the "Lateral Entry" scheme announced by the Government from time to time. Further, the general conditions and rules governing the provision of Lateral Entry is listed in the following Sub-Clauses:
- 10.1.2 Admission to 2nd year (3rd Semester) of the B.Des Degree program shall be open to the candidates who are holders of a 3-year Diploma in their respective domains (or equivalent

- qualification as recognized by the University), who have secured not less than forty-five percent (45%) marks in the final year examination (fifth and sixth semesters of the Diploma Program) in the appropriate degree related to the respective domains. In case of SC/ST and OBC candidates from Karnataka the minimum marks for eligibility shall be forty percent (40%).
- 10.1.3 Provided further that, candidates seeking Lateral Entry may be required to complete specified bridge courses as prescribed by the University. Such bridge courses, if any, shall not be included in the CGPA computations.
- 10.1.4 All the existing Regulations and Policies of the University shall be binding on all the students admitted to the Program through the provision of "Lateral Entry".
- 10.1.5 The Course requirements prescribed for the 1st Year of the B.Des Program shall be waived for the student(s) admitted through "Lateral Entry" and the duration of the B.Des Program for such students is three (03) years, commencing from the 3rd Semester (commencement of the 2nd Year) of the B.Des Program and culminating with the 8th Semester (end of the 4th Year) of the B.Des Program.
- 10.1.6 The existing Program Regulations of the concerned Program to which the student is admitted through the provision of "Lateral Entry" shall be binding on the student with effect from the 3rd Semester of the Program. i.e., the Program Structure and Curriculum from the 3rd to 8th Semesters of the Program concerned shall be binding on the student admitted through "Lateral Entry". Further, any revisions/ amendments made to the Program Regulations thereafter, shall be binding on all the students of the concerned Program.
- 10.1.7 All the Courses (and the corresponding number of Credits) prescribed for the 1st Year of the concerned B.Des Program shall be waived for the student(s) admitted to that B.Des Program through "Lateral Entry". Further, the Minimum Credit Requirements for the award of the B.Des Degree in the concerned Program shall be prescribed/ calculated as follows:
 - The Minimum Credit Requirements for the award of the Bachelor of Design (B.Des) Degree prescribed by the concerned Bachelor of Design Degree Program Regulations and Curriculum, 2024-2028, minus the number of Credits prescribed for the 1st Year (total number of Credits prescribed for the 1st and 2nd Semesters) of the B.Des Program.
 - For instance, if the Minimum Credit Requirements for the award of the Bachelor of Design (B.Des) Degree as prescribed by the Program Regulations for B.Des is "N" Credits, and, if the total credits prescribed in the 1st Year (total credits of the 1st and 2nd Semesters) of the Program concerned is "M" Credits, then the Minimum Credit Requirements for the award of the B.Des for a student who joins the Program through the provision of the Lateral Entry, shall be "N M" Credits.
- 10.1.8 Further, no other waiver except the Courses prescribed for the 1st year of the B.Des Program of the University shall be permissible for students joining the B.Des Program through the provision of Lateral Entry.

10.2 Transfer of student(s) from another recognized University to the 2nd year (3rd Semester) of the B.Des. Program of the University

A student who has completed the 1st Year (i.e., passed in all the Courses/Subjects prescribed for the 1st Year) of the B.Des Four-Year Degree Program from another recognized University, may be permitted to transfer to the 2nd Year (3rd Semester) of the B.Des Program of the University as per the rules and guidelines prescribed in the following Sub-Clauses:

- 10.2.1 The concerned student fulfils the criteria specified in Sub-Clauses 10.1.1, 10.1.2 and 10.1.3
- 10.2.2 The student shall submit the Application for Transfer along with a non-refundable Application Fee (as prescribed by the University from time to time) to the University no later than July of the concerned year for admission to the 2nd Year (3rd Semester) B.Des Program commencing on August on the year concerned.
- 10.2.3 The student shall submit copies of the respective Marks Cards/Grade Sheets/Certificates along with the Application for Transfer.
- 10.2.4 The transfer may be provided on the condition that the Courses and Credits completed by the concerned student in the 1st Year of the B.Des Four year Degree Program from the concerned University, are declared equivalent and acceptable by a Committee constituted by the Vice Chancellor for this purpose. Further, the Committee may also prescribe the Courses and Credits the concerned students shall have to mandatorily complete, if admitted to the 2nd Year of the B.Des Program of the University.
- 10.2.5 The Specialization allotted to the student concerned shall be the decision of the University and binding on the student.

11 Change of Specialization

A student admitted to a particular Specialization of the B.Des Program will normally continue studying in that Specialization till the completion of the program. However, the University reserves the right to provide the option for a change of Specialization, or not to provide the option for a change of Specialization, at the beginning of 3rd semester of the B.Des Program to eligible students in accordance with the following rules and guidelines: framed by the University from time to time.

- 11.1 Only those students, who have passed all the Courses prescribed in the 1st Year of the B.Des Program and had obtained a CGPA of not less than 6.50 at the end of the 2nd semester, shall be eligible for consideration for a change of Specialization.
- 11.2 A change in specialization, if permitted, will take effect from the beginning of the 3rd Semester of the B.Des program. Application for this change must be obtained within the first week after

- announcement of results. After this period, no requests for a change in specialization will be considered under any circumstances.
- 11.3 The student(s) provided with the change of specialization shall fully adhere to and comply with the Program Regulations of the concerned specialization of the B.Des Program, the Fee Policy pertaining to that specialization of the B.Des Program, and, all other rules pertaining to the changed specialization existing at the time.
- 11.4 Change of specialization once made shall be final and binding on the student. No student shall be permitted, under any circumstances, to refuse the change of specialization offered.
- 11.5 The eligible student may be allowed a change in specialization, strictly in order of inter se merit, subject to the conditions given below:
 - 11.5.1 The actual number of students in the third Semester in any particular specialization to which the transfer is to be made, should not exceed the intake fixed by the University for the concerned specialization; and,
 - 11.5.2 The actual number of students in any specialization from which transfer is being sought does not fall below 75% of the total intake fixed by the University for the concerned specialization.

The process of change of specialization shall be completed within the first fifteen days of Registration for the 3rd Semester of the B.Des Program.

- 12 Specific Regulations regarding Assessment and Evaluation (including the Assessment Details of NTCC Courses, Weightages of Continuous Assessment and End Term Examination for various Course Categories)
 - 12.1. The academic performance evaluation of a student in a Course shall be according to the University Letter Grading System based on the class performance distribution in the Course.
 - 12.2. Academic performance evaluation of every registered student in every Course registered by the student is carried out through various components of Assessments spread across the Semester. The nature of components of Continuous Assessments and the weightage given to each component of Continuous Assessments (refer Clause Error! Reference source not found. of Academic regulation) shall be clearly defined in the Course Plan for every Course, and approved by the DAC.
 - 12.3. Format of the End-Term examination shall be specified in the Course Plan.
 - 12.4. Grading is the process of rewarding the students for their overall performance in each Course.

 The University follows the system of Relative Grading with statistical approach to classify the students based on the relative performance of the students registered in the concerned Course except in the following cases:

- Non-Teaching Credit Courses (NTCC)
- Courses with a class strength less than 30

Absolute grading method may be adopted, where necessary with prior approval of concerned DAC.

Grading shall be done at the end of the Academic Term by considering the aggregate performance of the student in all components of Assessments prescribed for the Course. Letter Grades (Clause Error! Reference source not found. of academic regulations) shall be awarded to a student based on her/his overall performance relative to the class performance distribution in the concerned Course. These Letter Grades not only indicate a qualitative assessment of the student's performance but also carry a quantitative (numeric) equivalent called the Grade Point.

The components of continuous assessments, weightage for each component and the method of evaluation shall be assigned considering the nature of the Courses in terms of the pedagogy and outcomes.

12.5 Assessment Components and Weightage

Table 1: Assessment Components and Weightage for different category of Courses					
Nature of Course and Structure	Evaluation Component	Weightage			
Lecture-based Course	Continuous	50%			
L component in the L-T-P-C Structure is predominant (more than 1)	Assessments End Term Examination	50%			
(Examples 2-0-0-2, 3-0-0-3, etc.)	Liiu Teriii Examination	30%			
P component in the L-T-P-C Structure is predominant (Examples: 1-0-0-1, 2-0-4-4, 1-0-4-3, 2-0-2-3, 0-0-4-2 Etc.)	Continuous Assessments	100%			
Skill based Courses like Internship, Dissertation / Social Engagement and such similar Non-Teaching Credit Courses, where the pedagogy does not lend itself to a typical L-T-P-C structure	Guidelines for the assessmential components for the various types es, Courses, with recommended weightage				

The exact weightages of Evaluation Components shall be clearly specified in the concerned PRC and respective Course Plan.

Normally, for Practice/Skill based Courses, without a defined credit structure (L–T–P) [NTCC], but with assigned Credits (as defined in Clause Error! Reference source not found. of the Academic Regulations),

the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous Assessments, the distribution of weightage among such components, and the method of evaluation/assessment, shall be as decided and indicated in the Course Plan/PRC. The same shall be approved by the respective DAC.

12.6 Minimum Performance Criteria:

12.6.1 Theory only Course and Lab/Practice Embedded Theory Course

A student shall satisfy the following minimum performance criteria to be eligible to earn the credits towards the concerned Course:

- a. A student must obtain a minimum of 30% of the total marks/weightage assigned to the End Term Examinations in the concerned Course.
- b. The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of the components of Continuous Assessments, Mid Term Examinations and End Term Examinations in the concerned Course.

12.6.2 Integrated/Lab/Practice/Project Based Courses

The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of all assessment components in the concerned Course.

- 12.6.3 A student who fails to meet the minimum performance criteria listed above in a Course shall be declared as "Fail" and given "F" Grade in the concerned Course. For theory Courses, the student shall have to re-appear in the "Make-Up Examinations" as scheduled by the University in any subsequent semester, or, re-appear in the End Term Examinations of the same Course when it is scheduled at the end of the following Semester or Summer Term, if offered. The marks obtained in the Continuous Assessments (other than the End Term Examination) shall be carried forward and be included in computing the final grade, if the student secures the minimum requirements (as per Sub- Clauses 12.6.1, Error! Reference source not found. of Academic Regulations) in the "Make-Up Examinations" of the concerned Course. Further, the student has an option to re-register for the Course and clear the same in the summer term/ subsequent semester if he/she wishes to do so, provided the Course is offered.
- **12.7** Normally, for Practice/Skill based Courses, without a defined credit structure (L T P), but with assigned Credits, (as defined in Clause 5.2 of the Academic Regulations), the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous Assessments, the distribution of weightage among such components, and the method of

evaluation/assessment shall be prescribed in the concerned Course Handout. There shall be no component of End Term Final Examinations for such Courses.

In case any exception is required for a particular course, where the methods of assessment prescribed in the specific regulations mentioned above in Sub-Clauses 12.5, 12.6 and 12.7 are not suitable/ relevant for assessing the performance in the concerned Course, the DAC shall recommend the appropriate method of assessment for the approval by the BOS.

13 Additional clarifications - Rules and Guidelines for Transfer of Credits from MOOC, etc. – Note: These are covered in Academic Regulations

The University allows students to acquire credits from other Indian or foreign institutions and/or Massive Open Online Course (MOOC) platforms, subject to prior approval. These credits may be transferred and counted toward fulfilling the minimum credit requirements for the award of a degree. The process of transfer of credits is governed by the following rules and guidelines:

- 13.1 The transfer of credits shall be examined and recommended by the Equivalence Committee (Refer Error! Reference source not found. of academic regulations) and approved by the Dean Academics.
- 13.2 Students may earn credits from other Indian or foreign Universities/Institutions with which the University has an MOU, and that MOU shall have specific provisions, rules and guidelines for transfer of credits. These transferred credits shall be counted towards the minimum credit requirements for the award of the degree.
 - 13.3 Students may earn credits by registering for Online Courses offered by Study Web of Active Learning by Young and Aspiring Minds (SWAYAM) and National Program on Technology Enhanced Learning (NPTEL), or other such recognized Bodies/ Universities/Institutions as approved by the concerned BOS and Academic Council from time to time. The concerned School/Parent Department shall publish/include the approved list of Courses and the rules and guidelines governing such transfer of credits of the concerned Program from time to time. The Rules and Guidelines for the transfer of credits specifically from the Online Courses conducted by SWAYAM/ NPTEL/ other approved MOOCs are as stated in the following Sub-Clauses:
 - A student may complete SWAYAM/NPTEL/other approved MOOCs as mentioned in Clause Error! Reference source not found. (as per academic regulations) and transfer equivalent credits to partially or fully complete the mandatory credit requirements of Discipline Elective Courses and/or the mandatory credit requirements of Open Elective Courses as prescribed in the concerned Curriculum Structure. However, it is the sole responsibility of the student to complete the mandatory credit requirements of the Discipline Elective Courses and the Open

- Elective Courses as prescribed by the Curriculum Structure of the concerned Program.
- 13.3.2 SWAYAM/NPTEL/ other approved MOOCs as mentioned in Clause Error! Reference source not found. (as per academic regulations) shall be approved by the concerned Board of Studies and placed (as Annexures) in the concerned PRC.
- 13.3.3 Parent Departments may release a list of SWAYAM/NPTEL/other approved MOOCs for Pre-Registration as per schedule in the Academic Calendar or through University Notification to this effect.
- 13.3.4 Students may Pre-Register for the SWAYAM/NPTEL/other approved MOOCs in the respective Departments and register for the same Courses as per the schedule announced by respective Online Course Offering body/institute/ university.
- 13.3.5 A student shall request for transfer of credits only from such approved Courses as mentioned in Sub-Clause Error! Reference source not found. above.
- 13.3.6 SWAYAM/NPTEL/other approved MOOCs Courses are considered for transfer of credits only if the concerned student has successfully completed the SWAYAM/NPTEL/other approved MOOCs and obtained a certificate of successful/satisfactory completion.
- 13.3.7 A student who has successfully completed the approved SWAYAM/NPTEL/ other approved MOOCs and wants to avail the provision of transfer of equivalent credits, must submit the original Certificate of Completion, or such similar authorized documents to the HOD concerned, with a written request for the transfer of the equivalent credits. On verification of the Certificates/Documents and approval by the HOD concerned, the Course(s) and equivalent Credits shall forwarded to the COE for processing of results of the concerned Academic Term.
- 13.3.8 The credit equivalence of the SWAYAM/NPTEL/other approved MOOCs are based on Course durations and/or as recommended by the Course offering body/institute/university. The Credit Equivalence mapped to SWAYAM/ NPTEL approved Courses based on Course durations for transfer of credits is summarised in Table shown below. The Grade will be calculated from the marks received by the Absolute Grading Table Error! Reference source not found.. in the academic regulations.

Table 2: Durations and Credit Equivalence for Transfer of Credits from SWAYAM-NPTEL/ other								
approved MOOC Co	urses							
SI. No. Course Duration Credit Equivalence								

1	4 Weeks	1 Credit
2	8 Weeks	2 Credits
3	12 Weeks	3 Credits

- 13.3.9 The maximum permissible number of credits that a student may request for credit transfer from MOOCs shall not exceed 20% of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of the concerned Degree.
- 13.3.10 The University shall not reimburse any fees/expense; a student may incur for the SWAYAM/NPTEL/other approved MOOCs.
- 13.4 The maximum number of credits that can be transferred by a student shall be limited to forty percent (40%) of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of the concerned Degree. However, the grades obtained in the Courses transferred from other Institutions/MOOCs, as mentioned in this Section (13.0), shall not be included in the calculation of the CGPA.

14. Structure / Component with Credit Requirements Course Baskets & Minimum Basket wise Credit Requirements

The B.Des Program Structure (2024-2028) totalling 160 credits. Table 3 summarizes the type of baskets, number of courses under each basket and the associated credits that are mandatorily required for the completion of the Degree.

Table 3: B.Des 2024-2028: Summary of Mandatory Courses and Minimum Credit							
Contrib	Contribution from various Baskets						
SI. No.	TYPE OF COURSES	CREDITS					
1	Humanities, Social Sciences & Management Sciences (HS)	5					
2	Basic Design (BD)	16					
3	Design Studies (DS)	16					
4	Core (Professional) Course (CC)	45					
5	Design Project (Professional Practice) Course (DPC)	8					
6	Discipline (Professional) Elective (DE)	36					
7	Open Elective (OE)	9					
8	Professional Practice (PP) I and II	20					

9	Personal and Professional Skills (PPS)	5					
TOTAL							
The mandatory minimum credits required for the award of the B.Des Degree is 160 Credits							

In the entire Program, the practical and skill based course component contribute to an extent of approximately 92% out of the total credits of 160 for B.Des program of four years' duration.

15. Minimum Total Credit Requirements of Award of Degree

As per the AICTE guidelines, a minimum of 160 credits is required for the award of a B.Des. degree.

16. Other Specific Requirements for Award of Degree, if any, as prescribed by the Statutory Bodies,

- 16.1 The award of the Degree shall be recommended by the Board of Examinations and approved by the Academic Council and Board of Management of the University.
- 16.2 A student shall be declared to be eligible for the award of the concerned Degree if she/he:
 - a. Fulfilled the Minimum Credit Requirements and the Minimum Credits requirements under various baskets;
 - b. Secure a minimum CGPA of 4.50 in the concerned Program at the end of the Semester/Academic Term in which she/he completes all the requirements for the award of the Degree as specified in Sub-Clause a of Academic Regulations;
 - c. No dues to the University, Departments, Hostels, Library, and any other such Centers/ Departments of the University; and
 - d. No disciplinary action is pending against her/him.
- 17. Curriculum Structure Basket Wise Course List (not Semester Wise)

Practical / Skill based Courses – Professional Practice Courses (Internships / Thesis / Dissertation / Capstone Project Work / Portfolio / Mini project)

Practical / Skill based Courses like internship, project work, capstone project, research project / dissertation, and such similar courses, where the pedagogy does not lend itself to a typical L-T-P-C Structure as defined in Clause 5.1 of the Academic Regulations, are simply assigned the number of Credits based on the quantum of work / effort required to fulfill the learning objectives and outcomes prescribed for the concerned Courses. Such courses are referred to as Non-Teaching Credit Courses

(NTCC). These Courses are designed to provide students with hands-on experience and skills essential for their professional development. These courses aim to equip students with abilities in problem identification, root cause analysis, problem-solving, innovation, and design thinking through industry exposure and project-based learning. The expected outcomes are first level proficiency in problem solving and design thinking skills to better equip B.Des. graduates for their professional careers. The method of evaluation and grading for the Practical / Skill based Courses shall be prescribed and approved by the concerned Departmental Academic Committee (refer Annexure A of the Academic Regulations, 2025). The same shall be prescribed in the Course Plan.

18.1 Internship/ Professional Practice

- 18.1.1. The Internship/Professional Practice Program shall be in conducted in accordance with the Internship Policy prescribed by the University from time to time.
- 18.1.2 The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable/ stipulated by the concerned Industry/ Company for award of the Internship to a student.
- 18.1.3 The number of Internship/Professional Practice available for the concerned Academic Term. Further, the available number of internships shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry/ Company providing the Internship, as stated in Sub-Clause 18.1.2 above.
- 18.1.4. A student may opt for Internship/Professional Practice in an Industry/Company of her/his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her/his own. Provided further, that the Industry/ Company offering such Internship confirms to the University that the Internship program shall be conducted in accordance with the Program Regulations and Internship Policy of the University.
- 18.1.5. A student selected for an Internship in an Industry/ Company shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.
- 18.1.6. Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

18.1.7. Professional Practice -I

Professional Practice -I is a 8 Credit Course. This first level practice-based course is conducted after the 6th Semester of the B.Des Program, during the summer break (usually June – July), in accordance with the guidelines mentioned above from 18.1.1 to 18.1.6.

A student may undergo an Internship Program for a period of **8 – 12** weeks Depending on Specilazation in an Industry/ Company,

18.1.8 Professional Practice – II

Professional Practice - II is an intensive practice based course with 12 Credits offered during the final (4^{th}) year of the B.Des Program. Students may register for Professional Practice – II in the 8^{th} Semester of the B.Des Program, in accordance with the guidelines mentioned below from 18.2 to 18.4. A student may undergo an Internship Program for a period of 12 - 16 weeks Depending on Specilazation in an Industry/ Company.

18.2 Project Work

- 18.2.1 A student may do an extensive Project Work in an Industry/ Company/ Research Laboratory or the University Department(s), subject to the following conditions:
- 18.2.2 The Project Work shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.
- 18.2.3 The student may do the Project Work in an Industry/ Company/ Research Laboratory of her/his choice subject to the above-mentioned condition (Sub-Clause 18.2.1). Provided further, the Industry/ Company/ Research Laboratory offering such project work confirms to the University that the Project Work will be conducted in accordance with the Program Regulations and requirements of the University.
- 18.2.4 Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

18.3 Capstone Project/Portfolio

A student may undergo a Capstone Project/Portfolio for a period of 12 weeks in an industry / company or academic / research institution in the 8th Semester as applicable, subject to the following conditions:

- 18.3.1 The Capstone Project shall be in conducted in accordance with the Capstone Project/Portfolio Policy prescribed by the University from time to time.
- 18.3.2 The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable / stipulated by the concerned Industry / Company or academic / research institution for award of the Capstone Project/Portfolio to a student.
- 18.3.3 The number of Capstone Project/ Portfolio available for the concerned Academic Term. Further, the available number of Capstone Project / Portfolio shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry / Company or academic / research institution providing the Capstone Project/ Portfolio, as stated in Sub-Clause 18.3.2 above.

