PART A - PROGRAM REGULATIONS

1. Vision & Mission of the University and the School / Department

1.1 Vision of the University

To be a Value-driven Global University, excelling beyond peers and creating professionals of integrity and character, having concern and care for society.

1.2 Mission of the University

- Commit to be an innovative and inclusive institution by seeking excellence in teaching, research and knowledge-transfer.
- Pursue Research and Development and its dissemination to the community, at large.
- Create, sustain and apply learning in an interdisciplinary environment with consideration for ethical,
 ecological and economic aspects of nation building.
- Provide knowledge-based technological support and services to the industry in its growth and development.
- To impart globally-applicable skill-sets to students through flexible course offerings and support industry's requirement and inculcate a spirit of new-venture creation.

1.3 Vision of Presidency- School of Design

To become a value-based, Innovation-driven School of Design, transforming students into visionary designers, who shape the world with creative and socially sustainable solutions.

1.4 Mission of Presidency- School of Design

- Inspire and train students to be creative Thinkers and Designers.
- Empower students with design knowledge to address social, technical and economic challenges with innovative solutions.
- Sensitize students to embrace lifelong learning in a technology-enabled environment.
- Foster strategic alliances between Society and Academia for Research and its practical application.
- Instill Entrepreneurial and Leadership Skills to address social, environmental and community needs.

2. Preamble to the Program Regulations and Curriculum

This is the subset of Academic Regulations and it is to be followed as a requirement for the award of **B.Des** degree.

The Curriculum is designed to take into the factors listed in the Choice Based Credit System (CBCS) with focus on Social immersion, Project Based Learning, Studio Based Courses, Workshops, Field visits, Interdisiplinary Projects, International Immersion, Live Projects, Internship and Portfolio to enable the

students to become eligible and fully equipped for employment in industries, choose higher studies or entrepreneurship.

In exercise of the powers conferred by and in discharge of duties assigned under the relevant provision(s) of the Act, Statutes and Academic Regulations of the University, the Academic Council hereby makes the following Regulations.

3. Short Title and Applicability

- a. These Regulations shall be called the **Bachelor of Design** Degree Program Regulations and Curriculum 2024-2028.
- b. These Regulations are subject to, and pursuant to the Academic Regulations.
- c. These Regulations shall be applicable to the ongoing Bachelor of Design Degree Programs of the 2024-2028 batch, and to all other Bachelor of Design Degree Programs which may be introduced in future.
- d. These Regulations shall supersede all the earlier **Bachelor of Design** Degree Program Regulations and Curriculum, along with all the amendments thereto.
- e. These Regulations shall come into force from the Academic Year 2024-2025.

4. Definitions

In these Regulations, unless the context otherwise requires:

- a. "Academic Calendar" means the schedule of academic and miscellaneous events as approved by the Vice Chancellor;
- b. "Academic Council" means the Academic Council of the University;
- c. "Academic Regulations" means the Academic Regulations, of the University;
- d. "Academic Term" means a Semester or Summer Term;
- e. "Act" means the Presidency University Act, 2013;
- f. "AICTE" means All India Council for Technical Education;
- g. "Basket" means a group of courses bundled together based on the nature/type of the course;
- h. "BOE" means the Board of Examinations of the University;
- i. "BOG" means the Board of Governors of the University;
- j. "BOM" means the Board of Management of the University;
- k. "BOS" means the Board of Studies of a particular Department/Program of Study of the University;
- I. "CGPA" means Cumulative Grade Point Average as defined in the Academic Regulations;
- m. "Clause" means the duly numbered Clause, with Sub-Clauses included, if any, of these Regulations;
- n. "COE" means the Controller of Examinations of the University;

- o. "Course In Charge" means the teacher/faculty member responsible for developing and organising the delivery of the Course;
- p. "Course Instructor" means the teacher/faculty member responsible for teaching and evaluation of a Course;
- q. "Course" means a specific subject usually identified by its Course-code and Course-title, with specified credits and syllabus/course-description, a set of references, taught by some teacher(s)/course-instructor(s) to a specific class (group of students) during a specific Academic Term;
- r. "Curriculum Structure" means the Curriculum governing a specific Degree Program offered by the University, and, includes the set of Baskets of Courses along with minimum credit requirements to be earned under each basket for a degree/degree with specialization/minor/honours in addition to the relevant details of the Courses and Course catalogues (which describes the Course content and other important information about the Course). Any specific requirements for a particular program may be brought into the Curriculum structure of the specific program and relevant approvals should be taken from the BOS and Academic Council at that time.
- s. "DAC" means the Departmental Academic Committee of a concerned Department/Program of Study of the University;
- t. "Dean" means the Dean / Director of the concerned School;
- u. "Degree Program" includes all Degree Programs;
- v. "Department" means the Department offering the degree Program(s) / Course(s) / School offering the concerned Degree Programs / other Administrative Offices;
- w. "Discipline" means specialization or branch of B.Tech. Degree Program;
- x. "HOD" means the Head of the concerned Department;
- y. "Specialization Incharge" means the person who is responsible for each specialization;
- z. "L-T-P-C" means Lecture-Tutorial-Practical-Credit refers to the teaching learning periods and the credit associated;
- aa. "MOOC" means Massive Open Online Courses;
- bb. "MOU" means the Memorandum of Understanding;
- cc. "NPTEL" means National Program on Technology Enhanced Learning;
- dd. "Parent Department" means the department that offers the Degree Program that a student undergoes;
- ee. "Program Head" means the administrative head of a particular Degree Program/s;
- ff. "Program Regulations" means the Bachelor of Design Degree Program Regulations and Curriculum, 2024-2028;

- gg. "Program" means the Bachelor of Design (B.Des.) Degree Program;
- hh. "PSOD" means the Presidency School of Design;
- ii. "Registrar" means the Registrar of the University;
- ij. "School" means a constituent institution of the University established for monitoring, supervising and guiding, teaching, training and research activities in broadly related fields of studies;
- kk. "Section" means the duly numbered Section, with Clauses included in that Section, of these Regulations;
- II. "SGPA" means the Semester Grade Point Average as defined in the Academic Regulations;
- mm. "Statutes" means the Statutes of Presidency University;
- nn. "Sub-Clause" means the duly numbered Sub-Clause of these Program Regulations;
- oo. "Summer Term" means an additional Academic Term conducted during the summer break (typically in June-July) for a duration of about eight (08) calendar weeks, with a minimum of thirty (30) University teaching days;
- pp. "SWAYAM" means Study Webs of Active Learning for Young Aspiring Minds.
- qq. "UGC" means University Grant Commission;
- rr. "University" means Presidency University, Bengaluru; and
- ss. "Vice Chancellor" means the Vice Chancellor of the University.

5. Program Description

The **Bachelor of Design** Degree Program Regulations and Curriculum 2024-2028 are subject to, and, pursuant to the Academic Regulations. These Program Regulations shall be applicable to the following ongoing **Bachelor of Design (B.Des)** Degree Programs of 2024-2028 offered by the Presidency School of Design (PSOD) with the following Specialisation:

- 1. Fashion Design
- 2. Communication Design
- 3. Product Design
- 4. Space Design
- 5. Game Design
- 5.1 These Program Regulations shall be applicable to other similar Specialisations, which may be introduced in future.
- 5.2 These Regulations may evolve and get amended or modified or changed through appropriate approvals from the Academic Council, from time to time, and shall be binding on all concerned.

5.3 The effect of periodic amendments or changes in the Program Regulations, on the students admitted in earlier years, shall be dealt with appropriately and carefully, so as to ensure that those students are not subjected to any unfair situation whatsoever, although they are required to conform to these revised Program Regulations, without any undue favour or considerations.

6. Minimum and Maximum Duration

- 6.1 **Bachelor of Design** Degree Program is a Four-Year, Full-Time Semester based program. The minimum duration of the B.Des. Program is four (04) years and each year comprises of two academic Semesters (Odd and Even Semesters) and hence the duration of the **B.Des**. program is eight (08) Semesters.
- 6.2 A student who for whatever reason is not able to complete the Program within the normal period or the minimum duration (number of years) prescribed for the Program, may be allowed a period of two years beyond the normal period to complete the mandatory minimum credits requirement as prescribed by the concerned Program Regulations and Curriculum. In general, the permissible maximum duration (number of years) for completion of Program is 'N' + 2 years, where 'N' stands for the normal or minimum duration (number of years) for completion of the concerned Program as prescribed by the concerned Program Regulations and Curriculum.
- 6.3 The time taken by the student to improve Grades/CGPA, and in case of temporary withdrawal/rejoining (Refer to Clause **Error! Reference source not found.** of Academic Regulations), shall be counted in the permissible maximum duration for completion of a Program.
- In exceptional circumstances, such as temporary withdrawal for medical exigencies where there is a prolonged hospitalization and/or treatment, as certified through hospital/medical records, women students requiring extended maternity break (certified by registered medical practitioner), and, outstanding sportspersons representing the University/State/India requiring extended time to participate in National/International sports events, a further extension of one (01) year may be granted on the approval of the Academic Council.
- 6.5 The enrolment of the student who fails to complete the mandatory requirements for the award of the concerned Degree (refer Section 19.Error! Reference source not found. of Academic Regulations) in the prescribed maximum duration (Clauses 18.1 and 18.2 of Academic Regulations 2025), shall stand terminated and no Degree shall be awarded.

7 Programme Educational Objectives (PEO)

After four years of successful completion of the program, the graduates shall be able to:

- **PEO 1** Become a professional Designer in the area of Fashion design, Space design, Product design, Communication Design and Game Design .
- **PEO 2** Engage in active research in the specialized domain of Design.
- **PEO 3** Evolve as an Entrepreneur/Consultant/Design Practitioner.

8 Programme Outcomes (PO) and Programme Specific Outcomes (PSO)

8.1 Programme Outcomes (PO)

On successful completion of the Program, the students shall be able to:

- **PO 1** Apply knowledge of fundamental principles of design.
- **PO 2** Design and conduct experiments, as well as analyse and interpret design data.
- PO 3 Design a system, program, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- **PO 4** Operate on multidisciplinary teams.
- **PO 5** Identify, formulate and solve design problems.
- **PO 6** Demonstrate professional and ethical responsibility.
- PO 7 Interpret effectively.
- PO 8 Evaluate the impact of design solutions in a global, economic, environmental and societal context.
- PO 9 Recognize the need for and an ability to engage in lifelong design learning.
- PO 10 Identify contemporary design issues.
- **PO 11** Apply the techniques, skills, and modern design tools necessary for design practice.
- **PO 12** Apply the design principles and management principles to manage the project of multidisciplinary nature.

8.2 Program Specific Outcomes (PSOs):

On successful completion of the Program, the students shall be able to:

- **PSO 1** Identify and examine raw materials and constituents required for design innovation and development
- **PSO 2** Demonstrate skills in ideation, conceptualization and production of design solutions for manufacturing organizations and design houses
- **PSO 3** Apply creative skills for the production of sustainable, social and environmental-friendly products and processes

9 Admission Criteria (as per the concerned Statutory Body)

The University admissions shall be open to all persons irrespective of caste, class, creed, gender or nation. All admissions shall be made on the basis of merit in the qualifying examinations; Provided that forty percent of the admissions in all Programs of the University shall be reserved for the students of Karnataka State and admissions shall be made through a Common Entrance Examination conducted by

the State Government or its agency and seats shall be allotted as per the merit and reservation policy of the State Government from time to time.

The admission criteria to the B.Des Program is listed in the following Sub-Clauses:

- 9.1 An applicant who has successfully completed a Pre-University course or Senior Secondary School course (+2) or equivalent such as (11+1), 'A' level in Senior School Leaving Certificate Course from a recognized University of India or outside or from Senior Secondary Board or equivalent, constituted or recognized by the Union or by the State Government of that Country for the purpose of issue of qualifying certificate on successful completion of the course, may apply for and be admitted into the course.
- 9.2 Provided further, the applicant can be from any discipline and must have completed and passed the Pre-University/Higher Secondary / (10+2) / (11+1) examination, and, the applicant must have obtained a minimum of 45% of the total marks (40% in case of candidates belonging to the Reserved Category as classified by the Government of Karnataka) in these subjects taken together.
- 9.3 The applicant must clear the Design Entrance Examinations of the University.
- 9.4 Reservation for the SC/ST and other backward classes shall be made in accordance with the directives issued by the Government of Karnataka from time to time.
- 9.5 Admissions are offered to Foreign Nationals and Indians living abroad in accordance with the rules applicable for such admission, issued from time to time, by the Government of India.
- 9.6 Candidates must fulfil the medical standards required for admission as prescribed by the University.
- 9.7 If, at any time after admission, it is found that a candidate had not in fact fulfilled all the requirements stipulated in the offer of admission, in any form whatsoever, including possible misinformation and any other falsification, the Registrar shall report the matter to the Board of Management (BOM), recommending revoking the admission of the candidate.
- 9.8 The decision of the BOM regarding the admissions is final and binding.

10 Lateral Entry / Transfer Students requirements

- 10.1.1 The University admits students directly to the second year (3rd Semester) of the B.Des Degree Program as per the provisions and/or regulations of the Government of Karnataka pertaining to the "Lateral Entry" scheme announced by the Government from time to time. Further, the general conditions and rules governing the provision of Lateral Entry is listed in the following Sub-Clauses:
- 10.1.2 Admission to 2nd year (3rd Semester) of the B.Des Degree program shall be open to the candidates who are holders of a 3-year Diploma in their respective domains (or equivalent

- qualification as recognized by the University), who have secured not less than forty-five percent (45%) marks in the final year examination (fifth and sixth semesters of the Diploma Program) in the appropriate degree related to the respective domains. In case of SC/ST and OBC candidates from Karnataka the minimum marks for eligibility shall be forty percent (40%).
- 10.1.3 Provided further that, candidates seeking Lateral Entry may be required to complete specified bridge courses as prescribed by the University. Such bridge courses, if any, shall not be included in the CGPA computations.
- 10.1.4 All the existing Regulations and Policies of the University shall be binding on all the students admitted to the Program through the provision of "Lateral Entry".
- 10.1.5 The Course requirements prescribed for the 1st Year of the B.Des Program shall be waived for the student(s) admitted through "Lateral Entry" and the duration of the B.Des Program for such students is three (03) years, commencing from the 3rd Semester (commencement of the 2nd Year) of the B.Des Program and culminating with the 8th Semester (end of the 4th Year) of the B.Des Program.
- 10.1.6 The existing Program Regulations of the concerned Program to which the student is admitted through the provision of "Lateral Entry" shall be binding on the student with effect from the 3rd Semester of the Program. i.e., the Program Structure and Curriculum from the 3rd to 8th Semesters of the Program concerned shall be binding on the student admitted through "Lateral Entry". Further, any revisions/ amendments made to the Program Regulations thereafter, shall be binding on all the students of the concerned Program.
- 10.1.7 All the Courses (and the corresponding number of Credits) prescribed for the 1st Year of the concerned B.Des Program shall be waived for the student(s) admitted to that B.Des Program through "Lateral Entry". Further, the Minimum Credit Requirements for the award of the B.Des Degree in the concerned Program shall be prescribed/ calculated as follows:
 - The Minimum Credit Requirements for the award of the Bachelor of Design (B.Des) Degree prescribed by the concerned Bachelor of Design Degree Program Regulations and Curriculum, 2024-2028, minus the number of Credits prescribed for the 1st Year (total number of Credits prescribed for the 1st and 2nd Semesters) of the B.Des Program.
 - For instance, if the Minimum Credit Requirements for the award of the Bachelor of Design (B.Des) Degree as prescribed by the Program Regulations for B.Des is "N" Credits, and, if the total credits prescribed in the 1st Year (total credits of the 1st and 2nd Semesters) of the Program concerned is "M" Credits, then the Minimum Credit Requirements for the award of the B.Des for a student who joins the Program through the provision of the Lateral Entry, shall be "N M" Credits.
- 10.1.8 Further, no other waiver except the Courses prescribed for the 1st year of the B.Des Program of the University shall be permissible for students joining the B.Des Program through the provision of Lateral Entry.

10.2 Transfer of student(s) from another recognized University to the 2nd year (3rd Semester) of the B.Des. Program of the University

A student who has completed the 1st Year (i.e., passed in all the Courses/Subjects prescribed for the 1st Year) of the B.Des Four-Year Degree Program from another recognized University, may be permitted to transfer to the 2nd Year (3rd Semester) of the B.Des Program of the University as per the rules and guidelines prescribed in the following Sub-Clauses:

- 10.2.1 The concerned student fulfils the criteria specified in Sub-Clauses 10.1.1, 10.1.2 and 10.1.3
- 10.2.2 The student shall submit the Application for Transfer along with a non-refundable Application Fee (as prescribed by the University from time to time) to the University no later than July of the concerned year for admission to the 2nd Year (3rd Semester) B.Des Program commencing on August on the year concerned.
- 10.2.3 The student shall submit copies of the respective Marks Cards/Grade Sheets/Certificates along with the Application for Transfer.
- 10.2.4 The transfer may be provided on the condition that the Courses and Credits completed by the concerned student in the 1st Year of the B.Des Four year Degree Program from the concerned University, are declared equivalent and acceptable by a Committee constituted by the Vice Chancellor for this purpose. Further, the Committee may also prescribe the Courses and Credits the concerned students shall have to mandatorily complete, if admitted to the 2nd Year of the B.Des Program of the University.
- 10.2.5 The Specialization allotted to the student concerned shall be the decision of the University and binding on the student.

11 Change of Specialization

A student admitted to a particular Specialization of the B.Des Program will normally continue studying in that Specialization till the completion of the program. However, the University reserves the right to provide the option for a change of Specialization, or not to provide the option for a change of Specialization, at the beginning of 3rd semester of the B.Des Program to eligible students in accordance with the following rules and guidelines: framed by the University from time to time.

- 11.1 Only those students, who have passed all the Courses prescribed in the 1st Year of the B.Des Program and had obtained a CGPA of not less than 6.50 at the end of the 2nd semester, shall be eligible for consideration for a change of Specialization.
- 11.2 A change in specialization, if permitted, will take effect from the beginning of the 3rd Semester of the B.Des program. Application for this change must be obtained within the first week after

- announcement of results. After this period, no requests for a change in specialization will be considered under any circumstances.
- 11.3 The student(s) provided with the change of specialization shall fully adhere to and comply with the Program Regulations of the concerned specialization of the B.Des Program, the Fee Policy pertaining to that specialization of the B.Des Program, and, all other rules pertaining to the changed specialization existing at the time.
- 11.4 Change of specialization once made shall be final and binding on the student. No student shall be permitted, under any circumstances, to refuse the change of specialization offered.
- 11.5 The eligible student may be allowed a change in specialization, strictly in order of inter se merit, subject to the conditions given below:
 - 11.5.1 The actual number of students in the third Semester in any particular specialization to which the transfer is to be made, should not exceed the intake fixed by the University for the concerned specialization; and,
 - 11.5.2 The actual number of students in any specialization from which transfer is being sought does not fall below 75% of the total intake fixed by the University for the concerned specialization.

The process of change of specialization shall be completed within the first fifteen days of Registration for the 3rd Semester of the B.Des Program.

- 12 Specific Regulations regarding Assessment and Evaluation (including the Assessment Details of NTCC Courses, Weightages of Continuous Assessment and End Term Examination for various Course Categories)
 - 12.1. The academic performance evaluation of a student in a Course shall be according to the University Letter Grading System based on the class performance distribution in the Course.
 - 12.2. Academic performance evaluation of every registered student in every Course registered by the student is carried out through various components of Assessments spread across the Semester. The nature of components of Continuous Assessments and the weightage given to each component of Continuous Assessments (refer Clause Error! Reference source not found. of Academic regulation) shall be clearly defined in the Course Plan for every Course, and approved by the DAC.
 - 12.3. Format of the End-Term examination shall be specified in the Course Plan.
 - 12.4. Grading is the process of rewarding the students for their overall performance in each Course.

 The University follows the system of Relative Grading with statistical approach to classify the students based on the relative performance of the students registered in the concerned Course except in the following cases:

- Non-Teaching Credit Courses (NTCC)
- Courses with a class strength less than 30

Absolute grading method may be adopted, where necessary with prior approval of concerned DAC.

Grading shall be done at the end of the Academic Term by considering the aggregate performance of the student in all components of Assessments prescribed for the Course. Letter Grades (Clause Error! Reference source not found. of academic regulations) shall be awarded to a student based on her/his overall performance relative to the class performance distribution in the concerned Course. These Letter Grades not only indicate a qualitative assessment of the student's performance but also carry a quantitative (numeric) equivalent called the Grade Point.

The components of continuous assessments, weightage for each component and the method of evaluation shall be assigned considering the nature of the Courses in terms of the pedagogy and outcomes.

12.5 Assessment Components and Weightage

Table 1: Assessment Components and Weightage for different category of Courses							
Nature of Course and Structure	Evaluation Component	Weightage					
Lecture-based Course	Continuous	50%					
L component in the L-T-P-C Structure is predominant (more	Assessments	3070					
than 1)	End Term Examination	50%					
(Examples 2-0-0-2, 3-0-0-3, etc.)	End Term Examination	30%					
Lab/Practice-based Course	Continuous						
P component in the L-T-P-C Structure is predominant	Assessments	100%					
(Examples: 1-0-0-1, 2-0-4-4, 1-0-4-3, 2-0-2-3, 0-0-4-2 Etc.)	Assessments						
	Guidelines for the	e assessment					
Skill based Courses like Internship, Dissertation / Social	components for the va	arious types of					
Engagement and such similar Non-Teaching Credit Courses,	ses, Courses, with recommended weightages,						
where the pedagogy does not lend itself to a typical L-T-P-	P- shall be specified in the concerned						
C structure	Program Regulations and Curriculum /						
	Course Plans, as applicable.						

The exact weightages of Evaluation Components shall be clearly specified in the concerned PRC and respective Course Plan.

Normally, for Practice/Skill based Courses, without a defined credit structure (L–T–P) [NTCC], but with assigned Credits (as defined in Clause Error! Reference source not found. of the Academic Regulations),

the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous Assessments, the distribution of weightage among such components, and the method of evaluation/assessment, shall be as decided and indicated in the Course Plan/PRC. The same shall be approved by the respective DAC.

12.6 Minimum Performance Criteria:

12.6.1 Theory only Course and Lab/Practice Embedded Theory Course

A student shall satisfy the following minimum performance criteria to be eligible to earn the credits towards the concerned Course:

- a. A student must obtain a minimum of 30% of the total marks/weightage assigned to the End Term Examinations in the concerned Course.
- b. The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of the components of Continuous Assessments, Mid Term Examinations and End Term Examinations in the concerned Course.

12.6.2 Integrated/Lab/Practice/Project Based Courses

The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of all assessment components in the concerned Course.

- 12.6.3 A student who fails to meet the minimum performance criteria listed above in a Course shall be declared as "Fail" and given "F" Grade in the concerned Course. For theory Courses, the student shall have to re-appear in the "Make-Up Examinations" as scheduled by the University in any subsequent semester, or, re-appear in the End Term Examinations of the same Course when it is scheduled at the end of the following Semester or Summer Term, if offered. The marks obtained in the Continuous Assessments (other than the End Term Examination) shall be carried forward and be included in computing the final grade, if the student secures the minimum requirements (as per Sub- Clauses 12.6.1, Error! Reference source not found. of Academic Regulations) in the "Make-Up Examinations" of the concerned Course. Further, the student has an option to re-register for the Course and clear the same in the summer term/ subsequent semester if he/she wishes to do so, provided the Course is offered.
- **12.7** Normally, for Practice/Skill based Courses, without a defined credit structure (L T P), but with assigned Credits, (as defined in Clause 5.2 of the Academic Regulations), the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous Assessments, the distribution of weightage among such components, and the method of

evaluation/assessment shall be prescribed in the concerned Course Handout. There shall be no component of End Term Final Examinations for such Courses.

In case any exception is required for a particular course, where the methods of assessment prescribed in the specific regulations mentioned above in Sub-Clauses 12.5, 12.6 and 12.7 are not suitable/ relevant for assessing the performance in the concerned Course, the DAC shall recommend the appropriate method of assessment for the approval by the BOS.