- 18.3.4 A student may opt for Capstone Project/Portfolio in an Industry / Company or academic / research institution of her / his choice, subject to the condition that the concerned student takes the responsibility to arrange the I Capstone Project on her / his own. Provided further, that the Industry / Company or academic / research institution offering such Capstone Project/porfolio confirms to the University that the Capstone Project shall be conducted in accordance with the Program Regulations and Internship Policy of the University.
- 18.3.5 A student selected for a Capstone Project/ Portfolio in an industry / company or academic / research institution shall adhere to all the rules and guidelines prescribed in the Capstone Project Policy of the University.
- 18.3.6 Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

18.3 Research Project / Dissertation

A student may opt to do a Research Project / Dissertation for a period of 12 weeks in an Industry / Company or academic / research institution or the University Department(s) as an equivalence of Capstone Project, subject to the following conditions:

- **18.3.1** The Research Project / Dissertation shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.
- **18.3.1** Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

The student may do the Research Project / Dissertation in an Industry / Company or academic / research institution of her / his choice subject to the above mentioned condition (Sub-Clause 18.4.1). Provided further, that the Industry / Company or academic / research institution offering such Research Project / Dissertation confirms to the University that the Research Project / Dissertation work will be conducted in accordance with the Program Regulations and requirements of the University.

20. Open Electives

Open Electives are the courses offered by any Department/School of the University. The primary objective of offering Open Electives is to provide interdisciplinary/ transdisciplinary learning experiences. The outcome is a graduate with a fair exposure to disciplines beyond the chosen Branch in the B.Des Program.

Open Electives offered by any Department/School of the University are listed in the Course Structure under the Open Elective category and offered to students of any Department including the parent Department/School.

The Course details and method of evaluation shall be clearly prescribed in the concerned Course Handout.

20.1 List of Open Electives to be offered by the School / Department (Separately for ODD and EVEN Semesters.

23. Course Catalogue

Course Catalogue of all Courses Listed including the Courses Offered by other School / Department and Discipline / Programme Electives – Course Code, Course Name, Prerequisite, Anti-requisite, Course Description, Course Outcome, Course Content (with Blooms Level, CO, No. of Contact Hours), Reference Resources.

Sample Catalogue is given below for reference:

Course Code DES1007	Course Title: Elements and Principles of Design Type of Course: 1] Program Core 2] Laboratory Integrated	L-T-P-C	2	0	4	4						
Version No.	1.0	1		1	П							
Course Pre- requisites	Basic Drawing skills											
Anti-requisites	NIL											
Course Description	A firm understanding of design fundamental be a successful designer the student median and apply techniques of imaging. Understanding of design fundamental learn and use to interpret their design. Recognition, Study and analysis of Electron Develop skills to organize these elemental design practice. Realization and application of the elemental conceptual and visual nature of the conceptual nature of the c	nust compring to commitals, principle solving idents and principle ments and principle ments and the course of the	ehend nunica ples a eas. Princi inciple princi	d the Eler te a mess nd guide iples of C es of des ples of de es the stu	ments and sage to the lines that seesign. esign. udents to design.	Principles of eir audience. tudents can ply into their						
Course Objective	The objective of the course is familiarize the learners with the concepts Elements and Prinicples of Design and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.											

Course Outcomes	On successful completion of the course the students shall be able to:					
	Define the basic terminology of Elements and Principles of design.					
	Identify good con	npositional Principles	5.			
	Classify the desig	Classify the design principles to manage simple project of multidisciplinary nature.				
	Illustrate skills such as simple drawing, painting and rendering skills to compose 2-dimensional designs.					
	Demonstrate understanding of contemporary design issues through exploration of synthesis of content, problem solving and creativity.					
	Generate ideas by using elements and Principles of Design.					
Course Content:						
	Introduction to	Assignment	Observations			
Module 1	Elements Of	Case study	Illustrations	6 Classes		
	Design.	Documentation	Visual Journal			
Tonics						

Introduction and overview of Elements of Design.

Definition and Content: Dot, Line, Shape, Form, Colour, Texture. Theoretical and Practical Application.

Observations and discussions on Good Compositions.

Module 2	Detailed Study of Lines,	Assignment	Illustrations	8 Classes
Wiodule 2	Shapes, Forms.	Documentation	Visual Journal	o Classes

Topics:

Types of Lines- Vertical Lines, Horizontal Lines, Thick/Thin lines, Zig –zag lines, etc.

Use of Graphite Pencils, water proof ink and Pens.

Shading Techniques: Hatching, Cross hatching, Stippling, smudging by using pencils and pens.

Different types of Shapes and Forms: Geometrical, Natural, Abstract: Theoretical and Practical Application.

Understanding of Lights and Shadows: One light source, various light sources on different materials.

Module 3 Principles of Presentation Illustrations 6 Classes Design Documentation Visual Journal	Module 3				6 Classes
--	----------	--	--	--	-----------

Topics:

Introduction and overview of Principles of Design: Emphasis, Balance, Unity, Hierarchy, Rhythm, Proportion.

Types of Balance: Symmetrical, Asymmetrical and Radial.

Unity: Proximity, Repetition, Alignment, Variety.

Study on good compositional design ideas by using Elements of Design.				
	Color Theory	Assignment	Explorations	
Module 4	and Color	Case Study	Presentations	8 Classes
Schemes.		Documentation	Visual Journal	

Introduction to Colour and Properties of Colour: Hue, Value and Chroma/Intensity.

Colour Wheel: Primary, Secondary and Tertiary Colours. Cool colours and warm Colours.

Colour Schemes: Complementary, Monochromatic, Analogous, Neutrals, Pastels. Tints and shades.

Psychological effects of Colours.

Additive and subtractive colour theories/light and pigment theories – features and application

Module 5 Identification and Classification of Textures	Assignment Documentation	Explorations Visual Journal	8 Classes
---	---------------------------	-----------------------------	-----------

Topics:

Study and Development of Various Textures: Tactile and Visual Textures.

Proportion: Scale, Study of Human Figures.

Rhythm: Movements, Illusions

Study of Metamorphosis in Design: Theoretical and Practical Application.

List of Practical Tasks:

Task 1: Depiction of elements and principles of design.

Level 1: Develop a composition by using various lines and depict Emphasis.

Level 2: Illustrate two different objects by using one light source and shadow effect.

Task 2: Illustration and Representation of geometrical and natural shapes.

Level 1: Cut paper Collage: By using geometrical shapes depict all 4 types of Balance.

Level 2: Take Inspirations from the nature and illustrate a composition using alignment.

Task 3: Practice on color mediums and mixed media.

Level 1: Illustrate buildings and still objects using mixed media.

Level 2: Develop a Colour wheel and depict primary, secondary and tertiary colours

Task 4: Representation of colors and textures.

Level 1: Color Schemes and Tints, Tones and shades by using Poster colors.

Level 2: Creation of various textures by using natural and artificial materials.

Task 5: Depiction of Elements and Principles of Design

Level 1: Create a portrait using monochromatic scheme/Achromatic scheme using poster colors.

Level 2: Develop a composition by using Proportion and scale.

Task 6: Idea generation

Level 1: illusion composition by using polychromatic color scheme.

Level 2: Explore new ideas inspired by nature and various material objects transform into another object.

Targeted Application and Tools that can be used:

Abode Illustrator Draw: Practicing and Creation of digital drawings and composition.

Pencil Sketch App: Illustrating and rendering sketches and drawings.

Pics art App: Creation and Rendering of Composition and sketches.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Student shall be developing and create a theme board presentation by using elements and principles of design in their final project work.

Course	Course Title: Des	ign Ideation and Storytelling Across					
Code:	Media			1	0	2	3
ENG2021			L- T-P- C				
	Type of Course: S	School Core: Theory and Practical					
Version No.		1.0		•			
Course Pre- requisites		Creative thinking and basic communication skills					
Anti- requisites		NIL					
Course Description		This course is designed to help design students to attain awareness of art and design through ages. It will enable design students to communicate design stories effectively and through sound communication strategies. The skills will enhance their communication with their colleagues, clients and stakeholders. The modules of the course will focus on ancient Greek and Roman art, architecture through theatre and mythological narratives. The students will be enriched on artistic movements through different eras and literary texts that capture art and artists. The students will be exposed to graphic story telling formats and will be equipped with story telling and designing through digital storytelling platforms.					
Course Objective		This course is designed to improve the design students creative and communication skills through exposure to diverse literary, art and design related content. It also prepares them to effectively communicate their design content through presentations. The course will enhance the 'EMPLOYABILITY SKILLS of the design students in, studios, textile and fashion and design industry in the corporate, media, entertainment, advertising and start-ups. by using scenario-based and project-based assignments modeled on industry related needs.					

Course Outcomes	 Relate the main features and characteristics of ancient Greek and Roman theatre with modern design Review Victorian and Modern art, design and movements Compose graphic novels / Storyboards Apply the knowledge and skills of story writing/telling in digital story writing platform 					
Module 1	Connecting Ancient Greek and Roman literary narratives with contemporary world	Visual Display/AV/Flipped classroom	Ancient art, architecture,mythology, design and the contemporary world	4L +8P 12 Classes		
	design and the layout)	oman Mythological cha rt and design	- Tragedy, Comedy, Amphith aracters and their relevance in the digital maze games	·		
Module 2	Victorian and Modernist Art and Design	Visual Displays/ Videos/Fashion shows/ Text Analysis	Victorian art, literary works, design, costumes and decor /Modernist art movements	4 L and 8 P 12 classes		
	2.1. Victorian Age - Industrial Revolution, Angel in the House- Representation of women through art and painting., Costumes and interior decors Reading text - Robert Browning - <i>My Last Duchess</i> , Excerpts from Dickens' <i>Hard Times</i> 2.2 Modern era - Modernist art movements Avant-garde movement- Impressionism, Expressionism, Cubism and Surrealism' Reading text - Excerpt from Joseph Conrad's <i>Heart of Darkness</i> (Impressionism)					
Module 3	Graphic Novels and Storyboards	Graphic Novel Reading and analysis of the texts and visuals , AV, Flipped classrooms	Graphic novel analysis and doing storyboards	3 L and 6 P 9 classes		
	Topics: 3.1. Graphic novels- Definitions. Features, Evolution, Panels and Bubbles 3.2. Anime and Manga - Cultural and social contexts 3.4. Storyboard - Concept, Ideation and creation- Canva, Pixton, Storybird					
Module 4	Presentation skills for Design	Exposition, Demonstration,	Presentation on design content	4 Land 8		

		Story telling,		12 classes
	Topics	Presentation skills

Course Pre- requisites	NIL							
Anti-requisites	NIL							
Course Description	To increase the Observation behind each observation	To increase the Observation Skills of the Students and increase the logical thinking pehind each observation						
		This course will help students to develop keen observation skills in different levels of the given situation. Adaptation and conversion of those to ideas and documenting them for further research.						
	This course is designed to be very observant not only the physical attributes but also the inner of the given object or situation and the idea behind its existence.						also	
Course Objective	The objective of the course is familiarize the learners with the concepts Elements and Prinicples of Design and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.							
Course	On successful completion of	of the course the studer	nts shall b	e ab	le to:			
Outcomes	Relate the given design structure with its initial idea.							
	Recognize the need of the potential.	given design structure i	n the soci	ety a	and its usa	ige to it	s full	
	Recognize the cultural back	ground from where the	e design s	truct	ure initial	ly origi	nated.	
	Practical component:							
	Identify the background th	ne given design structur	e.					
	Discuss the reason behind	the design structure ex	ist in the	socie	ety			
	Interpret the impact of the	design structure withi	n the soc	iety	product.			
Course Content:								
Module 1	Identification of Design	Observation report	Illustration photogra			10 H	lours	

			Visual Journal	
Topics:	<u> </u>			
Recognition of bas physical attributes	sic designs around us natural of the design.	l or manmade. Identific	cation of texture colour size	e and other
Recognition of soc structure in the so	cial importance of the given I sciety.	Design Structure. Revie	w the impact of the physic	cal design
Generating ideas a	and solutions through session	ns such as Sketching, F	Prototyping, Brainstorming	,
Module 2	Reproduction of Design and its features	Documentation	Info-graphical development Visual Journal	15 Hours
Topics:				
Introduction to De	esign Thinking and Its Stages.			
Introduction to Mo	odes and Stages of Ideations	;		
Conceptualising de Society	esign starting from Worst Po	ssible Ideas and Impro	ving to the State to accepta	ance in the
Module 3	Analysis of the Design Production	Assignment Documentation	Visual Journal Development of Documentation of the individual design	20 Hours
Topics:	<u> </u>		<u> </u>	<u> </u>
Character required	d for the design Ideation			
Using the techniqu	ie of empathy manning for Γ	Design Thinking		

Using the technique of empathy mapping for Design Thinking

Hierarchy Needs and table of Design thinking and Design Creation

Development of ideation for a given Design structure

5List of Practical Tasks:

Project No. 1: Recognition and Observation

Level 1: Recognizing the Characters of the Design and Documenting the same through Phrases and Words and Photographs

Level 2: Identification of the Characteristics and copying through Sketching the same with Perspective

Level 3: Transcending the Design to other styles of Sketches, experimenting with different colour medium

Project No. 2:

Level 1: Exploring the stages in a given Design Structure

Level 2: Exploded View of the given Design or an object

Level 3: Improvisation on the design for personalization.

Project No. 3:

Level 1: Analyzing the design Structure through its character Study.

Level 2: Applying the Empathy mapping for the design where ever needed and improvising the idea.

Level 3: Development of new Parameters to create Improvised designs and exploring the designs.

Targeted Application and Tools that can be used:

Exploration towards Design Thinking

Research work for any given Case Study

Laying the base for Portfolio Creation

Tools in the Subjects will be reading materials, Historic reviews, previous works and articles related to the Design.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules, co-relating the insights comprising of planning, strategy, creative inputs, contents by understanding the big picture and translate ideas and design concepts across all levels. Consequentially creating innovative and interactive platforms for using Design across multiple platforms, overseeing design thought process, strategy planning, research, consultation with given clients. The project shall be approved first by the course instructor before further processes are developed.

Version No.	1.2					
Course Pre- requisites	NIL					
Anti-requisites	NIL					
Course Description	Drawing for Designers is the systematic study of inditechniques. it's important to consider the different t sketching and other practical tools, depending on the create an appealing approach in Design process. The understanding on design process and students are a techniques based on different interactive and conce	raditional : e specific r : subject w ble to gain	skills li needs ill pro vario	ike drav of the p vide dif us man	ving, project t ferent	o

Course Objective	The objective of the course is to familiarize the learners with the concepts of Ideation And Observation and attain Skill Development through Experiential Learning techniques.				
Course Outcomes	On successful completion of the course the students shall be able to: Introduce the importance of Drawing for designers Demonstrate various methods of drawings and sketching Interpret the impact of the drawing based design structure within the society product. Discuss the final outcome and effectiveness of the work				
Course Content:	Module 1: Drawing for Visual Thinking Module 2 Identification of Design in order to creating various drawings Module 3 Importance of drawing techniques in Reproduction of Design and its features.				
Module 1	Drawing for Visual Thinking	Observation report	Illustrations/ photographs Visual Journal	30 Hours	

How do we see? - To discuss the basic process of seeing. Act of perception

Visual Queries: Understanding of Maps, Charts, Diagrams and other graphical designs. Discussions with suitable examples.

What We Can Easily See: To study the Visual pop up of shapes, forms, arrangements, colours and other visual elements in different contexts and backgrounds.

Module 2 Identification of Design in order to creating various drawings	Documentation	Info-graphical development Visual Journal	35 Hours
---	---------------	---	----------

Topics:

Recognition of basic designs around us natural or manmade. Identification of texture colour size and other physical attributes of the design.

Recognition of social importance of the given Design Structure. Review the impact of the physical design structure in the society.

Generating ideas and solutions through sessions such as Sketching, Prototyping, Brainstorming,

Module 3	Importance of drawing techniques in Reproduction of	Documentation	Info-graphical development Visual Journal	35 Hours
----------	---	---------------	---	----------

Design and its features.		

Introduction to Basics sketching for Design Thinking

Drawings for Design Ideations

Important of the drawing for Conceptualising design starting from Worst Possible Ideas and Improving to the State to acceptance in the Society

5List of Practical Tasks:

Project No. 1: Recognition and Observation In Drawing for Designer

Level 1: Recognizing the Characters of the Design and Documenting the same through Phrases and Words and Photographs

Level 2: Identification of the Characteristics and copying through Sketching the same with Perspective

Level 3: Transcending the Design to other styles of Sketches, experimenting with different colour medium

Project No. 2:

Module 3 Topics:	Concept Development	Assignment, Research & Documentation.	Visual Journal, Report writing & Illustrations.	12 Hrs		

The designer chooses the most promising concepts from the group of ideas and develops them further. This entails honing the concepts and evaluating their applicability, technical viability, and possible impact.

Topics relevant to "EMBLOYBILITY SKILLS": Finding an issue, a need, or an opportunity for improvement within the designer's field of competence is the first step. This could be relevant to any design field, including product design, graphic design, interior design, user experience of Identifying the need or Opportunity in Design Appreciation for Skill Development through Experiential Learning Methodologies This is attained through assessment component mentioned in course handout.

Course Pre- requisites	NIL					
Anti- requisites	NIL					
Course Description	Begin an in-depth understanding of the history, evolution, and significance of design in order to appreciate the past, be inspired in the present, and anticipate the future. Analysis and cultivation of curiosity. Recognising that, design is one of the oldest human pursuits and is not the mere result of computer technology, Appreciation of the past, being inspired in the present, and anticipating the future. The course is both conceptual (study the origination of design, nature, and evolution) and visual (learn to see rather than simply look, preparing designs accordingly). They are introduced to the meaning of design, various stages of design processes, and evolution used in design development at the intermediate level and industrial level.					
Course Objective	The objective of the course is familiarize the learners of Understanding and Design History of Design and attaction using EXPERIENTIAL LEARNING Techniques.		•			t by
Course Outcomes	On successful completion of the course the students s Recognise the evolution of design and its relationship Discuss different philosophies in design. Describe historical timelines and evolutions.			ent an	d societ	y.
	Practical component: Identify the background the given design structure.					
	Discuss the reason behind the design structure exist in	n the societ	V			
	Describe historical timelines and evolutions.		•			

Course Content:						
Module 1	Introduction to Design History and Its Implicational Significance	Assignmentand Documentation	Comparison, explanation and Visual Journal	20 Hours		
Topics:						
Understanding	past –Design evoluti	on through history and its	importance			
The origins of o	design - pre and post	-industrial revolution				
Comparison o	f design evolution fro	m the past to the [resent.				
Module 2	Design methods and Design Theory	Assignment, case studyand Documentation	Report writing, Group discussion and Visual Journal	20 Hours		
Topics:						
Introduction to	design methods, phi	losophy and fundamental	s of design methods.			
Asian visual cu	lture journal study	(case study)				
The history of	design to the modern	design theory.				
Rethinking des	ign history from an e	volutionary perspective.				
A critical review	w of design history: fr	om the individual artist to	the social agent.			
Module 3	Design issues	Assignment, Research and Documentation.	Visual Journal, Report writing and Illustrations.	10 Hours		
Topics:						
Contemporary Design- An overview						
Features and instances of the contemporary designs.						
Understanding of the current and past scenario of craft and cottage industries of Uttar Pradesh or any other state of India.						
Module 4	Introduction to Ethnography	Assignment, Research and Documentation,	Sketches and illustrations, Visual journal, mini portfolio making.	10 Hours		

An introduction to the meaning of "Ethnography".

Targeted Application and Tools that can be used:

Hands on sketching to render using mix media. Basic computer applications like MS word, Powerpoint etc.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work comprising of the artwork design creation (manual/digital method), visual journal and mini portfolio development using different boards (story, mood, color, inspiration board) method. The design shall be approved first by the course instructor before further processes are developed.

Course Code:	Course Title: Basics of Drawing Skill		2	0	4	4
(DES1015)						
	Type of Course: 1] School Core (Only Foundation Subjects)	L-T-P-C				
	2] Integrated					
Version No.	1.0	L	II.			l
Course Pre- requisites	NIL					
Anti-requisites	NIL					
Course	Purpose:					
Description	This course is to understand the techniques or	f Drawings t	hroug	sh study a	nd prac	tice.
	Abilities to be developed:					
	Understanding the Various shapes and form a observing and sketching. Ability to manipulate context of various objects including their colo	e the basics	shape			
	Nature of the course:					
	The course is based on a natural study of various forms and shapes and object specific study of proportion and composition. This will also help in visualizing many traditional forms of art techniques throughout the world. The different materials and methods based, on experimentation on those shapes and forms of drawings will help the creative visualization to be revived in terms of the ideation process in design practice.					itional ods
Course Objective	The objective of the course is familiarize the least attain Skill Development of student by using E				_	
Course Outcomes	On successful completion of the course the st	udents shall	be al	ole to:		
	1.identify different mediums and techniques	s of drawing				
	2 able to observe, visualize and visual exper Drawing.	ience throuફ	gh the	basic ele	ments o	of
	3 improve visual representation by using pe	rspectives.				
	4 able to interact with the surroundings, ma	iterials and v	/ariou	s physica	l qualitie	es
	Practical component:					
	Adaptation of traditional craft into Modern ar Products.	nd Contempo	orary	Designs a	nd end	use
Course Content: Co	Course Content: Course sensitizes the student towards visual experience. It introduces of the					

 $fundamentals\ of\ drawing\ through\ line\ as\ primary\ element.\ The\ course\ introduces\ simple\ to\ complex$

١.	•	•	es interactive and technical kn eative explorations using drav	•	
Module 1	Introduction to the fundamentals of Drawing	Assignment Demonstration and Participative learning.	Illustrations Observation and comparison Visual Journal	6 Hours	
		Documentation			
Topics:		aria simbo of duoi.co			
	verview of elements and p		eoretical and Practical Applica	rtion	
			Monochromatic colored Patt

		I	Info-graphics development	T	
	Pictorial Composition and visual outcome	Assignment	Visual Journal	12 Hours	
Module 2		Documentation			
			Development of Samples for each		
Topics:					
1.Understanding a Ratio.	bout the Space, and Picto	orial arrangement - S	Still-life Studies, Rule of third,	Golden	
•	by using pencils and pen	•	nniques: Hatching, Cross hatch ogous color, complementary a	<u> </u>	
3. Different types of Shapes and Forms: Geometrical, Natural/ organic, abstract: Theoretical and Practical Application. Understanding of Lights and Shadows: One light source, various light sources on different materials					
		Assignment	Development of Samples for each		
Module 3	Outdoor Study	Documentation	Visual Journal	12 Hours	
		Hands on Practice			
Topics:	<u> </u>	<u> </u>	<u> </u>		
Proportion. Pictoria	ıl balance, visual narratio	n, scattered object st	Balance, Unity, Hierarchy, Rhy udy, nature study understandi value- Tone, Tints and Shades		
Module 4	Perspective	Assignment Documentation	Development of Paper Patterns for estimations.	6 Hours	

Introduction to- one point, two point and three-point perspective, Arial and linear perspective, Color-Theory: Hue, Intensity. Primary, Secondary and Tertiary Colors. Cool and warm colored composition

List of Practical Tasks:

Project No. 1 Create different tonal value sheets to reflect the understanding of pencils, color pencils, water color, poster color and variety of brushes.