13 Additional clarifications - Rules and Guidelines for Transfer of Credits from MOOC, etc. – Note: These are covered in Academic Regulations

The University allows students to acquire credits from other Indian or foreign institutions and/or Massive Open Online Course (MOOC) platforms, subject to prior approval. These credits may be transferred and counted toward fulfilling the minimum credit requirements for the award of a degree. The process of transfer of credits is governed by the following rules and guidelines:

- 13.1 The transfer of credits shall be examined and recommended by the Equivalence Committee (Refer Error! Reference source not found. of academic regulations) and approved by the Dean Academics.
- 13.2 Students may earn credits from other Indian or foreign Universities/Institutions with which the University has an MOU, and that MOU shall have specific provisions, rules and guidelines for transfer of credits. These transferred credits shall be counted towards the minimum credit requirements for the award of the degree.
 - 13.3 Students may earn credits by registering for Online Courses offered by Study Web of Active Learning by Young and Aspiring Minds (SWAYAM) and National Program on Technology Enhanced Learning (NPTEL), or other such recognized Bodies/ Universities/Institutions as approved by the concerned BOS and Academic Council from time to time. The concerned School/Parent Department shall publish/include the approved list of Courses and the rules and guidelines governing such transfer of credits of the concerned Program from time to time. The Rules and Guidelines for the transfer of credits specifically from the Online Courses conducted by SWAYAM/ NPTEL/ other approved MOOCs are as stated in the following Sub-Clauses:
 - A student may complete SWAYAM/NPTEL/other approved MOOCs as mentioned in Clause Error! Reference source not found. (as per academic regulations) and transfer equivalent credits to partially or fully complete the mandatory credit requirements of Discipline Elective Courses and/or the mandatory credit requirements of Open Elective Courses as prescribed in the concerned Curriculum Structure. However, it is the sole responsibility of the student to complete the mandatory credit requirements of the Discipline Elective Courses and the Open

- Elective Courses as prescribed by the Curriculum Structure of the concerned Program.
- 13.3.2 SWAYAM/NPTEL/ other approved MOOCs as mentioned in Clause Error! Reference source not found. (as per academic regulations) shall be approved by the concerned Board of Studies and placed (as Annexures) in the concerned PRC.
- 13.3.3 Parent Departments may release a list of SWAYAM/NPTEL/other approved MOOCs for Pre-Registration as per schedule in the Academic Calendar or through University Notification to this effect.
- 13.3.4 Students may Pre-Register for the SWAYAM/NPTEL/other approved MOOCs in the respective Departments and register for the same Courses as per the schedule announced by respective Online Course Offering body/institute/ university.
- 13.3.5 A student shall request for transfer of credits only from such approved Courses as mentioned in Sub-Clause Error! Reference source not found. above.
- 13.3.6 SWAYAM/NPTEL/other approved MOOCs Courses are considered for transfer of credits only if the concerned student has successfully completed the SWAYAM/NPTEL/other approved MOOCs and obtained a certificate of successful/satisfactory completion.
- 13.3.7 A student who has successfully completed the approved SWAYAM/NPTEL/ other approved MOOCs and wants to avail the provision of transfer of equivalent credits, must submit the original Certificate of Completion, or such similar authorized documents to the HOD concerned, with a written request for the transfer of the equivalent credits. On verification of the Certificates/Documents and approval by the HOD concerned, the Course(s) and equivalent Credits shall forwarded to the COE for processing of results of the concerned Academic Term.
- 13.3.8 The credit equivalence of the SWAYAM/NPTEL/other approved MOOCs are based on Course durations and/or as recommended by the Course offering body/institute/university. The Credit Equivalence mapped to SWAYAM/ NPTEL approved Courses based on Course durations for transfer of credits is summarised in Table shown below. The Grade will be calculated from the marks received by the Absolute Grading Table Error! Reference source not found.. in the academic regulations.

Table 2: Durations and Credit Equivalence for Transfer of Credits from SWAYAM-NPTEL/ other							
approved MOOO	approved MOOC Courses						
Sl. No.	Course Duration	Credit Equivalence					

1	4 Weeks	1 Credit
2	8 Weeks	2 Credits
3	12 Weeks	3 Credits

- 13.3.9 The maximum permissible number of credits that a student may request for credit transfer from MOOCs shall not exceed 20% of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of the concerned Degree.
- 13.3.10 The University shall not reimburse any fees/expense; a student may incur for the SWAYAM/NPTEL/other approved MOOCs.
- 13.4 The maximum number of credits that can be transferred by a student shall be limited to forty percent (40%) of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of the concerned Degree. However, the grades obtained in the Courses transferred from other Institutions/MOOCs, as mentioned in this Section (13.0), shall not be included in the calculation of the CGPA.

13.5

14. Structure / Component with Credit Requirements Course Baskets & Minimum Basket wise Credit Requirements

The B.Des Program Structure (2024-2028) totalling 160 credits. Table 3 summarizes the type of baskets, number of courses under each basket and the associated credits that are mandatorily required for the completion of the Degree.

Table 3: B.Des 2024-2028: Summary of Mandatory Courses and Minimum Credit Contribution from various Baskets						
SI. No.	Io. TYPE OF COURSES CRE					
1	Humanities, Social Sciences & Management Sciences (HS)	5				
2	Basic Design (BD)	17				
3	Design Studies (DS)	15				
4	Core (Professional) Course (CC)	45				
5	Design Project (Professional Practice) Course (DPC)	8				
6	Discipline (Professional) Elective (DE)	36				
7	Open Elective (OE)	9				

8	Professional Practice (PP) I and II	20				
9	Personal and Professional Skills (PPS)	5				
TOTAL	TOTAL 160					
The mandatory minimum credits required for the award of the B.Des Degree is 160 Credits						

In the entire Program, the practical and skill based course component contribute to an extent of approximately 92% out of the total credits of 160 for B.Des program of four years' duration.

15. Minimum Total Credit Requirements of Award of Degree

As per the AICTE guidelines, a minimum of 160 credits is required for the award of a B.Des. degree.

16. Other Specific Requirements for Award of Degree, if any, as prescribed by the Statutory Bodies,

- 16.1 The award of the Degree shall be recommended by the Board of Examinations and approved by the Academic Council and Board of Management of the University.
- 16.2 A student shall be declared to be eligible for the award of the concerned Degree if she/he:
 - a. Fulfilled the Minimum Credit Requirements and the Minimum Credits requirements under various baskets;
 - b. Secure a minimum CGPA of 4.50 in the concerned Program at the end of the Semester/Academic Term in which she/he completes all the requirements for the award of the Degree as specified in Sub-Clause a of Academic Regulations;
 - No dues to the University, Departments, Hostels, Library, and any other such Centers/
 Departments of the University; and
 - d. No disciplinary action is pending against her/him.

Practical / Skill based Courses – Professional Practice Courses (Internships / Thesis / Dissertation / Capstone Project Work / Portfolio / Mini project)

Practical / Skill based Courses like internship, project work, capstone project, research project / dissertation, and such similar courses, where the pedagogy does not lend itself to a typical L-T-P-C Structure as defined in Clause 5.1 of the Academic Regulations, are simply assigned the number of Credits based on the quantum of work / effort required to fulfill the learning objectives and outcomes prescribed for the concerned Courses. Such courses are referred to as Non-Teaching Credit Courses (NTCC). These Courses are designed to provide students with hands-on experience and skills essential for their professional development. These courses aim to equip students with abilities in problem identification, root cause analysis, problem-solving, innovation, and design thinking through industry exposure and project-based learning. The expected outcomes are first level proficiency in problem solving and design thinking skills to better equip B.Des. graduates for their professional careers. The method of evaluation and grading for the Practical / Skill based Courses shall be prescribed and approved

by the concerned Departmental Academic Committee (refer Annexure A of the Academic Regulations, 2025). The same shall be prescribed in the Course Plan.

18.1 Internship/ Professional Practice

- 18.1.1. The Internship/Professional Practice Program shall be in conducted in accordance with the Internship Policy prescribed by the University from time to time.
- 18.1.2 The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable/ stipulated by the concerned Industry/ Company for award of the Internship to a student.
- 18.1.3 The number of Internship/Professional Practice available for the concerned Academic Term. Further, the available number of internships shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry/ Company providing the Internship, as stated in Sub-Clause 18.1.2 above.
- 18.1.4. A student may opt for Internship/Professional Practice in an Industry/Company of her/his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her/his own. Provided further, that the Industry/ Company offering such Internship confirms to the University that the Internship program shall be conducted in accordance with the Program Regulations and Internship Policy of the University.
- 18.1.5. A student selected for an Internship in an Industry/ Company shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.
- 18.1.6. Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

18.1.7. Professional Practice -I

Professional Practice -I is a 8 Credit Course. This first level practice-based course is conducted after the 6th Semester of the B.Des Program, during the summer break (usually June – July), in accordance with the guidelines mentioned above from 18.1.1 to 18.1.6.

A student may undergo an Internship Program for a period of $\mathbf{8} - \mathbf{12}$ weeks Depending on Specilazation in an Industry/ Company,

18.1.8 Professional Practice - II

Professional Practice - II is an intensive practice based course with 12 Credits offered during the final (4^{th}) year of the B.Des Program. Students may register for Professional Practice – II in the 8^{th} Semester of the B.Des Program, in accordance with the guidelines mentioned below from 18.2 to 18.4. A student may undergo an Internship Program for a period of 12 - 16 weeks Depending on Specilazation in an Industry/ Company.

18.2 Project Work

- 18.2.1 A student may do an extensive Project Work in an Industry/ Company/ Research Laboratory or the University Department(s), subject to the following conditions:
- 18.2.2 The Project Work shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.
- 18.2.3 The student may do the Project Work in an Industry/ Company/ Research Laboratory of her/his choice subject to the above-mentioned condition (Sub-Clause 18.2.1). Provided further, the Industry/ Company/ Research Laboratory offering such project work confirms to the University that the Project Work will be conducted in accordance with the Program Regulations and requirements of the University.
- 18.2.4 Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

18.3 Capstone Project/Portfolio

A student may undergo a Capstone Project/Portfolio for a period of 12 weeks in an industry / company or academic / research institution in the 8th Semester as applicable, subject to the following conditions:

- 18.3.1 The Capstone Project shall be in conducted in accordance with the Capstone Project/Portfolio Policy prescribed by the University from time to time.
- 18.3.2 The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable / stipulated by the concerned Industry / Company or academic / research institution for award of the Capstone Project/Portfolio to a student.
- 18.3.3 The number of Capstone Project/ Portfolio available for the concerned Academic Term. Further, the available number of Capstone Project / Portfolio shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry / Company or academic / research institution providing the Capstone Project/ Portfolio, as stated in Sub-Clause 18.3.2 above.
- 18.3.4 A student may opt for Capstone Project/Portfolio in an Industry / Company or academic / research institution of her / his choice, subject to the condition that the concerned student takes the responsibility to arrange the I Capstone Project on her / his own. Provided further, that the Industry / Company or academic / research institution offering such Capstone Project/porfolio confirms to the University that the Capstone Project shall be conducted in

accordance with the Program Regulations and Internship Policy of the University.

- 18.3.5 A student selected for a Capstone Project/ Portfolio in an industry / company or academic / research institution shall adhere to all the rules and guidelines prescribed in the Capstone Project Policy of the University.
- 18.3.6 Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

18.3 Research Project / Dissertation

A student may opt to do a Research Project / Dissertation for a period of 12 weeks in an Industry / Company or academic / research institution or the University Department(s) as an equivalence of Capstone Project, subject to the following conditions:

- **18.3.1** The Research Project / Dissertation shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.
- **18.3.1** Students have to report their respective guide every week (online / offline mode depending on the geographical area of their ongoing research) mentioned by the department to update their progress on the concerned project.

The student may do the Research Project / Dissertation in an Industry / Company or academic / research institution of her / his choice subject to the above mentioned condition (Sub-Clause 18.4.1). Provided further, that the Industry / Company or academic / research institution offering such Research Project / Dissertation confirms to the University that the Research Project / Dissertation work will be conducted in accordance with the Program Regulations and requirements of the University.

19. Open Electives

Open Electives are the courses offered by any Department/School of the University. The primary objective of offering Open Electives is to provide interdisciplinary/ transdisciplinary learning experiences. The outcome is a graduate with a fair exposure to disciplines beyond the chosen Branch in the B.Des Program.

Open Electives offered by any Department/School of the University are listed in the Course Structure under the Open Elective category and offered to students of any Department including the parent Department/School.

The Course details and method of evaluation shall be clearly prescribed in the concerned Course Handout.

20.1 List of Open Electives to be offered by the School / Department (Separately for ODD and EVEN Semesters.

20. List of MOOC (NPTEL) Courses

21.1 NPTEL - Discipline Elective Courses for B. DES.

SI. No.	Course ID	ourse ID Course Name					
Fashion Design							
1	noc25-te02	Evaluation of Textiles Materials	12 Weeks				
Comm	unication Design						
1	noc25-de09	Augmenting Design Thinking with Human-Computer Interaction	8 Weeks				
2	noc25-de01	Design, Technology and Innovation	8 Weeks				
Product Design							
1	noc25-de10	Design Practices for Intelligent Product Design	8 Weeks				
2	noc25-me68	Product Engineering and Design Thinking	8 Weeks				
Space Design							
1	Noc25_de04	Strategies for sustainable design	12 Weeks				

Game	Design		
1	ntr25_ed64	Web-Designing and Multimedia Technology	12 Weeks

21.2 NPTEL - Open Elective Courses for B. Des.

SI. No.	Course ID	Course Name	Duration
1	noc25-de12	Introduction to Graphic Design	8 Weeks
2	noc25-mg15	Business Statistics	12 Weeks
3	noc25-mg06	AI in Marketing	12 Weeks
4	noc25-mg31	International Business	12 Weeks
5	noc25-mg62	Supply Chain Digitization	12 Weeks
6	noc25-me70	Robotics: Basics and Selected Advanced Concepts	12 Weeks

Course	A firm understar	nding of design fund	damentals are the found	lation for good					
Description	design. To be a Elements and P	successful designe	er the student must com and apply techniques of	prehend the					
	Understanding of design fundamentals, principles and guidelines that students can learn and use to interpret their design solving ideas.								
	Recognition, Study and analysis of Elements and Principles of Design.								
	Develop skills to organize these elements and principles of design and apply into their design practice.								
	Realization and	application of the	elements and principles	of design.					
	The conceptual and visual nature of the course enables the students to develop a concrete portfolio based on the understanding of Principles in design.								
Course Objective	The objective of the course is familiarize the learners with the concepts Elements and Prinicples of Design and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.								
Course	On successful of	completion of the co	ourse the students shall	be able to:					
Outcomes	Define the basic terminology of Elements and Principles of design.								
	Identify good compositional Principles.								
	Classify the des	sign principles to ma	anage simple project of	multidisciplinary					
		such as simple drav ensional designs.	wing, painting and rende	ering skills to					
		•	ntemporary design issue problem solving and cr	•					
	Generate ideas	s by using elements	and Principles of Desig	ın.					
Course Content:									
	Introduction to	Assignment	Observations						
Module 1	Elements Of	Case study	Illustrations	6 Classes					
	Design.	Documentation	Visual Journal						
Topics	ı	ı	1	1					
Introduction and o	overview of Eleme	ents of Design.							
Definition and Cor Application.	ntent: Dot, Line, S	Shape, Form, Colou	ır, Texture. Theoretical a	and Practical					
Observations and	discussions on C	Good Compositions							
Module 2	Detailed Study of Lines,	Assignment	Illustrations	8 Classes					

	Shapes,	Documentation	Visual Journal						
	Forms.								
Topics:									
Types of Lines- Ve	ertical Lines, Hori	zontal Lines, Thick	/Thin lines, Zig –zag line	es, etc.					
Use of Graphite P	encils, water pro	of ink and Pens.							
Shading Techniques: Hatching, Cross hatching, Stippling, smudging by using pencils and pens.									
Different types of Shapes and Forms: Geometrical, Natural, Abstract: Theoretical and Practical Application.									
Understanding of materials.	Understanding of Lights and Shadows: One light source, various light sources on different materials.								
	Introduction To	Assignment	Group Activities						
Module 3	Principles of	Presentation	Illustrations	6 Classes					
	Design	Documentation	Visual Journal						
Topics:									
Introduction and c Proportion.	verview of Princi	ples of Design: Em	ohasis, Balance, Unity, I	Hierarchy, Rhythm,					
Types of Balance:	Symmetrical, As	ymmetrical and Ra	dial.						
Unity: Proximity, F	Repetition, Alignm	ent, Variety.							
Study on good co	mpositional desig	ın ideas by using El	ements of Design.						
	Color Theory	Assignment	Explorations						
Module 4	and Color	Case Study	Presentations	8 Classes					
	Schemes.	Documentation	Visual Journal						
Topics:									
Introduction to Co	lour and Properti	es of Colour: Hue, \	Value and Chroma/Inter	sity.					
Colour Wheel: Pri	mary, Secondary	and Tertiary Colour	rs. Cool colours and wa	rm Colours.					
Colour Schemes: shades.	Complementary,	Monochromatic, Ar	nalogous, Neutrals, Pas	tels. Tints and					
Psychological effe	ects of Colours.								
Additive and subt	ractive colour the	ories/light and pigm	ent theories – features	and application					
Module 5									
	of Textures	Documentation	Visual Journal						

Study and Development of Various Textures: Tactile and Visual Textures.

Proportion: Scale, Study of Human Figures.

Rhythm: Movements, Illusions

Study of Metamorphosis in Design: Theoretical and Practical Application.

List of Practical Tasks:

Task 1: Depiction of elements and principles of design.

Level 1: Develop a composition by using various lines and depict Emphasis.

Level 2: Illustrate two different objects by using one light source and shadow effect.

Task 2: Illustration and Representation of geometrical and natural shapes.

Level 1: Cut paper Collage: By using geometrical shapes depict all 4 types of Balance.

Level 2: Take Inspirations from the nature and illustrate a composition using alignment.

Task 3: Practice on color mediums and mixed media.

Level 1: Illustrate buildings and still objects using mixed media.

Level 2: Develop a Colour wheel and depict primary, secondary and tertiary colours

Task 4: Representation of colors and textures.

Level 1: Color Schemes and Tints, Tones and shades by using Poster colors.

Level 2: Creation of various textures by using natural and artificial materials.

Task 5: Depiction of Elements and Principles of Design

Level 1: Create a portrait using monochromatic scheme/Achromatic scheme using poster colors.

Level 2: Develop a composition by using Proportion and scale.

Task 6: Idea generation

Level 1: illusion composition by using polychromatic color scheme.

Level 2: Explore new ideas inspired by nature and various material objects transform into another object.

Targeted Application and Tools that can be used:

Abode Illustrator Draw: Practicing and Creation of digital drawings and composition.

Pencil Sketch App: Illustrating and rendering sketches and drawings.

Pics art App: Creation and Rendering of Composition and sketches.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Student shall be developing and create a theme board presentation by using elements and principles of design in their final project work.

	Type of Course: 1] Program Core	С							
	2] Practical Integrated								
Version No.	1.0								
Course Pre- requisites	NIL								
Anti-requisites	NIL								
Course Description	To increase the Observation Skills of the Stud- thinking behind each observation	ents and	incr	ease the	logica	I			
	This course will help students to develop keen observation skills in different levels of the given situation. Adaptation and conversion of those to ideas and documenting them for further research.								
	This course is designed to be very observant not only the physical attributes but also the inner of the given object or situation and the idea behind its existence.								

Course Objective	The objective of the course is familiarize the learners with the concepts Elements and Prinicples of Design and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.						
Course	On successful completio	n of the course the s	tudents shall be able to:				
Outcomes	Relate the given design	structure with its initia	al idea.				
	Recognize the need of the its full potential.	ne given design struc	ture in the society and it	s usage to			
	Recognize the cultural background from where the design structure initially originated.						
	Practical component:						
	Identify the background	the given design stru	icture.				
	Discuss the reason behi	ind the design structu	re exist in the society				
	Interpret the impact of the design structure within the society product.						
Course Content:							
Module 1	Identification of Design	Observation report	Illustrations/ photographs Visual Journal	10 Hours			
Topics:							

Recognition of basic designs around us natural or manmade. Identification of texture colour size and other physical attributes of the design.

Recognition of social importance of the given Design Structure. Review the impact of the physical design structure in the society.

Generating ideas and solutions through sessions such as Sketching, Prototyping, Brainstorming,

Module 2 Reproduction of Designand its features	Documentation	Info-graphical development Visual Journal	15 Hours
---	---------------	---	----------

Topics:

Introduction to Design Thinking and Its Stages.

Introduction to Modes and Stages of Ideations

Conceptualising design starting from Worst Possible Ideas and Improving to the State to acceptance in the Society

Module 3 Analysis of the Design Production	Assignment Documentation	Visual Journal Development of Documentation of the individual design	20 Hours
--	---------------------------	--	----------

Character required for the design Ideation

Using the technique of empathy mapping for Design Thinking

Hierarchy Needs and table of Design thinking and Design Creation

Development of ideation for a given Design structure

5List of Practical Tasks:

Project No. 1: Recognition and Observation

Level 1: Recognizing the Characters of the Design and Documenting the same through Phrases and Words and Photographs

Level 2: Identification of the Characteristics and copying through Sketching the same with Perspective

Level 3: Transcending the Design to other styles of Sketches, experimenting with different colour medium

Project No. 2:

Level 1: Exploring the stages in a given Design Structure

Level 2: Exploded View of the given Design or an object

Level 3: Improvisation on the design for personalization.

Project No. 3:

Level 1: Analyzing the design Structure through its character Study.

Level 2: Applying the Empathy mapping for the design where ever needed and improvising the idea.

Level 3: Development of new Parameters to create Improvised designs and exploring the designs.

Targeted Application and Tools that can be used:

Exploration towards Design Thinking

Research work for any given Case Study

Laying the base for Portfolio Creation

Tools in the Subjects will be reading materials, Historic reviews, previous works and articles related to the Design.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules, co-relating the insights comprising of planning, strategy, creative inputs, contents by understanding the big picture and translate ideas and design concepts across all levels. Consequentially creating innovative and interactive platforms for using Design across multiple platforms, overseeing design thought process, strategy planning, research, consultation with given clients. The project shall be approved first by the course instructor before further processes are developed.

BE02002		L-T-P-				
	Type of Course: 1] School Core	С				
	2] Practical Integrated					
Version No.	1.2					

Course Pre- requisites	NIL						
Anti- requisites	NIL						
Course Description	Drawing for Designers is the systematic study of individual aspects of Design, tools and techniques. it's important to consider the different traditional skills like drawing, sketching and other practical tools, depending on the specific needs of the project to create an appealing approach in Design process. The subject will provide different understanding on design process and students are able to gain various manual tools and techniques based on different interactive and conceptual design projects.						
Course Objective	The objective of the course is to familiarize the learners with the concepts of Ideation And Observation and attain Skill Development through Experiential Learning techniques.						
	On successful comple	etion of the course	the students shall be able to	o:			
	Introduce the importa	nce of Drawing for	designers				
Course	Demonstrate various methods of drawings and sketching						
Outcomes	Interpret the impact of the drawing based design structure within the society product. Discuss the final outcome and effectiveness of the work						
	Diocado aro imar cato		is so of the work

7TH BOS 12 /01/2023

Date of Approval by the Academic Council	20TH AC Meet 15 /02/	2023					
sCourse Code:	Course Title: Design	Appreciation					
DES 1129							
	Type of Course: Prog	gram Core- Integrat	ed L-T-P- C	3	0	0	3
Version No.	3.0						
Course Prerequisites	Design Appreciation						
Anti-requisites	NA						
Course Description	For a designer, designersh, creative concept design field. It aspirest producing one-of-a-ki	ots to handle certair s to push the limits o	n problems or pof creativity and	oossibi d prob	ilities i	n a giv	/en
Course Objective	The objective of the course is to familiarize the learners with the concepts of Design Appreciation and attain Employability Skills through Experiential Learning techniques.						
Course	On successful comple	etion of the course t	he students sh	all be	able t	0:	
Outcomes	Define the importance	e of design apprecia	ation and effec	tivenes	ss in S	Society	<i>'</i> .
	Illustrate Different asp	pects of design appi	eciation.				
	Apply Different role of	f Design appreciatio	n in present s	ociety.			
Course Content	<u> </u> :						
encompass a w developing nove	ation for designers is no ide range of design disc el user experiences or d is to contribute to the a	ciplines, from creati designing sustainab	ng groundbrea le and eco-frie	king p ndly s	roduc olutior	ts to is. The	e goal
	Identifying the need or opportunity in	Assignment&	Comparison	•	natior	08	Hrs
Module 1	Design Innovation	Documentation	& Visual Jou	rnal			

Finding an issue, a need, or an opportunity for improvement within the designer's field of competence is the first step. This could be relevant to any design field, including product design, graphic design, interior design, user experience, fashion design etc.

Module 2	Research and Analysis	Assignment, case study& Documentation	Report writing, Group discussion & Visual Journal	10 Hrs
Module 2		case study&	Group discussion & Visual Journal	

Topics:

Thorough research is done to understand the context, target audience, market trends, and current solutions after the issue or opportunity has been recognized. To guide their design process, the designer acquires information and insights.