Level 1:

Level 2:

Project No. 2. To draw the motifs for tessellation

Level 1: Draw the motifs for tessellation through hands on drawing techniques and develop basic tessellated surface using cad skill.

Level 2: Draw the motifs to depict a theme for tessellation through hands on drawing techniques and develop basic tessellated surface using cad skill.

Project No. 3: To draw the isometric grids and its application

Level 1: To draw the isometric grid and practice 3D shapes creatively on the same using Pencils, graphite, Watercolors

Project No. 4:

Draw composition of 3D basic geometrical shapes in space using one-point perspective on paper and create rendered composition using Pencils and graphite.

Project No. 5:

Draw composition of 3D basic geometrical shapes in space using two point perspectives on paper and create rendered composition using pencils and graphite

Targeted Application and Tools that can be used:

Understanding the nature of drawing and its various application in design practice.

Tools used will be the Pencils, Graphite, Various eraser like Mono-Zero, Charcoal, Various drawing Paper like Canson, Fabriano, Ivory- 120GSM, 200GSM, 280 GSM, 300GSM etc, Watercolors and multi-colored pencil etc.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final Product which includes all or most of the art work which was taught in the Modules.

Topics relevant to "Development of Skill": Study of various objects by using different Techniques of drawing and sketching.

Some Topics from the Modules has to be shown under outdoor based practice or different interactive based activities.

Course Title: Approaches to Design Thinking
Course Code: L- T-P- 2 0 2 3
DES1009 Type of Course: School Core (Laboratory integrated)
Version No. 1.0

Course Pre- requisites	NA				
Anti-requisites	NA				
Course Description	The course aims to introduce concepts of Design thinking and orient the students towards importance of design thinking and communication, its definition and applications which re-orient the students/practitioners where focus which is otherwise directed inward toward the profession would incline it outwards toward the rest of society and the world.				
Course Objective	The objective of the course is familiarize the learners with the Approaches to Design Thinking and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.				
	On successful completion of the course the students shall be able to:				
Course Outcomes	Define and describe design thinking essentials				
Course Outcomes	Indicate grey areas in designs				
	Interpret designs with possible solutions				
Course Content:					
Module 1	Introduction to Design Thinking	Visual journal, book of essays, context-specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours	
Topics:					
Definition and intro	oduction to Desig	n Thinking			
Conceptual and cor	ntextual meaning	of Design Thinking			
Steps in Design Thi	nking				
Indian Design Policy					
Module 2	Design flaws: how not to design	Visual journal, book of essays, context-specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours	
Topics:					
Definition of design flaw and its identification					
Observational studies on design flaws in various areas of application					
Intentional designs					

Discussion and dissection of design loopholes as a universal concept

Module 3	Ancient Design Thinking	Visual journal, book of essays, context-specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours
----------	-------------------------------	---	---	----------

Cultural heritage and its inclusion in design

Discussion of heritage and repetitive sameness

Demystifying designs with metaphors

Ancient India's design thinking

Module 4	Design Evaluation	Visual journal, book of essays, context-specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours
----------	----------------------	---	---	----------

Topics:

Necessity of design evaluation

Design evaluation methods and processes involved

Universal Design Principles

Collaboration in design – multidisciplinary approach

List of Projects:

Identify design flaw in at least two cases and suggest possible solutions (logical/physical)

Identify purposeful design flaws in at least two cases and develop logical interpretations.

Develop visual narratives to at least three Universal Design Principles with two cases in each.

Identify at least two yesteryear designs and compare with their contemporary counterparts through design thinking process.

Develop a visual interpretation for any one example of collaborative design.

Targeted Application and Tools that can be used:

Design ideation and concept development for innovative projects

Research and prototype design and development based applications

Application in the field of innovative education and teaching-learning resource material design

Entrepreneurial, start-up based and management-oriented programs and projects

Revival and archival activities of ancient design literature and research therein

Focus Areas:

The topics focusing on 'Foundation' and 'Skill Development' are, Steps in Design Thinking, Observational studies on design flaws in various areas of application and Necessity of design evaluation

The topics focusing on 'Environment and Sustainability' are, Intentional designs, Discussion and dissection of design loopholes as a universal concept, Universal Design Principles and Necessity of design evaluation

Content: Students	aro oncourago	d to form group	s and initiate 'Group tinkering' in th	o M/S or Tinkoring

Content: Students are encouraged to form groups and initiate 'Group tinkering' in the W/S or Tinkering activity jointly taken-up with any outside agency/party.

List of Practical Tasks:

Task 1: Understanding Materials/objects at Workshop.

Level 1: List features and Properties of the material chosen before and after the experimentation. (Dissecting)

Level 2: Demonstrate the advantages of modifying the chosen material/object for experimentation.

Task 2: Use of recyclable organic and Urban materials/ Component

Level 1: Use simple available material to create object of everyday use.

Level 2: Use of unconventional materials to create an object and component.

Task 3: Use available ready to use (but nonfunctional for intended use) objects/component for experimentation.

Level 1: Use the product to re visit the functionality aspects by exploring and experimenting.

Level 2: Develop an alternative functional feature of an object/component.

Task 4: Experiment with non-compatible hybrid material/object formulation

Task 5: Comparative analysis on the collaborative final work, a group activity in an identified material/product experimentation process and present it as an Installation.

Level 1: Create an experimented object/component within a group and site specific installation

Level 2: Install and Create an object or component by using both organic and urban materials done in collaboration with any outside agency/group.

Targeted Application and Tools that can be used:

Application of tinkering range from flaw modification to suite local use/customer specific use.

The student mind becomes more explorative in action. All regular tools for material manipulation are to be used.

Tinkering process can lead to alternative use of product/materials thus paving way for sustainability.

Tinkering – If cultivated as way of life would enhance individual productivity and explorations (Old product-new use, New product old use, New product new use –philosophy)

Simple digital tools like Adobe, 'Turtle Art' (free software), Simple Electronic circuitry/materials, Simple material kinetics as motion objects. Products/components can be for personal or propriety applications.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Student hands-on creations, Student group Installations.

Course Code: DES1014	Course Title: Introduction to Design Ethnography Type of Course:1] Program Core 2] Laboratory only	L- T- P- C	0	0	8	4	
Version No.	1.0						
Course Pre- requisites	Contextual Understanding and Design History (DES1011)						
Anti-requisites	NIL						
Course Description	Ethnography is the systematic study of individual culture, people and exploring the cultural phenomena from the point of view of subject of the study. A common mistake made by novice design researchers is to ask users what they want from new product or service. Although this feels like the correct way to do user research, in most cases users don't know, don't care or can't articulate what they need. It is the design team's job to establish the underlying problem, identify the best solution and then validate that their solution works. Design ethnography is the first step on that journey.						

Course Objective	The objective of the course is familiarize the learners with Introduction to Design Ethnography and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.
Course Out	On successful completion of the course the students shall be able to:
Comes	Identify the culture and ethic in the given design structure.
	Discuss the reason behind the design structure exist in the society
	Interpret the impact of the design structure within the society.

Course Content:

- Task 01: Case study of Design Ethnography
- Level 1: Object study: Present object study in the form of report to depict the understanding of material from colour function of the object. With help of illustration, photograph, video and text.
- Level 2: By deconstructing the object and its form various perspective.
- Level 3: Reconstruct object by changing its preconception and association giving various example to use it unconventional.
- Task 02: Study of Object in environment: (Group activity)
- Level 1: Submit report on a system around the object. Through help of illustration, photograph, video and text.
- Level 2: Present model infographic to show the insides of level 1
- Task 03: Case on craft (Group activity)
- Level 1: Study a craft and submit detail report to understanding of stake holder, product, and material and environment(eco system). Through help of illustration, photograph, video and text.
- Level 2: Submit the detail report on your observation to improve craft or artisans life.
- Level 3: Design tools, process or product to help the artisan.
- Task 04: Study of different human in behaviour in different space.
- Level 1: Submit report on a human behaviour in various situation/space/time through help of illustration, photograph, video and text.
- Level 2: Present model infographic to show the insides of level 3
- Task 05: Study of different human in context.
- Level 1: Submit detail research report on a individual culture, people and exploring the cultural phenomena from the point of view of subject of the study. through help of illustration, photograph, video and text.
- Level 2: Present model infographic to show the insides of level 4
- Level 3: Present the critical views in the forms of report to improve the eco-system and the relevance e of the object in relevance.

Targeted Application and Tools that can be used:

In the early stages of a user-centred design project. Ethnography focuses on developing an understanding of the design problem.

Ethnographic methods (such as participant observation) could also be used to evaluate an existing design – but their true value comes from developing an early understanding of the relevant domain, audience(s), processes, goals and context(s) of use.

Tools: Camera for image and video documentation, Voice recorder.

Presentations

Explorations

14 Hours

Topics:

Module 3

Identification and Analysis: Design practice along with methods of material and design research.

Presentation

Documentation

		Assignment	Explorations	
Module 4	Study On Circular Designs	Case Study	Presentations	16 Classes
		Documentation	Visual Journal	

Topics:

Study and Development Of Various sustainable concepts, artefacts and Eco Friendly materials.

List of Practical Tasks:

Task 1: Creation of various 3D forms through Paper techniques.

Methods and

Design Research

- Level 1: Develop a form by using various Paper Manipulation Techniques.
- Level 2: Construct two different objects by using Paper Manipulation Techniques.
- Task 2: Illustration and Representation of Abstract/Organic Shapes through Clay Techniques.
- Level 1: Take Inspirations from Nature /Abstract shapes and create products.
- Level 2: Take Inspirations from Nature and Abstract shapes and create products.
- Task 3: Practice on any soft material using mixed media technique.
- Level 1: Illustrate and Design an object using any kind of soft material with mixed media.
- Level 2: Develop a designed object using mixed media techniques.
- Task 4: Representation of manipulated hard material using different methods.
- Level 1: Prepare presentations on hard material techniques and methods.
- Task 5: Idea generation
- Level 1: Explore new idea inspired by sustainable/Eco Friendly Material.

Level 2: Develop a problem solving product using any kind of Sustainable Material.
Targeted Application and Tools that can be used:
Abode Illustrator Draw: Practicing and Creation of digital drawings and composition.
Hard/Soft Materials Tools and Equipment.
Project work/Assignment: Mention the Type of Project /Assignment proposed for this course
Student shall be developing and create products using various materials in their final project work.
This course develops skills that students can apply in their design Practice.

Course Description	The use of digital tools in design has become essential, as they enhance creativity, efficiency, and teamwork. Depending on their unique requirements and the nature of the work, designers and Practitioner frequently combine various tools. Because technology and design are always interconnected, new tools are constantly being introduced, therefore it's important for students and professionals to produce more appealing works by using various digital tools.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Design Appreciation and attain Skill Development through Experiential Learning techniques.					

Course		On successful completion of the course the students shall be able to:					
Outcom	es	Define the impor	Define the importance of various digital tools and effectiveness in digital production.				
		Illustrate differen	Illustrate different digital tools and techniques for executing design concept.				
		Demonstrate diff	Demonstrate different ideas to create various digital composition.

Version No.	1.0	0						
Course Pre- requisites	ENG1002 Technical	NG1002 Technical English						
Anti-requisites	NIL							
Course Description	the course is to ena and write technical themselves in vario presentations focus	The course emphasizes on technical communication at advanced level. The purpose of the course is to enable learners to review literature in any form or any technical article and write technical reports. Extensive activities in practical sessions equip to express themselves in various forms of technical communications. Technical report writing and presentations focus on learners' area of interests and enhance their English language writing skills to communicate effectively.						
Course Objective	The objective of the course is familiarize the learners with Advanced English and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.							
Course Out Come	On successful comp	letion of the course the stude	ents shall be a	ble to	0:			
	-	Develop a critical and informed response reflectively, analytically, discursively, and creatively to their reading.						
	Communicate effec	Communicate effectively, creatively, accurately and appropriately in their writing.						
	Write technical repo	ort writing by pursuing individ	lual technical	-relat	ed inte	rests

Module 2		Writing Reviews		Classes		
Guided Notes						
In Guided Notes, the instructor provides a set of partial notes that students complete during the lecture, focusing their attention on key points.						
Sentence Stem Predictions						
In Sentence Stem Predictions (SSP), the professor presents a partial sentence that is structured to prompt students to predict select aspects of the upcoming lecture.						
Active Peading Decuments						

Active Reading Documents

Active Reading Documents (ARD) are carefully prepared forms that guide students through the process of critical and careful reading.

Practice Worksheets

Module 3	Technical Presentation	Classes

Fishbowl

In Fishbowl, students form concentric circles with a small group inside and a larger group outside. Students in the inner circle engage in an in-depth discussion, while students in the outer circle listen and critique content, logic, and group interaction.

Individual Readiness Assurance Tests

Individual Readiness Assurance Tests (IRATs) are closed-book quizzes that students complete after an out-ofclass reading, video, or other homework assignment.

Quick Write

Quick Write is a learning assessment technique where learners respond to an open-ended prompt.

Practice Worksheets

Module 4	Technical Report Writing	Classes

IRAs

When using IRAs, students complete a written response to a content-rich assignment that includes three components: Insight, Resource, and Application.

Quick Write

Quick Write is a learning assessment technique where learners respond to an open-ended prompt.

Individual Readiness Assurance Tests

Individual Readiness Assurance Tests (IRATs) are closed-book quizzes that students complete after an out-ofclass reading, video, or other homework assignment.

Targeted Application and Tools that can be used: Writing reports, Review writing, Group Discussion, Dyadic interviews, Grammarly.com

Project work/Assignment:

Contemporary Issues Journal - Assignment

In Contemporary Issues Journal (CIJ), students look for recent events or developments in the real world that are related to their coursework, then analyze these current affairs to identify the connections to course material in entries that they write in a journal.

Course Code: DES1023	Course Title: Analysis of textile materials Type of Course: Discipline Elective - Integrated	L- T-P -	1	0	4	3			
Version No.	2.0	2.0							
Course pre-requisites		Understanding of weave structures and compositions Basic knowledge about different types of fibers, yarns and fabrics							
Anti-requisites	NA	NA							
Course Description	The objective of the course is to introduce the students to various textile fibers, yarns and fabrics. It also helps the students analyze the essential and desirable properties of these materials. The course highlights various physical and chemical tests to identify different types of fibers — natural and man-made. Further, the course enables the students to understand yarn compositions, their manufacturing processes and end uses.								
Course Objective	This course is designed to familiarize the learners of materials and attain Employability by using Experience		_		•	textile			
	On successful completion of the course the studer	nts will be a	ble t	0,					
	Develop an ability to identify different textile fibre	s, yarns and	d fab	rics					
Course Outcomes	Distinguish between the fibre families and yarn categories based on intrinsic and extrinsic factors								
	Analyze the compositions and study the features of fibres, yarns and fabrics and apply the knowledge to various end uses/applications								
	Outline the manufacturing methods of fibers, yarns and fabrics through industrial learning								
Course Content:	Study of textile fibres , Study of textile yarns, Intro Classification of fabrics	Study of textile fibres , Study of textile yarns, Introduction to fabric technology,							

Module 1	Study of textile	Visual journal,	Context-relevant	14 hours
Wodale 1	fibres	observation book	Assignments, presentations.	

Topics:

Introduction to textile fibres – definition, sources, classification and properties of textile fibres. Cellulose fibres – cotton, flax, kapok, hemp, ramie - properties and end uses, protein fibres - silk, wool, properties and end uses. Regenerated cellulose fibres – viscose rayon, acetate rayon, Tencel, Modal, Bamboo, Lyocel – production, source, properties and end uses. Synthetic fibers – nylon, polyester, acrylic and mod-acrylic – properties and end uses, polyethylene, polypropylene, olefin, elastomeric fibres (spandex and lycra) – end uses

Module 2	Study of textile	Visual journal,	Context-relevant	12 hours
iviodule 2	yarns	observation book	Assignments, presentations.	12 110013

Topics:

Yarn manufacturing process for short staple fibres, spinning process – ring and open end yarn spinning, flowchart for manufacturing carded, combed yarn and folded yarn, difference between rotor, ring spinning and air jet spinning. Polymers – polymerization, degree of polymerization, different types of polymers – addition and condensation, orientation and crystallinity, characteristics of fibre forming polymers, general physical and chemical properties of fibres. Texturization – types (simplex and complex yarns) and uses, blends – types, uses of blended yarns.

Module 3	Introduction to	Visual journal,	Context-relevant	10 hours
iviodule 3	fabric technology	observation book	Assignments, presentations.	10 nours

Topics:

General Characteristics of woven fabrics and their importance – count of yarn, fabric grain, Thread density, Fabric width, Fabric weight and selvedges. Introduction on different methods of fabric formation – woven, knitted and nonwoven fabrics, properties and end uses. Woven fabric formation – weaving preparatory, objectives and brief study of processes – winding, warping, sizing, drawing and denting, weft winding, introduction to Khadi, and handloom and power loom fabrics. Classification of looms, passage of material through looms, study of primary and secondary motions, principles of shuttle less looms, multiple gripper, rapier, air jet and water looms, advantages of unconventional over conventional looms.

Module 4	Classification of	Visual journal,	Context-relevant	09 hours
iviouale 4	fabrics	observation book	Assignments, presentations.	09 Hours

Topics:

Introduction to knitting, classification, difference between warp and weft knitting, basics of weft knitting, loop diagram and properties of basic weft knitted structures, modification of weft knitted structures. Introduction and salient features of Crepe fabrics like georgette, chiffons, Extra threads, Warp and weft pile and Brocade and damask, Terry pile structures.

List of Projects:

Reports on important fabric manufacturing clusters in India and their salient features – Kanchipuram, Arni, Kumbhakonam, Chanderi, Maheshwari, Salem and Karoor, Bangalore, Mysore, Ilkal, Guledgudda, Kota, Banaras, Suhalkuchi, Santhipur, Behrampur of Orissa, Pochampalli and Panipat

Topics relevant to "Employability": Identification of textile fibres, properties, end uses, yarns and different methods of fabric formation for Employability through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Catalogue prepared by	Sandeep K.N, Asst. Professor, Fashion Design
Recommended by the Board of Studies on	5th BOS, 22.03.2022
Date of Approval by the Academic Council	18th Academic Council held on 03.08.2022

Course Code: DES2007	Course Title: Elements of Fashion Illustration					
	Type of Course: 1] Program Core 2] Integrated	L-T-P- C	1	0	4	3
Version No.	3.0					
Course Pre- requisites	NA					
Anti- requisites	NIL					
Course Description	Purpose: This course is to understand Fashion illustration and Designing process.					

The course is not just illustrating body forms or garments, but more of structured design learning. It enables the student to learn the basics of fashion illustration - drawing technique of the human figure and different mediums such as using pencil, markers, water colours, paint, digital interfaces, etc.

Nature of the course:

The course prepares the student to realize the importance of an effective research for a project, its interpretation and the needs of a client while also keeping their style intact, creating, a concept or a mood through their artistic vision. The course also helps the students to develop their individual style and prepares them to structure their design portfolios

Course Objective

The objective of the course is to familiarize the learners with the concepts of Elements of Fashion Illustration skill to analysis and attain SKILL DEVELOPMENT through **EXPERIENTIAL LEARNING** techniques

Course Outcomes

Upon successful completion of the course the students shall be able to:

Illustrate the basic body forms and proportions

Identify the head theory and postures – static and dynamic

Sketch the basic body poses and perspectives

Relate the human body in proportions relevant to fashion illustration

Select mediums to sketch and render life forms

Course Content:

		Assignment		
Module 1	Fashion figures: balance & movement	Demonstration and Participative learning.	Examples/ Demo/Assignments	18 Hours
		Documentation		

Topics:

Introduction to head-theory, croquis, balance lines, postures, proportions

Stick-figure drawings, block sketches, poses and balance illustrations.

Sketching of 8 and 10 head croquis, different poses of croquis.

Face analysis and features – sketching with face block.

Sketching of hands and legs using block sketches

Drawing from photographs/magazines/live study – with croquis and costumes

		Assignment		
Module 2	Application of art mediums	Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	19Hours

Topics:

Fleshing and rendering techniques – skin and materials

Rendering techniques using water colours

Rendering techniques using Staedtler pencils, charcoal, Marker pen, oil pastel, water colour and chalk

		Assignment		
Module 3	Fabric representation & rendering	Demonstration and Participative learning.	Examples/ Demo/Assignments	19 Hours
		Documentation		

Topics:

Textural rendering of garments and fabrics

Clothing figure – swimwear and lingerie, trouser and skirts.

Clothing figure – jackets, coats and fall layering

Traditional and contemporary outfits for men and women

		Assignment		
Module 4	Portfolio development	Demonstration and Participative learning.	Examples/ Demo/Assignments	19 Hours

Topics:

Study of artists and fashion illustrators of national and international repute

Study of seasonal trends and fashion week collection and illustration

Development of different types of boards – mood, colour, swatch, texture and inspiration

Development of look book and style books

List of Practical Tasks:

- Project No. 1: Illustrate the basic body forms and proportions.
- Project No. 2: Illustrate the basic body forms and proportions with block and line.
- Project No. 3: Illustrate the basic body with flesh figure and rendering.
- Project No. 4: Illustrate the basic body forms and proportions with different poses and style
- Project No. 5: Identify the head theory and postures static and dynamic with feature drawings phase 1
- Project No. 6: Identify the head theory and postures static and dynamic with feature drawings phase 2
- Project No. 7: Identify the head theory and postures static and dynamic with feature drawings phase 3
- Project No. 8: Identify the head theory and postures static and dynamic with feature drawings phase 4
- Project No. 9: Identify the head theory and postures static and dynamic with feature drawings with color media.
- Project No. 10: Identify the head theory and postures static and dynamic and color theory
- Project No. 11: Select mediums to sketch and render life forms (Water color)
- Project No. 12: Select mediums to sketch and render life forms (oil pastel)
- Project No. 13: Select mediums to sketch and render life forms (dry pastel)
- Project No. 14: Select mediums to sketch and render life forms (staedtler)
- Project No. 15: Select mediums to sketch and render life forms (Ink)
- Project No. 16: Select mediums to sketch and render life forms (acrylic colour)
- Project No. 17: Select mediums to sketch and render life forms and exploring in different medium of colors
- Project No. 18: Select mediums to sketch and render life forms and exploring in different medium of colors
- Project No. 19: Select mediums to sketch and render life forms and exploring in different medium of colors
- Project No. 20: Design 5 different types of illustration based on a selective theme and explore through fashion illustration
- Project No. 21: Design 5 different types of illustration based on a selective theme and explore through fashion illustration and develop record work based on the theme selected as per the ideas.
- Project No. 22: Develop inspiration mood and concept board digital
- Project No. 23: Develop inspiration mood and concept board digital with pontoon shades and updates
- Project No. 24: Develop inspiration mood and concept board digital with pontoon shades and updates
- Project No. 25: Develop inspiration mood and concept board digital with pontoon shades and updates
- Project No. 26: Design 10-5 different types of illustration based on a selective theme and explore through fashion illustration based on the theme selection.

Project No. 27: Design 10- 5 different types of illustration based on a selective theme and explore through fashion illustration based on the theme selection.

Project No. 28: Accessories rendering based on the theme selected a s add on to the illustration rendering.

Project No. 29: Accessories rendering based on the theme selected a s add on to the illustration rendering.

Project No. 30: Presentation and team work as a group or individual work on as a final garment or tangible product to be developed.

Targeted Application & Tools that can be used:

Understanding the basics of visual design and elements in fashion illustration.

In general, they will be learning about the shapes forms, and colors.

Combined to create a design with fabric rendering and flats

Tools used in fashion illustration and color media.

Topics relevant to "Skill Development":

Study of Understanding fashion illustration and techniques and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Topics:

Dart manipulation—Bustling dart, Neck line dart, Insertion of pleats in bodice, Insertion of tucks in bodice, Insertion of cowl in bodice.

		Assignment		
Module 4	Basic Garment Components & Fitting	Demonstration and Participative learning.	Examples/ Demo/Assignments	14 Hours
		Documentation		

Topics:

Skirts, Pants, Collars, Sleeves and Tailored Garments.

List of Practical Tasks:

Project No. 1: Development of Basic Bodice: Front using Muslin fabric.

Project No. 2: Development of Basic Bodice: Back Bodice using Muslin fabric.

Project No. 3: Development of Basic Bodice: Front And Back bodice using special fabric.

Project No. 4: Development of Basic Bodice: Front And Back bodice using special fabric with faster.

Project No. 5: Construction of Basic Skirt

Project No. 6: Construction of Basic Skirt with special fabric.

Project No. 7: Construction of Basic Skirt with style variation.

Project No. 8: Construction of Dart variation (Buster)

Project No. 9: Construction of Dart variation (French)

Project No. 10: Construction of Dart variation (Mid Armhole)

Project No. 11: Construction of Dart variation (shoulder)

Project No. 12: Construction of Dart variation (Neck with style line)

Project No. 13: Construction of sleeve with dart component.

- Project No. 14: Construction of puff sleeve with draping.
- Project No. 15: Construction of yokes and variations.
- Project No. 16: Construction of yokes with gathers.
- Project No. 17: Construction of yokes buster / back.
- Project No. 18: Construction of collars.
- Project No. 19: Construction of mandarin collar.
- Project No. 20: Construction of collard along with bodies.
- Project No. 21: Selection of theme based on draping techniques and develop 5 set of garment through draping techniques only.
- Project No. 22: selection of theme.
- Project No. 23: Creation of mood board, inspiration
- Project No. 24: Creation of idea, fabric. And muslin fit.
- Project No. 25: Pattern development as per the design ideas.
- Project No. 26: Mockup of through draping skill.
- Project No. 27: Presentation skills and board creation.
- Project No. 28: Presentation and photo skills Fit.
- Project No. 29: Presentation and shoot, Editing.
- Project No. 30: Presentation and presenting of two complete range of garments and accessories using advanced draping technique

Targeted Application & Tools that can be used:

Understand basic skills and techniques in positioning and pinning fabric on a dress form to develop structure of a garment/accessory design -- to support and expand the fashion design process.

Development and implementation of draping skill in designing of garments.

Generating mockups before the final design process to understand the design in 3D.

Design finalization and Presentation for the jury and evaluation.

Topics relevant to "Skill Development":

Study of Understanding of Draping and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

		Documentation	estimations.	

Topics:

women body block Armstrong method

unisexual pant body method.

pant women

basic skirt block

Introduction kids block

List of Practical Tasks:

Project No. 1: Creation of New patterns

Project No. 2Taking Measurements according to retail sizes and Couture Measurements.

Project No. 3Creation of Basic Block for upper body for men, women and Kids. (Front Back and Sleeves)

Project No. 4: Creation of Pant block

Project No. 5Creation of Basic block for Pants – Unisexual (Casual), Men, Women

Project No. 6: Pattern Correction and Manipulation.

Project No. 7Using of Slash and Spread Method.

Project No. 8: Manipulation of Single dart to double and Triple dart Series.

Project No. 9: Definition of Dart, Types of Darts, Importance of Dart Manipulations and Placements.

Project No. 10: Neckline Patterns and Seam allowance for cutting

Targeted Application & Tools that can be used:

Exposure to a wide range of patterns and their improvisation by way of case studies, client study.

Prototyping of projects in collaboration with other streams who will be acting as a client base.

Understanding the values of scales-up and scaling down project sizes without compromising on the output.

Topics relevant to "EMPLOYABILITY': MEASURMENTS OF different body types Pattern making and Adaptation Method for Employabilty through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Course Description	The course aims to emphasizes on imparting knowledge on design parameters so that students can develop new design ideas to garments and products.
Course Objective	The objective of the course is familiarize the learners with the concepts of Basics of Sewing Techniques and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.
Course Out Comes	On successful completion of the course the students shall be able to: Define the terminologies used in sewing Explain the types and functions of sewing machines Operate the sewing machine and produce basic stitches Identify of different types of stitches, seams, seam finishes & fullness.

Course Content: Sewing terminologies, parts and functions, Stitches & sewing techniques, Stitches & Seams - construction and classification, Fullness: study and development. stitching of Body blocks

	Sewing	Construction	Observations	
Module 1	terminologies, parts and	Documentation	Illustrations	10 Classes
	functions	Presentation	Visual Journal	

History of sewing and sewing machine

Introduction to sewing machine: Domestic sewing machine, Industrial sewing machine

Difference between Domestic & Industrial sewing machine, parts of a sewing machine

Varieties of industrial sewing machines- Single needle machine, double needle machine-lock stitch & chain stitch machines

Over-lock machine, sewing machine needles types, parts & functions, care and maintenance of sewing machine

care and maintenance of sewing machine

Measuring Tools, Drafting Tools, Cutting Tools Sewing Tools, Finishing Tools

Module 2	Stitches & sewing techniques	Designing, Construction Documentation	Explorations Illustrations Visual Journal	12 Classes
----------	------------------------------	---------------------------------------	---	------------

Hand needles – Size & types - Sewing Thread – Types (documentation work)

Sewing threads- function, performance, characteristics

Applications of hand stitches - Hems - Types - Uses, Corner Makings - Types and Uses, Casing -Introduction – use, Edge Finishing

Fabric Fundamentals - Types of Fabrics, Selection of Needle and thread according to fabric types

Fabric Preparation for cutting, Grain, Selvedge, Shrinkage, Straightening the fabric Grains

	Stitches & Seams	Constanting	Illustrations	
Module 3	 construction and classification 	Construction, Presentation	Observation	12 Classes
	and classification	Documentation	Visual Journal	

Stitch properties, stitch classes, stitch types – practice & documentation

Seam classes, super imposed, Lapped, bound, Flat – practice & documentation

Module 4	Fullness: study and development	Construction, Documentation, Assignment	Observation Illustrations Visual Journal	14 Classes
----------	------------------------------------	---	--	------------

Topics: Set –In Sleeve, Sleeve Cuffs, Dart less Sleeve, Sleeve Design variations. Plackets. Pocket classification

Introduction to fullness, types and uses (illustrations)

Study, analysis and development of Darts , pleats and tucks

Study, analysis and development of gathering, shirring, gores and godets

Study, analysis and development of Ruffles, Frills & Flares

Module 5	stitching of Body blocks	Designing, Construction Documentation.	Explorations Illustrations	12 Classes
			Visual Journal	

women body block, Men body block, pant stitching, Skirt stitching, Basic Garment Finishes, Use and Adaptations of Necklines, Sleeves and seam Lines in real time Garments and Basic Stitching for men womwn and Kids

List of Laboratory Tasks:

Experiment NO 1: Development of Basic Bodice with Dart Manipulation.

Level 1: Front and Back Bodice using one dart manipulation

Level 2: Front and Back Bodice using two dart manipulation.

Experiment No. 2: Construction of an upper garment with Yoke/Flanges.

Experiment No. 3. Development of collars and pockets.

Experiment No. 4. Sleeves Variations

Level 1. Develop any one sleeve variations using printed fabric.

Level 2. Develop any two sleeve variations using checks fabric.

Experiment No.5. Insertion and construction of Pleats/gathers in Skirt.

Level 1. Insertion and Construction of Pleats in Skirt.

Level 2. Insertion and Construction of Pleats & gathers in Skirts.

Experiment No.6. Construction of Dress without waistline Seams.

Experiment No. 7. Development of one complete garment with one variation.

Experiment No. 8. Experimentation on different garment construction Techniques.

Level 1. Construction of two complete outfits with sleeve, neckline variations and accessories.

Level 2. Creation of one complete range of garments and accessories using advanced garment Construction Techniques.

Targeted Application & Tools that can be used:

Student shall be able to experiment in garment construction with different fabric materials and develop understanding of Industry standard.

Topics relevant to "EMPLOYABILITY: MEASURMENTS OF different body types Basic Sewing Techniques AND Basic stitches familiarization of Sewing machine and Adaptation Method for EMPLOYABILITY through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Course Objective		The objective of the course is to familiarize the learners with the concepts of Textile Design Development and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.						
Course Outcomes	On successful comple	tion of the course the st	tudents w	/ill be a	ble to:			
	Identify different Mot	rifs and its source						
	Produce composition	s with Motif repeat sche	emes base	ed on e	nd-appl	ications	•	
	Relate elements and designs.	principles of design thro	ough outli	ne drav	ving an	d Arrang	emen	t of
	Practical component:							
	Develop traditional	craft into Modern and Co	ontempo	rary De	signs ar	nd end u	se Pro	ducts.
		Patterns , Historical Pers e Studies of Different Cu	•	_				_
		Assignment	Illustrat	ions				
Module 1	Introduction to Motifs and Patterns	Demonstration and Participative learning.	Observa compar			10 F	lours	
		Documentation	Visual J	ournal				
Topics:			1					

Introduction to Motifs and their Types, Classifications

History and Importance of Motifs in ancient cultures

Significance of the motifs in local cultures and Global understanding

Module 2	Historical Perspective of Designs and Motifs	Assignment Documentation	Info-graphics development Visual Journal Development of Samples for each	20 Hours
----------	--	---------------------------	--	----------

Topics:

Gaining Knowledge about the Traditional Contemporary Motifs and their Story

Cross cultural Motif Symbolism, Global Design Representation through Symbols, Motifs and Logos

Topics:

Exploration of Different Techniques using different Medium of Traditional and Contemporary methods of Creating

Motif Development and motif Grid techniques increase and decrease in Sizes of Motifs according to endues of the product

Case Studies of Different Cultures Traditions and Regional Impressions	Assignment Documentation	Development of Paper Patterns for estimations.	5 Hours
--	---------------------------	--	---------

Topics:

Case study on the Designers and Their Designs who have Experimented on the same.

List of Practical Tasks:

Project No. 1: Motif Development

Project No. 2: Basic motif development in different styles of Traditional Contemporary Geometric Stylized and Abstract with the colour representation.

Project No. 3: 10 Basic motif development in different styles of Traditional Contemporary Geometric Stylized and Abstract with the colour representation

Project No. 4: Developing the Sized Scale of the Motifs chosen in Manual version and producing the same on fabric

Project No. 5: Developing the Sized Scale of the Motifs chosen in Digital version and producing the same on fabric

Project No. 6: Creating the Repeat patterns on the grid and without grid with the given Set of Motifs

Project No. 7: Study of Pattern Grids in the Given Design and Documentation

Project No. 8: History and Importance of Motifs in ancient cultures

Project No. 9: Gaining Knowledge about the Traditional Contemporary Motifs and their Story

Project No.10: Exploration of Different Techniques using different Medium of Traditional and Contemporary methods of Creating motifs

Exploration of Different Techniques using different Medium of Traditional and Contemporary methods of Creating motifs

Targeted Application & Tools that can be used:

Understanding the Heritage of the Old Civilizations which have seeped down to modern times with these crafts.

Tools used will be the Hand Needle, threads, authentic Tools used for Crafts used by the artisans will be used.

Course Code: DES2112	Course Title: Clothing Culture and Communication Type of Course: Program core - Theory	L- T-P- C	1	0	4	3
Version No.	1.0		1	1		
Course pre-requisites	NA					
Anti-requisites	NA					
Course Description	The course emphasizes on clothing as a cultural and social identity that translates into an individual's identity. It elaborates the characteristics of clothing as a personality that manifests in the form of traditional and distinctive clothing. It helps the student develop this form of open communication through design intervention where the individual can express their ideas and opinions through their appearance.					
Course Objective	This course is designed to familiarize the learners with the concepts of Clothing Culture and Communication and attain Skill Development by using Participative Learning techniques.					
Course Outcomes	On successful completion of the course the students shall be able to: Identify user groups based on role and clothing status Define fashion concepts, differences and cycles of styles and fashion Discuss timelines, costumes, RTW and mass marketing of fashion					

	Review social, cultural and economic aspects of evolution of costumes						
	Illustrate costumes based on timelines, genders and social status						
Course Content:		Introduction to clothing culture, Clothing and communication, Introduction to fashion concepts, History and timeline of clothing, Illustrative studies					
Module 1	Introduction to clothing culture	l book, photo l collages, digital artworks.		10 hours			
Topics:	Л						
Understanding clothing	g and clothing culture						
Purpose of clothing pro	otection, modesty, att	raction and communicati	on				
Individual & dress, per	sonal communication	, personal expression					
Image building, psycho	ology and sociology in	fluence on clothing					
Module 2	Clothing and communication	Visual journal, sketch book, photo documentation	Sketches, illustrations, collages, digital artworks, visual documentation	10 hours			
Topics:	.1	1	ı				
Clothing culture and co	ommunication, men a	nd women clothing group	os				
Role and status of cloth	ning						
Clothing culture and co	ommunication based	on conservative					
Labour, liberal, social, o	democrat, customs ar	nd marital status					
Module 3	Introduction to fashion concepts	Visual journal, sketch book, photo documentation	Sketches, illustrations, collages, digital artworks, visual documentation	10 hours			
Topics:							
Individual and dress, p	ersonal communication	on, personal expression					
Image building, Psycho	logical and sociologic	al influence on clothing					
Fashion, fashion conce	pts, differences of fas	hion and non-fashion					
Recurring cycles of fash	nion, styles and fashic	on					
Module 4	History and timeline of	Visual journal, sketch book, photo	Sketches, illustrations, collages, digital artworks,	15 hours			
	clothing	documentation	visual documentation				

Victorian women, their dress and social position

Corset culture, fashion in 20th century

Women at war, between war and post war

Equality between men and women, sexual revolution

Marriage and family, education and employment

Evolution of different types of costumes

		Visual journal, sketch	Sketches, illustrations,	
Module 5	Illustrative studies	book, photo	collages, digital artworks,	15 hours
		documentation	visual documentation	

Topics:

Minis, maxis, unisex, fit woman, glamorous woman

Casual and formal clothing

Fashion for all ready to wear fashion, mass marketing of fashion

Youth style and fashion, teddy boy, skins, mods, hippies, punks

Taste of youth and their lifestyle

Targeted Application & Tools that can be used:

Fashion communication and design history studies

Illustration and styling for fashion communicators

Storyboarding and concept board development for design collections

Theme development for window displays and fashion events

Application of Illustrator, Photoshop, InDesign, or other visual design tools

This course develops knowledge about apparel industries and fashion sector, their structures, process lines and manufacturing systems and quality standards. Also, this course helps the students to understand basic ideas about merchandising and retail markets, which will later translate into visual merchandising and fashion retailing ideas and concept development projects.					
Course Outcomes	Identify and define Explain skills require	On successful completion of the course the students shall be able to, Identify and define various departments and activities of apparel industry Explain skills required in apparel production in industrial set-up Define various marketing and merchandising terminologies					
Course Content:							
Module 1	Introduction to apparel industry processes	Visual journal, Presentations, Assignments	Discussions and	d brainsto	rming	15 per	riods

Introduction to Apparel production, Structures of apparel business, structure of the apparel industry, global apparel manufacturing, Apparel Manufacturing set-ups as per the Product specification. Sourcing- Introduction to fabric and accessory, sourcing and its types. Sampling department- importance of sampling department, objectives, types of samples- prototype, fit sample, pp sample, size set, production sample, shipment sample. Technical design reading, Tech pack analysis & objective, creating tech pack.

Module 2	Pre-production processes in apparel manufacture	Visual journal, Presentations, Assignments	Discussions and brainstorming	15 periods
----------	--	--	-------------------------------	------------

Cutting department: Machineries, fabric spreading, pattern laying, marker preparation, sorting, numbering & bundling, fusing department- methods of fusing, fusing machines. Production department: selection of production system- progressive bundle system, unit production system, modular manufacturing, piece work. Production planning, Linear manufacturing process. Finishing & pressing department, trimming department, packing department.

	Apparel			
	accessories,	Visual journal,		
Module 3	Inspection,	Presentations,	Discussions and brainstorming	15 periods
	Packing and	Assignments		
	Dispatch			

Apparel accessories & components - fasteners, labels, support materials, decorative trims, tapes & packing materials. In process quality inspection, objectives methods, advantages, inspection methodology, final inspection, random inspection, general inspection method for shirts, trouser and kids garments. Introduction to export documentation, objectives, terminologies, principal documents, auxiliary documents, risk cover, insurance, quality control and pre-shipment inspection, export credit, short, medium, long-term credit, packing credit, negotiation of bills, payment procedures in export trade.

Targeted Application & Tools that can be used:

Production planning, scheduling and shipment activities

Merchandising, export documentation and sourcing

Domestic and global exports, buying and negotiations

Focus Areas:

Technical design reading, Tech pack analysis & objective, creating tech pack – Participative learning, focusing on skill development and employability

Finishing & pressing department, trimming department, packing department – experiential learning (industrial visits) focusing on skill development

Assignment

Construction of full length Dress with Adaptation, Working pattern and Production Patterns, with Complete Muslin Fit.

List of Laboratory Tasks:

Experiment NO 1: Development of Basic Bodice with Dart Manipulation.

Level 1: Front and Back Bodice using one dart manipulation

Level 2: Front and Back Bodice using two dart manipulation.

Experiment No. 2: Construction of an upper garment with Yoke/Flanges.

Experiment No. 3. Development of collars and pockets.

Experiment No. 4. Sleeves Variations

Level 1. Develop any one sleeve variations using printed fabric.

Level 2. Develop any two sleeve variations using checks fabric.

Experiment No.5. Insertion and construction of Pleats/gathers in Skirt.

Level 1. Insertion and Construction of Pleats in Skirt.

Level 2. Insertion and Construction of Pleats & gathers in Skirts.

Experiment No.6. Construction of Dress without waistline Seams.

Experiment No. 7. Development of one complete garment with one variation.

Experiment No. 8. Experimentation on different garment construction Techniques.

Level 1. Construction of two complete outfits with sleeve, neckline variations and accessories.

Level 2. Creation of one complete range of garments and accessories using advanced garment Construction Techniques.

Targeted Application & Tools that can be used:

Student shall be able to experiment in garment construction with different fabric materials and develop understanding of Industry standard.

- Magazines: Needle & Thread, The Apparel Times, Apparel, Vogue, Apparel Online.