Module 3	Concept Development	Assignment, Research & Documentation.	Visual Journal, Report writing & Illustrations.	12 Hrs
----------	------------------------	---	---	--------

Topics:

The designer chooses the most promising concepts from the group of ideas and develops them further. This entails honing the concepts and evaluating their applicability, technical viability, and possible impact.

Topics relevant to "EMBLOYBILITY SKILLS": Finding an issue, a need, or an opportunity for improvement within the designer's field of competence is the first step. This could be relevant to any design field, including product design, graphic design, interior design, user experience of Identifying the need or Opportunity in Design Appreciation for Skill Development through Experiential Learning Methodologies This is attained through assessment component mentioned in course handout.

Name: Jyoti Sharma

Designation: Asst. Professor

Fashion Design, School of Design

Recommende d by the Board of Studies on	4th BOS Held on 10th of August 2021
Date of Approval by the Academic Council	16 AC Held on 23. October 2021

Course	Course Title: Contextual Understanding and						
Code:	Course Title: Contextual Understanding and Design History						
DES1011		L-T-P-C	2	0	2	3	
	Type of Course: 1] Program Core		_	U	2	3	
	2] Practical Integrated						
Version No.	1.0	l		l		ı	
Course Pre- requisites	NIL						
Anti- requisites	NIL						
Course Description	Begin an in-depth understanding of the history, evolution, and significance of design in order to appreciate the past, be inspired in the present, and anticipate the future. Analysis and cultivation of curiosity. Recognising that, design is one of the oldest human pursuits and is not the mere result of computer technology, Appreciation of the past, being inspired in the present, and anticipating the future. The course is both conceptual (study the origination of design, nature, and evolution) and visual (learn to see rather than simply look, preparing designs accordingly). They are introduced to the meaning of design, various stages of design processes, and evolution used in design development at the intermediate level and industrial level.						
Course Objective	The objective of the course is familiarize the learners with the concepts Contextual Understanding and Design History of Design and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.						

Course	On successful completion of the course the students shall be able to:					
Outcomes	Recognise the evolution of design and its relationship to the environment and society.					
	Discuss different philosophies in design.					
	Describe historical	l timelines and evolution	S.			
	Practical compone	ent:				
	Identify the background the given design structure.					
	Discuss the reason behind the design structure exist in the society					
	Describe historical timelines and evolutions.					
Course Content:						
Module 1	Introduction to Design History and Its Implicational Significance	Assignmentand Documentation	Comparison, explanation and Visual Journal	20 Hours		

Understanding past –Design evolution through history and its importance

The origins of design - pre and post-industrial revolution

Comparison of design evolution from the past to the [resent.

Marshala O	Design methods	Assignment, case studyand	Report writing,	00.11
Module 2	and Design	otadyana	Group discussion and	20 Hours
	Theory	Documentation	Visual Journal	

Topics:

Introduction to design methods, philosophy and fundamentals of design methods.

Asian visual culture. - journal study (case study)

The history of design to the modern design theory.

Rethinking design history from an evolutionary perspective.

A critical review of design history: from the individual artist to the social agent.

Module 3	Design issues	Assignment, Research and Documentation.	Visual Journal, Report writing and Illustrations.	10 Hours
Topics:				
Contempora	ry Design- An overv	iew		
Features an	d instances of the c	ontemporary designs.		
Understandi any other sta	•	d past scenario of craft a	nd cottage industries of Uttar	Pradesh or
Module 4	Introduction to Ethnography	Assignment, Research and Documentation,	Sketches and illustrations, Visual journal, mini portfolio making.	10 Hours
Topics:			I	
An introduct	ion to the meaning c	of "Ethnography".		
Targeted Ap	plication and Tools	that can be used:		
Hands on sk Powerpoint o	_	sing mix media. Basic co	mputer applications like MS w	ord,

	Foundation Department, School Of Design
Recommen ded by the Board of Studies on	2nd BOS Held on 4th September 2020
Date of Approval by the Academic Council	16th AC Held on 23 Oct 2021

Course Code:	Course Title: Basics of Drawing Skill		2	0	4	4	
(DES1015)							
	Type of Course: 1] School Core (Only Foundation Subjects)	L-T-P-C					
	2] Integrated						
Version No.	1.0						
Course Pre- requisites	NIL						
Anti-requisites	NIL						
Course	Purpose:						
Description	This course is to understand the techniques of Drawings through study and practice.						
	Abilities to be developed:						
	Understanding the Various shapes and form and the nature of various objects by observing and sketching. Ability to manipulate the basics shapes and forms in the context of various objects including their colors and textures.						
	Nature of the course:						
	The course is based on a natural study of various forms and shapes and object specific study of proportion and composition. This will also help in visualizing many traditional forms of art techniques throughout the world. I different materials and methods based, on experimentation on those shape and forms of drawings will help the creative visualization to be revived in the of the ideation process in design practice.						

Course Objective	The objective of the course is familiarize the learners with the Basics of Drawing and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.		
Course	On successful completion of the course the students shall be able to:		
Outcomes	1.identify different mediums and techniques of drawing		
	2 able to observe, visualize and visual experience through the basic elements of Drawing.		
	3 improve visual representation by using perspectives.		
	4 able to interact with the surroundings, materials and various physical qualities		
	Practical component:		
	Adaptation of traditional craft into Modern and Contemporary Designs and end use Products.		

Course Content: Course sensitizes the student towards visual experience. It introduces of the fundamentals of drawing through line as primary element. The course introduces simple to complex process of drawing required to visualize the ideas. Course provides interactive and technical knowledge to resolve the design problems. Course helps to engage in various creative explorations using drawing as a medium.

Module 1 Introduction to the fundamentals of Drawing lear	gnment Illustrations Observation and comparison umentation Visual Journal	6 Hours
---	---	---------

Topics:

Introduction and overview of elements and principles of drawing.

Definition and Content: Dot, Line, Shape, Form, Color, Texture. Theoretical and Practical Application.

Line, Shape and Form manipulation, Color wheel, Achromatic and Monochromatic colored Patterns.

Module 2	Pictorial Composition and visual outcome	Assignment Documentation	Info-graphics development Visual Journal Development of Samples for each	12 Hours
----------	--	--------------------------	--	----------

Topics:

1.Understanding about the Space, and Pictorial arrangement - Still-life Studies, Rule of third, Golden Ratio.

- 2. Use of Graphite Pencils, water proof ink and Pens. Shading Techniques: Hatching, Cross hatching, stippling, smudging by using pencils and pens, neutral Color, analogous color, complementary and split complementary color,
- 3. Different types of Shapes and Forms: Geometrical, Natural/ organic, abstract: Theoretical and Practical Application. Understanding of Lights and Shadows: One light source, various light sources on different materials

Module 3 Outdoor Study Documentation Hands on Practice Samples for each Visual Journal 12 House

1. Introduction and overview of Principles of Drawing: Emphasis, Balance, Unity, Hierarchy, Rhythm, Proportion. Pictorial balance, visual narration, scattered object study, nature study understanding various textural grounds and their sustainability, watercolor Study, Color value-Tone, Tints and Shades

Module 4 Perspective Assignment Development of Paper Patterns for estimations. 6 Hours
--

Topics:

Introduction to- one point, two point and three-point perspective, Arial and linear perspective, Color- Theory: Hue, Intensity. Primary, Secondary and Tertiary Colors. Cool and warm colored composition

List of Practical Tasks:

Project No. 1 Create different tonal value sheets to reflect the understanding of pencils, color pencils, water color, poster color and variety of brushes.

Level 1:

Level 2:

Project No. 2. To draw the motifs for tessellation

Level 1: Draw the motifs for tessellation through hands on drawing techniques and develop basic tessellated surface using cad skill.

Level 2: Draw the motifs to depict a theme for tessellation through hands on drawing techniques and develop basic tessellated surface using cad skill.

Project No. 3: To draw the isometric grids and its application

Level 1: To draw the isometric grid and practice 3D shapes creatively on the same using Pencils, graphite, Watercolors

Project No. 4:

Draw composition of 3D basic geometrical shapes in space using one-point perspective on paper and create rendered composition using Pencils and graphite.

Project No. 5:

Draw composition of 3D basic geometrical shapes in space using two point perspectives on paper and create rendered composition using pencils and graphite

Targeted Application and Tools that can be used:

Understanding the nature of drawing and its various application in design practice.

Tools used will be the Pencils, Graphite, Various eraser like Mono-Zero, Charcoal, Various drawing Paper like Canson, Fabriano, Ivory- 120GSM, 200GSM, 280 GSM, 300GSM etc, Watercolors and multi-colored pencil etc.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final Product which includes all or most of the art work which was taught in the Modules.

Topics relevant to "Development of Skill": Study of various objects by using different Techniques of drawing and sketching.

Some Topics from the Modules has to be shown under outdoor based practice or different interactive based activities.

Course Code: DES1009	Course Title: Approaches to Design Thinking Type of Course: School Core (Laboratory integrated) L- T- P- C 2 0 2						2	3	
Version No.	1.0	1.0							
Course Pre- requisites	NA	NA							
Anti-requisites	NA								
Course Description	students towar definition and focus which is	The course aims to introduce concepts of Design thinking and orient the students towards importance of design thinking and communication, its definition and applications which re-orient the students/practitioners where focus which is otherwise directed inward toward the profession would incline it outwards toward the rest of society and the world.							
Course Objective	The objective of the course is familiarize the learners with the Approaches to Design Thinking and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.								
	On successful	completion of the cours	he course the students shall be able to:						
Course	Define and describe design thinking essentials								
Outcomes	Indicate grey areas in designs								
	Interpret desig	ns with possible solutio	ns						
Course Content:									
Module 1	Introduction to Design Thinking	Visual journal, book of essays, context- specific assignment/project	story narra	al outpurboarding ative de study r	g and velop	d ment,		ours	
Topics:	1						L		
Definition and intr	roduction to Des	sign Thinking							

Conceptual and contextual meaning of Design Thinking

Steps in Design Thinking					
Indian Design Pol	licy				
Module 2	Design flaws: how not to design	Visual journal, book of essays, context- specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours	

Definition of design flaw and its identification

Observational studies on design flaws in various areas of application

Intentional designs

Discussion and dissection of design loopholes as a universal concept

Module 3	Ancient Design Thinking	Visual journal, book of essays, context- specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours
----------	-------------------------------	---	---	----------

Topics:

Cultural heritage and its inclusion in design

Discussion of heritage and repetitive sameness

Demystifying designs with metaphors

Ancient India's design thinking

Module 4 Design Evaluati	Visual journal, book of essays, context-specific assignment/project	Visual output generation, storyboarding and narrative development, case study reports	12 hours
-----------------------------	---	---	----------

Topics:

Necessity of design evaluation

Design evaluation methods and processes involved

Universal Design Principles

Collaboration in design – multidisciplinary approach

List of Projects:

Identify design flaw in at least two cases and suggest possible solutions (logical/physical)

Identify purposeful design flaws in at least two cases and develop logical interpretations.

Develop visual narratives to at least three Universal Design Principles with two cases in each.

Identify at least two yesteryear designs and compare with their contemporary counterparts through design thinking process.

Develop a visual interpretation for any one example of collaborative design.

Targeted Application and Tools that can be used:

Design ideation and concept development for innovative projects

Research and prototype design and development based applications

Application in the field of innovative education and teaching-learning resource material design

Entrepreneurial, start-up based and management-oriented programs and projects

Revival and archival activities of ancient design literature and research therein

Focus Areas:

The topics focusing on 'Foundation' and 'Skill Development' are, Steps in Design Thinking, Observational studies on design flaws in various areas of application and Necessity of design evaluation

The topics focusing on 'Environment and Sustainability' are, Intentional designs, Discussion and dissection of design loopholes as a universal concept, Universal Design Principles and Necessity of design evaluation

Catalogue prepared by	Dr. Ashok A Itagi and Mr. Madhusudana M
Recommended by the Board of Studies on	3rd BOS Held on 24.March 2021
Date of Approval by the Academic Council	16th AC Held on 23 Oct 2021

Course Code DES1012	Course Title: Experiential Skill Shop Type of Course: 1] Program Core 2] Practical Experience Integrated	L-T-P- C	0	0	4	2
Version No.	1.0					
Course Pre- requisites	Ability to Manipulate Materials					
Anti-requisites	NIL					
Course Description	This course is an approach to learning through experimental activities. Exploration, investigation and hands-on exercise are the fundamental concerns of 'Experiential Skill Shop'. This course, in its true nature is seemingly devoid of a framework but in this course everyday use objects and materials are (Meddled, tweaked) with a sense of iterating and reflecting towards a hypothetical goal. This activity encourages each student to dissect, deconstruct and reflect on each activity.					
Course Objective	The objective of the course is familiarize the learners with Experiential Skill Shop					
	and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.				MANING	

Course	On successi	On successful completion of the course the students shall be able to:				
Outcomes		REMEMBER/UNDERSTAND: Describe the materials/objects as productive experimentation' leading them to be more creative.				
		ssify the praction	cal project to suite the hypotheticers.	al goal. Leading		
		Examine the pre- self-creative vis	rocess, involvement, approach, it sualizer.	erate. Leading		
	_		omes as a definite functional refl ling them to be effective participa			
	CREATE: Tr		leconstruct the material. Leading	them to be

	on of organic and urban materials and their integral	Collection.		
	connection			
•	ual student fo	r deconstructin	als, objects, equipment or proceng, constructing/ formulating procent.	<u>-</u>
Module 3	Developm ent of collective ideas, group discussion, discarding and perfecting surrounde d available materials.	Assignment Presentatio n. Sample Presentatio n	Reflective notes, Illustrations Visual Journal	06 Classes
Content: Collection tools to explore a		at tinkering at	home using everyday materials	and accessible
Module 4	Collaborati ve experiment ation and final installation , Collaborati ve visual context, using the Experienti al skill Pedagogy.	Case Study- Assignment Final collective video and visual documentat ion.	Reflective notes. Group Installations and Presentations. Visual Journal.	06 Classes
Content: Students are encouraged to form groups and initiate 'Group tinkering' in the W/S or Tinkering activity jointly taken-up with any outside agency/party.				

List of Practical Tasks:

Task 1: Understanding Materials/objects at Workshop.

Level 1: List features and Properties of the material chosen before and after the experimentation. (Dissecting)

Level 2: Demonstrate the advantages of modifying the chosen material/object for experimentation.

Task 2: Use of recyclable organic and Urban materials/ Component

Level 1: Use simple available material to create object of everyday use.

Level 2: Use of unconventional materials to create an object and component.

Task 3: Use available ready to use (but nonfunctional for intended use) objects/component for experimentation.

Level 1: Use the product to re visit the functionality aspects by exploring and experimenting.

Level 2: Develop an alternative functional feature of an object/component.

Task 4: Experiment with non-compatible hybrid material/object formulation

Task 5: Comparative analysis on the collaborative final work, a group activity in an identified material/product experimentation process and present it as an Installation.

Level 1: Create an experimented object/component within a group and site specific installation

Level 2: Install and Create an object or component by using both organic and urban materials done in collaboration with any outside agency/group.

Targeted Application and Tools that can be used:

Application of tinkering range from flaw modification to suite local use/customer specific use.

The student mind becomes more explorative in action. All regular tools for material manipulation are to be used.

Tinkering process can lead to alternative use of product/materials thus paving way for sustainability.

Tinkering – If cultivated as way of life would enhance individual productivity and explorations (Old product-new use, New product old use, New product new use – philosophy)

Simple digital tools like Adobe, 'Turtle Art' (free software), Simple Electronic circuitry/materials, Simple material kinetics as motion objects. Products/components can be for personal or propriety applications.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Student hands-on creations, Student group Installations.

	Presidency University, Bangalore.
Recommended by the Board of Studies on	2nd BOS Held on 4th September 2020
Date of Approval by the Academic Council	16th AC Held on 23 Oct 2021

Course Code: DES1014	Course Title: Introduction to Design Ethnography Type of Course:1] Program Core 2] Laboratory only	L- T- P- C	0	0	8	4
Version No.	1.0			1		
Course Pre- requisites	Contextual Understanding and Design History (DES1011)					
Anti-requisites	NIL					
Course Description	Ethnography is the systematic study of individual culture, people and exploring the cultural phenomena from the point of view of subject of the study. A common mistake made by novice design researchers is to ask users what they want from new product or service. Although this feels like the correct way to do user research, in most cases users don't know, don't care or can't articulate what they need. It is the design team's job to establish the underlying problem, identify the best solution and then validate that their solution works. Design ethnography is the first step on that journey.					

Course Objective	The objective of the course is familiarize the learners with Introduction to Design Ethnography and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.				
Course Out Comes	On successful completion of the course the students shall be able to:				
	Identify the culture and ethic in the given design structure.				
	Discuss the reason behind the design structure exist in the society				
	Interpret the impact of the design structure within the society.				

Course Content:

Task 01: Case study of Design Ethnography

Level 1: Object study: Present object study in the form of report to depict the understanding of material from colour function of the object. With help of illustration, photograph, video and text.

Level 2: By deconstructing the object and its form various perspective.

Level 3: Reconstruct object by changing its preconception and association giving various example to use it unconventional.

Task 02: Study of Object in environment: (Group activity)

Level 1: Submit report on a system around the object. Through help of illustration, photograph, video and text.

Level 2: Present model infographic to show the insides of level 1

Task 03: Case on craft (Group activity)

Level 1: Study a craft and submit detail report to understanding of stake holder, product, and material and environment(eco system). Through help of illustration, photograph, video and text.

Level 2: Submit the detail report on your observation to improve craft or artisans life.

Level 3: Design tools, process or product to help the artisan.

Task 04: Study of different human in behaviour in different space.

Level 1: Submit report on a human behaviour in various situation/space/time through help of illustration, photograph, video and text.

Level 2: Present model infographic to show the insides of level 3

Task 05: Study of different human in context.

Level 1: Submit detail research report on a individual culture, people and exploring the cultural phenomena from the point of view of subject of the study. through help of illustration, photograph, video and text.

Level 2: Present model infographic to show the insides of level 4

Level 3: Present the critical views in the forms of report to improve the eco-system and the relevance e of the object in relevance.

Targeted Application and Tools that can be used:

In the early stages of a user-centred design project. Ethnography focuses on developing an understanding of the design problem.

Ethnographic methods (such as participant observation) could also be used to evaluate an existing design – but their true value comes from developing an early understanding of the relevant domain, audience(s), processes, goals and context(s) of use.

Tools: Camera for image and video documentation, Voice recorder.

	+	Assignment	Observations		$\overline{}$		
Module 1	Introduction to Soft Materials	Case study	Illustrations			14	Hours
	Materiais	Documentation	Visual Journal				
	·	1			1		

Knowledge and Classification: Properties, various techniques and usage of soft materials: Paper, Yarn, Fabric, Leather, Clay.

Module 2	Introduction to Hard Materials	Assignment Case Study Documentation	Observations Illustrations Visual Journal	16 Hours
Topics:				•
Application and Man	ipulation : Behaviour, n	nethods and usage of hard n	naterials: Plastic, Metal, Stone	e, Wood.
Module 3	Methods and Design Research	Assignment Presentation Documentation	Group Activities Presentations Explorations	14 Hours
Topics:	<u> </u>	<u> </u>		<u>.</u> I
Identification and An	alysis: Design practice	along with methods of mate	rial and design research.	
		Assignment	Explorations	
Module 4	Study On Circular Designs	Case Study	Presentations	16 Classes
	Boolgilo	Documentation	Visual Journal	
Topics:	<u> </u>	<u> </u>	<u> </u>	<u>.</u> L
Study and Developn	nent Of Various sustain	able concepts, artefacts and	Eco Friendly materials.	
List of Practical Task	s:			
Task 1: Creation of v	arious 3D forms throug	h Paper techniques.		
Level 1: Develop a fo	orm by using various Pa	aper Manipulation Technique	S.	
Level 2: Construct to	wo different objects by เ	using Paper Manipulation Te	chniques.	
Task 2: Illustration ar	nd Representation of Ab	ostract/Organic Shapes throu	ugh Clay Techniques.	
Level 1: Take Inspira	ations from Nature /Abs	stract shapes and create prod	ducts.	
Level 2: Take Inspir	ations from Nature and	Abstract shapes and create	products.	
Task 3: Practice on a	ny soft material using r	mixed media technique.		
Level 1: Illustrate an	d Design an object usir	ng any kind of soft material w	vith mixed media.	
Level 2: Develop a c	lesigned object using n	nixed media techniques.		
Task 4: Representati	on of manipulated hard	material using different met	hods.	
Level 1: Prepare pre	esentations on hard ma	terial techniques and metho	ds.	

Level 1: Explore new idea inspired by sustainable/Eco Friendly Material.

Level 2: Develop a problem solving product using any kind of Sustainable Material.

Task 5: Idea generation

Targeted Application and Tools that can be used:

Abode Illustrator Draw: Practicing and Creation of digital drawings and composition.

Hard/Soft Materials Tools and Equipment.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

Student shall be developing and create products using various materials in their final project work.

This course develops skills that students can apply in their design Practice.

Course Pre- requisites	NIL							
Anti-requisites	NIL							
Course Description	The use of digital tools in design has become essential, as they enhance creativity, efficiency, and teamwork. Depending on their unique requirements and the nature of the work, designers and Practitioner frequently combine various tools. Because technology and design are always interconnected, new tools are constantly being introduced, therefore it's important for students and professionals to produce more appealing works by using various digital tools.							
Course Objective	The objective of the course is to familiarize the learners with the concepts of Design Appreciation and attain Skill Development through Experiential Learning techniques.							
Course	On successful completion of the course the students shall be able to:							
Outcomes	Define the importance of various digital tools and effectiveness in digital production.							
	Illustrate different digital tools and techniques for executing design concept.							
	Demonstrate different ideas to create various digital composition.							
Course Content:								
Module 1	Introduction to digital tools and techniques	Assignment& Documentation	-	writing, P on & Visu			35 H	Hours

	Topics:					
	Basics of Photoshop tools and techniques, Digital Sketching and Drawing, image editing, vector graphics, and Basics of layout design.				nage

3-2-1

In 3-2-1, students write about 3 things they learned in the lecture, 2 things they found particularly interesting from the lecture, and 1 question they still have about the lecture content.

Advance Organizers

An Advance Organizer (AO) is a template that professors can share with students prior to a lecture to help them structure the information they're about to learn.

Digital Story

Students use computer-based tools, such as video, audio, graphics, and Web publishing, to tell personal or academic stories about life experiences relevant to course themes.

Practice worksheets

Module 2	Writing Reviews	Classes

Guided Notes

In Guided Notes, the instructor provides a set of partial notes that students complete during the lecture, focusing their attention on key points.

Sentence Stem Predictions

In Sentence Stem Predictions (SSP), the professor presents a partial sentence that is structured to prompt students to predict select aspects of the upcoming lecture.

Active Reading Documents

Active Reading Documents (ARD) are carefully prepared forms that guide students through the process of critical and careful reading.

Practice Worksheets

Module 3	Technical Presentation	Classes

Fishbowl

In Fishbowl, students form concentric circles with a small group inside and a larger group outside. Students in the inner circle engage in an in-depth discussion, while students in the outer circle listen and critique content, logic, and group interaction.

Individual Readiness Assurance Tests

Individual Readiness Assurance Tests (IRATs) are closed-book quizzes that students complete after an out-of-class reading, video, or other homework assignment.

Quick Write

Quick Write is a learning assessment technique where learners respond to an open-ended prompt.

Practice Worksheets

Module 4	Technical Report Writing	Classes

IRAs

When using IRAs, students complete a written response to a content-rich assignment that includes three components: Insight, Resource, and Application.

Quick Write

Quick Write is a learning assessment technique where learners respond to an open-ended prompt.

Individual Readiness Assurance Tests

Individual Readiness Assurance Tests (IRATs) are closed-book quizzes that students complete after an out-of-class reading, video, or other homework assignment.

Targeted Application and Tools that can be used: Writing reports, Review writing, Group Discussion, Dyadic interviews, Grammarly.com

Project work/Assignment:

Contemporary Issues Journal - Assignment

In Contemporary Issues Journal (CIJ), students look for recent events or developments in the real world that are related to their coursework, then analyze these current affairs to identify the connections to course material in entries that they write in a journal.