Topics relevant to "EMPLOYABILITY: MEASURMENTS OF different body types Pattern making and Adaptation Method through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Catalogue prepared by	Ms. Garima Agarwal , Assistant Professor Fashion Design.
Recommended by the Board of Studies on	6th BOS held on 26 July 2022
Date of Approval by the Academic Council	18th BOS held on 3 August 2022

Course Code:	Course Title: Advanced Pattern Making 1 0 4				3	
DES2009	Type of Course: 1] Program Core - Integrated	L-T-P-				
Version No.	2.0					
Course Pre- requisites	Basics Of Pattern Making					
Anti-requisites	NIL					
Course	Purpose:					
Description	Expanding the knowledge about Body Anatomy and Confidence of the Client's Needs, by understanding their work method of the Garment Industry. Study the co-residence of Industry in Local, National and International development of Patterns. The application of different to	r comfor elation be Standard	t level. etween s for a l	To Un the va	derstand arious lev planning	els of and

	comparing them. These	techniques will be us	l in Industries and Measure sed for better understandin ehavior of Different fabric a	g of the Behavior of		
	Abilities to be developed	d:				
	Understanding consumer psychology and adapting strategies for Creating effective body Pattern to the Individual or mass Clients. In the case of Mass production this will achieved through a single Method of Pattern Making or even combining Techniques to achieve the most effective and Comfortable fit.					
	Nature of the course:					
	The course is based on Industrial Study of pattern as well as Individual study of a client's body. Clients will be allotted to the Students from whom the students will be taking on body measurement and comparing the measurement and Industry Standard Measurement					
	The students will be exposed to Different fabrics on which they will have to work on to understand the cutting methods of Pattern according to thickness of the Fabric.					
Course Objective	The objective of the course is familiarize the learners with the concepts of Advanced Pattern Making and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.					
Course Outcomes	On successful completio	n of the course the s	tudents shall be able to:			
	Recognize Measuremen	t method for persona	al body Measurement.			
	Interpret the construction Standard and personal N		erns for Men's Wear and ki	ds wear Using		
	Calculate the Fabric consembellishments and Pat	•	nt Fabrics provided with Dif	ferent surface

Application of Analysis on the Blocks With Estimation ern grading with Fabric to Cern grading with Fabric wit	Assignment Documentation Obtain the real time for the real time f	Development of Paper Patterns for estimations. Fabric estimation for the given	10 Hours en Block Pattern. apted Design

Topics:

Estimation of Fabrics for Different Patterns Such Men's Wear Women's Wear and assessing it with the actual Sample Garment.

Evaluating the Differential Measurement of fabric Estimation in calculation and actual usage of fabric which provides the Fabric Wastage estimation. This would help in recalculation and Interpretation of pattern Arrangement During Estimation and leading towards Minimal wastage of the fabric.

List of Practical Tasks:

Project No. 1: Creation of New patterns

Level 1: Creation of new pattern through Drafting and Adaptation Method

Level 2: Experimentation of Adaptation to Acquire new patterns

Level 3: Compare the Different Patterns such as upper torso patterns and lower torso Patterns to acquire different criteria for estimation.

Project No. 2: Grading of Patterns

Level 1: Preparing the Patterns for Grading using Slopers.

Level 2: Grading the given pattern Scale up and Scale Down for a given pattern.

Level 3: Elaboration of grading into nesting with either grading up of grading down.

Project No. 3: Estimation of fabrics

Level 1: Selection and formulation of a block and its adaptation for single size and Multiple size estimation

Level 2: Cutting, composing and Spreading of Patterns for estimation of Fabric.

Level 3: Comparison of fabric usage in Block patterns and Adaptation Patterns for waste Estimation.

Targeted Application & Tools that can be used:

Exposure to a wide range of patterns and their improvisation by way of case studies, client study.

Prototyping of projects in collaboration with other streams who will be acting as a client base.

Understanding the values of scales-up and scaling down project sizes without compromising on the output.

Course Objective						

The objective of the course is to familiarize the learners with the concepts of sustainability in fashion is to skill analysis and attain SKILL DEVELOPMENT through **EXPERIENTIAL LEARNING** techniques Course Upon successful completion of the course the students shall be able to: Outcomes Identify to articulate the environmental impacts of the fashion industry, including resource consumption, pollution, and waste generation. Understand and evaluate sustainable materials, understanding their benefits and limitations in the context of fashion design and production. Identify the principles of sustainable design, such as zero-waste pattern making, life cycle thinking, and circular fashion concepts, to create environmentally friendly garments. Understand the innovative technologies and practices, such as upcycling, recycling, and the use of digital design tools, to address sustainability challenges in fashion. practical skills in garment repair and maintenance, learning techniques to extend the life of clothing and reduce textile waste. Course Content: Assignmen t Introductio Demonstra n to tion and Module 1 Sustainabil Examples/ Demo/Assignments 12Hours Participativ ity in e learning. Fashion Document ation Topics: Overview and expectations, Definition and scope of sustainability in fashion, Historical context and evolution of sustainable fashion. Assignmen t Demonstra Environme ntal tion and Module 2 Examples/ Demo/Assignments 12 Hours Impacts of Participativ Fashion e learning. Document ation Topics: Environmental impacts of textile production and garment manufacturing, Water usage, pollution, and waste in the fashion industry

Module 3	Sustainabl D e Materials ti and Design Principles e D	Assignmen Demonstra tion and Participativ e learning. Document ation	Examples/ Demo/Assignments	14 Hours
----------	---	--	----------------------------	----------

Topics: Natural vs. synthetic fibers, Innovations in sustainable textiles (organic, recycled, biodegradable), Certifications and standards (e.g., GOTS, OEKO-TEX)

Documentation	Module 4	Innovations in Sustainable Fashion and Future of Sustainable Fashion	Assignment Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	14
---------------	----------	--	--	-------------------------------	----

Topics: Design strategies for sustainability, Life cycle assessment (LCA) in fashion, Zero-waste and circular des concepts and Project planning and development

List of Practical Tasks:

Life Cycle Assessment (LCA) Project

Conduct a life cycle assessment on a chosen garment to evaluate its environmental impact from production to disposal. Present findings and suggest improvements for reducing the garment's environmental footprint.

Sustainable Material Research

Research and present on different sustainable materials (e.g., organic cotton, bamboo, Tencel, recycled polyester). Compare their environmental impacts and suitability for various fashion applications.

Designing a Zero-Waste Collection

Develop a mini-collection of garments using zero-waste pattern-making techniques. Create prototypes and present the design process, highlighting how waste was minimized.

Sustainable Fashion Photography

Create a photo series that highlights sustainable fashion items, emphasizing their environmental and social benefits. Use the photos to create promotional materials or a look book for a sustainable fashion campaign.

Targeted Application & Tools that can be used:

Understand the environmental and social impacts of the fashion industry.

Learn about sustainable materials and ethical sourcing.

Explore innovative practices and technologies in sustainable fashion.

Develop skills in sustainable design and production methods.

Analyse case studies of brands and designers leading in sustainability...

Topics relevant to "Skill Development":

Study of Understanding of sustainability in fashion and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Topics:				

Dart manipulation—Bustling dart, Neck line dart, Insertion of pleats in bodice, Insertion of tucks in bodice, Insertion of cowl in bodice.

		Assignment		
Module 4	Advanced Draping Methods:	Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	14

Skirts, Pants, Collars, Sleeves and Tailored Garments.

List of Practical Tasks:

- Project No. 1: Development of Basic Bodice: Front using Muslin fabric.
- Project No. 2: Development of Basic Bodice: Back Bodice using Muslin fabric.
- Project No. 3: Development of Basic Bodice: Front And Back bodice using special fabric.
- Project No. 4: Development of Basic Bodice: Front And Back bodice using special fabric with faster.
- Project No. 5: Construction of Basic Skirt
- Project No. 6: Construction of Basic Skirt with special fabric.
- Project No. 7: Construction of Basic Skirt with style variation.
- Project No. 8: Construction of Dart variation (Buster)
- Project No. 9: Construction of Dart variation (French)
- Project No. 10: Construction of Dart variation (Mid Armhole)
- Project No. 11: Construction of Dart variation (shoulder)
- Project No. 12: Construction of Dart variation (Neck with style line)
- Project No. 13: Construction of sleeve with dart component.
- Project No. 14: Construction of puff sleeve with draping.
- Project No. 15: Construction of yokes and variations.
- Project No. 16: Construction of yokes with gathers.
- Project No. 17: Construction of yokes buster / back.
- Project No. 18: Construction of collars.
- Project No. 19: Construction of mandarin collar.
- Project No. 20: Construction of collard along with bodies.
- Project No. 21: Selection of theme based on draping techniques and develop 5 set of garment through draping techniques only.
- Project No. 22: selection of theme.
- Project No. 23: Creation of mood board, inspiration

Project No. 24: Creation of idea, fabric. And muslin fit.

Project No. 25: Pattern development as per the design ideas.

Project No. 26: Mockup of through draping skill.

Project No. 27: Presentation skills and board creation.

Project No. 28: Presentation and photo skills Fit.

Project No. 29: Presentation and shoot, Editing.

Project No. 30: Presentation and presenting of two complete range of garments and accessories using

advanced draping technique

Targeted Application & Tools that can be used:

Understand basic skills and techniques in positioning and pinning fabric on a dress form to develop structure of a garment/accessory design -- to support and expand the fashion design process.

Development and implementation of draping skill in designing of garments.

Generating mockups before the final design process to understand the design in 3D.

Design finalization and Presentation for the jury and evaluation.

Topics relevant to "Skill Development":

Study of Understanding of Draping and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Course Code: DES1029	Course Title: Supply Chain Management Type of Course: Program Core - Theory	L- T-P-	3	0	0	3	
Version No.	2.0		•	•	•		
Course pre- requisites	Understanding of fashion concepts Basic knowledge about garments and accessories. Elements and principles of design, including colour theory.						
Anti-requisites	NA						
Course Description	The importance of understanding production concepts in apparel and fashion industry later transforms into merchandising, branding and retailing activities of the products and accessories. This course develops knowledge about apparel industries and fashion sector, their structures, process lines and manufacturing systems and quality standards. Also, this course helps the students to understand basic ideas about merchandising and retail markets, which will later translate into visual merchandising and fashion retailing ideas and concept development projects.						
Course Objective	This course is designed to familiarize the learners with the concepts of Fashion Merchandising and attain Employability by using Participative Learning techniques						
Course Outcomes	On successful completion of the course the students shall be able to, Identify and define various departments and activities of apparel industry						
	Explain skills required in apparel production	ın indus	strial s	et-up)		

	Define various mark	keting and merchandis	sing terminologies		
Course Content:	Introduction to apparel industry processes, Pre-production processes in apparel manufacture, Inspection, Packing and Dispatch, Introduction to marketing and merchandising.				
Module 1	Introduction to apparel industry processes	Visual journal, Presentations, Assignments	Discussions and brainstorming	11 periods	

Introduction to Apparel production, Structures of apparel business, structure of the apparel industry, global apparel manufacturing, Apparel Manufacturing set-ups as per the Product specification. Sourcing-Introduction to fabric and accessory, sourcing and its types. Sampling department- importance of sampling department, objectives, types of samples- prototype, fit sample, pp sample, size set, production sample, shipment sample. Technical design reading, Tech pack analysis & objective, creating tech pack.

Module 2	Pre-production processes in apparel manufacture	Visual journal, Presentations, Assignments	Discussions and brainstorming	12 periods
----------	--	--	-------------------------------	------------

Cutting department: Machineries, fabric spreading, pattern laying, marker preparation, sorting, numbering & bundling, fusing department- methods of fusing, fusing machines. Production department: selection of production system- progressive bundle system, unit production system, modular manufacturing, piece work. Production planning, Linear manufacturing process. Finishing & pressing department, trimming department, packing department.

Module 3	Inspection, Packing and Dispatch	Visual journal, Presentations, Assignments	Discussions and brainstorming	12 periods
----------	----------------------------------	--	-------------------------------	------------

Apparel accessories & components - fasteners, labels, support materials, decorative trims, tapes & packing materials. In process quality inspection, objectives methods, advantages, inspection methodology, final inspection, random inspection, general inspection method for shirts, trouser and kids garments. Introduction to export documentation, objectives, terminologies, principal documents, auxiliary documents, risk cover, insurance, ECGC, quality control and pre-shipment inspection, export credit, short, medium, long-term credit, packing credit, negotiation of bills, payment procedures in export trade.

Module 4 Introduction to marketing and merchandising Module 4 Visual journal, Presentations, Assignments Discussions and brainstorming	10 Periods
--	------------

Introduction to Retail, Marketing, Management and Merchandising, terminologies. Fashion retailing-History, Scope, Importance, Types (Domestic and International), techniques, channel of distribution. Marketing – types, four P's, fashion promotion advantages, trade shows, exhibitions, fashion shows, market survey and research. Types of merchandising, concepts, merchandise planning, sampling- Importance, counter sample.

Targeted Application & Tools that can be used:

Fashion design and styling

Fashion accessories sourcing, product design and development

Historical research and contemporary analysis of fashion merchandising

Theme-based design and styling of fashion accessories

Design collection (Digital concept will all the design boards and display)

List of Practical Tasks:

1. Concept Development & Sketching and Illustration

Create mood boards and inspiration boards.

Conduct trend analysis and market research.

Produce hand-drawn fashion sketches.

Create digital fashion illustrations using software like Adobe Illustrator.

2.Technical Flats and Spec Sheets & Fabric and Textile Exploration

Draw technical flats of garments.

Develop spec sheets with detailed garment measurements and construction notes.

Create fabric swatches and texture boards.

Develop original textile designs or prints.

3. Color Story and Palette Creation & Collection Development

Develop a cohesive color palette for a collection.

Create color story boards to communicate the theme and mood of the collection.

Design a mini collection of 6-10 pieces.

Create lookbooks to present the collection.

4. Garment Construction Samples (Digital)

Produce sample garments or prototypes.

Document the construction process with photographs and notes

Targeted Application & Tools that can be used:

Identify the knowledge of the fundamental components of a professional fashion portfolio.

Understand the importance of a well-organized and visually appealing portfolio.

Apply structure of a garment/accessory design -- to support and expand the fashion design process.

Identify the display design concepts through sketches, illustrations, and technical drawings.

Apply and incorporate thorough research and trend analysis into design projects.

Topics relevant to "Skill Development":

Study of Understanding of elemets of portfolio and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Documentation

Topics:

Illustrate the inspiration, research and trends behind a collection; accessorize and package a collection by emphasizing its emotional value; create all the materials needed to present a collection to stakeholders.

List of Practical Tasks:

Assignment 1: Create an editorial styling board with 05 visual boards detailing out the layouts, inspiration and research. Creating a character and character research a photo-shoot or a live model presentation of the look through and make up, hair style & costume. Students may work on a set as a makeup artist or assist on set.

Assignment 2: Illustrate a look book with 03 looks using any retail brand's latest collection with thematic representation. Use make-up and hair styling along with suitable accessories and props for thematic photo-shoot ideation. Or Styling creative photo essay suitable for print and digital publication for a celebrity/artist.

Targeted Application & Tools that can be used:

Identify and research, interpret and develop styling concepts and work with composition.

Analysis the style relevant to current and future trends in style and visual look.

Identify and manage all elements, resources and processes behind the creation of a styled image.

Identify to develop creative imagery required for briefs based on fashion styling for editorial shoot.

Research on international and national designer.

Topics relevant to "Skill Development":

Study of Understanding Fashion styling and communication to skill in styling, editing and attain Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Course Description	The course aims to provide the students with comprehensive knowledge about visual merchandising, store design, and window display. The course also helps them to understand and practice elements of visual merchandising which includes store management and branding.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Visual Merchandising in Fashion and attain Employability of student by using Experiential Learning techniques.					
Course Outcomes	On successful completion of the course, the students shall be able to: Theory outcomes: Define the design concepts applied to visual merchandising Discuss the processes involved in creating effective theme-based displays Practical outcomes: Review the meaning-making process to display themes through visual mediums Apply effective planning strategies to maximize consumer interest and sales					

Course Content:				
Module 1	Store Design	Visual documentation	Practical design explorations, store visits	9 periods

Creating a store image

Store exteriors and interiors

Store layout design

Space planning and planograms

Store study – Kurt Geiger

Module 2 Windows	Visual documentation	Practical design explorations, store visits	12 periods
------------------	----------------------	---	------------

Topics:

Display planning

Themes, schemes and props

Display designing

Colour blocking

Window prepping and installation

Lighting, signage and graphics

Stores study – Printemps, Louis Vuitton, and Fortnum & Mason

Modulo 2	In-store Visual	Visual	Practical design	12 periods
Module 3	Merchandising	documentation	explorations, store visits	12 perious

Topics:

Product adjacencies

Floor layouts

Fixtures and product handling

In-store displays and trend areas

PoP and add-on sales

Signage and tagging

Lighting and ambience

Virtual visual merchandising

Store study - Topshop, Matthew Williamson, and Flight 001

Module 4	Visual Merchandising – Presentation	Visual documentation	Practical design explorations, store visits	12 periods
----------	---	-------------------------	---	------------

Communication tool

Merchandise presentation techniques

Store fixtures

Store atmospherics

Visual communication

List of Projects:

Development of planograms for different stores

Design and development of signage and colour blocking

Design and development of lighting and graphics

Design and development of in-store displays and trend areas

Designing virtual visual merchandising

Planning and development of store fixtures

Planning and development of store atmospherics

Targeted Applications & Tools that can be used:

Development and implementation of visual merchandising strategy

Generating visual display sketches for the store's visual design requirements

Design finalization and detailed floor plan creation for display areas

Installing and setting up of window displays, walkways, counters, and in-store displays

Cost monitoring and working under budget constraints

Course Pre- requisites	Knowledge and Skills related to all the courses studied in previous semesters.					
Anti-requisites	NIL					
Course Description	During their 60-day internship, the student should maximize learning and contribut by immersing themselves fully in the company's culture and projects. They should begin with a thorough orientation to understand the organization's goals and values Setting clear objectives with their supervisor and aligning them with personal development goals is crucial. Active participation in team activities, meetings, and training sessions helps them grasp the company's workflow and expectations. Early on, the student should focus on observation and learning from experienced colleagues. Asking questions, seeking feedback, and taking initiative in small tasks				ld lues. nd	

	demonstrate their skills. As they gain confidence, they should engage more deeply in project work, ensuring to meet deadlines and exceed quality standards. Regularly reviewing progress with supervisors and adjusting goals as needed maximizes their impact.
	Networking with colleagues across departments and seeking mentorship opportunities broadens their understanding of the industry and career paths. Documenting achievements and lessons learned to update their portfolio is essential. Finally, reflecting on the internship experience helps them identify strengths and areas for growth. By embracing challenges with enthusiasm and professionalism, they not only contribute effectively but also lay a solid foundation for future career endeavors.
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through internship in companies and attain Employability Skills through Experiential Learning techniques.
	On successful completion of this course the students shall be able to:
	Remembering:
	The student recalls and describes the company's goals, values, and workflow from their orientation and ongoing activities.
	☑ Understanding:
	They demonstrate understanding by explaining how their internship tasks contribute to the company's objectives and adapting to its culture.
	2 Applying:
Course Outcomes	Through active participation and project work, they apply their knowledge and skills in design, software tools, and teamwork to real-world challenges.
	2 Analyzing:
	They analyze feedback from supervisors and colleagues to improve their work quality and efficiency, adjusting their approach as needed.
	② Evaluating:
	The student evaluates their own performance and contributions, reflecting on achievements, challenges, and areas for growth during the internship.
	2 Creating:
	By documenting their achievements and updating their portfolio, they create a comprehensive record of their internship experience and design accomplishments.

Course Description	For their graduation project in Design, students should choose a topic that aligns with their interests and career goals. Begin with a well-defined proposal and timeline, ensuring the project is feasible within the given resources and timeframe. Conduct thorough research, including a literature review and market/user analysis, to ground the project in current trends and needs. Develop concepts, create prototypes, and iterate based on feedback from mentors and peers. Schedule regular check-ins with mentors for guidance and engage in peer reviews for diverse perspectives. Compile the project into a professional portfolio, documenting the process and final outcomes. Write a detailed thesis report and prepare a compelling final presentation to showcase your work. Reflect on the learning experience, assessing strengths and areas for improvement, and consider future developments or opportunities for further research or publication. This structured approach ensures a comprehensive and impactful graduation project.						
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through portfolio making and attain Employability Skills through Experiential Learning techniques.

Module 1	Introduction to Wet processing	Visual journal, Presentations, Assignments	Classroom discussion, student work exploration, and presentations	25 periods

Introduction to wet processing, sequence of wet processing operations for cotton, silk and wool, Brief discussion on Equipment and machineries used for wet processing. Different methods and process parameters used for singeing, Desizing, scouring, bleaching and mercerization, Silk Yarn and Fabrics - Degumming, Bleaching, Scouring

	Methods and	Visual journal,	Classroom discussion,	
Module 2	materials in wet	Presentations,	student work exploration,	25 periods
	processing	Assignments	and presentations	

Dyeing- Introduction, classification, Methods of dyeing, application of direct, acid, vat, reactive dyes for cotton, silk and wool yarn. Printing methods – Block and screen, after-treatments for dyed and printed goods - washing, steaming and drying. Tie and dye of cotton or silk fabric using reactive colors. Batik printing of cotton and silk fabric

Module 3	Finishing in wet	Visual journal,	Classroom discussion,	
		Presentations,	student work exploration,	25 periods
	processing	Assignments	and presentations	

Finishes- definition, types- Temporary and permanent Finishes, Basic/routine—Stentering, Decatising, sanforising, calendaring, Functional/ special-waterproof and water repellent, Wrinkle free, antimicrobial, Flame retardant and other special finishes. Garment processing and finishing: Importance of garment dyeing and finishing, Special finishes used for denims. Care of fabrics — Principles of laundering, stain removal, various solvents used and different methods of washing, soaps and detergents used during washing

List of Projects:

- 1) CA 1: Visual document and presentation related to Module 1
- 2) CA 2: Visual document and presentation related to Module 3
- 3) Mid-Term: Visual document and presentation related to Module 1 & 2

Targeted Application & Tools that can be used:

- 1. Wet processing, dyeing and printing activities.
- 2. Machineries & equipment's used for wet processing

3. Temporary & permanent finishes, various solvents used for different methods.

Topics relevant to "EMPLOYABILITY": Methods of dyeing, Tie and dye of cotton or silk fabric using reactive colors. Batik printing of cotton and silk fabric for Employability through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Introduction of Visual Design basics

Terminologies used in Visual Design

Visual Elements with understanding the aesthetics

Module 2 of Visual nt Design Principles Do	Assignme nt Document ation	Working on design principles, Visual Journal Development of exercises	10 Hours
--	-------------------------------------	---	----------

Topics:

Analysis of Aesthetics, gaining knowledge about the composition with design principle.