Course Description	Purpose:							
·	The course provides fundamental insights into the process of Hand sewing and embroidery. Understanding of equipment's and the techniques used to develop basic and advanced hand stitching and sewing processes.							
	Abilities to be Develop:							
	The students get well equipped with the knowledge of developing stitches with a thorough understanding of the materials and substrates used in making the sewing threads and needles.							
	Nature of the Course:							
	It also helps the students to develop the creative skills along with technical inputs to develop different types of surface developments using stitching and sewing techniques.							
Course Objective	The objective of the course is familiarize the learners with the concepts Basics of Needle Craft and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.							
Course	On successful completion of the course the students shall be able to:							
Outcomes	Define the terminologies used in Hand sewing	and embro	idery.					
	Identify different types of garment hand stitche	s and finish	nes.					
	Apply various hand embroideries and stitches	for surface	embe	llishr	nent.			
	Research on various hand stitching techniques embellishment.	s and meth	ods fo	r sur	face			

Course Content:	Hand Stitches & Sewing techniques, Construction and Manipulation, Fabric Fundamentals,				
Module 1	Hand Stitches & Sewing techniques	Practice Case study Documentation	Observations Illustrations Visual Journal	14 Hours	

Topics: Introduction to Hand stitches & embroidery application of temporary and permanent stitches.

	Construction and Manipulation	Assignment	Observations	
Module 2		Case Study	Illustrations	16 Hours
		Documentation	Visual Journal	

Topics: Advanced Hand embroidery and smocking technique, Applique work and Mirror work.

Module 3	Fabric Fundamentals	Assignment Presentation Documentation	Group Activities Presentations	14 Hours
		Documentation	Explorations	

Topics: Types of Fabrics, Selection of Needle and thread according to fabric types. Fabric Preparation for cutting, Grain, Selvedge, Shrinkage, Straightening the fabric grains.

List of Practical Tasks:

- Task 1: Development of Basic hand stitches & seams.
- Task 2: Develop of 5 basic line stitches through hand embroidery.
- Task 3: Construct 10 basic line stitches through hand embroidery.
- Task 4: Representation of Loop stitches using hand embroidery.
- Task 5: Construct 5 samples of different loop stitches inspired by boho style.
- Task 7: Construct 10 samples of different loop stitches inspired by boho style.
- Task 8: Practice on any traditional surface embellishment techniques.
- Task 9: Design and develop an object using any kind of traditional surface embellishment method.
- Task 10: Design and develop an 2 object using any kind of traditional surface embellishment method.
- Task 11: Development of samples of hem finishing techniques.
- Task 12: Development of samples of hem finishing techniques.
- Task 13: Sample development of Applique and patch work.
- Task 14: finishing of the Project

Targeted Application & Tools that can be used:

Students to develop the creative skills along with technical inputs to develop different types of surface developments using stitching and sewing techniques.

Hand sewing and embroidery tools and equipment.

Topics relevant to "Skill Development": Motif creation of Basic Hand Sewing and tools and handling accessories for beginners for Skill Development through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Cellulose fibres – cotton, flax, kapok, hemp, ramie – properties and end uses, protein fibres – silk, wool, properties and end uses. Regenerated cellulose fibres – viscose rayon, acetate rayon, Tencel, Modal, Bamboo, Lyocel – production, source, properties and end uses. Synthetic fibers – nylon, polyester, acrylic and modacrylic – properties and end uses, polyethylene, polypropylene, olefin, elastomeric fibres (spandex and lycra) – end uses

Module 2	journal, vation book Context-relevant Assignments, presentations.	12 hours
----------	--	----------

Topics:

Yarn manufacturing process for short staple fibres, spinning process – ring and open end yarn spinning, flowchart for manufacturing carded, combed yarn and folded yarn, difference between rotor, ring spinning and air jet spinning. Polymers – polymerization, degree of polymerization, different types of polymers – addition and condensation, orientation and crystallinity, characteristics of fibre forming polymers, general physical and chemical properties of fibres. Texturization – types (simplex and complex yarns) and uses, blends – types, uses of blended yarns.

Module 3	Introduction to fabric technology	Visual journal, observation book	Context-relevant Assignments, presentations.	10 hours
----------	-----------------------------------	-------------------------------------	--	----------

Topics:

General Characteristics of woven fabrics and their importance—count of yarn, fabric grain, Thread density, Fabric width, Fabric weight and selvedges. Introduction on different methods of fabric formation — woven, knitted and non-woven fabrics, properties and end uses. Woven fabric formation — weaving preparatory, objectives and brief study of processes — winding, warping, sizing, drawing and denting, weft winding, introduction to Khadi, and handloom and power loom fabrics. Classification of looms, passage of material through looms, study of primary and secondary motions, principles of shuttle less looms, multiple gripper, rapier, air jet and water looms, advantages of unconventional over conventional looms.

Module 4	Classification of fabrics	Visual journal, observation book	Context-relevant Assignments, presentations.	09 hours
----------	---------------------------	-------------------------------------	--	----------

Topics:

Introduction to knitting, classification, difference between warp and weft knitting, basics of weft knitting, loop diagram and properties of basic weft knitted structures, modification of weft knitted structures. Introduction and salient features of Crepe fabrics like georgette, chiffons, Extra threads, Warp and weft pile and Brocade and damask, Terry pile structures.

List of Projects:

Reports on important fabric manufacturing clusters in India and their salient features – Kanchipuram, Arni, Kumbhakonam, Chanderi, Maheshwari, Salem and Karoor, Bangalore, Mysore, Ilkal, Guledgudda, Kota, Banaras, Suhalkuchi, Santhipur, Behrampur of Orissa, Pochampalli and Panipat

Topics relevant to "Employability": Identification of textile fibres, properties, end uses, yarns and different methods of fabric formation for Employability through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Catalogue prepared by	Sandeep K.N, Asst. Professor, Fashion Design
Recommended by the Board of Studies on	5th BOS, 22.03.2022
Date of Approval by the Academic Council	18th Academic Council held on 03.08.2022

Course Code:	Course Title: Elements of Fashion Illustration					
DES2007						
		L-T- P-C	1	0	4	3
	Type of Course: 1] Program Core					
	2] Integrated					
Version No.	3.0					
Course Pre-	NA					
requisites						
Anti- requisites	NIL					

Course	Purpose:	Purpose:					
Description	This course is to	o understand Fash	ion illustration and Designing բ	process.			
	Abilities to be de	eveloped:					
	The course is not just illustrating body forms or garments, but more of structured design learning. It enables the student to learn the basics of fashion illustration - drawing technique of the human figure and different mediums such as using pencil, markers, water colours, paint, digital interfaces, etc.						
	Nature of the co	ourse:					
	The course prepares the student to realize the importance of an effective research for a project, its interpretation and the needs of a client while also keeping their style intact, creating, a concept or a mood through their artistic vision. The course also helps the students to develop their individual style and prepares them to structure their design portfolios						
Course Objective	The objective of the course is to familiarize the learners with the concepts of Elements of Fashion Illustration skill to analysis and attain SKILL DEVELOPMENT through EXPERIENTIAL LEARNING techniques						
Course	Upon successfu	ul completion of the	e course the students shall be	able to:			
Outcomes	Illustrate the ba	sic body forms and	d proportions				
	Identify the hea	d theory and postu	res – static and dynamic				
	Sketch the basi	c body poses and	perspectives				
	Relate the hum	an body in proporti	ons relevant to fashion illustra	tion			
	Select mediums	s to sketch and ren	der life forms				
Course Con	l tent:						
		Assignment					
Module 1	Fashion figures: balance & movement	Demonstration and Participative learning.	Examples/ Demo/Assignments	18 Hours			
		Documentation					

Topics:

Introduction to head-theory, croquis, balance lines, postures, proportions

Stick-figure drawings, block sketches, poses and balance illustrations.

Sketching of 8 and 10 head croquis, different poses of croquis.

Face analysis and features – sketching with face block.

Sketching of hands and legs using block sketches

Drawing from photographs/magazines/live study – with croquis and costumes

Module 2	Application of art mediums	Assignment Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	19Hours

Topics:

Fleshing and rendering techniques – skin and materials

Rendering techniques using water colours

Rendering techniques using Staedtler pencils, charcoal, Marker pen, oil pastel, water colour and chalk

		Assignment		
Module 3	Fabric representation & rendering	Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	19 Hours

Topics:

Textural rendering of garments and fabrics

Clothing figure – swimwear and lingerie, trouser and skirts.

Clothing figure – jackets, coats and fall layering

Traditional and contemporary outfits for men and women

Module 4	Portfolio development	Assignment Demonstration and Participative learning. Documentatio	Examples/ Demo/Assignments	19 Hours
		n		

Topics:

Study of artists and fashion illustrators of national and international repute

Study of seasonal trends and fashion week collection and illustration

Development of different types of boards – mood, colour, swatch, texture and inspiration

Development of look book and style books

List of Practical Tasks:

Project No. 1: Illustrate the basic body forms and proportions.

Project No. 2: Illustrate the basic body forms and proportions with block and line.

Project No. 3: Illustrate the basic body with flesh figure and rendering.

Project No. 4: Illustrate the basic body forms and proportions with different poses and style

Project No. 5: Identify the head theory and postures – static and dynamic with feature drawings phase 1

Project No. 6: Identify the head theory and postures – static and dynamic with feature drawings phase 2

Project No. 7: Identify the head theory and postures – static and dynamic with feature drawings phase 3

Project No. 8: Identify the head theory and postures – static and dynamic with feature drawings phase 4

Project No. 9: Identify the head theory and postures – static and dynamic with feature drawings with color media.

Project No. 10: Identify the head theory and postures – static and dynamic and color theory

Project No. 11: Select mediums to sketch and render life forms (Water color)

Project No. 12: Select mediums to sketch and render life forms (oil pastel)

Project No. 13: Select mediums to sketch and render life forms (dry pastel)

Project No. 14: Select mediums to sketch and render life forms (staedtler)

Project No. 15: Select mediums to sketch and render life forms (lnk)

Project No. 16: Select mediums to sketch and render life forms (acrylic colour)

Project No. 17: Select mediums to sketch and render life forms and exploring in different medium of colors

Project No. 18: Select mediums to sketch and render life forms and exploring in different medium of colors

Project No. 19: Select mediums to sketch and render life forms and exploring in different medium of colors

Project No. 20: Design 5 different types of illustration based on a selective theme and explore through fashion illustration

Project No. 21: Design 5 different types of illustration based on a selective theme and explore through fashion illustration and develop record work based on the theme selected as per the ideas.

Project No. 22: Develop inspiration mood and concept board digital

Project No. 23: Develop inspiration mood and concept board digital with pontoon shades and updates

Project No. 24: Develop inspiration mood and concept board digital with pontoon shades and updates

Project No. 25: Develop inspiration mood and concept board digital with pontoon shades and updates

Project No. 26: Design 10- 5 different types of illustration based on a selective theme and explore through fashion illustration based on the theme selection.

Project No. 27: Design 10- 5 different types of illustration based on a selective theme and explore through fashion illustration based on the theme selection.

Project No. 28: Accessories rendering based on the theme selected a s add on to the illustration rendering.

Project No. 29: Accessories rendering based on the theme selected a s add on to the illustration rendering.

Project No. 30: Presentation and team work as a group or individual work on as a final garment or tangible product to be developed.

Targeted Application & Tools that can be used:

Understanding the basics of visual design and elements in fashion illustration.

In general, they will be learning about the shapes forms, and colors.

Combined to create a design with fabric rendering and flats

Tools used in fashion illustration and color media.

Topics relevant to "Skill Development":

Study of Understanding fashion illustration and techniques and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Course Code: DES2157	Course Title: Basics of Draping and Pattern Making Type of Course: 1] Program core	L-T-P- C	2	0	4	4
	Integrated					
Version No.	2.0	L	I			
Course Pre- requisites	NA					
Anti-requisites	NIL					
Course Description	Purpose: This course is to understand fundamentals of Draping and its importance in fashion trends Abilities to be developed:					
	The objective of the course is to provide an understanding of the basics of visual design and the tools to the student. The course equips them to be able to analyze various types of forms, spaces, and semantics, and explore meta and complex patterns.					
	Nature of the course:					
	The students will be able to develop an interwind the research and development of more effective visual communication designs which in the long run will translate into their applications in the design industry.					

Course Objective	The objective of the course is to familiarize the learners with the concepts of Draping and garment construction to skill analysis and attain SKILL DEVELOPMENT through EXPERIENTIAL LEARNING techniques					
Course	Upon succe	essful comple	tion of the course the students sh	all be able to:		
Outcomes	Identify the form to dev		and techniques in positioning and	pinning fabric on a dress		
	Apply structured	•	nent/accessory design to suppo	ort and expand the fashion		
	Identify and recognize the patterning and fitting problems and solutions with draping techniques.					
	Apply and r	manipulate dr	aping Techniques.			
	Interpret the	eir creative de	esign ideas through various drapir	ng techniques.		
Course Content	:					
Module 1	Introducti on and Basic terminolo gy of Draping:	Assignme nt Demonstr ation and Participati ve learning. Document ation	Examples/ Demo/Assignments	12Hours		
Topics:						
Introduction to o	Iraping.					
Study of Equipn	nent's.					
Study of Grain.						
Study of Dress t	forms.					
Preparation of d	ress forms fo	or draping.				
Preparation of n	nuslin for Dra	ping-Tearing	, blocking, pressing.			
Module 2	Identificati on & Applicatio n	Assignme nt Demonstr ation and Participati ve learning. Document	Examples/ Demo/Assignments	12 Hours		
		ation				

Topics:

Marking, Trueing, Method of draping of Front body, Method of draping of Back body.

Module 3	Manipulati on Technique s	Assignme nt Demonstr ation and Participati ve learning.	Examples/ Demo/Assignments	14 Hours
		Document ation		

Topics:

Dart manipulation—Bustling dart, Neck line dart, Insertion of pleats in bodice, Insertion of tucks in bodice, Insertion of cowl in bodice.

		Assignment		
Module 4	Basic Garment Components & Fitting	Demonstration and Participative learning.	Examples/ Demo/Assignments	14 Hours
		Documentation		

Topics:

Skirts, Pants, Collars, Sleeves and Tailored Garments.

List of Practical Tasks:

Project No. 1: Development of Basic Bodice: Front using Muslin fabric.

Project No. 2: Development of Basic Bodice: Back Bodice using Muslin fabric.

Project No. 3: Development of Basic Bodice: Front And Back bodice using special fabric.

Project No. 4: Development of Basic Bodice: Front And Back bodice using special fabric with faster.

Project No. 5: Construction of Basic Skirt

Project No. 6: Construction of Basic Skirt with special fabric.

Project No. 7: Construction of Basic Skirt with style variation.

Project No. 8: Construction of Dart variation (Buster)

Project No. 9: Construction of Dart variation (French)

Project No. 10: Construction of Dart variation (Mid Armhole)

Project No. 11: Construction of Dart variation (shoulder)

Project No. 12: Construction of Dart variation (Neck with style line)

Project No. 13: Construction of sleeve with dart component.

Project No. 14: Construction of puff sleeve with draping.

- Project No. 15: Construction of yokes and variations.
- Project No. 16: Construction of yokes with gathers.
- Project No. 17: Construction of yokes buster / back.
- Project No. 18: Construction of collars.
- Project No. 19: Construction of mandarin collar.
- Project No. 20: Construction of collard along with bodies.
- Project No. 21: Selection of theme based on draping techniques and develop 5 set of garment through draping techniques only.
- Project No. 22: selection of theme.
- Project No. 23: Creation of mood board, inspiration
- Project No. 24: Creation of idea, fabric. And muslin fit.
- Project No. 25: Pattern development as per the design ideas.
- Project No. 26: Mockup of through draping skill.
- Project No. 27: Presentation skills and board creation.
- Project No. 28: Presentation and photo skills Fit.
- Project No. 29: Presentation and shoot, Editing.
- Project No. 30: Presentation and presenting of two complete range of garments and accessories using advanced draping technique

Targeted Application & Tools that can be used:

Understand basic skills and techniques in positioning and pinning fabric on a dress form to develop structure of a garment/accessory design -- to support and expand the fashion design process.

Development and implementation of draping skill in designing of garments.

Generating mockups before the final design process to understand the design in 3D.

Design finalization and Presentation for the jury and evaluation.

Topics relevant to "Skill Development":

Study of Understanding of Draping and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Date of Approval by the Academic Council	20TH AC held on 15 /02/2023

Course Code: DES1020	Course Title: Basics of Pattern Making	L-T- P-C	2	0	4	4
DES 1020	Type of Course: Program Core - Integrated					
Version No.	3.0					
Course Pre- requisites	NIL					
Anti-requisites	NIL					
Course Description	Pattern making also known as pattern drafting helps the students to create, develop patterns that are then cut on the fabric and finally sewn into garments. The knowledge of machines, tools and equipment used in pattern drafting and processing are an essential part of this course. Different techniques imparted in pattern drafting, cutting and sewing and their importance in apparel garment construction develops both technical knowledge and creativity amongst the students. The course also highlights the understanding of different components of an apparel garment and their importance as a whole forms the Gestalt principle of developing any apparel garment.					

Course Objective	The objective of the course is familiarize the learners with the concepts of Basics of Pattern Making and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.					
Course Outcomes	On successful completion of	of the course the stu	dents shall be able to:			
	Define basic terminologies	and parts of pattern	drafting			
	Practical component:					
	Operate and discover the basic functions of sewing machines					
	Operate basic tools and equipment of pattern making					
	Prepare styles of different components of a garment					
Course Content:	Introduction to Patterns , Introduction to components of Garments, Dart Manipulation Techniques, Creation of Body blocks.					
		Assignment	Illustrations			
Module 1	Introduction to Patterns	Comparative report Documentation	Calculations & comparison Visual Journal	20 Hours		
T!						

Topics:

Market for Patterns/Size ratios and identify the Target users for Particular Pattern.

present Patterns/Size ratios and competition between Different Brands using similar Size and Patterns. Use research to assess the Target Users and their demands for certain pattern in the market.

Analyse the similar Patterns in different brands to give inputs to create the value Addition to a Pattern and to achieve better fit and comfort for a group of clients.

Module 2 Introduction to components of Garments	Assignment Documentation	Info-graphics development Visual Journal	10 Hours
---	--------------------------	--	-------------

Topics:

Neckline Patterns and Seam allowance for cutting

Sleeve Patterns and Adaptation of Sleeve Pattern

Cuffs, Collars, plackets, Pockets and Yoke patterns and Adaptations

Module 3	Dart Manipulation Techniques	Assignment Documentation	Info-graphics development Visual Journal	10 Hours
----------	---------------------------------	---------------------------	--	-------------

Topics:

Definition of Dart, Types of Darts, Importance of Dart Manipulations and Placements.

Slash and Spread Method Pivot Method					
Single dart Double [Dart and Triple Dart Series				
Module 4	Creation of Body blocks	Assignment Documentation	Development of Paper Patterns for estimations.	15 Hours	

Topics:

women body block Armstrong method

unisexual pant body method.

pant women

basic skirt block

Introduction kids block

List of Practical Tasks:

Project No. 1: Creation of New patterns

Project No. 2Taking Measurements according to retail sizes and Couture Measurements.

Project No. 3Creation of Basic Block for upper body for men, women and Kids. (Front Back and Sleeves)

Project No. 4: Creation of Pant block

Project No. 5Creation of Basic block for Pants – Unisexual (Casual), Men, Women

Project No. 6: Pattern Correction and Manipulation.

Project No. 7Using of Slash and Spread Method.

Project No. 8: Manipulation of Single dart to double and Triple dart Series.

Project No. 9: Definition of Dart, Types of Darts, Importance of Dart Manipulations and Placements.

Project No. 10 : Neckline Patterns and Seam allowance for cutting

Targeted Application & Tools that can be used:

Exposure to a wide range of patterns and their improvisation by way of case studies, client study.

Prototyping of projects in collaboration with other streams who will be acting as a client base.

Understanding the values of scales-up and scaling down project sizes without compromising on the output.

Topics relevant to "EMPLOYABILITY': MEASURMENTS OF different body types Pattern making and Adaptation Method for Employabilty through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Version No.	3.0					1
Course Pre-requisites	NIL					
Anti-requisites	NIL					
Course Description	The course aims to emphasizes on imparting knowledge on design parameters so that students can develop new design ideas to garments and products.					
Course Objective	The objective of the course is famil of Basics of Sewing Techniques at by using EXPERIENTIAL LEARNIN	nd attain	EMPLO			•

Course Out Comes	On successful completion of the course the students shall be able to:			
	Define the terminologies used in sewing			
	Explain the types and functions of sewing machines			
	Operate the sewing machine and produce basic stitches			
	Identify of different types of stitches, seams, seam finishes & fullness.			

Course Content: Sewing terminologies, parts and functions, Stitches & sewing techniques, Stitches & Seams – construction and classification, Fullness: study and development. stitching of Body blocks

	Sewing	Construction	Observations	
Module 1	terminologies, parts and	Documentation	Illustrations	10 Classes
	functions	Presentation	Visual Journal	

History of sewing and sewing machine

Introduction to sewing machine: Domestic sewing machine, Industrial sewing machine

Difference between Domestic & Industrial sewing machine, parts of a sewing machine

Varieties of industrial sewing machines- Single needle machine, double needle machine-lock stitch & chain stitch machines

Over-lock machine, sewing machine needles types, parts & functions, care and maintenance of sewing machine

care and maintenance of sewing machine

Measuring Tools, Drafting Tools, Cutting Tools Sewing Tools, Finishing Tools

Module 2	Stitches & sewing techniques	Designing, Construction Documentation	Explorations Illustrations Visual Journal	12 Classes
----------	------------------------------	---	---	------------

Hand needles – Size & types - Sewing Thread – Types (documentation work)

Sewing threads- function, performance, characteristics

Applications of hand stitches – Hems - Types – Uses, Corner Makings - Types and Uses, Casing - Introduction – use, Edge Finishing

Fabric Fundamentals - Types of Fabrics, Selection of Needle and thread according to fabric types

Fabric Preparation for cutting, Grain, Selvedge, Shrinkage, Straightening the fabric Grains

Module 3	Stitches & Seams – construction and classification	Construction, Presentation Documentation	Illustrations Observation Visual Journal	12 Classes
----------	--	--	--	---------------

Stitch properties, stitch classes, stitch types – practice & documentation

Seam classes, super imposed, Lapped, bound, Flat – practice & documentation

Module 4	Fullness: study and development	Construction, Documentation, Assignment	Observation Illustrations Visual Journal	14 Classes
----------	---------------------------------------	---	--	------------

Topics: Set –In Sleeve, Sleeve Cuffs, Dart less Sleeve, Sleeve Design variations. Plackets. Pocket classification

Introduction to fullness, types and uses (illustrations)

Study, analysis and development of Darts , pleats and tucks

Study, analysis and development of gathering, shirring, gores and godets

Study, analysis and development of Ruffles, Frills & Flares

Module 5	stitching of Body blocks	Designing, Construction Documentation.	Explorations Illustrations	12 Classes
			Visual Journal	

women body block, Men body block, pant stitching, Skirt stitching, Basic Garment Finishes, Use and Adaptations of Necklines, Sleeves and seam Lines in real time Garments and Basic Stitching for men womwn and Kids

List of Laboratory Tasks:

Experiment N0 1: Development of Basic Bodice with Dart Manipulation.

Level 1: Front and Back Bodice using one dart manipulation

Level 2: Front and Back Bodice using two dart manipulation.

Experiment No. 2: Construction of an upper garment with Yoke/Flanges.

Experiment No. 3. Development of collars and pockets.

Experiment No. 4. Sleeves Variations

Level 1. Develop any one sleeve variations using printed fabric.

Level 2. Develop any two sleeve variations using checks fabric.

Experiment No.5. Insertion and construction of Pleats/gathers in Skirt.

Level 1. Insertion and Construction of Pleats in Skirt.

Level 2. Insertion and Construction of Pleats & gathers in Skirts.

Experiment No.6. Construction of Dress without waistline Seams.

Experiment No. 7. Development of one complete garment with one variation.

Experiment No. 8. Experimentation on different garment construction Techniques.

Level 1. Construction of two complete outfits with sleeve, neckline variations and accessories.

Level 2. Creation of one complete range of garments and accessories using advanced garment Construction Techniques.

Targeted Application & Tools that can be used:

Student shall be able to experiment in garment construction with different fabric materials and develop understanding of Industry standard.

Topics relevant to "EMPLOYABILITY: MEASURMENTS OF different body types Basic Sewing Techniques AND Basic stitches familiarization of Sewing machine and Adaptation Method for EMPLOYABILITY through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Course Description	The course provides hands-on experience to the students in digital and non-digital medium to develop interesting compositions and designs using colour theory as the fundamental concept. This course further narrows down to understand the application of Motifs in textile based on their end-uses and also replicate them using the said medium through varied levels of explorations.							
Course Objective	The objective of the course is to familiarize the learners with the concepts of Textile Design Development and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.							
Course Outcomes	On successful comp	letion of the course the	studen	nts will be	able to	D :		
	Identify different Mot	ifs and its source						
	Produce composition	ns with Motif repeat sch	emes l	based on	end-ap	plicatio	ns.	
	Relate elements and designs.	principles of design thr	ough o	outline dr	awing a	and Arra	ngen	nent of
	Practical component	:						
	Develop traditional Products.	craft into Modern and C	Contem	porary D	esigns)	and end	d use	
		Patterns , Historical Pe ase Studies of Different			•			onverting
		Assignment	Illustr	ations				
Module 1	Introduction to Motifs and Patterns	Demonstration and Participative learning.	_	rvation 8 arison	t	10 H	Hours	
		Documentation	Visua	al Journal	l			
Topics:			•					
Introduction to Motifs and their Types, Classifications								
History and Importance of Motifs in ancient cultures								

Significance of the motifs in local cultures and Global understanding

Module 2	Historical Perspective of Designs and Motifs	Assignment Documentation	Info-graphics development Visual Journal Development of Samples for each	20 Hours
----------	--	--------------------------	--	----------

Topics:

Gaining Knowledge about the Traditional Contemporary Motifs and their Story

Cross cultural Motif Symbolism, Global Design Representation through Symbols, Motifs and Logos

Module 3 Converting Motifs into Patterns Grids and Patterns	Assignment Documentation Hands on Practice	Development of Samples for each Visual Journal	25 Hours
---	--	--	----------

Topics:

Exploration of Different Techniques using different Medium of Traditional and Contemporary methods of Creating motifs

Motif Development and motif Grid techniques increase and decrease in Sizes of Motifs according to endues of the product

Module 4	Case Studies of Different Cultures Traditions and Regional Impressions	Assignment Documentation	Development of Paper Patterns for estimations.	5 Hours
----------	--	--------------------------	--	---------

Topics:

Case study on the Designers and Their Designs who have Experimented on the same.

List of Practical Tasks:

Project No. 1: Motif Development

Project No. 2: Basic motif development in different styles of Traditional Contemporary Geometric Stylized and Abstract with the colour representation.

Project No. 3: 10 Basic motif development in different styles of Traditional Contemporary Geometric Stylized and Abstract with the colour representation

Project No. 4: Developing the Sized Scale of the Motifs chosen in Manual version and producing the same on fabric

Project No. 5: Developing the Sized Scale of the Motifs chosen in Digital version and producing the same on fabric

Project No. 6: Creating the Repeat patterns on the grid and without grid with the given Set of Motifs

Project No. 7: Study of Pattern Grids in the Given Design and Documentation

Project No. 8: History and Importance of Motifs in ancient cultures

Project No. 9: Gaining Knowledge about the Traditional Contemporary Motifs and their Story

Project No.10: Exploration of Different Techniques using different Medium of Traditional and Contemporary methods of Creating motifs

Exploration of Different Techniques using different Medium of Traditional and Contemporary methods of Creating motifs

Targeted Application & Tools that can be used:

Understanding the Heritage of the Old Civilizations which have seeped down to modern times with these crafts.

Tools used will be the Hand Needle, threads, authentic Tools used for Crafts used by the artisans will be used.

Course Pre- requisites	Basics of sewing		
Anti-requisites	NIL		
Course Description	The course aims to emphasizes on imparting knowledge on design parameters so that students can develop new design ideas to garments and products.		
Course Objective	The objective of the course is familiarize the learners with the concepts of Advanced Sewing Techniques and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.		
Course Out	On successful completion of the	e course the students shall be able to:	
Comes	Define the terminologies used in	n sewing	
	Explain the types and functions	of sewing machines	
	Identify of different types of stite	ches, seams, seam finishes & fullness.	
	Operate the sewing machine ar	nd produce basic stitches	
	· · · · · · · · · · · · · · · · · · ·	functions, Stitches & sewing techniques, , Fullness: study and development	
Module 1	Sewing terminologies, parts and functions	Construction Documentation Presentation	
	•	of Needle and thread according to fabric dge, Shrinkage, Straightening the fabric	
Module 2	Stitches & sewing techniques	Designing, Construction Documentation	
	•	pment – Introduction to fullness, types and uses s, pockets, analysis and development of	
Module 3	Stitches & Seams – construction and classification	Construction, Presentation Documentation	
fullness and surfa		ction with variations, One-piece dress using onstruction of Lower Torso: Construction of	
Module 4	Fullness: study and development	Construction, Documentation, Assignment	

Construction of full length Dress with Adaptation, Working pattern and Production Patterns, with Complete Muslin Fit.

List of Laboratory Tasks:

Experiment N0 1: Development of Basic Bodice with Dart Manipulation.

Level 1: Front and Back Bodice using one dart manipulation

Level 2: Front and Back Bodice using two dart manipulation.

Experiment No. 2: Construction of an upper garment with Yoke/Flanges.

Experiment No. 3. Development of collars and pockets.

Experiment No. 4. Sleeves Variations

Level 1. Develop any one sleeve variations using printed fabric.

Level 2. Develop any two sleeve variations using checks fabric.

Experiment No.5. Insertion and construction of Pleats/gathers in Skirt.

Level 1. Insertion and Construction of Pleats in Skirt.

Level 2. Insertion and Construction of Pleats & gathers in Skirts.

Experiment No.6. Construction of Dress without waistline Seams.

Experiment No. 7. Development of one complete garment with one variation.

Experiment No. 8. Experimentation on different garment construction Techniques.

Level 1. Construction of two complete outfits with sleeve, neckline variations and accessories.

Level 2. Creation of one complete range of garments and accessories using advanced garment Construction Techniques.

Targeted Application & Tools that can be used:

Student shall be able to experiment in garment construction with different fabric materials and develop understanding of Industry standard.

Text Book

Pattern Making for Fashion Design - Helen Joseph Armstrong.

The New Complete Guide to Sewing: Step-by-Step Techniquest for Making Clothes and Home Accessories Updated Edition with All-New Projects and Simplicity Patterns (Reader's Digest) Hardcover – 11 November 2010 by Editors of Reader's Digest (Author).

Version No.	2.0	•	1	•		
Course Pre- requisites	Basics Of Pattern Making					
Anti-requisites	NIL					
Course Description	Purpose: Expanding the knowledge about Body Anatomy a according to the Client's Needs, by understanding Understand the work method of the Garment Industry in Standards for a better planning and development different techniques in Advanced Pattern methods used in Industries and Measurement Method and techniques will be used for better understanding of Body. Understanding the Behavior of Different face	g their coustry. Sto I Local, of Patte Is of Grad I compar of the Be	omfort udy the Nationa erns. The ding in ring the ehavior	level. co-real and ne app Form m. The	To elation I Internate olication ula Methonese	tional of nod
	Abilities to be developed:					
	Understanding consumer psychology and adaptir body Pattern to the Individual or mass Clients. In will achieved through a single Method of Pattern I Techniques to achieve the most effective and Cor	the case	e of Ma or even	ss pr	oduction	
	Nature of the course:					
	The course is based on Industrial Study of pattern client's body. Clients will be allotted to the Studen				-	

	taking on body measurement and comparing the measurement and Industry Standard Measurement.				
	The students will be exposed to Different fabrics on which they will have to work on to understand the cutting methods of Pattern according to thickness of the Fabric.				
Course Objective	The objective of the course is familiarize the learners with the concepts of Advanced Pattern Making and attain EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.				
Course	On successful comple	tion of the course t	he students shall be able	to:	
Outcomes	Recognize Measureme	ent method for pers	sonal body Measurement	i.	
	Interpret the constructi Using Standard and pe	-	atterns for Men's Wear a ent	nd kids wear	
	Calculate the Fabric co	•	erent Fabrics provided w	rith Different	
	•		f fabrics & their importan nalysis on the Blocks Wit		
		Assignment	Illustrations		
Module 1	Analysis of Patterns	Comparative report	Calculations & comparison	6 Hours	
		Documentation	Visual Journal		
Topics:					
1 -	-		ent Brands using similar s for certain pattern in the		
			s to create the value Add		
	tter fit and comfort for a <mark>or Particular Pattern.</mark>	group of clients. M	larket for Patterns/Size ra	atios and identify	
Module 2	General properties of fabrics & their	Assignment	Info-graphics development	9 Hours	
medale 2	importance in Pattern Making	Documentation	Visual Journal	o i iouio	
Topics:					
	Physical properties of fabrics – substrates, types, width, thickness, colour used for the different Patterns and Different Garment.				
Internal & externa	I factors affecting fabric	behaviour and per	formance and using then	n for different	
purpose in certain	area of the Pattern whi	<mark>le designing the ga</mark>	<mark>rments.</mark>		
Module 3	Geometry of fabrics & calculations	Assignment Documentation	Fabric Estimation Calculation process and Size down Estimation Development of standard and	10 Hours	
			Standard and		

Personalized measurement

Topics:

Understanding the reason behind Fabric Estimation during Pattern making. Recognising and reviewing the characteristics of fabric before estimation.

Planning and Demonstration of different fabric for layering in a garment and estimating the usage of each fabric in a complete pattern belonging to and individual Costume.

Estimating and Analysing the fabric Requirement for Mass Production Patterns and Couture Patterns. Working on Different Methods of Fabric Estimation.

Module 4	Application of Analysis on the Blocks With Estimation	Assignment Documentation	Development of Paper Patterns for estimations.	10 Hours
----------	--	---------------------------	--	----------

Topics:

Combining of Pattern grading with Fabric to Obtain the real time fabric estimation for the given Block Pattern.

Combining of Pattern grading with Fabric to Obtain the real time fabric estimation for the Adapted Design Pattern.

Comparison of Fabric Estimation with and without grading for Single Size Production and Multiple Size Production.

Module 5 Assessment of Different Patterns and Crisis Management	Case Studies Assessment and Documentation	Case Studies	10 Hours
--	---	--------------	----------

Topics:

Estimation of Fabrics for Different Patterns Such Men's Wear Women's Wear and assessing it with the actual Sample Garment.

Evaluating the Differential Measurement of fabric Estimation in calculation and actual usage of fabric which provides the Fabric Wastage estimation. This would help in recalculation and Interpretation of pattern Arrangement During Estimation and leading towards Minimal wastage of the fabric.

List of Practical Tasks:

Project No. 1: Creation of New patterns

Level 1: Creation of new pattern through Drafting and Adaptation Method

Level 2: Experimentation of Adaptation to Acquire new patterns

Level 3: Compare the Different Patterns such as upper torso patterns and lower torso Patterns to acquire different criteria for estimation.

Project No. 2: Grading of Patterns

Level 1: Preparing the Patterns for Grading using Slopers.

Level 2: Grading the given pattern Scale up and Scale Down for a given pattern.

Level 3: Elaboration of grading into nesting with either grading up of grading down.

Project No. 3: Estimation of fabrics

Level 1: Selection and formulation of a block and its adaptation for single size and Multiple size estimation

Level 2: Cutting, composing and Spreading of Patterns for estimation of Fabric.

Level 3: Comparison of fabric usage in Block patterns and Adaptation Patterns for waste Estimation.

Targeted Application & Tools that can be used:

Exposure to a wide range of patterns and their improvisation by way of case studies, client study.

Prototyping of projects in collaboration with other streams who will be acting as a client base.

Understanding the values of scales-up and scaling down project sizes without compromising on the output.

Course Code:	Course Title: Digital Marketing in Fashion			
DES2128	Type of Course: Discipline Elective - L- T-P- C 2 0 2 3 Integrated			
Version No.	1.0			
Course pre- requisites	NA			
Anti-requisites	NA			
	The course aims to provide a comprehensive understanding of digital marketing fundamentals and their application, particularly within the context of the fashion industry. Students will explore key concepts such as digital marketing channels, trends, and consumer behavior in digital media. They will learn strategies for Search Engine Optimization (SEO), Search Engine Marketing (SEM), social media marketing, content			
Course Description	marketing, email marketing, influencer marketing, and affiliate marketing.			
Course Objective	The objective of the course is to familiarize the learners with the concepts of Digital Marketing in Fashion and attain Employability of student by using Experiential Learning			
	techniques.			
	On successful completion of the course, the students shall be able to:			
	Theory outcomes:			
	Explain key components of digital marketing, specifically tailored to the fashion industry context			
	Practical outcomes:			
	Produce marketing campaigns using various channels tailored for fashion brands			
Course Outcomes	Apply strategies to enhance user experience, traffic, and drive conversions through optimized e-commerce platforms			
	Interpret legal and ethical issues related to digital marketing practices			
Course Content:				

Module 1	Understanding Digital Marketing Fundamentals	Visual document project	Case studies, classroom discussions and presentations	15 Periods
Topics:		1		
Introduction to Dig	jital Marketing			
Overview of digita	l marketing channels,	trends, and strate	gies	
Consumer interac	tion with digital media	and purchasing d	ecisions	
Search Engine Op	otimization and Searc	h Engine Marketin	g	
Social media mark	keting			
Content marketing)			
Email marketing				
Influencer marketi	ng			
Affiliate marketing				
Measuring the effe	ectiveness of digital m	narketing campaigr	าร	
	Advancements in		Case studies, classroom	
Module 2	Digital Marketing for Fashion	Visual document project	discussions and presentations	15 periods
Topics:		<u> </u>	1	
Data-Driven Marke	eting Strategies			
Mobile Marketing	and App Developmen	t		
Emerging Technol	ogies in Fashion Mar	keting		
International Digita	al Marketing			
Legal and Ethical	lssues in Digital Mark	eting		
			Case studies, classroom	
	Implementing	Visual document	discussions and	15 periods
Module 3	Digital Marketing Strategies	project	presentations	

Social Media Marketing for Fashion

Content Marketing in Fashion

Email Marketing and Automation

E-commerce Optimization

Influencer Marketing and Brand Partnerships

List of Projects:

Visual document project on 'Exploring Consumer Interaction with Digital Media and Purchasing Decisions in Fashion'

Visual document project on 'Exploring Emerging Technologies in Fashion Marketing'

Visual document project on 'Exploring Content Marketing in Fashion'

Targeted Applications & Tools that can be used:

Channel Development for Marketing – Google Analytics, Instagram Insights, LinkedIn Ads

Measurement of Campaign Effectiveness - Tableau, Google Data Studio

E-Commerce Optimization – A/B Testing Tools

Legal and Ethical Considerations – GDPR Compliance Tools, FTC Compliance Guides

Course	Purpose:					
Description	This course is to understand and and its industry.	d develop	ment sus	stainability aspe	cts in fash	nion
	Abilities to be developed:					
	The objective of the course is to provide an understanding of the basics of visual design and the tools to the student. The course equips them to be able to analyze various types of forms, spaces, and semantics, and explore meta and complex patterns.					
	Nature of the course:					
	The students will be able to development of more effective v run will translate into their applic	isual con	nmunicat	ion designs whic		ong
Course Objective	The objective of the course is to familiarize the learners with the concepts of sustainability in fashion is to skill analysis and attain SKILL DEVELOPMENT through EXPERIENTIAL LEARNING techniques					
Course	Upon successful completion of t	he course	e the stud	dents shall be at	ole to:	
Outcomes	Identify to articulate the environmental impacts of the fashion industry, including resource consumption, pollution, and waste generation.					
	Understand and evaluate sustainable materials, understanding their benefits and limitations in the context of fashion design and production.					
	Identify the principles of sustainable design, such as zero-waste pattern making, life cycle thinking, and circular fashion concepts, to create environmentally friendly garments.					
	Understand the innovative technic recycling, and the use of digital challenges in fashion.	•	•			

	practical skills in garment repair and maintenance, learning techniques to extend the life of clothing and reduce textile waste.							
Course Content	:

Topics: Environ pollution, and w		•	•		duction and garment ma	nufactı	uring, Water usage,	
	Cust	ain a b	Assignme nt					
Module 3	le Mate and Desig		Demonstr ation and Participati ve learning.			14 Hours		
			Document ation					
•	Topics: Natural vs. synthetic fibers, Innovations in sustainable textiles (organic, recycled, biodegradable), Certifications and standards (e.g., GOTS, OEKO-TEX)							
Module 4			ations in inable Fashio	on	Assignment	Exam Demo	nples/ b/Assignments	14

and Future of Sustainable Fashion	Demonstration and Participative learning.	
	Documentation	

Topics: Design strategies for sustainability, Life cycle assessment (LCA) in fashion, Zero-waste and design concepts and Project planning and development

List of Practical Tasks:

Life Cycle Assessment (LCA) Project

Conduct a life cycle assessment on a chosen garment to evaluate its environmental impact from production to disposal. Present findings and suggest improvements for reducing the garment's environmental footprint.

Sustainable Material Research

Research and present on different sustainable materials (e.g., organic cotton, bamboo, Tencel, recycled polyester). Compare their environmental impacts and suitability for various fashion applications.

Designing a Zero-Waste Collection

Develop a mini-collection of garments using zero-waste pattern-making techniques. Create prototypes and present the design process, highlighting how waste was minimized.

Sustainable Fashion Photography

Create a photo series that highlights sustainable fashion items, emphasizing their environmental and social benefits. Use the photos to create promotional materials or a look book for a sustainable fashion campaign.

Targeted Application & Tools that can be used:

Understand the environmental and social impacts of the fashion industry.

Learn about sustainable materials and ethical sourcing.

Explore innovative practices and technologies in sustainable fashion.

Develop skills in sustainable design and production methods.

Analyse case studies of brands and designers leading in sustainability...

Topics relevant to "Skill Development":

Study of Understanding of sustainability in fashion and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

- Project No. 12: Construction of Dart variation (Neck with style line)
- Project No. 13: Construction of sleeve with dart component.
- Project No. 14: Construction of puff sleeve with draping.
- Project No. 15: Construction of yokes and variations.
- Project No. 16: Construction of yokes with gathers.
- Project No. 17: Construction of yokes buster / back.
- Project No. 18: Construction of collars.
- Project No. 19: Construction of mandarin collar.
- Project No. 20: Construction of collard along with bodies.
- Project No. 21: Selection of theme based on draping techniques and develop 5 set of garment through draping techniques only.
- Project No. 22: selection of theme.
- Project No. 23: Creation of mood board, inspiration
- Project No. 24: Creation of idea, fabric. And muslin fit.
- Project No. 25: Pattern development as per the design ideas.
- Project No. 26: Mockup of through draping skill.
- Project No. 27: Presentation skills and board creation.
- Project No. 28: Presentation and photo skills Fit.
- Project No. 29: Presentation and shoot, Editing.
- Project No. 30: Presentation and presenting of two complete range of garments and accessories using advanced draping technique

Targeted Application & Tools that can be used:

Understand basic skills and techniques in positioning and pinning fabric on a dress form to develop structure of a garment/accessory design -- to support and expand the fashion design process.

Development and implementation of draping skill in designing of garments.

Generating mockups before the final design process to understand the design in 3D.

Design finalization and Presentation for the jury and evaluation.

Topics relevant to "Skill Development":

Study of Understanding of Draping and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Course Objective	This course is designed to familiarize the learners with the concepts of Fashion Merchandising and attain Employability by using Participative Learning techniques						
Course Outcomes	On successful completion of the course the students shall be able to, Identify and define various departments and activities of apparel industry Explain skills required in apparel production in industrial set-up Define various marketing and merchandising terminologies						
Course Content:	Introduction to apparel industry processes, Pre-production processes in apparel manufacture, Inspection, Packing and Dispatch, Introduction to marketing and merchandising.						
Module 1	Introduction to apparel industry processes	Visual journal, Presentations, Assignments	Discuss brainsto			11	periods

Introduction to Apparel production, Structures of apparel business, structure of the apparel industry, global apparel manufacturing, Apparel Manufacturing set-ups as per the Product specification. Sourcing- Introduction to fabric and accessory, sourcing and its types. Sampling department-importance of sampling department, objectives, types of samples- prototype, fit sample, pp sample, size set, production sample, shipment sample. Technical design reading, Tech pack analysis & objective, creating tech pack.

Module 2 Pre-production processes in apparel manufacture Visual journal Presentation Assignments	1 Discussions and 1
--	---------------------

Cutting department: Machineries, fabric spreading, pattern laying, marker preparation, sorting, numbering & bundling, fusing department- methods of fusing, fusing machines. Production department: selection of production system- progressive bundle system, unit production system, modular manufacturing, piece work. Production planning, Linear manufacturing process. Finishing & pressing department, trimming department, packing department.

Module 3 Inspection Packing Dispatch	'	Discussions and brainstorming	12 periods
--------------------------------------	---	-------------------------------	------------

Apparel accessories & components - fasteners, labels, support materials, decorative trims, tapes & packing materials. In process quality inspection, objectives methods, advantages, inspection methodology, final inspection, random inspection, general inspection method for shirts, trouser and kids garments. Introduction to export documentation, objectives, terminologies, principal documents, auxiliary documents, risk cover, insurance, ECGC, quality control and pre-shipment inspection, export credit, short, medium, long-term credit, packing credit, negotiation of bills, payment procedures in export trade.

Module 4	Introduction to marketing and merchandising	Visual journal, Presentations, Assignments	Discussions and brainstorming	10 Periods
----------	---	--	-------------------------------	------------

Introduction to Retail, Marketing, Management and Merchandising, terminologies. Fashion retailing-History, Scope, Importance, Types (Domestic and International), techniques, channel of distribution. Marketing – types, four P's, fashion promotion advantages, trade shows, exhibitions, fashion shows, market survey and research. Types of merchandising, concepts, merchandise planning, sampling-Importance, counter sample.

Targeted Application & Tools that can be used:

Fashion design and styling

Fashion accessories sourcing, product design and development

Historical research and contemporary analysis of fashion merchandising

Theme-based design and styling of fashion accessories

Preparation of n	nuslin for Dra	ping-Tearing	, blocking, pressing.				
Module 2	Showcasi ng Design Skills	Assignme nt Demonstr ation and Participati ve learning. Document ation	Examples/ Demo/Assignments	12 Hours			
Topics:	<u> </u>	1	1				
Marking, Truein	ng, Method of	draping of F	ront body, Method of draping of B	ack body.			
Module 3	Developin g Technical Proficienc y	Assignme nt Demonstr ation and Participati ve learning.	Examples/ Demo/Assignments	14 Hours			

	Document ation			
Topics:			<u>'</u>	
•	on—Bustling dart, Neck line tion of cowl in bodice.	edart, Insertion of pleats in	n bodice, Insertion of tucks	
Module 4	Incorporating Research and Inspiration and Presentation Skills	Assignment Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	14
Topics:				
Design collectio	n (Digital concept will all th	ne design boards and disp	olay)	

List of Practical Tasks:

1. Concept Development & Sketching and Illustration

Create mood boards and inspiration boards.

Conduct trend analysis and market research.

Produce hand-drawn fashion sketches.

Create digital fashion illustrations using software like Adobe Illustrator.

2. Technical Flats and Spec Sheets & Fabric and Textile Exploration

Draw technical flats of garments.

Develop spec sheets with detailed garment measurements and construction notes.

Create fabric swatches and texture boards.

Develop original textile designs or prints.

3. Color Story and Palette Creation & Collection Development

Develop a cohesive color palette for a collection.

Create color story boards to communicate the theme and mood of the collection.

Design a mini collection of 6-10 pieces.

Create lookbooks to present the collection.

4. Garment Construction Samples (Digital)

Produce sample garments or prototypes.

Document the construction process with photographs and notes

Targeted Application & Tools that can be used:

Identify the knowledge of the fundamental components of a professional fashion portfolio.

Understand the importance of a well-organized and visually appealing portfolio.

Apply structure of a garment/accessory design -- to support and expand the fashion design process.

Identify the display design concepts through sketches, illustrations, and technical drawings.

Apply and incorporate thorough research and trend analysis into design projects.

Topics relevant to "Skill Development":

Study of Understanding of elemets of portfolio and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through assessment component mentioned in course handout.

Course	Purpose:						
Description	The course provides fundar embroidery. Understanding basic and advanced hand s	of equipment's and tl	he technic	ques us		_	
	Abilities to be Develop:						
	The students get well equipped with the knowledge of developing stitches with a thorough understanding of the materials and substrates used in making the sewing threads and needles.						
	Nature of the Course:						
	It also helps the students to develop the creative skills along with technical inputs to develop different types of surface developments using stitching and sewing techniques.						puts to
Course Objective	The objective of the course is familiarize the learners with the concepts Basics of Needle Craft and attain Skill Development of student by using EXPERIENTIAL LEARNING Techniques.						
Course	On successful completion o	f the course the stude	ents shall	be able	to:		
Outcomes	Define the terminologies us	ed in Hand sewing ar	nd embroi	idery.			
	Identify different types of ga	rment hand stitches	and finish	es.			
	Apply various hand embroic	leries and stitches for	r surface (embellis	shmer	nt.	
	Research on various hand stitching techniques and methods for surface embellishment.						
Course Content:	Hand Stitches & Sewing ted Fundamentals,	chniques, Construction	on and Ma	anipulat	ion, F	abric	
		Practice	Observa	ations			_
Module 1	Embroidery Stitches with basics Stitches	Case study	Illustrati	ons	Ц	1. ours	4
]	pasics Suiches					ours	

Topics: Introduction to Hand stitches & embroidery application of temporary and permanent stitches. Embroidery of Running Stitches Like Kantha, kashida, Chambarumal, kasuti

	Construction and	Assignment	Observations Illustrations	40.11
Module 2	Manipulation of Stitches	Case Study	illustrations	16 Hours
	with Accessories	Documentation	Visual Journal	

Topics: Advanced Hand embroidery and smocking technique, Applique work and Mirror work. Phulkari Surastrian Embroideries like Labani, Kutch Kaathewar Sindhi

Module 3	Fabric Fundamentals and Appliques	Assignment Presentation	Group Activities Presentations	14 Hours
		Documentation	Explorations	

Topics: Types of Fabrics, Selection of Needle and thread according to fabric types. Fabric Preparation for cutting, Grain, Selvedge, Shrinkage, Straightening the fabric grains.