Exploration of Meta-patterns with hands on exercises

	Understan ding of	Assignme nt	Working on design principles,	
Module 3	Visual Language	Document ation	Visual Journal	15 Hours
		Hands on Practice	Development of exercises	

Topics:

Exploration of Different Techniques of design work as Visual Language.

Case study of the Designers and Their Designs who have Experimented on the same.

		Assignme		
Module 4	Analysis of Visual Design Concepts	nt Document ation Hands on Practice	Working on design principles, Visual Journal Development of exercises	15 Hours

Topics:

Visual Principles exercises with hands on exercise.

Analysis of Visual Concepts of Creating the concept development assignment work Etc.

Tessellations and their variations in visual design.

List of Practical Tasks:

Project No. 1

Explore the design principles from nature with taking photograph.

Project No. 2

Explore the design principles from nature with taking photograph.

Project No. 3

Explore the design principles from nature with taking photograph.

Project No. 4

Explore and experimentation of different design principles.

Project No. 5

Explore and experimentation of different design principles.

Project No. 6

Explore and experimentation of different design principles.

Project No. 7

Explore and experimentation of different design principles.

Project No. 8

Study on 10 different stylization of work and create the exercise with similar way using one of the design principle.

Project No. 9

Study on 10 different stylization of work and create the exercise with similar way using one of the design principle.

Project No. 10

Study on 10 different stylization of work and create the exercise with similar way using one of the design principle.

Project No. 11

Study on 10 different stylizations of work and create the exercise in a similar way using one of the design principles.

Project No. 12

Development of 5- 6 Samples of different type design projects using design principles.

Project No. 13

Development of 5- 6 Samples of different type design projects using design principles.

Project No. 14

Development of 5- 6 Samples of different type design projects using design principles.

Project No. 15

Development of 5-6 Samples of different type design projects using design principles.

Project No. 16

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 17

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 18

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 19

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 20

Analysis of Visual Design Concepts and implementation of exercises.

Project No. 21

Analysis of Visual Design Concepts and implementation of exercises.

Project No. 22

Using design principles, students have to make one final portfolio for the submission.

Project No. 23

Using design principles, students have to make one final portfolio for the submission.

Project No. 24

Using design principles, students has to make one final portfolio for the submission.

Targeted Application & Tools that can be used:

Understanding the use of principle of design in the project work which should be acceptable by the industry professionals.

Tools will be used, different software like: Photoshop and Adobe Illustrator to get the final output and paper, color and brushes to be used to make the sample works.

Topics relevant to "Skill Development": Study of Understanding of Visual Language and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through the Studio project task component mentioned in the course handout.

Version No.	1.0						
Course pre- requisites	NA						
Anti-requisites	NA						
Course Description	This course offers an essential introduction to Adobe Photoshop and Illustrator, focusing not only on mastering basic tools like the pen, brush, and blending options but also on fostering design creativity. Students will learn to create vector illustrations and explore various visual design aspects,						

	ultimately enhancing their ability to conceptualize and implement innovative digital designs effectively.				
Course Objective	The objective of the course is EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.				
Course Outcomes	On successful completion of the course, the students shall be able to: Understand essential tools in Adobe Photoshop and Illustrator, including the pen, brush, and blending options. Apply creative design skills, to various digital projects. Implement advanced visual design concepts.				
Course Content:	This course introduces Adobe Photoshop and Illustrator, focusing on essential tools, vector illustration, and creative design techniques.				
Module 1	Introduction to Digital Design Tools Case studies, classroom discussions and presentations 15 Per				

Understanding the interface and basic functionalities of Photoshop and Illustrator.

Exploring essential tools such as the pen tool, brush tool, and blending options.

Hands-on practice sessions to familiarize students with basic tool operations.

Module 2	Advanced Techniques in Digital Design	Visual documentation	Case studies, classroom discussions and presentations	15 periods
----------	---	----------------------	--	------------

Topics:

Advanced tools and features in Photoshop and Illustrator for more complex designs.

Techniques for creating and manipulating vector illustrations effectively.

Integration of typography, color theory, and composition in digital designs.

Topics:

Designing logos, posters, and digital illustrations using Photoshop and Illustrator.

Conceptualizing and executing digital design projects from start to finish.

Incorporating feedback and iterative design processes.

List of Projects:

Practical exercises: Create a simple digital artwork combining basic shapes and applying various tools

Design project: Create a visually appealing digital poster or advertisement using advanced tools and techniques learned.

Portfolio review: Present a collection of digital designs demonstrating proficiency in using advanced features and concepts.

Discuss insights gained about professional practices and future career aspirations in digital design.

Targeted Applications & Tools that can be used:

Adobe Illustrator: For creating logos, icons, and vector graphics that form the core of visual brand identity.

Adobe Photoshop: Useful for editing and manipulating images, creating graphics, and refining visual elements of brand communication.

Canva: A user-friendly tool for designing social media graphics, presentations, and marketing materials, suitable for smaller-scale projects and beginners.

Text Book

"Adobe Photoshop Classroom in a Book" by Adobe Creative Team - This series provides comprehensive lessons and exercises for learning Photoshop from beginner to advanced levels.

"Adobe Illustrator Classroom in a Book" by Adobe Creative Team - Similar to the Photoshop version, this book offers structured lessons and projects to master Illustrator.

"The Adobe Illustrator WOW! Book" by Sharon Steuer - This book focuses on creative techniques and advanced tips for using Adobe Illustrator effectively.

"Photoshop for Dummies" by Barbara Obermeier and Ted Padova - A beginner-friendly guide covering essential tools and techniques in Photoshop.

"Vector Basic Training: A Systematic Creative Process for Building Precision Vector Artwork" by Von Glitschka - This book emphasizes creating vector illustrations and artwork using Illustrator.

"The Non-Designer's Design Book" by Robin Williams - While not specific to Adobe tools, this book provides foundational principles of design that apply to digital tools as well

Module 3	Sign & Symbo Is	Term paper/ Assign ment/ Case Study	Using a creative brief / Defining a client's expectations / Using mood boards/ any other such associated activity	15 Hours

Abstraction and Typography- Typographic Poster

Book cover design

Print products and packaging

Data Visualization

VD for Media Production

VD for Interface

List of Practical Tasks:

Project 1. Create a Logo using adobe illustrator. Follow the process which was thought to you using timeline. (Discovery, Mood Boards, Typography, Deductive Ideations, Visual Associations / Shape Association / Storytelling / Color Association / Conceptual Patterns / Historical References / Thesaurus, Thumbnail Sketching, Type of Logo (Story of the logo), Test your logo if it fits the given exercises, Tagline / Slogan)

Project 2. (CREATE 3NOS OF MONOGRAMS), Discovery - Using mood boards (collage format, consisting of gathered images, texts, and sample objects based on a specific topic or theme, potential styles,) BLACK&WHITE, Ideation - Different styles Thumbnail Sketching (Include detailed notes) Illustrate vector file, Test your symbol if it fits the given exercises

Project 3. Create a SYMBOL Total 2 nos / 2-3 IDEATIONS)

Describe why you chose this symbol, Discovery - Using mood boards, Ideation - Different styles Thumbnail Sketching, Illustrate vector file, Test your symbol if it fits the given exercises, Tagline / Slogan

Targeted Application & Tools that can be used: Use Adobe Illustrator and Adobe photoshop for creating vector and raster graphics.

Course Descriptio n	The objective of this course is Understand research in the context of	design methods	s and thinki	ng.		

Will provide opportunities in the product and service industries through application of user and trend research. Develop ability in taking informed design decisions through research. Design research will also help to gain insight and empathy of the stakeholders. Course Objective The objective of the course is to familiarize the learners with the concepts of DESIGN RESEARCH and attain Skill Development through Experiential Learning techniques. Course On successful completion of the course the students shall be able to: Outcomes Grasp design research fundamentals: Understand the role of research in design practice, navigate design discourse, and analyze research methods used in design. Formulate research questions: Critically identify design problems and translate them into focused research questions. Apply research methods: Select and implement appropriate research methodologies (surveys, interviews, etc.) for design projects. Analyze and interpret data: Critically analyze research findings and draw insightful conclusions. Design research projects: Develop a well-defined design research project proposal using acquired knowledge and methods. Communicate research effectively: Document and present design research processes and findings in a clear and compelling way. **Course Content:** Design research course delves into understanding user needs, research methods, and data analysis to inform design decisions. Knowledge - Understanding the need of Design research as a specialized area of knowledge and application. Skill - To be able to contextualize the design problem and employ the appropriate research tools. Synthesis - To be able to decode and analyses information to produce useful insights for design. DES1126	Type of Course:						
	Program Core						
Version No.	1.0						
Course pre- requisites	NA						
Anti-requisites	NA						
Course Description	This introductory photography course provides essential skills for beginners, covering camera basics, exposure fundamentals, composition techniques, and lighting principles. Students will learn to capture compelling images through hands-on practice and interactive lessons. Emphasis is placed on understanding camera functions, achieving proper exposure, and developing an eye for effective composition, preparing participants to confidently explore the art and technicalities of photography.						
Course Objective	The objective of the course is to SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.						
Course Outcomes	On successful completion of the course, the students shall be able to: Understand and operate camera settings effectively. Apply correct exposure in various lighting conditions. Implement light to enhance mood and clarity in photos.						
Course Content:	This course covers essential photography skills, including camera functions, exposure techniques, composition principles, and lighting fundamentals.						
Module 1	Camera Basics and Exposure Fundamentals	Visual documentation	Case studies, classroom discussions a presentation	nd		15 Per	riods
Topics:	•	· · ·					

Camera types and functionalities.

Understanding exposure: aperture, shutter speed, and ISO.

Techniques for achieving proper exposure in different lighting conditions.

Practical exercises: Hands-on sessions to practice camera settings and exposure control.

Module 2	Composition Techniques and Visual Design	Visual documentation	Case studies, classroom discussions and presentations	15 periods
----------	--	-------------------------	---	------------

Composition rules and guidelines: rule of thirds, leading lines, framing, etc.

Understanding visual balance and harmony in photography.

Creative approaches to framing and perspective.

Practical application: Hands-on exercises to apply composition techniques in photography projects.

	Lighting		Case studies,	
Madula 2	Principles and	Visual	classroom	15
Module 3	Advanced	documentation	discussions and	15 periods
	Techniques		presentations	

Topics:

Types of natural and artificial light sources and their effects.

Techniques for using light modifiers and reflectors.

Strategies for indoor and outdoor lighting setups.

Advanced shooting techniques: low light photography, backlighting, etc.

List of Projects:

Capture a series of images demonstrating correct exposure techniques learned in class.

Present a collection of photographs demonstrating the effective use of composition techniques.

Design and execute a photo shoot focusing on controlled lighting techniques.

Create a thematic portfolio showcasing mastery of camera skills, composition, and lighting principles.

Targeted Applications & Tools that can be used:

Digital Single-Lens Reflex (DSLR) Cameras: Learn camera basics, exposure controls, and manual settings to capture high-quality images.

Smartphone Photography: Explore the capabilities of smartphone cameras for everyday photography, emphasizing composition and lighting techniques applicable to mobile devices.

Photo Editing Software: Introduce basic photo editing tools like Adobe Lightroom or Adobe Photoshop to enhance and refine captured images post-production.

Online Portfolios and Social Media Platforms: Utilize platforms like Instagram or Behance to share and receive feedback on photographic work, fostering community engagement and portfolio development.

Text Book

"Understanding Exposure" by Bryan Peterson - A comprehensive guide to mastering the concepts of exposure, essential for capturing well-exposed photographs.

"The Photographer's Eye: Composition and Design for Better Digital Photos" by Michael Freeman - Focuses on composition techniques and visual design principles to enhance photographic storytelling.

"Digital Photography Complete Course: Learn Everything You Need to Know in 20 Weeks" by David Taylor - A structured course covering all aspects of digital photography from camera basics to advanced techniques.

"Read This If You Want to Take Great Photographs" by Henry Carroll - Provides practical tips and insights into creating impactful photographs, suitable for beginners.

"The Art of Photography: An Approach to Personal Expression" by Bruce Barnbaum - Explores the artistic and creative aspects of photography, encouraging personal expression and style development.

Course Descripti on	The objective of this course is to provide an overview of the world of creating effective and visually engaging designs for printed publications.
	The course also aims for the students to explore the foundational principles, industry practices, and software applications used to bring ideas to life on paper.
	This course offers students to:
	Gain a comprehensive understanding of design principles for print media, including layout, typography, and imagery.
	Master the technical aspects of print production, from selecting paper and printing processes to file preparation.
	Develop proficiency in industry-standard design software for creating print layouts.
	Hone critical thinking skills to analyze and critique design concepts and finished products.
	Learn effective strategies for planning, producing, and disseminating various printed publications.
Course	
Objectiv e	The objective of the course is to familiarize the learners with the concepts of PRINTING & PUBLICATION DESIGN and attain Employability through Experiential Learning techniques.
Course Outcom es	On successful completion of the course the students shall be able to:
	Design print-ready publications that are visually appealing, informative, and adhere to industry standards.
	Confidently navigate the print production process, making informed decisions about materials and techniques.
	Apply design principles and software skills to create diverse printed materials like brochures, magazines, and book covers.
	Communicate design concepts effectively, both verbally and visually.
Course Cor	ntent:

Understan	iding the Fu	ndamentals	and Principles of Printing and Publication Des	ign
Module 1	Foundati ons of Print Design	Assignm ent Demonst ration and Participa tive learning. Docume ntation	Observation & discussion & Visual Journal	5 Hours
Topics:				
	on to basic o		iples, layout techniques, and typography fund	amentals specifically
Module 2	Typogra phy for Print	Assignm ent Docume ntation	Observation & discussion & Visual Journal	5 Hours
	per into the y for maxim	-	pe, learning about selecting fonts, creating hie in print.	rarchies, and using
Module 3	Design Software for Print	Assignm ents & presenta tion	Observation & discussion & Visual Journal	15 Hours
	on to Desigr tware for cr		s related to Print Design. hands-on training in i	ndustry-standard
Module 4	Print Producti on	Assignm ents &	Observation & discussion & Visual Journal	20 Hours

Topics:

Explore the various stages of print production, from selecting paper and printing processes to prepress and final output.

Targeted Application & Tools that can be used:

To Create Print Designs using AdobeInDesign, QuarkXPress, Affinity Publisher, Scribus, Microsoft Publisher, Adobe Photoshop, Adobe Illustrator.

Topics relevant to "Employability": Study of Printing & Publication Design for Employability through Experiential learning techniques. This is attained through the assessment component mentioned in course handout.

Course Prerequisites	NIL							
Anti- requisites	NIL							
Course Description	This course combines elements of a traditional Communication Studies (Social Media Marketing, Digital Journalism, Message Design) with a Digital Design (Video & Sound, Digital Imaging & Composition, Motion Graphics). These are the tools necessary to design and deliver messages to an interconnected world. They are complementary skills, and the combination of the two produces graduates that are productive, insightful, and highly employable. This course introduces students' to digital mediums used in communication design and various techniques to use them effectively.							
Course Objectives	The objective of the course is SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.							
Course Out Comes	On successful completion of the course the students shall be able to: 1.Identify digital communication medium PRACTICAL COMPONENT 2. Recognize the social media communication							

	3. Analyzo	3. Analyze various digital media narratives.						
Course Content:	Diptych a	Introduction to Digital platforms Diptych and Image Making Social Media audit and Basics of AR/VR						
Module 1	Underst anding Digital Medium s	Term paper/Assignment/Case Study	Programming/Simulation/Data Collection/any other such associated activity	15 Hours				

Topics: **Understanding Digital Mediums**

Digital Media - Digitalization and Convergence

Designing for internet and communication devices, its limitations and possibilities, Pixel perfect design, use and importance of digital artifacts

Introduction to various digital technologies used in communication design,

Module 2 Ma	age uking Term paper/Assignment/Case study	Programming/Simulation/Data Collection/any other such associated activity	10 Hours
-------------	--	---	-------------

Topics: Image Making for Digital Mediums

Understanding Tactile Textures

Replicating Tactile textures digitally

Role of Color in Digital Textures

Module 3	Designing for Social Media	Term paper/Assignment/Case Study	Programming/Simulation/Data Collection/any other such associated activity	10 Hours
----------	----------------------------------	----------------------------------	---	-------------

Topics: Designing for Social Media

Social Media Design Contextualizing

Planning and executing a digital narrative

Course Description	This course equips the student with critical content creation and management skills. Students also learn how to establish an ongoing process to manage your content. This includes setting up a content calendar, managing and moderating your posts, analyzing data for insights and iteration, and how to increase content effectiveness. This course is intended for people who want to learn how to create and manage a business presence, including creating content, interacting and engaging with customers on social media and evaluating the results of different posts. This course equips students to create medium relevant content; optimized specifically for the medium.							
Course Objectives		tive of the course is SKILL DEV 3 Techniques.	ELOPMENT of studer	nts by using	EXP	ERII	ENTIAL	-
Course Out Comes	1. Describ	On successful completion of the course the students shall be able to: 1. Describe what content development is as applied to Communication Design Interpret the methods of user information gathering Design optimized content as per the brief provided by the user.						
Course Content:	Content D Writing Content C	Content Generation Content Development and Content Marketing, Confluence with Storytelling and Creative Writing Content Optimization Generating Content for Instruction Design and User Interaction Design						
Module 1	Content Generat ion	Presentations and case study essays	Activity-based lear discussion and brai				5 Ho	ours

Topics: **Content Generation** Introduction to Content generation What is the importance of Content development? Content Develop ment and Content Marketi Presentations and case study Activity-based learning, group 10 Module 2 ng, discussion and brainstorming Hours essays Conflue nce with Storytell ing and Creative Writing Topics: Content Development and Content Marketing, Confluence with Storytelling and Creative Writing How to create content and it sources to find out Modes of Content Delivery – Blog Posts to Infographics Content Presentations and case Activity-based learning, group 15 Module 3 Optimizatio study essays discussion and brainstorming Hours n Topics: **Content Optimization** The importance of Content Optimization, What are the key factor to create content Optimization and use in social media. SEMESTER- 6

Course Code: DES 2137	Course Title: Interdisciplinary Design Collaboration Type of Course: Integrated (Discipline Elective)	L-T- P-C	1	0	4	3	
Version No.	3.0						
Course Pre- requisites	Interdisciplinary Design Collaboration						
Anti- requisites	NIL						
Course Descriptio n	This course equips students to navigate the dynamic world of interdisciplinary design collaboration. They will be able to explore how design professionals from diverse backgrounds can work together to tackle complex problems and develop groundbreaking solutions. Through hands-on projects, they will be able to gain the skills to: Bridge Disciplinary Gaps: Understand different design fields and leverage their unique strengths. Foster Effective Collaboration: Master communication, teamwork, and conflict resolution strategies. Design Thinking for All: Apply design thinking methodologies in collaborative settings. Craft Innovative Solutions: Harness the power of diverse perspectives to generate creative and impactful designs.						

Course Objective

The objective of the course is to familiarize the learners with the concepts of Interdisciplinary Design Collaboration

and attain **Employability** through **Experiential Learning** techniques.

Course Outcomes

On successful completion of the course the students shall be able to:

Articulate the benefits and challenges of interdisciplinary design collaboration.

Effectively communicate and collaborate with individuals from diverse design backgrounds.

Utilize design thinking frameworks in collaborative project settings.

Identify and leverage the strengths of different design disciplines to generate creative solutions.

Navigate conflict constructively and foster a positive collaborative environment.

Develop and present project that showcase the power of interdisciplinary design.

Course Content:

This course equips you to bridge design disciplines, fostering creative problem-solving through effective collaboration.

		Assignme		
Module 1	Foundatio ns of Interdiscip linary Collaborat ion	nt Demonstr ation and Participati ve learning. Document ation	Observation & discussion & Visual Journal	15 Hours

Topics:

Benefits and challenges of interdisciplinary design

Introduction to design thinking in a collaborative environment

Understanding diverse design disciplines and their languages

Case studies of successful interdisciplinary design projects

Module 2	Communi cation and Collaborat ion Strategies	Assignme nt Document ation	Observation & discussion & Visual Journal	20 Hours
Topics:				
Effective co	mmunication	for diverse te	eams	
Active lister	ning and empa	athy building		
Conflict reso	olution and n	egotiation tac	etics	
Team dynar	nics and foste	ering a collabo	orative environment	
Collaboratio	on tools and t	echnologies		
Module 3	Design Thinking in Action, Design Disciplines in Dialogue	Assignme nts & presentati on	Observation & discussion & Visual Journal	20 Hours
Topics:				
-	sign problems	s through a co	ollaborative lens	
_			disciplinary teams	
Ideation and	d brainstormi	ng technique	s for diverse perspectives	
	and testing i			
			e.g., graphic design, engineering, UX design)

DES1070	Type of Course:		L- T- P- C	1	0	4	3
	Discipline Elective						
Version No.	1.0		•				
Course pre- requisites	NA						
Anti-requisites	NA						
Course Description	This course delves into the world of motion graphics, teaching students to create dynamic visual content using animation and graphic design principles. Topics include keyframe animation, typography in motion, visual effects, and storytelling through motion. Students will gain hands-on experience with industry-standard software, enabling them to produce engaging motion graphics for various digital media platforms.						
Course Objective	The objective of the course is EMPLOYABILITY of students by using EXPERIENTIAL LEARNING Techniques.						
Course Outcomes	On successful completion of the course, the students shall be able to: Identify text effectively to enhance visual storytelling. Understand visual effects to add depth and interest to motion graphics. Apply engaging stories through motion graphics that captivate and inform audiences.						
Course Content:	This course covers the fundamentals of motion graphics, including keyframe animation, typography in motion, visual effects, and storytelling techniques using industry-standard software.						
Module 1	Fundamentals of Motion Graphics and Keyframe Animation	Visual documentation	Classroom di Demo and presentation		ons,	15 Per	iods
Tonics:	-						

Topics:

Overview of motion graphics and its applications in digital media.