Applique works and their Catagories, Koudi making, Patch work, Drawn Thread work

List of Practical Tasks:

Project No. 1

Level 1: Explore 10 different Stitches with Iterations

Level 2: Explore 20 different Stitches with Iterations

Project No. 2:

Level 1: Study on 5 traditional textiles of the craft of India and Research on 2 Traditional craft.

Level 2: Study on 10 traditional textiles of the craft of India and Research on 4 Traditional craft.

Project No. 3:

Level 1: Development of 5- 6 Samples of Macramé, Knitting, Crochet, Drawn thread Work etc.

Project No. 4:

Using used old fabric and clothing to convert them into products and ensembles.

Targeted Application & Tools that can be used:

Students to develop the creative skills along with technical inputs to develop different types of surface developments using stitching and sewing techniques.

Hand sewing and embroidery tools and equipment.

Topics relevant to "Skill Development": Motif creation of Basic Hand Sewing and tools and handling accessories for beginners for Skill Development through Experiential Learning techniques. This is attained through assessment component mentioned in course handout.

Course Code.	Course Title: Professional Practice -I Type of Course: NTCC	L- T-P- C	0	0	0	8
Version No.	1.0					
Course Pre- requisites	Knowledge and Skills related to all the course	es studied in	prev	rious	semes	sters.

Anti-requisites	NIL
Course Description	During their 60-day internship, the student should maximize learning and contribution by immersing themselves fully in the company's culture and projects. They should begin with a thorough orientation to understand the organization's goals and values. Setting clear objectives with their supervisor and aligning them with personal development goals is crucial. Active participation in team activities, meetings, and training sessions helps them grasp the company's workflow and expectations.
	Early on, the student should focus on observation and learning from experienced colleagues. Asking questions, seeking feedback, and taking initiative in small tasks demonstrate their skills. As they gain confidence, they should engage more deeply in project work, ensuring to meet deadlines and exceed quality standards. Regularly reviewing progress with supervisors and adjusting goals as needed maximizes their impact.
	Networking with colleagues across departments and seeking mentorship opportunities broadens their understanding of the industry and career paths. Documenting achievements and lessons learned to update their portfolio is essential. Finally, reflecting on the internship experience helps them identify strengths and areas for growth. By embracing challenges with enthusiasm and professionalism, they not only contribute effectively but also lay a solid foundation for future career endeavors.
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through internship in companies and attain Employability Skills through Experiential Learning techniques.
	On successful completion of this course the students shall be able to:
Course Outcomes	 □ Remembering: The student recalls and describes the company's goals, values, and workflow from their orientation and ongoing activities. □ Understanding: They demonstrate understanding by explaining how their internship tasks contribute to the company's objectives and adapting to its culture. □ Applying: Through active participation and project work, they apply their knowledge and skills in design, software tools, and teamwork to real-world challenges. □ Analyzing:

	They analyze feedback from supervisors and colleagues to improve their work quality and efficiency, adjusting their approach as needed.						
	□ Evaluating:						
	The student evaluates their own performance and contributions, reflecting on achievements, challenges, and areas for growth during the internship.						
	□ Creating:						
	By documenting their achievements and updating their portfolio, they create a comprehensive record of their internship experience and design accomplishments.

Anti-requisites	NIL						
Course Description	For their graduation project in Design, students should choose a topic that aligns with their interests and career goals. Begin with a well-defined proposal and timeline, ensuring the project is feasible within the given resources and timeframe. Conduct thorough research, including a literature review and market/user analysis, to ground the project in current trends and needs. Develop concepts, create prototypes, and iterate based on feedback from mentors and peers. Schedule regular check-ins with mentors for guidance and engage in peer reviews for diverse perspectives. Compile the project into a professional portfolio, documenting the process and final outcomes. Write a detailed thesis report and prepare a compelling final presentation to showcase your work. Reflect on the learning experience, assessing strengths and areas for improvement, and consider future developments or opportunities for further						

	research or publication. This structured approach ensures a comprehensive and impactful graduation project.
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through portfolio making and attain Employability Skills through Experiential Learning techniques.
	On successful completion of this course the students shall be able to:
	□ Remembering: The student recalls and describes the company's goals, values, and workflow
	from their orientation and ongoing activities.
	□ Understanding:

- 1) CA 1: Visual document and presentation related to Module 1
- 2) CA 2: Visual document and presentation related to Module 3
- 3) Mid-Term: Visual document and presentation related to Module 1 & 2

Targeted Application & Tools that can be used:

- 1. Wet processing, dyeing and printing activities.
- 2. Machineries & equipment's used for wet processing
- 3. Temporary & permanent finishes, various solvents used for different methods.

Topics relevant to "EMPLOYABILITY": Methods of dyeing, Tie and dye of cotton or silk fabric using reactive colors. Batik printing of cotton and silk fabric for **Employability** through **Experiential Learning** techniques. This is attained through assessment component mentioned in course handout.

Semester-1

Course Code DES1007		L-T-P- C	2	0	4	4	
Version No.	2.0						
Course Pre- requisites	Basic Drawing skills						
Anti-requisites	NIL						
	A firm understanding of design fundan design. To be a successful designer th Elements and Principles of design and communicate a message to their audi	ne stude d apply	ent mu	st comp	rehend t	the	
		Understanding of design fundamentals, principles and guidelines that students can learn & use to interpret their design solving ideas.					
Course Description	Recognition, Study and analysis of Elements and Principles of Design. Develop skills to organize these elements and principles of design and apply into their design practice.						
	Realization & application of the elements and principles of design.						
	The conceptual and visual nature of the course enables the students to develop a concrete portfolio based on the understanding of Principles in design.						
Course Objective	The objective of the course is to familiarize the learners with the concepts of Elements and Principles of Design and attain Skill Development through Experiential Learning techniques.						
	On successful completion of the cours	se the s	tudent	s shall b	e able t	0:	
Course	Define the basic terminology of Elements and Principles of design.						
Outcomes	Classify the design principles to manage simple project of multidisciplinary nature.						
	Generate ideas by using elements and	Generate ideas by using elements and Principles of Design.					
Course	Module1: Introduction to Elements Of	Design	l.				
Content:	Module2: Introduction To Principles of	Desigr	1				

		Module3	: Color Theory and Colo	r Scher	mes.		
Module 1		Introduction to Elements Of Design.	Assignment Case study Documentation	Illustrations		20 Classes	
	Definition Applica	pics roduction and overview of Elements of Design. efinition and Content: Dot, Line, Shape, Form, Colour, Texture. Theoretical and Practical oplication. esservations and discussions on Good Compositions.					
Module	dule 2 Introduction To Principles of Design Assignment Presentation Illustrations Visual Journal				20 Classes		
	Rhythm Types o Unity: F	cs: duction and overview of Principles of Design: Emphasis, Balance, Unity, Hierarchy, thm, Proportion. es of Balance: Symmetrical, Asymmetrical and Radial. y: Proximity, Repetition, Alignment, Variety. ly on good compositional design ideas by using Elements of Design.					
Module	÷ 3	Color Theory and Color Schemes.	Assignment Case Study Documentation		Explorations Presentations Visual Journal	20 Classes	
	Topics: Introduction to Colour and Properties of Colour: Hue, Value and Chroma/Intensity. Colour Wheel: Primary, Secondary and Tertiary Colours. Cool colours and warm Colours. Colour Schemes: Complementary, Monochromatic, Analogous, Neutrals, Pastels. Tints and shades. Psychological effects of Colours. Additive and subtractive colour theories/light and pigment theories – features and application List of Practical Tasks: Task 1: Depiction of elements and principles of design.						

Level 1: Develop a composition by using various lines and depict Emphasis.

Level 2: Illustrate two different objects by using one light source and shadow effect.

Task 2: Illustration and Representation of geometrical and natural shapes.

Level 1: Cut paper Collage: By using geometrical shapes depict all 4 types of Balance.

Level 2: Take Inspirations from the nature and illustrate a composition using alignment.

Task 3: Practice on color mediums and mixed media.

Level 1: Illustrate buildings and still objects using mixed media.

Level 2: Develop a Colour wheel and depict primary, secondary and tertiary colours

Task 4: Representation of colors and textures.

Level 1: Color Schemes and Tints, Tones and shades by using Poster colors.

Level 2: Creation of various textures by using natural and artificial materials.

Task 5: Depiction of Elements and Principles of Design

Level 1: Create a portrait using monochromatic scheme/Achromatic scheme using poster colors.

Level 2: Develop a composition by using Proportion and scale.

Task 6: Idea generation

Level 1: illusion composition by using polychromatic color scheme.

Level 2: Explore new ideas inspired by nature and various material objects transform into another object.

Targeted Application & Tools that can be used:

Abode Illustrator Draw: Practicing and Creation of digital drawings and composition.

Pencil Sketch App: Illustrating and rendering sketches and drawings.

Pics art App: Creation and Rendering of Composition and sketches.

Anti- requisit es	NA						
Course Descri ption	through drawing. By exploring the observational drawing, composition, and the use of various drawing media, the course aims to equip students with a deeper sense to translate their observations and ideas into compelling drawings.						
Course Objecti ve	· '						
	On successful con	npletion of the cours	se, the students shall be able to:				
	Theory outcomes:						
Course Outco	Identify and descri	ibe basic drawing to	ols, materials, and techniques.				
mes	Practical outcome	s:					
	Interpret the impor	rtance of observatio	nal drawing in visual representation	n.			
	Apply various drav	wing techniques to a	accurately depict objects, spaces, a	and textures.			
Course Conten t:							
Module 1	Introduction to Drawing and Materials	Visual documentation, assignments, presentations-visual journal, sketches	Classroom discussions and presentations, visual sketches presentation.	15 Periods			
Topics:							
Overviev various f	_	iscipline- History an	d evolution of drawing, importance	of drawing in			
Understa	anding one-point, tw	o-point, and three-ہر	point perspective for creating spatia	al illusion.			
Module 2	I presentations visual sketches 1.15 periods 1						
Topics:	Topics:						
The role of observation in drawing accuracy.							
Techniqu	ies to enhance obse	ervational skills.					
Methods for measuring and scaling objects.							

Understa	Understanding relationships between parts and whole.						
Module 3	Composition and Design	Visual documentation, assignments, presentations-visual journal, sketches	Classroom discussions and presentations, visual sketches presentation.	15 periods			

Principles of Composition- Balance, symmetry, and asymmetry.

Rule of thirds, golden ratio, and other compositional guides.

Techniques for overlapping, scaling, and layering.

Module 4	Experi mentin g with Media and Styles	Visual documentation, assignments, presentations-visual journal, sketches	Classroom discussions and presentations, visual sketches presentation.	15 periods
-------------	--	---	--	------------

Topics:

Mixed Media Drawing- Combining different drawing and painting materials.

Studying various art movements and their drawing styles.

Exploring textures and effects through mixed media.

List of Projects:

Visual document project on "Concept Development".

Visual document project on "Translating ideas into a cohesive visual plan".

Targeted Applications & Tools that can be used:

Research projects on Conceptboard.

Research projects on Grid Overlay Tools

Topics:	I	1	1	<u> </u>	

Introduction to- one point, two point and three-point perspective, Arial and linear perspective, Color- Theory: Hue, Intensity. Primary, Secondary and Tertiary Colors. Cool and warm colored composition

List of Practical Tasks:

Project No. 1 Create different tonal value sheets to reflect the understanding of pencils, color pencils, water color, poster color and variety of brushes.

Level 1:

Level 2:

Project No. 2: Draw the 2D shapes using construction techniques to learn about the Basic tools and medium used in technical drawing.

Level 1: Create interesting objects based on the construction of basic 2D shapes and their properties using various materials.

Project No. 3:

Level 1: To draw the isometric grid and practice 3D shapes creatively on the same using Pencils, graphite, Watercolors

Project No. 4:

Draw composition of 3D basic geometrical shapes in space using one-point perspective on paper and create rendered composition using Pencils and graphite.

Project No. 5:

Draw composition of 3D basic geometrical shapes in space using two point perspectives on paper and create rendered composition using pencils and graphite

Targeted Application & Tools that can be used:

Understanding the nature of drawing and its various application in design practice.

Tools used will be the Pencils, Graphite, Various eraser like Mono-Zero, Charcoal, Various drawing Paper like Canson, Fabriano, Ivory- 120GSM, 200GSM, 280 GSM, 300GSM etc, Watercolors and multi-colored pencil etc.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final Product which includes all or most of the art work which was taught in the Modules.

Topics relevant to "Development of Skill": Study of various objects by using different Techniques of drawing and sketching.

Some Topics from the Modules has to be shown under outdoor based practice or different interactive based activities.

Course Descrip			The use of digital tools in design has become essential, as they enhance creativity, efficiency, and teamwork. Depending on their unique requirements and the nature of the work, designers and Practitioner frequently combine various tools. Because technology and design are always interconnected, new tools are constantly being introduced, therefore it's important for students and professionals to produce more appealing works by using various digital tools.						
Course Objecti			the con	The objective of the course is to familiarize the learners with the concepts of Design Appreciation and attain Skill Development through Experiential Learning techniques.					
Course Outcom			On successful completion of the course the students shall be able to: Define the importance of various digital tools and effectiveness in digital production. Illustrate different digital tools and techniques for executing design concept. Demonstrate different ideas to create various digital composition.						
Course Conten									
Module	: 1	Introduction to digital tools and techniques		Assig nment & Docu menta tion		Report writing, Practical illustration & Visual Journal			
Topics: Basics of Photoshop tools and techniques, Digital Sketching and Drawing, image editing, vector graphics, and Basics of layout design.

Course Description	This course introduces students to the foundational principles of concept development in design. Students will learn how to generate, refine, and communicate design ideas effectively. Emphasizing creative thinking and problem-solving, the course covers techniques for brainstorming, sketching, and creating mood boards. Students will explore various methods for researching and analyzing design trends, user needs, and market demands. By the end of the course, students will be equipped with the skills to develop cohesive and innovative design concepts, ready for further refinement and implementation in advanced design projects.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Concept Development and attain Employability through EXPERIENTIAL LEARNING techniques					

Course	Upon successful completion of the course, students will be able to:		
Outcomes	Generate and brainstorm innovative design ideas using various creative thinking techniques.		
	Refine design concepts through iterative processes, including sketching and creating mood boards.		
	Communicate design ideas effectively using visual and verbal presentation skills.		
	Research and analyze design trends, user needs, and market demands to inform concept development.		
	Develop cohesive and innovative design concepts ready for further refinement and implementation in advanced projects.

Course Content:											
Module 1	Introduction to Career Orientation, Self- Assessment and Personal Development, Skill Development for Career Success, Professional Networking, Career Advancement and Development, Exploring design disciplines, Building a design skillset	Presentations	Classroom discussions, demos and presentations	15 Periods							

Overview and Importance of Career Planning.

Personality and Career Assessments

Values and Interests

Professional Skills

Technical Skills

Soft Skills

Building a Network

Networking Events and Strategies

Leveraging Social Media

Career Progression

Continuing Education and Certifications

Faculty talk (of different streams) and student query clarification.

Identifying essential skills for each design discipline

Resources for skill development(workshops, online courses, software training)

List of Projects:

Visual presentation project on "three potential career paths of interest, detailing job roles, required skills, salary expectations, and future outlook".

Visual presentation project on "a plan to build and expand your professional network, including attending events, reaching out to contacts, and leveraging social media".

Targeted Applications & Tools that can be used:

Self-Assessment and Personal Development

Career Exploration

Skill Development

Text Book

Design Careers: How to Get Your Foot in the Door" by Debbie Millman (Provides an overview of design professions and offers practical advice for landing your first design job).

"Thinking with Type: A Critical Guide for Designers, Writers, Editors, & Everyone Else Who Loves Language" by Ellen Lupton (Explores the fundamental principles of typography, applicable to various design disciplines).

"This Is Design Thinking: How to Use Design Thinking to Solve Problems" by Hasso Plattner, Karl Ulrich Zeithaml, and Patrick Heidrich (Introduces the design thinking methodology, a valuable tool for tackling complex design challenges).

Discipline-specific books: Consider including introductory books relevant to the B.Des. disciplines covered in the course (e.g., "Graphic Design School" by David Dabner for graphic design).

	Course Title: Drawing For Designers									
Course Code: DES2082	Type of Course: 1] School Core	L-T- P-C	0	0	8	4				
	2] Practical Integrated									
Version No.	1.2									
Course Pre- requisites	NIL									
Anti-requisites	NIL									
Course Description	Drawing for Designers is the systematic study of individual aspects of Design, tools and techniques. it's important to consider the different traditional skills like drawing, sketching and other practical tools, depending on the specific needs of the project to create an appealing approach in Design process. The subject will provide different understanding on design process and students are able to gain various manual tools and techniques based on different interactive and conceptual design projects.									
Course Objective	The objective of the course is to familiarize the learners with the concepts of Ideation And Observation and attain Skill Development through Experiential Learning techniques.									
Course Outcomes	On successful completion of the course the students shall be able to: Introduce the importance of Drawing for designers Demonstrate various methods of drawings and sketching Interpret the impact of the drawing based design structure within the society product. Discuss the final outcome and effectiveness of the work									
Course Content:	Module 1: Drawing for Visual Thinking									

	Module 2 Identification of Module 3 Importance of its features.	J	· ·	•
Module 1	Drawing for Visual Thinking	Observation report	Illustrations/ photographs Visual Journal	30 Hours

How do we see? - To discuss the basic process of seeing. Act of perception

Visual Queries: Understanding of Maps, Charts, Diagrams and other graphical designs. Discussions with suitable examples.

What We Can Easily See: To study the Visual pop up of shapes, forms, arrangements, colours and other visual elements in different contexts and backgrounds.

Module 2 Identification of in order to crea various drawing	ng Documentation	Info-graphical development Visual Journal	35 Hours
---	------------------	---	-------------

Topics:

Recognition of basic designs around us natural or manmade. Identification of texture colour size and other physical attributes of the design.

Recognition of social importance of the given Design Structure. Review the impact of the physical design structure in the society.

Generating ideas and solutions through sessions such as Sketching, Prototyping, Brainstorming,

Module 3	Importance of drawing techniques in Reproduction of Design and its features.	Documentation	Info-graphical development Visual Journal	35 Hours

Topics:

Introduction to Basics sketching for Design Thinking

Drawings for Design Ideations

Important of the drawing for Conceptualising design starting from Worst Possible Ideas and Improving to the State to acceptance in the Society

5List of Practical Tasks:

Project No. 1: Recognition and Observation In Drawing for Designer

Level 1: Recognizing the Characters of the Design and Documenting the same through Phrases and Words and Photographs

Level 2: Identification of the Characteristics and copying through Sketching the same with Perspective

Level 3: Transcending the Design to other styles of Sketches, experimenting with different colour medium

Project No. 2:

Level 1: Exploring the stages in a given Design Structure

Level 2: Exploded View of the given Design or an object

Level 3: Improvisation on the design for personalization.

Project No. 3:

Level 1: Analyzing the design Structure through its character Study.

Level 2: Applying the Empathy mapping for the design where ever needed and improvising the idea.

Level 3: Development of new Parameters to create Improvised designs and exploring the designs.

Targeted Application & Tools that can be used:

Manual tools of Sketching and drawings to explore the visual thinking

Laying the base for Portfolio Creation by using various drawing techniques.

Tools in the Subjects will be reading Drawings materials with technical approach.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules, co-relating the insights comprising of planning, strategy, creative inputs, contents by understanding the big picture and translate ideas and design concepts across all levels. Consequentially creating innovative and interactive platforms for using Design across multiple platforms, overseeing design thought process, strategy planning, research, consultation with given clients. The project shall be approved first by the course instructor before further processes are developed.

Course Content:				
Module 1	Introduction to Foundations of Design	Visual documentation, assignments, presentations-visual journal	Classroom discussions and presentations	15 Periods
Topics:	•	•	•	•

iopics:

Understanding the meaning of Design- from its functional aspects to its artistic and cultural significance.

Understanding the scope and significance of design history.

Prehistoric and marvel creativity- cave paintings, design innovations in Greece and Rome.

Module 2	The Evolution of Design Through the Ages	Visual documentation, assignments, presentations-visual journal	Classroom discussions and presentations	15 periods
----------	---	---	---	------------

Topics:

Medieval & Gothic Design: the rise of religious architecture (cathedrals, monasteries) and the use of light, color, and symbolism in medieval design.

The Industrial Revolution and Design: Mass production, standardization, and the rise of consumer goods.

Victorian Eclecticism: Mixing historical styles in architecture, interiors, and fashion.

Factors influencing technological advancements- innovations in materials and processes.

Module 3	Global perspective & appreciation in design	Visual documentation, assignments, presentations-visual journal	Classroom discussions and presentations	15 periods
----------	--	---	---	------------

Topics:

Indigenous and Traditional Designs: Exploration of Native American, African, and Oceanic design traditions.

Cross-Cultural Influences: The blending of global aesthetics in modern design.

How does the design reflect the time period and cultural values?

Social and Political Impact: Does the design have a broader message or influence on society?

List of Projects:

Visual document project on "specific design movements".

Visual document project on "the impact of design on society"

Visual document project on "reinterpret historical design concepts for contemporary use".

Targeted Applications & Tools that can be used:

Research projects on specific design influential figures.

Creative designing of contemporarised products.

Design interpretation and documentation of historic collections.

-----------------------------------	-------------------	---	----------

Topics:

Exploration of Different Techniques of design work as Visual Language.

Case study of the Designers and Their Designs who have Experimented on the same.

Module 4	Analysis of Visual	Assignm ent Documen	Working on design principles, Visual Journal	15 Hours
Module 4	Design Concepts	tation Hands on Practice	Development of exercises	13 Hours

Topics:

Visual Principles exercises with hands on exercise.

Analysis of Visual Concepts of Creating the concept development assignment work Etc.

Tessellations and their variations in visual design.

List of Practical Tasks:

Project No. 1

Explore the design principles from nature with taking photograph.

Project No. 2

Explore the design principles from nature with taking photograph.

Project No. 3

Explore the design principles from nature with taking photograph.

Project No. 4

Explore and experimentation of different design principles.

Project No. 5

Explore and experimentation of different design principles.

Project No. 6

Explore and experimentation of different design principles.

Project No. 7

Explore and experimentation of different design principles.

Project No. 8

Study on 10 different stylization of work and create the exercise with similar way using one of the design principle.

Project No. 9

Study on 10 different stylization of work and create the exercise with similar way using one of the design principle.

Project No. 10

Study on 10 different stylization of work and create the exercise with similar way using one of the design principle.

Project No. 11

Study on 10 different stylizations of work and create the exercise in a similar way using one of the design principles.

Project No. 12

Development of 5-6 Samples of different type design projects using design principles.

Project No. 13

Development of 5- 6 Samples of different type design projects using design principles.

Project No. 14

Development of 5- 6 Samples of different type design projects using design principles.

Project No. 15

Development of 5- 6 Samples of different type design projects using design principles.

Project No. 16

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 17

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 18

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 19

Understanding of Visual Language with creating the different types of assignments using design principles.

Project No. 20

Analysis of Visual Design Concepts and implementation of exercises.

Project No. 21

Analysis of Visual Design Concepts and implementation of exercises.

Project No. 22

Using design principles, students have to make one final portfolio for the submission.

Project No. 23

Using design principles, students have to make one final portfolio for the submission.

Project No. 24

Using design principles, students has to make one final portfolio for the submission.

Targeted Application & Tools that can be used:

Understanding the use of principle of design in the project work which should be acceptable by the industry professionals.

Tools will be used, different software like: Photoshop and Adobe Illustrator to get the final output and paper, color and brushes to be used to make the sample works.

Topics relevant to "Skill Development": Study of Understanding of Visual Language and list of practical tasks for Skill Development through Experiential learning techniques. This is attained through the Studio project task component mentioned in the course handout.

Anti- requisites	NIL					

Course	Purpose:					
Descripti on			nporary typography, focusing on its role in on market demands.	digital and		
	Abilities to b	e Developed:				
	Students will master type selection, layout design, and typographic hierarchy to create visually compelling and effective communication.					
Course	e The objective of the course is the SKILL DEVELOPMENT of students by using					
Objective						
Course	On success	ful completion of	the course the students shall be able to:			
Outcome s	Identify and define the influence of typography on visual perception.					
	Practical component:					
	Analyze the techniques of different types of stylizations in Typography design with hands-on exercise.					
	Apply the various type forms and their derivatives and reconstruct them.					
	Review variations in grid structures to create various type forms through explorative research work.					
		aphy - Basics an ype forms,Anato	nd applications,Grid Structure and Type Fomy of Grid.	orm		
		Assignment				
Module 1	Typograph y - Basics and application s	Demonstratio n and Participative learning. Documentatio n	Observation & discussion & Visual Journal	15 Hours		
Topics:						
Understand	ding the funda	amentals of letter	rform.			
Principle o	Principle of communicating with letterform and the stylization.					
Module 2	Grid Structure Assignment Observation & discussion &					

Different types of features in Type forms.

Using Typography in different context – Books, Posters/Signage

Module 3	3D Features of type forms	Assignments & presentation	Observation & discussion & Visual Journal	20 Hours
----------	------------------------------------	----------------------------------	---	----------

Topics:

Typography in different context -Motion Graphics

Anatomy of Grid with letterform.

Module 4	Anatomy of Grid	Assignments & presentation	Observation & discussion & Visual Journal	20 Hours
----------	--------------------	----------------------------	---	----------

Topics:

Understanding Types of Grids

Experimentation of Font Designing

List of Practical Tasks:

Project No. 1

Typography - Basics and applications (Presentation)

Letterform and the stylization in typography design (Presentation)

Project No. 2:

Different types of features in Type forms. (Presentation)

Using Typography in different context – Book cover, Posters/Signage design with hands on exercise. (Presentation)

Project No. 3:

Use of Typography in different context -Motion Graphics (Presentation)

Anatomy of Grid with letterform with hands on exercise.

Project No. 4:

The different Types of Grids with hands on exercise.

Experimentation of Font Designing with hands on exercise.

Targeted Application & Tools that can be used:

Adobe InDesign: Best for designing print layouts, editorial content, and sophisticated text compositions.

Type kit (Adobe Fonts): Provides access to a vast library of fonts that can be integrated into design projects.

Glyphs or Font Forge: Tools for creating custom fonts and modifying existing typefaces.

Google Fonts: A free resource for web-friendly fonts that can be used across various digital platforms.

Topics relevant to "Development of Skill": Study of Typography for Skill Development through Experiential learning techniques. This is attained through the Studio Project tasks mentioned in the course handout.

Version No.	1.0							
Course Pre- requisites	Storytelling and nar	rative						
Anti-requisites	NIL							
Course	Purpose:							
Description	_	The objective of the course is to learn, appreciate and understand storytelling as part of the communication design.						
	Abilities to be devel	oped:						
		The course equips the students to understand storytelling and narrative techniques and associate the concepts to live cases.						
	Nature of the course	e:						
	It will enable the students to undertake story telling based approach as one of the options to create a cohesive communication strategy.							
Course								
Objective	The objective of the course is the SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.							
Course	On successful comp	oletion of the course the	e student	s shall b	e al	ole t	o:	
Outcomes	Identify storytelling	models.						
	Associate narrative medium.	styles and theories to	different t	ype of co	omn	nuni	icatio	n
	Use the storytelling alternatives.	technique for creating	pragmatio	c commi	unica	atio	n app	roach
	Practical componen	t:						
	Analyse and unders in storytelling with h	stand the different types ands on exercise.	s of styliza	ation in s	story	/boa	ard d	esign
Course Content:	ı							
		Assignment						
Module 1	Fundamentals of Storytelling and Narrative	Demonstration and Participative learning.	Observa discuss				5 H	Hours
		Documentation	Visual J	lournal				
Topics:	l		l					
Introduction to St	Introduction to Storytelling and Narrative structure.							

Fundamentals of Storytelling and Narratives structures.							
Module 2	Linear and Non- Linear Storytelling	Assignment Documentation	Observation & discussion & Visual Journal	5 Hours			

Understanding of Linear and Non-Linear Storytelling.

Story boarding and Narrative approaches with different camera angles.

Module 3	Application of Narratives and Storytelling for Causes and Brands	Assignments & presentation	Observation & discussion & Visual Journal	10 Hours
----------	--	----------------------------	---	----------

Topics:

Study of Storytelling and narratives approaches to different mediums.

Study of script and character behavior approaches to the story.

Module 4	Study of Storytelling and narratives approaches to different mediums	Assignments & presentation	Observation & discussion & Visual Journal	10 Hours
----------	--	----------------------------	---	----------

Topics:

Study of Storytelling and narratives approaches to different mediums for brands and causes.

List of Practical Tasks:

Project No. 1

Level 1: Storytelling and Narrative with different camera angles (Presentation)

Level 2: Storytelling and Narrative with the importance of character (Presentation)

Project No. 2:

Level 1: Different types of features in linear and non-linear story (Presentation)

Level 2: Using the design story of Book cover, Posters/Signage design etc. (Presentation)

Project No. 3:

Level 1: Use of context and the narrative approach to the brands (Presentation)

Level 2: Use of context and the narrative approach to the brands (Presentation)

Project No. 4:

Level 1: Narratives approaches to different mediums for brands and its causes. (Presentation)

Level 2: Comparative study of narrative approach to brand designing. (Presentation)

Targeted Application & Tools that can be used:

Understanding the chronology of Arts from a historical perspective

Tools will be used to sketch, draw and presentation to understand the Art & Design History

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final Product which includes all which was taught in the Modules for their submission.

Topics relevant to "Skill Development": Study of Typography for Skill Development through Experiential learning techniques. This is attained through the Studio Project tasks mentioned in the course handout.

Anti-requisites	NA	NA						
Course Description	This course offers an essential introduction to Adobe Photoshop and Illustrator, focusing not only on mastering basic tools like the pen, brush, and blending options but also on fostering design creativity. Students will learn to create vector illustrations and explore various visual design aspects, ultimately enhancing their ability to conceptualize and implement innovative digital designs effectively.							
Course Objective	The objective of the course is EMPLOYABILITY of student by using EXPERIENTIAL LEARNING Techniques.							
Course Outcomes	On successful completion of the course, the students shall be able to: Understand essential tools in Adobe Photoshop and Illustrator, including the pen, brush, and blending options. Apply creative design skills, to various digital projects. Implement advanced visual design concepts.							
Course Content:		duces Adobe Photosho ector illustration, and c	•			•		
Module 1	Introduction to Digital Design Tools	Visual documentation	Case studie classroom discussions presentation	and	I	15 Period	ds	
Topics:	1	<u> </u>						
Understanding the interface and basic functionalities of Photoshop and Illustrator.								

Exploring essential tools such as the pen tool, brush tool, and blending options.								
Hands-on practice sessions to familiarize students with basic tool operations.								
Module 2	Advanced Techniques in Digital Design	Visual documentation	Case studies, classroom discussions and presentations	15 periods				

Advanced tools and features in Photoshop and Illustrator for more complex designs.

Techniques for creating and manipulating vector illustrations effectively.

Integration of typography, color theory, and composition in digital designs.

Module 3	Digital Design Projects and Applications	Visual documentation	Case studies, classroom discussions and presentations	15 periods
----------	--	-------------------------	--	------------

Topics:

Designing logos, posters, and digital illustrations using Photoshop and Illustrator.

Conceptualizing and executing digital design projects from start to finish.

Incorporating feedback and iterative design processes.

List of Projects:

Practical exercises: Create a simple digital artwork combining basic shapes and applying various tools.

Design project: Create a visually appealing digital poster or advertisement using advanced tools and techniques learned.

Portfolio review: Present a collection of digital designs demonstrating proficiency in using advanced features and concepts.

Discuss insights gained about professional practices and future career aspirations in digital design.

Targeted Applications & Tools that can be used:

Adobe Illustrator: For creating logos, icons, and vector graphics that form the core of visual brand identity.

Adobe Photoshop: Useful for editing and manipulating images, creating graphics, and refining visual elements of brand communication.

Canva: A user-friendly tool for designing social media graphics, presentations, and marketing materials, suitable for smaller-scale projects and beginners.

Text Book

"Adobe Photoshop Classroom in a Book" by Adobe Creative Team - This series provides comprehensive lessons and exercises for learning Photoshop from beginner to advanced levels.

"Adobe Illustrator Classroom in a Book" by Adobe Creative Team - Similar to the Photoshop version, this book offers structured lessons and projects to master Illustrator.

"The Adobe Illustrator WOW! Book" by Sharon Steuer - This book focuses on creative techniques and advanced tips for using Adobe Illustrator effectively.

"Photoshop for Dummies" by Barbara Obermeier and Ted Padova - A beginner-friendly guide covering essential tools and techniques in Photoshop.

"Vector Basic Training: A Systematic Creative Process for Building Precision Vector Artwork" by Von Glitschka - This book emphasizes creating vector illustrations and artwork using Illustrator.

"The Non-Designer's Design Book" by Robin Williams - While not specific to Adobe tools, this book provides foundational principles of design that apply to digital tools as well

Course Pre- requisites	Design Research Methods
Anti- requisites	NIL
Course Descripti on	The objective of this course is
	Understand research in the context of design methods and thinking.
	Will provide opportunities in the product and service industries through application of user and trend research.
	Develop ability in taking informed design decisions through research. Design research will also help to gain insight and empathy of the stakeholders.
Course Objective	The objective of the course is to familiarize the learners with the concepts of DESIGN RESEARCH and attain Skill Development through Experiential Learning techniques.
Course Outcome s	On successful completion of the course the students shall be able to:
3	Grasp design research fundamentals: Understand the role of research in design practice, navigate design discourse, and analyze research methods used in design.
	Formulate research questions: Critically identify design problems and translate them into focused research questions.
	Apply research methods: Select and implement appropriate research methodologies (surveys, interviews, etc.) for design projects.
	Analyze and interpret data: Critically analyze research findings and draw insightful conclusions.
	Design research projects: Develop a well-defined design research project proposal using acquired knowledge and methods.
	Communicate research effectively: Document and present design research processes and findings in a clear and compelling way.
Course Co	ontent:

Design research course delves into understanding user needs, research methods, and data analysis to inform design decisions.

Knowledge - Understanding the need of Design research as a specialized area of knowledge and application.

Skill - To be able to contextualize the design problem and employ the appropriate research tools.

Synthesis - To be able to decode and analyses information to produce useful insights for design.

Module 1	Definition of Research , Need for research Types of research , ROL	Assignm ent Documen tation	Observation & discussion Visual Journal , Lecture, seminars	18 Hours

	Program Core						
Version No.	1.0	L		ı			
Course pre- requisites	NA						
Anti-requisites	NA						
Course Description	This introductory photography course provides essential skills for beginners, covering camera basics, exposure fundamentals, composition techniques, and lighting principles. Students will learn to capture compelling images through hands-on practice and interactive lessons. Emphasis is placed on understanding camera functions, achieving proper exposure, and developing an eye for effective composition, preparing participants to confidently explore the art and technicalities of photography.						
Course Objective	The objective of the course is to SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.						
	On successful completion of the co	ourse, the stu	idents	shall	be able	e to:	
	Understand and operate camera settings effectively.						
Course Outcomes	Apply correct exposure in various lighting conditions.						
Implement light to enhance mood and clarity in photos				S.			
Course Content:	This course covers essential photography skills, including camera functions, exposure techniques, composition principles, and lighting fundamentals.						

Module 1	Camera Basics and Exposure Fundamentals	Visual documentation	Case studies, classroom discussions and presentations	15 Periods
----------	---	-------------------------	--	---------------

Camera types and functionalities.

Understanding exposure: aperture, shutter speed, and ISO.

Techniques for achieving proper exposure in different lighting conditions.

Practical exercises: Hands-on sessions to practice camera settings and exposure control.

Module 2	Composition Techniques and Visual Design	Visual documentation	Case studies, classroom discussions and presentations	15 periods
----------	--	-------------------------	--	------------

Topics:

Composition rules and guidelines: rule of thirds, leading lines, framing, etc.

Understanding visual balance and harmony in photography.

Creative approaches to framing and perspective.

Practical application: Hands-on exercises to apply composition techniques in photography projects.

Module 3	Lighting Principles and Advanced Techniques	Visual documentation	Case studies, classroom discussions and presentations	15 periods
----------	---	-------------------------	--	------------

Topics:

Types of natural and artificial light sources and their effects.

Techniques for using light modifiers and reflectors.

Strategies for indoor and outdoor lighting setups.

Advanced shooting techniques: low light photography, backlighting, etc.

List of Projects:

Capture a series of images demonstrating correct exposure techniques learned in class.

Present a collection of photographs demonstrating the effective use of composition techniques.

Design and execute a photo shoot focusing on controlled lighting techniques.

Create a thematic portfolio showcasing mastery of camera skills, composition, and lighting principles.

Targeted Applications & Tools that can be used:

Digital Single-Lens Reflex (DSLR) Cameras: Learn camera basics, exposure controls, and manual settings to capture high-quality images.

Smartphone Photography: Explore the capabilities of smartphone cameras for everyday photography, emphasizing composition and lighting techniques applicable to mobile devices.

Photo Editing Software: Introduce basic photo editing tools like Adobe Lightroom or Adobe Photoshop to enhance and refine captured images post-production.

Online Portfolios and Social Media Platforms: Utilize platforms like Instagram or Behance to share and receive feedback on photographic work, fostering community engagement and portfolio development.

Text Book

"Understanding Exposure" by Bryan Peterson - A comprehensive guide to mastering the concepts of exposure, essential for capturing well-exposed photographs.

"The Photographer's Eye: Composition and Design for Better Digital Photos" by Michael Freeman - Focuses on composition techniques and visual design principles to enhance photographic storytelling.

"Digital Photography Complete Course: Learn Everything You Need to Know in 20 Weeks" by David Taylor - A structured course covering all aspects of digital photography from camera basics to advanced techniques.

"Read This If You Want to Take Great Photographs" by Henry Carroll - Provides practical tips and insights into creating impactful photographs, suitable for beginners.

"The Art of Photography: An Approach to Personal Expression" by Bruce Barnbaum - Explores the artistic and creative aspects of photography, encouraging personal expression and style development.

Course Code:	Course Title: Al for Design Innovation	L-T- P- C	3	0			
DES2139	Type of Course: OE				0	3	
Version No.	1.0						
Course Prerequisites	NA						
Anti- requisites	NA						
Course Description	This course explores the intersection of Artificial Intelligence (AI) and design thinking, equipping students with the skills to leverage AI for innovative design solutions. Through a combination of theoretical understanding and practical application, students will gain insights into how AI can enhance creativity, user experience, and problem-solving in various design disciplines.						
Course Objective	The objective of the course is to familiarize the learners with the concepts of AI through Entrepreneurship DEVELOPMENT of students by using Participative LEARNING Techniques.						
Course Out Comes	On successful completion of the course the students shall be able to: Understand the fundamentals of AI and its potential applications in design.						
	Critically evaluate the ethical considerations of using AI in design. Apply AI tools and techniques to design research, ideation, and prototyping.						

	Develop design solutions that leverage AI to address user needs and societal challenges relevant to the Indian context.					
Course Content:	Introduction to AI for Design, Design Thinking with AI					
Module 1	Introduction to Al for Design	Term paper/Assignment/C ase Study	Applying AI to a specific design challenge	15 Hours		

Understanding AI: This module introduces core AI concepts (machine learning, deep learning, natural language processing) and their relevance to the design field.

Al in Design Landscape: Students explore existing applications of Al in various design disciplines (product design, graphic design, fashion design, etc.) with a focus on Indian design trends.

Guest Lecture: Invite a design professional who uses Al in their work to share their experience and insights.

Module 2	Design Thinking with Al	Term paper/Assignment/C ase Study	Applying AI to a specific design challenge	15 Hours

Topics:

Al-powered User Research: This module explores how Al tools can be used for user research tasks such as data analysis, sentiment analysis, and user behavior prediction.

Al for Design Ideation: Students learn about Al-powered brainstorming techniques, generative design tools, and how to leverage AI to explore innovative design solutions.

Case Studies: Analyze successful design projects that have integrated AI in their process, focusing on Indian companies or startups.

Workshop: Hands-on session with an Al-powered design tool relevant to the students' specialization (e.g., Al-powered material suggestion for product design).

Module 3 Designing with AI Paper/Assignment/ Case Study	Developing an Al-powered design prototype	15 Hours
---	---	----------

Topics:

Al for Prototyping and Testing: This module explores how Al can be used for rapid prototyping, user testing with AI simulations, and iterating on design solutions based on AI-generated feedback.

Ethical Considerations: Students discuss the ethical implications of using AI in design, such as bias, privacy, and transparency.

The Future of AI and Design: Explore emerging trends and potential future applications of AI in the design industry, particularly relevant to the Indian context.

Final Project Development: Students work on individual or team projects to develop an Alpowered design prototype that addresses a specific design challenge.

Presentations and Critique: Students present their final projects and receive feedback from peers and instructors.

Course Descript ion	The objective of this course is to provide an overview of the world of creating effective and visually engaging designs for printed publications.
	The course also aims for the students to explore the foundational principles, industry practices, and software applications used to bring ideas to life on paper.
	This course offers students to:
	Gain a comprehensive understanding of design principles for print media, including layout, typography, and imagery.
	Master the technical aspects of print production, from selecting paper and printing processes to file preparation.
	Develop proficiency in industry-standard design software for creating print layouts.
	Hone critical thinking skills to analyze and critique design concepts and finished products.
	Learn effective strategies for planning, producing, and disseminating various printed publications.
Course Objectiv e	The objective of the course is to familiarize the learners with the concepts of PRINTING & PUBLICATION DESIGN and attain Employability through Experiential Learning techniques.
Course Outcom es	On successful completion of the course the students shall be able to:
	Design print-ready publications that are visually appealing, informative, and adhere to industry standards.
	Confidently navigate the print production process, making informed decisions about materials and techniques.
	Apply design principles and software skills to create diverse printed materials like brochures, magazines, and book covers.
	Communicate design concepts effectively, both verbally and visually.

Version No.	3.0					
Course Pre- requisites	Interdisciplinary Design Collaborati	on				
Anti- requisites	NIL					
Course Descripti on	This course equips students to nav collaboration. They will be able to e backgrounds can work together to groundbreaking solutions. Through skills to: Bridge Disciplinary Gaps: Understaunique strengths. Foster Effective Collaboration: Mas resolution strategies. Design Thinking for All: Apply designsettings. Craft Innovative Solutions: Harness creative and impactful designs.	explore how tackle comp hands-on pand different ster commun	designation designation	n profession profession oblems and state will not fields and not teamword dologies in	onals from ad develop I be able to ad leverage ork, and co collaborat	diverse o gain the e their nflict
Course Objective	The objective of the course is to far Interdisciplinary Design Collaborati and attain Employability through Ex	on			·	s of

Course Outcome s

On successful completion of the course the students shall be able to:

Articulate the benefits and challenges of interdisciplinary design collaboration.

Effectively communicate and collaborate with individuals from diverse design backgrounds.

Utilize design thinking frameworks in collaborative project settings.

Identify and leverage the strengths of different design disciplines to generate creative solutions.

Navigate conflict constructively and foster a positive collaborative environment.

Develop and present project that showcase the power of interdisciplinary design.

Course Content:

This course equips you to bridge design disciplines, fostering creative problem-solving through effective collaboration.

		Assignm ent		
	Foundati ons of	Demonst ration		
Module 1	Interdisci plinary	and Participat	Observation & discussion &	15 Hours
	Collabora tion	ive learning.	Visual Journal	
		Documen tation		

Topics:

Benefits and challenges of interdisciplinary design

Introduction to design thinking in a collaborative environment

Understanding diverse design disciplines and their languages

Case studies of successful interdisciplinary design projects

Module 2	Communi cation and Collabora tion Strategie s	Assignm ent Documen tation	Observation & discussion & Visual Journal	20 Hours
----------	---	----------------------------	---	----------

Topics: Effective communication for diverse teams Active listening and empathy building Conflict resolution and negotiation tactics Team dynamics and fostering a collaborative environment Collaboration tools and technologies Design Thinking Assignm in Action, Observation & discussion & ents & Module 3 20 Hours Design presentat Visual Journal Discipline ion s in Dialogue Topics: Defining design problems through a collaborative lens User research methodologies for interdisciplinary teams Ideation and brainstorming techniques for diverse perspectives Prototyping and testing in a collaborative setting Deep dives into specific design fields (e.g., graphic design, engineering, UX design) Understanding the strengths and limitations of each discipline Mapping connections and potential collaborations across disciplines Guest lectures from industry professionals with interdisciplinary backgrounds Project Develop ment and Impleme Assignm Observation & discussion & ntation, ents & Module 4 20 Hours Communi presentat Visual Journal cation ion and Presentat ion

Developing a collaborative design brief

Assigning roles and responsibilities within teams

Project management strategies for interdisciplinary teams

Iterative design process with continuous feedback loops

Overcoming roadblocks and adapting to unforeseen challenges

Documenting the design process for diverse audiences

Crafting compelling presentations that showcase collaborative strengths

Effective storytelling techniques for interdisciplinary projects

Preparing for client presentations and pitches

Targeted Application & Tools that can be used:

Interdisciplinary design thrives with project management, communication, and discipline-specific tools fostering seamless collaboration.

Topics relevant to "Employability": Study of Interdisciplinary Design Collaboration

for Employability through Experiential learning techniques. This is attained through the assessment component mentioned in course handout.

Sustainable Materials and Practices

Life Cycle Assessment (LCA)

Sustainable Packaging Design Project

List of Studio Practical task:

Assemble a visual journal compiling different elements and various packaging forms.

Sketch and model a package for a brand's product.

Explore, sketch and model an alternative and sustainable packaging medium for an already existing product.

Targeted Application & Tools that can be used:

Adobe Dimension, Adobe Illustrator, Sketch based Visualization, Labeling Machines, QR Code Printing Machine

Text Book

The Package Design Book, Pentawards and Julius Wiedemann

STRUCTURAL PACKAGING Paperback – 13 February 2012 by Paul Jackson (Author)

Reference Books
The Package Design Book, Pentawards and Julius Wiedemann
Structural Packaging: Design your own Boxes and 3D Forms(Paper engineering for designers and students) by Paul Jackson
Packaging Essentials: 100 Design principles for Creating Packages (Design Essentials) by Sarah Roncarelli and Candace Ellicott
Skill Sets
All topics in theory components are relevant to Environment and Sustainability.
Lab/Project Skill sets
An attitude of enquiry.
Ability to conduct research on their own
Ability to ideate and sketch shortlisted ideas
Ability to model ideated concepts
Ability to work as a leader and as a member of a team.
Ability to create sustainable concepts
Write reports and present
Develop understanding of the relationship between package design and other design subfields, such as branding, advertising and information graphics.

Development	nt to "Skill Development": Principle of design, nomenclature for developing Skill through Experiential Learning techniques. This is attained through the studio omponent mentioned in the course handout.

Version No.	1.0			
Course pre- requisites	NA			
Anti-requisites	NA			
Course Description	This course delves into the world of motion graphics, teaching students to create dynamic visual content using animation and graphic design principles. Topics include keyframe animation, typography in motion, visual effects, and storytelling through motion. Students will gain hands-on experience with industry-standard software, enabling them to produce engaging motion graphics for various digital media platforms.			
Course Objective	The objective of the course is EMPLOYABILITY of students by using EXPERIENTIAL LEARNING Techniques.			
Course Outcomes	On successful completion of the course, the students shall be able to: Identify text effectively to enhance visual storytelling. Understand visual effects to add depth and interest to motion graphics. Apply engaging stories through motion graphics that captivate and inform audiences.			
Course Content:	This course covers the fundamentals of motion graphics, including keyframe animation, typography in motion, visual effects, and storytelling techniques using industry-standard software.			
Module 1	Fundamentals of Motion Graphics and Keyframe Animation	Visual documentation	Classroom discussions, Demo and presentations	15 Periods
Topics:				

Overview of motion graphics and its applications in digital media.

Introduction to keyframe animation principles.

Basic animation techniques: easing, timing, and spacing.

Hands-on practice with industry-standard software (e.g., Adobe After Effects).

Module 2	Typography in Motion and Visual Effects	Visual documentation	Classroom discussions, Demo and presentations	15 periods
----------	---	-------------------------	--	------------

Topics:

Principles of typography in motion graphics.