Introduction to keyframe animation principles.

Basic animation techniques: easing, timing, and spacing.

Hands-on practice with industry-standard software (e.g., Adobe After Effects).

Module 2 Typography in Motion and Visual Effects	Visual documentation	Classroom discussions, Demo and presentations	15 periods
--	-------------------------	---	---------------

Topics:

Principles of typography in motion graphics.

Techniques for animating text and incorporating it into visual narratives.

Introduction to visual effects: masking, compositing, and particle effects.

Practical exercises with software tools to create typographic animations and effects.

Module 3	Storytelling and Advanced Motion Graphics Techniques	Visual documentation	Classroom discussions, Demo and presentations	15 periods
----------	---	-------------------------	---	---------------

Topics:

Storyboarding and planning motion graphics projects.

Advanced animation techniques: character animation, 3D motion graphics, and camera movements.

Integrating audio and visual elements to enhance storytelling.

Final project: Design and produce a complete motion graphics piece from concept to execution.

List of Projects:

Assess understanding of keyframe animation principles and basic techniques.

Create a short animation using keyframe techniques, demonstrating smooth motion and proper timing.

Develop an animated typographic sequence that effectively communicates a message.

Apply visual effects to a motion graphics piece, demonstrating creativity and technical proficiency.

Create and present a storyboard for a motion graphics project, outlining the narrative and key animation sequences.

Develop a comprehensive motion graphics video, incorporating advanced techniques and storytelling elements, and present it to the class for critique.

Targeted Applications & Tools that can be used:

Adobe After Effects: Industry-standard software for creating motion graphics and visual effects, essential for keyframe animation and advanced animation techniques.

Adobe Premiere Pro: Used for editing video and integrating motion graphics with other media elements to create cohesive projects.

Adobe Illustrator: For creating vector graphics and assets that can be animated in After Effects.

Adobe Photoshop: For designing and editing raster graphics and images that can be animated in motion graphics projects.

· Storyboarder or Storyboard That: Storyboarding tools to plan and visualize motion graphics projects before animating.

DES2044	Type of C	ourse: Program Core		С			4	3		
Version No.	1.0					1		L		
Course Pre- requisites	NIL	NIL								
Anti- requisites	NIL	NIL								
Course Description	This course is to understand the skills of entrepreneurship and understand the characteristics of an entrepreneur, qualities and skill set required for the generation of idea, identification, and selection of opportunity in Communication Design as well as creating an effective business model.									
Course Objectives	-	The objective of the course is SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.								
Course Out	On succes	ssful completion of the course	the students shall be ab	le to:						
Comes	Identify the different types of enterprise.									
	PRACTICAL COMPONENT :									
	Describe the filtering feasible business ideas.									
	Evaluate a sustainable Business Model.									
Course Content:	Basics of Entrepreneurship , Idea Generation and Idea Feasibility, Development of Sustainable Business Models									
Module 1	Basics of Entrepr eneursh ip	Assignment/Case Study	Data Collection/any of activity	other such	asso	ciate		.5 lours		
Topics:	Basics of E	I Entrepreneurship								
Meaning and	d definition	s of Entrepreneurship,								
Importance	of Entrepre	neurship in general								
Module 2	Idea Generat ion andAssignment/Case Study ion andData Collection/any other such associated activity15 Hours									

Idea		
Feasibi	li	
ty		

Topics: Idea Generation and Idea Feasibility

Brainstorming, Focus groups, Internet search,

Different exercises on generation of opportunity related to retail like Brain storming, news - paper exercises, Problem inventory analysis,

Product/ Service Feasibility (Technical), Industry feasibility (Analysis of competition)

Module 3	Developme nt of Sustainable Business	Assignment/Case Study	Data Collection/any other such associated activity	15 Hours
	Models			

Topics: Development of Sustainable Business Models

Business model and its importance & Components of Effective business model, Business Model Canvas

Govt. Schemes / Policies-General like Prime Minister Employment Generation Programme (PMEGP), Credit linked capital subsidy scheme, general and related to apparel, textile and accessories

Targeted Application & Tools that can be used:

- 1. Business model and its importance & Components of Effective business model, Business Model Canvas
- 2. Brainstorming, Focus groups, Internet search,
- 3. Importance of Entrepreneurship in general

Course Pre- requisites	Knowledge and Skills related to all the courses studied in previous semesters.
Anti-requisites	NIL
Course Description	Students observe art, craft, technics and Culture in action, develop an awareness of the method of design explorations, and often get an opportunity to see, study, manipulate and apply design principles in value additions. Students learn about the implementation of the principles of design they have learnt in class, when they observe multidisciplinary teams of experts from different streams of design, economics, and management deal with techno-economic problems at the micro and macro levels. Finally, it enables them to develop and refine their language, communication and inter-personal skills, both by its very nature, and by the various evaluation components, such as seminar, group discussion, project report preparation, etc. The broad-based core education, strong in design principles rich in heuristics, experiential learning and design thinking tools provide the foundation necessary for the student to understand appropriately the nature of real-life problems. The students have options to pursue this course as either Project Work and Dissertation at the university, or Project Work in an Industry/Company/Research Laboratory, or Internship Program in an Industry/Company.
Course Objectives	The objective of the course is SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.
	On successful completion of this course the students shall be able to:
Course Outcomes	Identify the design problems related to local, regional, national or global needs. Apply appropriate techniques or modern design tools for solving the potential problem
	Design the tasks as per the standards and specifications.
	Interpret the events and results for meaningful conclusions.
	Appraise project findings and communicate effectively through scholarly publications.

Course Description	Elements of Play is a subject that involves a basic understanding of design, games and play. This subject focus on to game design process, idea generation, conceptualization, visual design, and prototyping. The subject comprises understanding gameplay, game mechanics, and the game component which helps students understand the basics of board games. The main objective of the course is to familiarize the students with the basic game design process, terminal, and, concept generation so that they can generate and prototype new game concepts.						
Course Objective	The objective of the course is t Elements of Play and attain Ski techniques.						
	Upon successful completion of	the course, the stu	udents shall	be ab	le to:		
Course	Define the board games in terms of gameplay, game mechanics, and game components.						
Outcomes	Practical Component	Practical Component					
	Generalize the game design pr	ocess to generate r	new concept	s.			
	Produce simple board games.

Principle and

Logics

		Assignment		
Module 3	Final Product	Demonstration and Participative Learning. Documentation	Examples/ Demo/Assignments	15 Hours

Topics:

Visual Design

Packaging

Communication

List of Practical Tasks:

Project No. 1

Level 1: Play 5 different board games and write about them.

Level 2: Play 10 different board games and write about them.

Project No. 2:

Level 1: Prototype 2 different board games.

Level 2: Prototype 4 different board games.

Project No. 3:

Level 1: Create 1 final board game design

Level 2: Create 2 final board game design

Targeted Applications & Tools that can be used:

Understanding how a board game is designed. In general, they will be learning about the design process, how the gameplay, and the game mechanism.

Tools used are Raster and Vector software.

Topics are relevant to "Skill Development": Study of visual design and techniques like shapes, patterns, and colours and work with all that to create a design for Skill Development through Experiential Learning techniques. This is attained through the assessment component mentioned in the course handout.

Game Genres: Case Studies.

Validating Ideas.

Assignment: Select 1 out of all ideas after properly validating it.

		Assignment	Observation/ Demo/	
Module 4	Documentation	Case Study	Videos/ Interaction/	10 Class
		Documentation	Discussion/Practice	

Topics:

Types of Game Documents.

The Game Design Document.

Types of GDDs.

Popular GDDs: Case Studies.

GDD Template.

Project: GDD Creation.

List of Laboratory Tasks:

Experiment NO 1: Gameplay Loops.

Level 1: Students must break down popular games and identify their core and supporting loops and make the appropriate diagram representing the loops.

Experiment NO 2: Generate 5 different ideas using various ideation techniques.

Level 1: Students will create 5 different ideas using various ideation techniques, like Inspiration, Memory, Previous Games, Daily Life, and Passion.

Experiment NO 3: Validating Ideas.

Level 1: Students must select 1 out of all ideas after properly validating it.

Experiment NO 4: Game Design Documentation.

Level 1: Students will be designing a GDD document that lists all the topics covered in this course, for a particular game idea after it has been properly validated.

Targeted Application & Tools that can be used: Video game ideation is a critical step when developing video games, as it helps develop a clear vision for the game and lay the foundation for its design and development. Ideation can also help teams identify key elements that will make the game unique and engaging. By brainstorming ideas and discussing them, developers can identify potential issues early on and make changes before they become costly.

Word Documentation.

Digital Image Manipulation Application.

		T		_	T	ı	
	Course Title: Storytelling &						
	Storyboarding						
Course Code:		L-T-P-C	1	0	4	3	
DES 2053	Type of Course: Program Core, Integrated	L-1-F-C	1			3	
Version No.	2.0						
Course Pre- requisites	NA						
Anti-requisites	NIL						
	Purpose:						
	This course is to understand Storytelling and its Storyboarding for Animation.						
	Abilities to be developed:						
Course Description	Describe the plot and scene in the storyboard, different types of camera angles, and their importance in storytelling. Illustrate the different views of character position in the storyboard						
	Nature of the course:						
	A storyboard is a visual plotter for a storyline. The linear direction of the cells in a storyboard makes it an effective tool for narrating a tale, outlining a process, and illustrating the sense of movement. Storyboards are essentially a series of sequential illustrations that tell a tale.						
Course Objective	The objective of the course is to familiarize the learners with the concepts of Storytelling and Storyboarding and attain Skill Development through Experiential Learning techniques.						
	Upon successful completion of the course, the students shall be able to:						
	Explain the importance of Storytelling and Storyboarding in relation to animation.						
Course Outcomes	Practical Component						
	Illustrate the elements of the character with the camera angle used in the storyboard.						
	Demonstrate a complete output of the final Storyboard.						

Course Content:					
Module 1	Introduction to Storytelling & Storyboarding	Assignment Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	15 Hours	
Topics:			· I		
Brainstorming					
Collecting Images					
Creative Research

	This course will also give an overview of different animation techniques in various software like Adobe after effects, adobe animate and etc. This is a laboriented course, in which students are asked to do several types of animation exercises, which will finally be part of the evaluation process for the student also.							
Course Objective	The objective of the course is to familiarize the learners with the concepts of Basics of Animation and Tools and attain Employability through Experiential Learning techniques.							
	Upon success	ful completion of the cou	urse, the students shall be ab	le to:				
	Identify differ	ent types of Animation						
Course Outcomes	Practical Com	ponent						
	Practice differ	ent types of Animation.						
	Explain the di	fferent types of Animatio	on.					
Course Content:								
		Assignment						
Module 1	Introduction to Animation	Demonstration and Participative Learning.	Examples/ Demo/Assignments	10 Hours				
		Documentation						
Topics: 12 Principles of	Animation	1	1					
Module 2	Study of Animation	Assignment Demonstration and Participative Learning. Documentation	Examples/ Demo/Assignments	15 Hours				

Topics: Study of Zoetrope **Stop Motion Animation** Flipbook Animation Logics Assignment Demonstration and Introduction Examples/ Module 3 Participative 15 Hours to Software Demo/Assignments Learning. Documentation Topics: Introduction to 2D Animation Walk Cycle Run Cycle Jump Cycle Assignment Demonstration and Sound flow in Examples/ Module 4 Participative 10 Hours Animation Demo/Assignments Learning. Documentation Topics: Study of Lip Sync, Background Animation, Story Animation List of Practical Tasks: Project No. 1 Level 1: Create an animation for each principle of animation. Level 2: Create an animation for each principle of animation using the key frame animation technique. Project No. 2: Level 1: Understand the classical way of animation and create a zoetrope card in 2d animation. Level 2: Create a video clip of an animal walk with the technique mentioned above.

Project No. 3:

Level 1: Understand the walk cycle.

Level 2: Create a video clip of human walking.

Level 1: Create a video clip to understand lip-sync in 2d animation

Level 2: Create a video clip with an animal from the learning of Level 1

Targeted Applications & Tools that can be used:

Create a video clip with an animal from the learning of level 1

Tools used Adobe photoshop, 2d Animation Software

Topics are relevant to "EMPLOYABILITY SKILLS": Flip book animation Assignment on 12 principles of animation 2d animation on software tools for Employability Skills through Experiential Learning techniques. This is attained through the studio project component mentioned in the course handout.

SEMESTER 4

Course Code:	Course Title: Game Character Design	L-P-C	1	4	3	
DES2074	Type of Course: Discipline Elective, Integrated					
Version No.	1.0					
Course Pre- requisites	NA					
Anti- requisites	NA					
Course Description	Explore character creation in our Game Character Design course, focusing on anatomy, personality, and animation for immersive gaming. Shape digital personas through practical projects and industry techniques, crafting impactful gaming experiences.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Game Character Design and attain Skill Development through Experiential Learning techniques.					
Course Out Comes	On successful completion of the course, the students shall be able to: Understand different forms and shapes. Identify different artwork and their Origins. Practical Component: Apply techniques to develop characters for games.					
Course Content:	Shape and Form Study, Character Design, Character Bible.					

Module 1	Shape and Form Study	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	15 Classes
----------	-------------------------	--	--	------------

Topics:

Primitive shape study.

Characters with an everyday object.

Heads.

Proportions.

Module 2 Character Design	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	15 Classes
---------------------------	--	--	------------

Topics:

Elements of Character Design - personality, attitude, role, function.

Biography of character -

Visualizing the Character -

Creating Characters from life study.

Story and the role of characters.

The role, symbolism, and significance of all sorts of characters in animated films – human, imaginary – fantasy.

		Demonstration	Observation/ Demo/ Videos/	
Module 3	Character Bible	Case Study	Interaction/ Discussion/	15 Classes
		Documentation	Practice	

Topics:

Character Bible and model sheets, Stereotypes.

Design of Anthropomorphic Animals and Objects

Anthropomorphic and alien characters, animals, birds, objects.

List of Practical Tasks:

Project No. 1

Level 1: Creating characters with everyday objects.

Level 2: Study games characters.

Project No. 2:

Level 1: Simplifying the characters with shapes.

Level 2: Development of backstory for characters.

Project No. 3:

Level 1: Developing Anthropomorphic characters for games.

Project No. 4: Creating Character turnaround sheet for games.

Targeted Application & Tools that can be used: Targeted Application & Tools that can be used:

Understanding the requirements of the game industry and moving with the trend.

Tools used will be pencil, sketchbook and colors, and digital painting tools.

Topics:								
Understanding the game development process								

Introduction to Unity's interface and basic navigation

Creating a new 2D project in Unity

Importing and organizing assets

Exploring the Scene and Game views

Introduction to 2D game components in Unity

		Assignment	Info-graphics development	
Module 2	2D Animation	Demonstration and Participative	Visual Journal	15 Classes
		learning.	Development of Samples	
		Documentation	for each	

Topics:

Working with sprites and textures

Creating 2D animations using Unity's Animation System

Designing levels using tilemaps

Camera setup for 2D games

Designing game animation using: jumping, running, smearing, etc.

Creating interactive game juice

		Assignment	Development of Samples	
	Integration in Come	Demonstration	for each	
Module 3	Integration in Game Engine	and Participative learning.	Visual Journal	10 Classes
		Documentation		

Topics:

Improving game visuals through particle systems and lighting

Performance optimization techniques for 2D games

Finalizing and packaging the game for distribution

List of Practical Tasks:

Project No. 1

Level 1: Create a sprite sheet

Level 2: Create a level using tileset.

Project No. 2:

Level 1: Create a animation for character.

Level 2: Create a animation with smearing effect.

Project No. 3:

Level 1: Create a text adventure game.

Targeted Application & Tools that can be used:

Understanding 2D game design process.

Tools used will be unity, photoshop and spine.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to design and develop a 2D game

Topics:	<u> </u>		<u> </u>	
Topics:				

Introduction to Game Development

Game Loop and Update Functions

Sprites and Graphics

Input Handling

Collision Detection

Game Physics

Sound and Music

Game UI and Menus

Game State Management

Building and Deploying Games

List of Practical Tasks:

Project No. 1

Level 1: Create a basic console application that shows Arithmetic operation.

Level 2: Create a basic console application that shows Comparison Operators

Project No. 2:

Level 1: Creating a dialogue tree using conditional statements.

Level 2: Create a text adventure game with player dealing damage random between (5,10) damage to enemy's health

Project No. 3:

Level 1: Create a text adventure game.

Targeted Application & Tools that can be used:

Understanding game development process using C# and game engine

Tools used will be Visual Studio community edition and Visual Studio Code.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to develop a game (2D or 3D)

Text Books

Mastering Unity 2017 Game Development with C# - Thorn, Alan

Learning C# 7 By Developing Games with Unity 2017: Learn C# Programming by Building Fun and Interactive Games with Unity -Micael DaGraça, Predrag Končar, Predrag Koncar

Topics relevant to SKILL DEVELOPMENT: Interface, Multiple Interfaces-Enums, Files, Exceptions-Game Project Skill Development through Experiential Learning Techniques. This is attained through assessment component mentioned in course handout.

Course Pre- requisites	NA					
Anti- requisites	NA					
Course Description	This course will introduce students to principles of level design such as pacing, difficulty, flow, player guidance and aesthetics. They will also learn how to design levels for mobile and hyper-casual games, considering their simple mechanics, short play sessions, and puzzle elements. Throughout the course, students will be given opportunities to create and test their own levels using level design tools in-built in Game Engines. At the end of the course, students will understand the entire process of creating a level for diverse types of game.					
Course Objective	The objective of the course is to familiarize the le Design and attain Skill Development through Expe					evel
Course Out Comes	On successful completion of the course, the students shall be able to: Explain the process of basic game level creation. Practical Component: Produce game levels for 2D games. Produce game levels for puzzle games.

Level 1: Student will learn to breakdown levels from existing games and understand how the levels were designed.

Experiment NO 2: Designing the Critical Path.

Level 1: Student will learn to design the critical path for a level and create a Level Map using software.

Experiment NO 3: Puzzle Design Creation.

Level 1: Students will create levels for an existing puzzle game.

Targeted Application & Tools that can be used: Level Design is used to design various kinds of levels in a game. It also helps to understand the concept of the game and the game flow. Level Design is used to guide the player to points of interest and make sure the player is never lost within the game-world.

Version No.	1.0				1	1	1	
Course Pre- requisites	DES2055 C# Basics fo	r Game Developmen	t					
Anti-requisites	NIL							
Course Description	This course will dive into advanced concepts and techniques in C# programming, with a focus on their practical application in game development. Topics covered will include data structures, algorithms, memory management, advanced scripting techniques, and optimization strategies. Students will also learn how to use Unity's built-in features to create advanced gameplay mechanics and will work on several hands-on projects to apply the concepts learned. By the end of this course, students will have a deeper understanding of the C# language and its capabilities and will have developed the skills to create complex and optimized games using Unity.							
Course Objective	The objective of the course is to familiarize the learners with the concepts of Advanced C# for Game Development and attain Skill Development through Experiential Learning techniques.							
	On successful comple	etion of the course the	e stud	ents shall be	e able	to:		
	Recognize different p	rogramming concept	S.					
Course Outcomes	Differentiate the use	of various types of al	gorith	ms in C#.				
	Produce a concept fo	r a game.						
	Demonstrate a game	using C# game devel	opme	nt framewor	·k.

Interfaces and Abstract Classes in Game Design

Exception Handling and Debugging in C#

Implementing Finite State Machines (FSM)

Algorithm Optimization and Recursion

Module 3	Game Prototyping	Assignment	Examples/	29 Sessions
Module 5	and Mechanics	Documentation	Demo/Assignments	29 365510115

Topics:

Rapid Prototyping Methodologies

Designing and Implementing Game Mechanics

Unity UI Design and Interaction

Prototyping Game Levels and Worlds

Iterative Development and Playtesting

Mod4le 4	Advanced Game Integration	Assignment Documentation	Examples/ Demo/Assignments	28 Sessions
----------	------------------------------	---------------------------	----------------------------	-------------

Topics:

Particle Systems and Visual Effects

Advanced Lighting and Rendering Techniques

Cinemachine for Camera Control

Audio Integration and Sound Design

Game Performance Optimization and Profiling

List of Practical Tasks:

Project No. 1: Core C# Game Development

Level 1: Task: Develop a basic game application that demonstrates object-oriented programming by creating a player character with simple attributes (e.g., health, score).

Level 2: Task: Extend the application to include an inventory system that allows adding, removing, and viewing items, with dynamic updates based on player actions.

Project No. 2: Advanced Algorithm Application

Level 1: Task: Implement a Finite State Machine (FSM) for an NPC with basic states like idle, move, and attack.

Level 2: Task: Enhance the FSM to include complex states such as patrol, flee, and interact, with optimized transitions based on real-time game conditions.

Project No. 3: Prototyping Game Mechanics

Level 1: Task: Create a basic 2D game prototype featuring core mechanics such as movement, simple physics interactions, and a scoring system.

Level 2: Task: Expand the prototype to include advanced mechanics like power-ups, enemy AI behaviors, and multiple level designs with progressive difficulty.

Project No. 4: Full Game Integration

Level 1: Task: Develop a game integrating core Unity features like basic particle effects, lighting setup, and simple sound effects.

Level 2: Task: Implement advanced integration, including dynamic lighting effects, complex particle systems, Cinemachine for advanced camera control, and adaptive audio that reacts to gameplay changes.

Targeted Application & Tools that can be used: Understanding the requirements of the game industry and moving with the trend

Tools Used:

Unity Profiler

Blender/Maya (Optional for Art Assets)

Adobe Photoshop/GIMP

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final product that includes all or most of the artwork which was taught in the Modules.

Anti-requisites	NA					
Course Description	With this course, we aim to equip students with knowledge so that they start designing hyper-casual games. An important part of any hyper-casual game is its economy. As such, we will be studying different economic models and different monetization techniques used in the industry. A video game's UI is very important to inform the player of all relevant information. Such as player stats, enemy stats, health and damage points and much more. This course goes into the entire workflow of creating UI/UX for video games. By the end of this course, students will					

	also understand the and tracking its per		metrics and analytics by lau	nching a game			
Course Objective	•	he objective of the course is to familiarize the learners with the concepts of Hyper- asual Game Design and attain Skill Development through Experiential Learning echniques.					
Course Out Comes	Explain the process Produce a Hyper-Ca	n successful completion of the course, the students shall be able to: xplain the process of creating hyper-casual games. roduce a Hyper-Casual Game with an emphasis on Economy Design. pply UI/UX design techniques and create a working prototype.

Freemium Models:	Components and Str	rategies					
Types of In-Game Currencies (Soft, Hard, Energy, etc.)							
Effective Use of Ad	s (Banner, Interstitial,	Rewarded Ads)					
Growth, Retention,	, and Key Performanc	e Indicators (KPIs)					
Module 3	UI/UX Design for Hyper-Casual Games	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	25 Sessions			

Topics:

Basics of UI/UX and Their Importance in Games

Minimalist Design for Accessibility

Wireframing and Prototyping (Low-Fi to Hi-Fi)

Visual Feedback and Game Aesthetics

Case Studies of Minimal UI (e.g., Pick-up-and-Play, Instant Play)

List of Laboratory Tasks:

Experiment No 1: Deconstructing Popular Games.

Level 1: Take a popular hyper-casual game and deconstruct it. Understand the different elements and mechanics that make up the game. Create a proper document of your findings along with the gameplay loops.

Level 2:

Experiment No 2: Game Monetization.

Level 1: Decide the entire Monetization Model for your hyper-casual game. What are soft currencies? What are hard currencies?

Level 2: Develop a detailed monetization plan for the chosen hyper-casual game that incorporates multiple revenue streams.

Experiment No 2: Types of UI.

Level 1: Give examples for each of the four types of UI from popular games.

Level 2: Deep dive into key UI design principles such as usability, accessibility, aesthetics, and consistency.

Targeted Application & Tools that can be used: An important part of any hyper-casual game is its economy. As such, we will be studying about different economy models used in the industry and the different monetization techniques to make sure the games being designed turn a profit.

Integrating Models into Game Engines

List of Practical Tasks:

Project No. 1: Basic Sculpting Techniques

Level 1: Create a simple 3D object (e.g., a stylized tree, basic character or creature) using fundamental sculpting tools in ZBrush or Blender.

Level 2: Design a more complex base mesh for a character or creature using advanced sculpting tools and ZSpheres.

Project No. 2: Anatomy and Proportions in Sculpting

Level 1: Sculpt a simple human or creature bust, paying attention to basic anatomical landmarks and proportions.

Level 2: Sculpt a full human body or creature with attention to detailed anatomical features such as muscles, joints, and realistic facial structures.

Project No. 3: Advanced Surface Detailing and Texturing

Level 1: Add basic surface details such as wrinkles, pores, and scars to a sculpted character or creature using alphas and custom brushes.

Level 2: Create a hyper-realistic character or creature, detailing skin textures, pores, wrinkles, and adding unique surface features (e.g., scales, fur).

Project No. 4: Retopology and Game Engine Integration

Level 1: Retopologize a simple sculpted model for game use, ensuring that it is low-poly and optimized for performance.

Level 2: Complete the retopology of a detailed character or creature, perform UV unwrapping, and prepare the model for texturing and export into a game engine.

Targeted Application & Tools that can be used:

Focus on creating high-quality, optimized 3D models for games, animation, VR, and 3D printing. Models must meet industry standards for performance, resolution, and integration with game engines.

Tools:

Traditional Sculpting Tools (pencil, sketchbook, colors)

Digital Sculpting Tools (ZBrush, Blender, Mudbox, Substance Painter, Unity/Unreal Engine)

Documentation

Topics:

Lighting and Post Processing

Advanced Blueprint Scripting

Particle Effects

Camera and Cinematics

Debugging

Building and Exporting Games

List of Laboratory Tasks:

Experiment NO 1: Designing a level using Game Engine.

Level 1: Student will learn to design a level, with player guidance and proper lighting and the critical path using game engine.

Experiment NO 2: Design a short Cinematic.

Level 1: Student will learn to design a short cinematic using game engine. By importing animations and understanding how the in-engine camera works.

Experiment NO 3: 3D Game Prototype.

Level 1: Students will create a working prototype for a 3D Game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a solid foundation in Unreal Engine, progressing from basic skills to the creation of a full 3D game by the end of the semester.

Course Pre- requisites	NA							
Anti-requisites	NA							
Course Description	This course provides a comprehensive introduction to the principles and practices of combat design in video games. The course will cover both melee and ranged combat design, AI behavior in combat, and the integration of combat systems into game narratives and environments.							
Course Objective	The objective of the course is to familiarize the learners with the concepts of Combat Design and attain Skill Development through Experiential Learning techniques.							
Course Out Comes	On successful completion of the course, the students shall be able to: Describe the process of creating immersive combat interactions. Practical Component: Create combat encounters for different enemy classes in games.							

	Create a well-bala	nced and immersive b	ooss fight for a game.	
Course Content:	Fundamentals of C Integrating Comba	_	y Design and Encounter Bala	ncing,
Module 1	Fundamentals of Combat Design	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	10 Classes
Topics:				
Introduction to Cor	nbat Design			
Core Mechanics of	Combat Systems			
Player Controls and	l Feedback			
Designing Melee Co	ombat			
Designing Ranged (Combat			
Module 2	Enemy Design and Encounter Balancing	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	20 Classes
Topics:	l			-
Advanced Combat	Mechanics			
Balancing Combat S	Systems			
Enemy Classes				
Synergy between E	nemy Classes			
AI Behavior in Com	bat			
Creating Engaging B	Enemy Types			
		Demonstration	Observation/ Demo/	
Module 3	Integrating Combat Systems	Case Study	Videos/ Interaction/	15 Classes
		Documentation	Discussion/ Practice	
Topics:	<u> </u>	l	1	I
Integrating Combat	: Systems into Game	e Narratives		
Environmental Des	ign for Combat Scer	narios		

User Experience and Feedback in Combat Design

List of Laboratory Tasks:

Experiment NO 1: Analyze the combat system of an existing game and identify its core mechanics.

Level 1: Student will learn to how contemporary games' combat systems work.

Experiment NO 2: Design and balance a combat system for multiple enemy classes.

Level 1: Student will learn to design and balance combat system for different enemy classes and understand how synergy between them can lead to interesting and engaging encounters.

Experiment NO 3: Create a boss fight for a game.

Level 1: Students will design the different systems and balance a boss encounter for a game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a thorough understanding of combat design for video game applications, from foundational principles to advanced techniques and project development, enabling them to create engaging and balanced combat systems by the end of the semester.

Version No.	1.0			I				
Course Pre- requisites	NA							
Anti-requisites	NA							
Course Description	This course provides an in-depth exploration of special effects (VFX) in game design, covering the fundamentals of visual effects creation and implementation. Students will learn techniques for creating particle systems, shaders, and real-time visual effects.							
Course Objective	The objective of the course is to familiarize the learners with the concepts of Special Effects for Game and attain Skill Development through Experiential Learning techniques.							
Course Out Comes	On successful completion of the course, the students shall be able to: Describe the process of game FX creation using Game Engine. Practical Component: Apply post-processing effects to enhance visuals and create specific moods. Produce dynamic and immersive visual effects for a game.							

by the Academic

Council

Course Content:	Fundamentals of Game VFX, Intermediate Techniques in VFX Creation, Advanced VFX Techniques					
Module 1	Fundamentals of Game VFX	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	15 Classes		

Topics:

Introduction to Visual Effects in Games

Basics of Particle Systems

Introduction to Shaders and Materials

Creating Basic VFX Elements

Introduction to VFX Software

	Intermediate	Demonstration	Observation/ Demo/	
Module 2	Techniques in	Case Study	Videos/ Interaction/	15 Classes
	VFX Creation	Documentation	Discussion/ Practice	

Topics:

Advanced Particle System Techniques

Complex Shader Development

Real-Time VFX and Optimization

Simulating Natural Phenomena (e.g., water, smoke, fire)

Integrating VFX into Game Engines

		Demonstration	Observation / Dames /	
	Advanced VFX		Observation/ Demo/	
Module 3	Techniques	Case Study	Videos/ Interaction/	15 Classes
	reciniques	Documentation	Discussion/ Practice	

Topics:

Dynamic and Interactive VFX

Lighting and Rendering for VFX

Procedural Effects and Simulations

Optimizing VFX for Performance

List of Laboratory Tasks:

Experiment NO 1: Produce a basic visual effect (e.g., explosion, fire) using particle systems and shaders.

Level 1: Students will learn to how particle systems work in game engines and be able to create FX.

Experiment NO 2: Simulate a natural phenomenon (e.g., flowing water, dynamic smoke) and integrate it into a game engine.

Level 1: Student will be equipped with practical skills in particle system creation, shader development, and VFX production..

Experiment NO 3: Develop procedural effects and simulations for complex VFX.

Level 1: Students will create a working prototype for a 3D Game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a comprehensive understanding of special effects creation for games, from foundational techniques to advanced project development, enabling them to produce professional-quality VFX by the end of the semester.

Version No.	1.0			ı					
Course Pre- requisites	DES2063 – Basic Level Design								
Anti-requisites	NA	NA							
Course Description	This course will introduce students to advanced principles of level design such as pacing, difficulty, flow, player guidance and aesthetics. They will also learn how to design levels for mobile and hyper-casual games, considering their simple mechanics, short play sessions, and puzzle elements. Throughout the course, students will be given opportunities to create and test their own levels using level design tools in-built in Game Engines. At the end of the course, students will understand the entire process of creating a level for diverse types of game.								
Course Objective	The objective of the course is to familiarize the learners with the concepts of Advanced Level Design and attain Skill Development through Experiential Learning techniques.								
Course Out Comes	On successful completion of the course, the students shall be able to: Identify the process of game-level creation. Practical Component: Understand level design principles for puzzle design and environment design. Apply level design techniques and create levels for a hyper-casual game. Identify the critical path in a 3D level and construct the game level using the principles taught.								

Course Content:	Level Design Introduction, Level Design Principles, 2D Level Design, 3D Level Design.					
Module 1	Level Design Introduction	Assignment Case Study Documentation	Observation/ Videos/ Interaction/ Discussion	10 Class		

Topics:

Level Design Introduction.

Fundamentals of Level Design.

Level Design: The Process.

Level Design Fundamentals: Case Studies.

Level Deconstruction: Finding The Critical Path.

Assignment: Level Map Creation: Creating the Critical Path.

I Module 2	Level Design Principles	Assignment	Observation/ Tutorials/	
		Case Study	Videos/ Interaction/	10 Class
		Documentation	Discussion	

Topics:

Fundamentals of Puzzle Design.

Hyper casual Level Design.

Puzzle Design: Case Studies.

Fundamentals of Environment Design.

Level Flow Design.

Player Guidance.

Environment Design: Case Studies.

Module 3		Assignment		
	2D Level Creation	Case Study	Observation/ Tutorials/ Videos/ Interaction/ Discussion/Practice	20 Class
		Demonstration & Participative Learning		

Topics:

2D Level Creation Tools.

Basics of UI.

Creating Levels for a Hyper Casual Game.

Minor Project: Create levels for a Hyper Casual Game.							
Module 4	3D Level Creation	Assignment Case Study Demonstration & Participative Learning	Observation/ Tutorials/ Videos/ Interaction/ Discussion/Practice	20 Class			

Topics:

Outdoor Level Design.

Unity Terrain Tools.

Blockout Level.

Asset Collection.

Level Creation.

Lighting.

Major Project: Create a 3D level using the map you created as a reference.

List of Laboratory Tasks:

Experiment NO 1: Breaking down a game-level.

Level 1: Student will learn to breakdown levels from existing games and understand how the levels were designed.

Experiment NO 2: Designing the Critical Path.

Level 1: Student will learn to design the critical path for a level and create a Level Map using software.

Experiment No. 3: Puzzle Design Creation.

Level 1: Students will create levels for a small hyper casual game, using a Game Engine.

Experiment NO 4: Environment Design.

Level 1: Students will learn to design the environment of a level, using a Game Engine.

Targeted Application & Tools that can be used: Level Design is used to design various kinds of levels in a game. It also helps to understand the concept of the game and the game flow. Level Design is used to guide to player to points of interest and make sure the player is never lost within the game-world.

Digital Drawing Application,

Game Engine.

Course Code: DES3024	Type of Course: 1] Program Core		1	0	6	4
Version No.	1.0					
Course Pre- requisites	DES2075					
Anti-requisites	NIL					
Course Description	This course builds upon students' existing knowledge of 3D modeling, texturing, and basic animation principles to focus specifically on creating high-quality animations for game environments. Students will delve into advanced animation techniques, rigging, optimization for real-time engines, and game-specific animation workflows. Through a combination of theoretical lectures and practical exercises, students will gain the skills necessary to bring characters, objects, and environments to life in a game setting.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of 3D Animation and attain Skill Development through Experiential Learning techniques.					

On successful completion of the course the students shall be able to:

Theory Components:

Define core principles of advanced animation techniques, rigging for animation, and game animation workflows

Practical component:

Explain the importance of optimization techniques for real-time performance in game animation.

Apply advanced animation techniques to create high-quality animation cycles for characters and objects in a game environment.

Apply rigging principles to create functional rigs for characters and objects, ensuring proper weight distribution and deformation.

Course Content:

		Assignment		
Module 1	Introduction to Game Animation	Demonstration and Participative learning.	Examples/ Demo/Assignments	26 Hours
		Documentation		

Topics: Theory (5 hours):

Game animation pipeline

Character design for animation

Animation principles in game development

Game animation tools (e.g., industry-standard software overview)

Practical (21 hours):

Introduction to game animation workflow

Basic rig exploration and understanding

Animating simple game mechanics (jumping, running, etc.)

Creating basic idle and walk cycles

Module 2	Modulo 2	Advanced Modeling for	Assignment	Examples/	26 Hours
	Wodule 2	Games	Documentation	Demo/Assignments	20 HOUIS

Topics: Theory (3 hours):

Low poly vs. high poly modeling for games

Optimization techniques for game assets

retopology for game animation

Practical (23 hours):

Creating game-ready character models (low poly)

UV unwrapping for efficient texturing

Basic retopology techniques for animation

	Modulo 2	Character Animation for	Assignment	Examples/	26 hours
Module 3	Module 5	Games	Documentation	Demo/Assignments	20110015

Topics: Theory (2 hours):

Advanced animation principles for game characters

Forward Kinematics vs. Inverse Kinematics (FK vs. IK)

Acting for game animation

Practical (24 hours):

Advanced character rigging for animation

Applying IK and FK for different scenarios

Creating complex character animations (attacks, special moves)

Introduction to motion capture for games (optional)

Mod4le 4 Game Environ Animation and Integration	t Assignment Documentation	Examples/ Demo/Assignments	26 hours
---	-----------------------------	----------------------------	----------

Topics: Theory (3 hours):

Animating game environments (props, objects)

Creating cinematics for games (cutscenes)

Integrating animation into game engines (e.g., Unity, Unreal)

Practical (23 hours):

Animating game props and objects

Creating basic cinematics using animation tools

Exporting and importing animations into a game engine (using a chosen engine)

Basic optimization for in-game animation playback

List of Practical Tasks:

Project No. 1

Level 1: Character Animation Basics

Level 2: Rig Exploration.

Level 3: Interactive Game Mechanic Animation.

Project No. 2:

Level 1: Low-Poly Character Creation.

Level 2: UV Unwrapping Practice.

Level 3: Game-Ready Asset Creation.

Project No. 3:

Level 1: Advanced Character Rigging.

Level 2: Complex Character Animation.

Level 3: Introduction to Motion Capture Integration (Optional)

Project No. 4:

Level 1: Game Environment Prop Animation.

Level2: Basic Cinematic Creation.

Level3: Game Engine Integration.

Targeted Application & Tools that can be used:

Understanding the requirements of the game industry and moving with the trend

Tools used will be 3D Software and game engine(Unity/Unreal).

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final product that includes all or most of the artwork which was taught in the Modules.

Version No.			•	1	•	
Course Pre- requisites	tes Knowledge and Skills related to all the courses studied in previous semesters.					
Anti-requisites	NIL					
Course Description	During their 60-day internship, the student should maximize learning and contribution by immersing themselves fully in the company's culture and properties of the should begin with a thorough orientation to understand the organization goals and values. Setting clear objectives with their supervisor and aligning with personal development goals is crucial. Active participation in team action meetings, and training sessions helps them grasp the company's workflow a expectations. Early on, the student should focus on observation and learning from experience colleagues. Asking questions, seeking feedback, and taking initiative in small					tion's them tivities, and

demonstrate their skills. As they gain confidence, they should engage more deeply in project work, ensuring to meet deadlines and exceed quality standards. Regularly reviewing progress with supervisors and adjusting goals as needed maximizes their impact. Networking with colleagues across departments and seeking mentorship opportunities broadens their understanding of the industry and career paths. Documenting achievements and lessons learned to update their portfolio is essential. Finally, reflecting on the internship experience helps them identify strengths and areas for growth. By embracing challenges with enthusiasm and professionalism, they not only contribute effectively but also lay a solid foundation for future career endeavors. The objective of this course is to familiarize the learners with the concepts of Tasks Course Objectives based learning through internship in companies and attain Employability Skills through Experiential Learning techniques. On successful completion of this course the students shall be able to: Remembering: The student recalls and describes the company's goals, values, and workflow from their orientation and ongoing activities. ☑ Understanding: They demonstrate understanding by explaining how their internship tasks contribute to the company's objectives and adapting to its culture. ② Applying: Through active participation and project work, they apply their knowledge and Course Outcomes skills in design, software tools, and teamwork to real-world challenges. Analyzing: They analyze feedback from supervisors and colleagues to improve their work quality and efficiency, adjusting their approach as needed. ② Evaluating: The student evaluates their own performance and contributions, reflecting on achievements, challenges, and areas for growth during the internship. 2 Creating: By documenting their achievements and updating their portfolio, they create a comprehensive record of their internship experience and design accomplishments. Topics:

Advanced Techniques in AR and VR Development

Creating Immersive Storytelling Experiences

Integrating AR and VR with AI and IoT

Testing, Iteration, and User Feedback in AR and VR

List of Laboratory Tasks:

Experiment NO 1: Research and present on the history and evolution of AR and VR in gaming.

Level 1: Student will learn the evolution of AR and VR in gaming.

Experiment NO 2: Design a user experience flow for an AR or VR application.

Level 1: Student will learn to design a short experience flow for their project. This can be done in Figma or game engine directly.

Experiment NO 3: Create a 3D environment for an AR or VR game.

Level 1: Students will use assets from their previous projects or create new ones and create an immersive 3D environment for their final XR project.

Experiment NO 4: Design, develop, and present a complete AR or VR game prototype.

Level 1: Students will create a working prototype for an XR game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a thorough understanding of AR and VR development for video game applications, from foundational principles to advanced project development, enabling them to create immersive game experiences by the end of the semester.

SEMESTER 8

Course Code:	Course Title: Game Prototyping	L-T-P-C	0	0	0	3
DES2132	Type of Course: Discipline Elective (NTCC)					
Version No.	1.0					
Course Pre- requisites	NA					
Anti-requisites	NIL					
Course Description	Game prototyping is a crucial phase within the game design department that involves creating early versions or mock-ups of a video game to test and refine its core mechanics, gameplay elements, and overall concept. It serves as a preliminary step to validate ideas and explore potential directions for the final game. During prototyping, designers, developers, and artists collaborate to quickly produce a basic representation of the game, often using simplified graphics and mechanics. This allows the team to identify what works and what doesn't, addressing any design flaws or issues before investing significant time and resources into full development.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Game Prototyping and attain Employability through EXPERIENTIAL LEARNING techniques.					

Course Outcomes	Upon successful completion of the course the students shall be able to: List the core elements that make up a game's mechanics Explain the concept of iterative design and its role in the game prototyping process Use a prototyping tool to create a basic playable representation of your game concept

Course Pre- requisites	Knowledge and Skills related to all the courses studied in previous semesters.					
Anti-requisites	NIL					
Course Description	For their graduation project in Design, students should choose a topic that aligns with their interests and career goals. Begin with a well-defined proposal and timeline, ensuring the project is feasible within the given resources and time frame. Conduct thorough research, including a literature review and market/user analysis, to ground the project in current trends and needs. Develop concepts, create prototypes, and iterate based on feedback from mentors and peers. Schedule regular check-ins with mentors for guidance and engage in peer reviews for diverse perspectives. Compile the project into a professional portfolio, documenting the process and final outcomes. Write a detailed thesis report and prepare a compelling final presentation to showcase your work. Reflect on the learning experience, assessing strengths and areas for improvement, and consider future developments or opportunities for further research or publication. This structured approach ensures a comprehensive and impactful graduation project.		lysis, verse ne re ured			
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through portfolio making and attain Employability Skills through Experiential Learning techniques.					

	On successful completion of this course the students shall be able to:
	2 Remembering:
	The student recalls and describes the company's goals, values, and workflow from their orientation and ongoing activities.
	2 Understanding:
	They demonstrate understanding by explaining how their internship tasks contribute to the company's objectives and adapting to its culture.
	2 Applying:
course outcomes	Through active participation and project work, they apply their knowledge and skills in design, software tools, and teamwork to real-world challenges.
	2 Analyzing:
	They analyze feedback from supervisors and colleagues to improve their work quality and efficiency, adjusting their approach as needed.
	2 Evaluating:
	The student evaluates their own performance and contributions, reflecting on achievements, challenges, and areas for growth during the internship.