Techniques for animating text and incorporating it into visual narratives.

Introduction to visual effects: masking, compositing, and particle effects.

Practical exercises with software tools to create typographic animations and effects.				
Module 3	Storytelling and Advanced Motion Graphics Techniques	Visual documentation	Classroom discussions, Demo and presentations	15 periods

Storyboarding and planning motion graphics projects.

Advanced animation techniques: character animation, 3D motion graphics, and camera movements.

Integrating audio and visual elements to enhance storytelling.

Final project: Design and produce a complete motion graphics piece from concept to execution.

List of Projects:

Assess understanding of keyframe animation principles and basic techniques.

Create a short animation using keyframe techniques, demonstrating smooth motion and proper timing.

Develop an animated typographic sequence that effectively communicates a message.

Apply visual effects to a motion graphics piece, demonstrating creativity and technical proficiency.

Create and present a storyboard for a motion graphics project, outlining the narrative and key animation sequences.

Develop a comprehensive motion graphics video, incorporating advanced techniques and storytelling elements, and present it to the class for critique.

Targeted Applications & Tools that can be used:

Adobe After Effects: Industry-standard software for creating motion graphics and visual effects, essential for keyframe animation and advanced animation techniques.

Adobe Premiere Pro: Used for editing video and integrating motion graphics with other media elements to create cohesive projects.

Adobe Illustrator: For creating vector graphics and assets that can be animated in After Effects.

Adobe Photoshop: For designing and editing raster graphics and images that can be animated in motion graphics projects.

· Storyboarder or Storyboard That: Storyboarding tools to plan and visualize motion graphics projects before animating.

2. Category management: a new approach for fashion marketing? by Belinda Dewsnap, Cathy Hart, European Journal of Marketing, ISSN: 0309-0566

https://www-emerald-compresiuniv.knimbus.com/insight/content/doi/10.1108/03090560410539267/full/html

Topics relevant to "Skill Development": Consumer Groups – demographic trends & psychographic trends, Consumer spending - personal income, disposable income, discretionary income for developing Skill Development through Participative Learning techniques. This is attained through the assessment component mentioned in course handout.

	Type of Course: Program Core
Version No.	1.0
Course Pre- requisites	Knowledge and Skills related to all the courses studied in previous semesters.
Anti-requisites	NIL
Course Description	Students observe art, craft, technics and Culture in action, develop an awareness of the method of design explorations, and often get an opportunity to see, study, manipulate and apply design principles in value additions. Students learn about the implementation of the principles of design they have learnt in class, when they observe multidisciplinary teams of experts from different streams of design, economics, and management deal with technoeconomic problems at the micro and macro levels. Finally, it enables them to develop and refine their language, communication and inter-personal skills, both by its very nature, and by the various evaluation components, such as seminar, group discussion, project report preparation, etc. The broad-based core education, strong in design principles rich in heuristics, experiential learning and design thinking tools provide the foundation necessary for the student to understand appropriately the nature of real-life problems. The students have options to pursue this course as either Project Work and Dissertation at the university, or Project Work in an Industry/Company/Research Laboratory, or Internship Program in an Industry/Company.
Course Objectives	The objective of the course is SKILL DEVELOPMENT of students by using EXPERIENTIAL LEARNING Techniques.
	On successful completion of this course the students shall be able to:
	Identify the design problems related to local, regional, national or global needs.
Course Outcomes	Apply appropriate techniques or modern design tools for solving the potential problem
Course Outcomes	Design the tasks as per the standards and specifications.
	Interpret the events and results for meaningful conclusions.
	Appraise project findings and communicate effectively through scholarly publications.

	Module1: Intro	oduction to Eleme	nts of Design.	
Course Content:	Module2: Intro	oduction To Princip	oles of Design	
	Module3: Col	or Theory and Col	or Schemes.	
	Introduction	Assignment	Observations	
Module 1	to Elements	Case study	Illustrations	20 Classes
	Of Design.	Documentation	Visual Journal	

Introduction and overview of Elements of Design.

Definition and Content: Dot, Line, Shape, Form, Colour, Texture. Theoretical and Practical Application.

Observations and discussions on Good Compositions.

Design Documentation

Topics:

Introduction and overview of Principles of Design: Emphasis, Balance, Unity, Hierarchy, Rhythm, Proportion.

Types of Balance: Symmetrical, Asymmetrical and Radial.

Unity: Proximity, Repetition, Alignment, Variety.

Study on good compositional design ideas by using Elements of Design.

	Color	Assignment	Explorations	
Module 3	Theory and Color	Case Study	Presentations	20 Classes
	Schemes.	Documentation	Visual Journal	

Introduction to Colour and Properties of Colour: Hue, Value and Chroma/Intensity.

Colour Wheel: Primary, Secondary and Tertiary Colours. Cool colours and warm Colours.

Colour Schemes: Complementary, Monochromatic, Analogous, Neutrals, Pastels. Tints and shades.

Psychological effects of Colours.

Additive and subtractive colour theories/light and pigment theories – features and application

List of Practical Tasks:

- Task 1: Depiction of elements and principles of design.
- Level 1: Develop a composition by using various lines and depict Emphasis.
- Level 2: Illustrate two different objects by using one light source and shadow effect.
- Task 2: Illustration and Representation of geometrical and natural shapes.
- Level 1: Cut paper Collage: By using geometrical shapes depict all 4 types of Balance.
- Level 2: Take Inspirations from the nature and illustrate a composition using alignment.
- Task 3: Practice on color mediums and mixed media.
- Level 1: Illustrate buildings and still objects using mixed media.
- Level 2: Develop a Colour wheel and depict primary, secondary and tertiary colours
- Task 4: Representation of colors and textures.
- Level 1: Color Schemes and Tints, Tones and shades by using Poster colors.
- Level 2: Creation of various textures by using natural and artificial materials.
- Task 5: Depiction of Elements and Principles of Design
- Level 1: Create a portrait using monochromatic scheme/Achromatic scheme using poster colors.
- Level 2: Develop a composition by using Proportion and scale.
- Task 6: Idea generation
- Level 1: illusion composition by using polychromatic color scheme.
- Level 2: Explore new ideas inspired by nature and various material objects transform into another object.

Targeted Application & Tools that can be used:

Abode Illustrator Draw: Practicing and Creation of digital drawings and composition.

Pencil Sketch App: Illustrating and rendering sketches and drawings.

Pics art App: Creation and Rendering of Composition and sketches.

Course Description	This course introduces students to the foundational principles of concept development in design. Students will learn how to generate, refine, and communicate design ideas effectively. Emphasizing creative thinking and problem-solving, the course covers techniques for brainstorming, sketching, and creating mood boards. Students will explore various methods for researching and analyzing design trends, user needs, and market demands. By the end of the course, students will be equipped with the skills to develop cohesive and innovative design concepts, ready for further refinement and implementation in advanced design projects.						
Course Objective							
	The objective of the course is to familiarize the learners with the concepts of Concept Development and attain Employability through EXPERIENTIAL LEARNING techniques						
Course Outcomes	Upon successful completion of the course, stud	ents will be	e abl	e to:			
	Generate and brainstorm innovative design idea thinking techniques.	as using va	ariou	s cre	ative	Э

Anti-requisites	NA					
Course Description	The objective of this course is to provide students with an in-depth exploration of the foundational skills and techniques necessary for effective visual communication through drawing. By exploring the observational drawing, composition, and the use of various drawing media, the course aims to equip students with a deeper sense to translate their observations and ideas into compelling drawings.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of the basic drawing techniques and tools and attain Skill Development of student by using Experiential Learning techniques.					
Course Outcomes	On successful completion of the course, the students shall be able to: Theory outcomes: Identify and describe basic drawing tools, materials, and techniques. Practical outcomes: Interpret the importance of observational drawing in visual representation. Apply various drawing techniques to accurately depict objects, spaces, and textures.					
Course Content:						

Module 1 Introduction to Drawing and Materials Visual documentation, assignments, presentations-visual journal, visual sketch presentation	ations, 15
--	------------

Overview of Drawing as a Discipline- History and evolution of drawing, importance of drawing in various fields.

Understanding one-point, two-point, and three-point perspective for creating spatial illusion.

Module 2 Observational Drawing Visual documentation, assignments, presentations-visual journal, sketches Visual documentation, and presentation presentation.	tions,
--	--------

Topics:

The role of observation in drawing accuracy.

Techniques to enhance observational skills.

Methods for measuring and scaling objects.

Understanding relationships between parts and whole.

Module 3	Composition and Design	Visual documentation, assignments, presentations-visual journal, sketches	Classroom discussions and presentations, visual sketches presentation.	15 period s
----------	------------------------	---	---	-------------------

Topics:

Principles of Composition-Balance, symmetry, and asymmetry.

Rule of thirds, golden ratio, and other compositional guides.

Techniques for overlapping, scaling, and layering.

Module 4	Experimenting with Media and Styles	Visual documentation, assignments, presentations- visual journal, sketches	Classroom discussions and presentations, visual sketches presentation.	15 periods
----------	-------------------------------------	---	--	------------

Topics:

Mixed Media Drawing- Combining different drawing and painting materials.

Studying various art movements and their drawing styles.

Exploring textures and effects through mixed media. List of Projects: Visual document project on "Concept Development". Visual document project on "Translating ideas into a cohesive visual plan". Targeted Applications & Tools that can be used: Research projects on Concept board. Research projects on Grid Overlay Tools Text Book "Drawing on the Right Side of the Brain" by Betty Edwards "Keys to Drawing" by Bert Dodson "The Natural Way to Draw" by Kimon Nicolaides References Unsplash- A source of high-resolution images and photos that can be used for drawing references. ArtStation- A portfolio website for professional artists, featuring a wide range of digital artwork and concept designs. Topics relevant to "SKILL DEVELOMENT -Principles of Composition- Balance, symmetry, and asymmetry, Mixed Media Drawing- Combining different drawing and painting materials through Experiential Learning techniques.

Date of Approval by the Academic Council	24th AC meeting held on 03/08/2024

	Course Title: Materials, Media, Tools & Techniques					
Course Code DES 1008	Type of Course: 1] Program Core 2] Integrated	L-T-P-C	2	0	4	4

Version No.	1.0					
Course Pre- requisites	NIL					
Anti-requisites	NIL					
Course Description	Purpose: This course introduces various materials through hands-on activities, relevant demonstrations and engaging lectures. An introduction to manufacturing processes, and the ability to manipulate materials to visually communicate ideas. Abilities to be Develop: Students are able to develop an understanding of different materials and their properties. Students will be encouraged to develop design research by an expanded knowledge of materials. Nature of the Course: The conceptual and empirical nature of the course enables the students to develop products based on the understanding of various Materials.					
Course Objective	of Materials,		is to familiarize the learn nd Techniques and attain ng techniques.	-		
Course Outcomes	On successful completion of the course the students shall be able to: Understand the characteristics, features and behavior of soft materials. Identify where most materials come from which processes are used to make a product. Recognize basic family of materials used in soft-goods including sustainable materials and manufacturing processes. Practical Component: Demonstrate understanding of contemporary design issues through exploration of synthesis of content, problem solving and creativity.					
Course Content:						
Module 1	Introductio n to Soft Materials	Assignment Case study Documentati on	Observations Illustrations Visual Journal	14 Hours		
Topics	1	1				

Knowledge and Classification: Properties, various techniques and usage of soft materials: Paper, Yarn, Fabric, Leather, Clay.

Module 2 and	ehavior nd Case Study ethods Documentation	Observations Illustrations Visual Journal	16 Hours
--------------	--	---	----------

Application and Manipulation : Behaviour, methods and usage of soft materials: Paper, Yarn, Fabric, Leather and clay

Module 3	Methods & Design Research	Assignment Presentation Documentati on	Group Activities Presentations Explorations	14 Hours
----------	---------------------------------	---	---	----------

Topics:

Identification and Analysis: Design practice along with methods of material and design research.

Module 4 Study On Circular Designs	Assignment Case Study Documentati on	Explorations Presentations Visual Journal	16 Classes
------------------------------------	--------------------------------------	---	------------

Topics:

Study and Development Of various sustainable concepts, artefacts and Eco Friendly materials.

List of Practical Tasks:

- Task 1: Creation of various 3D forms through Paper techniques.
- Level 1: Develop a form by using various Paper Manipulation Techniques.
- Level 2: Construct two different objects by using Paper Manipulation Techniques.
- Task 2: Illustration and Representation of Abstract/Organic Shapes through Clay Techniques.
- Level 1: Take Inspirations from Nature /Abstract shapes and create products.
- Level 2: Take Inspirations from Nature and Abstract shapes and create products.
- Task 3: Practice on any soft material using mixed media technique.
- Level 1: Illustrate and Design an object using any kind of soft material with mixed media.
- Level 2: Develop a designed object using mixed media techniques.
- Task 4: Representation of manipulated soft material using different methods.
- Level 1: Prepare presentations on hard material techniques & methods.
- Task 5: Idea generation
- Level 1: Explore new idea inspired by sustainable/Eco Friendly Material.

Level 2: Develop a problem solving product using any kind of Sustainable Material.

Targeted Application & Tools that can be used:

Understanding of contemporary design issues through exploration of synthesis of content, problem solving and creativity.

Soft Materials Tools and Equipment.

Topics relevant to "Development of Skill": Application and Manipulation: Behavior, methods and usage of soft materials.

Course Description	This course focuses on fostering creativity through innovation and ideation techniques. Students will learn to generate, refine, and implement groundbreaking ideas using brainstorming, design thinking, and prototyping methods. Emphasis is placed on problem-solving, collaborative creativity, and developing concepts that drive innovation across various design fields. By the end, students will be equipped to tackle complex design challenges innovatively.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of innovation and Ideation and attain Employability through EXPERIENTIAL LEARNING techniques					
	Upon successful completion of the Level 1 courses, students will be able to:					
	Remember: Identify and recall basic design principles and elements.					
Course	Understand: Explain fundamental concepts and techniques in creative problem-solving and ideation.					
Outcomes	Apply: Utilize basic tools and software relevant to their field in practical projects.					
	Analyze: Conduct research and analyze user needs, market trends, and historical influences to inform design decisions.

Practical outcomes: Interpret historical design techniques and materials. Demonstrate strategies for design development effectively.					
Course Content:						

		<mark>Visual</mark>		
	Introduction to	documentation,	Classroom discussions	15
Module 1	Foundations of	assignments,	and presentations	Periods
	Design	presentations-	and presentations	renous
		visual journal		
				i I

Understanding the meaning of Design- from its functional aspects to its artistic and cultural significance.

Understanding the scope and significance of design history.

Prehistoric and marvel creativity- cave paintings, design innovations in Greece and Rome.

Module 2	The Evolution of Design Through the Ages	Visual documentation, assignments, presentations-visual journal	Classroom discussions and presentations	15 periods
----------	---	---	---	---------------

Topics:

Medieval & Gothic Design: the rise of religious architecture (cathedrals, monasteries) and the use of light, color, and symbolism in medieval design.

The Industrial Revolution and Design: Mass production, standardization, and the rise of consumer goods.

Victorian Eclecticism: Mixing historical styles in architecture, interiors, and fashion.

Factors influencing technological advancements- innovations in materials and processes.

Module 3	Global perspective & appreciation in design	Visual documentation, assignments, presentations-visual journal	Classroom discussions and presentations	15 periods
----------	--	---	---	---------------

Topics:

Indigenous and Traditional Designs: Exploration of Native American, African, and Oceanic design traditions.

Cross-Cultural Influences: The blending of global aesthetics in modern design.

How does the design reflect the time period and cultural values?

Social and Political Impact: Does the design have a broader message or influence on society?

List of Projects:

Visual document project on "specific design movements".

Visual document project on "the impact of design on society"

Visual document project on "reinterpret historical design concepts for contemporary use".

Targeted Applications & Tools that can be used:

Research projects on specific design influential figures.

Creative designing of contemporarised products.

Design interpretation and documentation of historic collections.

	Course Title: Drawing For Designers					
Course Code: DES2082	Type of Course: 1] School Core 2] Practical Integrated	L-T-P- C	0	0	8	4
Version No.	1.2					
Course Pre- requisites	NIL					
Anti-requisites	NIL					
Course Description	Drawing for Designers is the systematic study of individual aspects of Design, tools and techniques. it's important to consider the different traditional skills like drawing, sketching and other practical tools, depending					

	on the specific needs of the project to create an appealing approach in Design process. The subject will provide different understanding on design process and students are able to gain various manual tools and techniques based on different interactive and conceptual design projects.						
Course Objective	Ideation And Obse	The objective of the course is to familiarize the learners with the concepts of Ideation And Observation and attain Skill Development through Experiential Learning techniques.					
Course Outcomes	On successful completion of the course the students shall be able to: Introduce the importance of Drawing for designers Demonstrate various methods of drawings and sketching Interpret the impact of the drawing-based design structure within the society product. Discuss the final outcome and effectiveness of the work						
Course Content:	Module 1: Drawing for Visual Thinking Module 2 Identification of Design in order to creating various drawings Module 3 Importance of drawing techniques in Reproduction of Design and its features.						
Module 1	Drawing for Visual Thinking	Observation report	Illustrations/ photographs Visual Journal	30 Hours			
Topics:							

How do we see? - To discuss the basic process of seeing. Act of perception

Visual Queries: Understanding of Maps, Charts, Diagrams and other graphical designs. Discussions with suitable examples.

What We Can Easily See: To study the Visual pop up of shapes, forms, arrangements, colours and other visual elements in different contexts and backgrounds.

Module 2 Identification of Design in order to creating various drawings	Info-graphical development Visual Journal	35 Hours
---	--	----------

Topics:

Recognition of basic designs around us natural or manmade. Identification of texture colour size and other physical attributes of the design.

Recognition of social importance of the given Design Structure. Review the impact of the physical design structure in the society.

Generating ideas and solutions through sessions such as Sketching, Prototyping, Brainstorming,

Module 3	Importance of drawing techniques in Reproduction of Design and its features.	Documentation	Info-graphical development Visual Journal	35 Hours
----------	--	---------------	---	----------

Topics:

Introduction to Basics sketching for Design Thinking

Drawings for Design Ideations

Important of the drawing for Conceptualising design starting from Worst Possible Ideas and Improving to the State to acceptance in the Society

5List of Practical Tasks:

Project No. 1: Recognition and Observation In Drawing for Designer

Level 1: Recognizing the Characters of the Design and Documenting the same through Phrases and Words and Photographs

Level 2: Identification of the Characteristics and copying through Sketching the same with Perspective

Level 3: Transcending the Design to other styles of Sketches, experimenting with different colour medium

Proiect No. 2:

Level 1: Exploring the stages in a given Design Structure

Level 2: Exploded View of the given Design or an object

Level 3: Improvisation on the design for personalization.

Project No. 3:

Level 1: Analyzing the design Structure through its character Study.

Level 2: Applying the Empathy mapping for the design where ever needed and improvising the idea.

Level 3: Development of new Parameters to create Improvised designs and exploring the designs.

Targeted Application & Tools that can be used:

Manual tools of Sketching and drawings to explore the visual thinking

Laying the base for Portfolio Creation by using various drawing techniques.

Tools in the Subjects will be reading Drawings materials with technical approach.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules, co-relating the insights comprising of planning, strategy, creative inputs, contents by understanding the big picture and translate ideas and design concepts across all levels. Consequentially creating innovative and interactive platforms for using Design across multiple platforms, overseeing design thought process, strategy planning, research, consultation with given clients. The project shall be approved first by the course instructor before further processes are developed.

Communication

List of Practical Tasks:

Project No. 1

Level 1: Play 5 different board games and write about them.

Level 2: Play 10 different board games and write about them.

Project No. 2:

Level 1: Prototype 2 different board games.

Level 2: Prototype 4 different board games.

Project No. 3:

Level 1: Create 1 final board game design

Level 2: Create 2 final board game design

Targeted Applications & Tools that can be used:

Understanding how a board game is designed. In general, they will be learning about the design process, how the gameplay, and the game mechanism.

Tools used are Raster and Vector software.

Topics are relevant to "Skill Development": Study of visual design and techniques like shapes, patterns, and colours and work with all that to create a design for Skill Development through Experiential Learning techniques. This is attained through the assessment component mentioned in the course handout.

Adding the Juice.

Module 3 Idea Generation	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion	10 Classes
--------------------------	--	--	---------------

Topics:

Elements of a Game.

Theme and its Importance.

Demographics.

Player Motivation.

5 Ideation Techniques.

5 Ideation Techniques: Case Studies.

Assignment: Generate 5 different ideas using various ideation techniques.

Brainstorming Ideas.

Game Genres

Game Genres: Case Studies.

Validating Ideas.

Assignment: Select 1 out of all ideas after properly validating it.

		Assignment	Observation/ Demo/	
Module 4	Documentation	Case Study	Videos/ Interaction/	10 Class
		Documentation	Discussion/Practice	

Topics:

Types of Game Documents.

The Game Design Document.

Types of GDDs.

Popular GDDs: Case Studies.

GDD Template.

Project: GDD Creation.

List of Laboratory Tasks:

Experiment N0 1: Gameplay Loops.

Level 1: Students must break down popular games and identify their core and supporting loops and make the appropriate diagram representing the loops.

Experiment N0 2: Generate 5 different ideas using various ideation techniques.

Level 1: Students will create 5 different ideas using various ideation techniques, like Inspiration, Memory, Previous Games, Daily Life, and Passion.

Experiment N0 3: Validating Ideas.

Level 1: Students must select 1 out of all ideas after properly validating it.

Experiment N0 4: Game Design Documentation.

Level 1: Students will be designing a GDD document that lists all the topics covered in this course, for a particular game idea after it has been properly validated.

Targeted Application & Tools that can be used: Video game ideation is a critical step when developing video games, as it helps develop a clear vision for the game and lay the foundation for its design and development. Ideation can also help teams identify key elements that will

make the game unique and engaging. By brainstorming ideas and discussing them, developers can identify potential issues early on and make changes before they become costly.

Word Documentation.

Digital Image Manipulation Application.

Module 3	Introduction to Vector Software	Demonstration and Participative Learning.	Examples/ Demo/Assignments	15 Hours		
		Documentation				

Basic tools and techniques

Shapes, patterns & symbols.

List of Practical Tasks:

Project No. 1

Level 1: Design 5 basic shapes and shade them

Level 2: Design 10 basic shapes and shade them

Project No. 2:

Level 1: Design creatively 5 designs using all colour schemes

Level 2: Design creatively 10 designs using all colour schemes

Project No. 3:

Level 1: Design 5 collage works and uses all the methods learned

Level 2: Design 5 collage works and uses all the methods learned

Project No. 4:

Level 1: Design 5 shapes and patterns and use all the methods learned

Level 2: Design 10 shapes and patterns work and use all the methods learned

Targeted Applications & Tools that can be used:

Understanding the basics of visual design. In general, they will learn about shapes, forms, and colours. How all this can be combined to create a design.

Tools used are Raster and Vector software.

Topics are relevant to "Employability": Study of visual design and techniques like shapes, patterns, and colours and work with all that to create a design for developing Employability Skills through Experiential Learning techniques. This is attained through the assessment component mentioned in the course handout.

Version No.	1.0				1	
Course Pre- requisites	NA					
Anti-requisites	NA					
Course Description	This course provides an in-depth exploration of the theoretical foundations of video game design. Students will learn about the core principles, mechanics, and narrative structures that contribute to engaging and innovative video games. Emphasis will be placed on understanding the psychological and cultural impacts of games, design methodologies, and the future of game design.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Game Design Theory and attain Employability through Participative Learning techniques.					
Course Outcomes	On successful completion of the course, the students shall be able to: Identify different genres of video games and their impact on gameplay. Describe game mechanics and gameplay loops.					

	Describe different psychological ways designers can impact a player's behaviour.				
Course Content:	Foundations of Gam Game Psychology	Foundations of Game Design, Narrative and Character Development, Game Psychology			
Module 1	Foundations of Game Design	Demonstration and Participative Learning. Documentation	Illustrations/ Observation / Interaction/ Discussion	10 Classes	
Topics:			-		
Video Game History					
Video Game Genres					
Game Mechanics					
Gameplay Loops					
Module 2	Narrative and Character Development	Demonstration and Participative learning. Documentation	Illustrations/ Observation / Interaction/ Discussion	10 Classes	
Topics:		,	1	,	
Game Narratives					
Plot Theory					
Worldbuilding					
Branching Narratives					
Dialogue					
Interactive Storytelling					
Module 3	Game Psychology	Demonstration and Participative learning. Documentation	Illustrations/ Observation / Interaction/ Discussion	Classes

Characters with an everyday object.								
Heads.								
Proportions.								
Module 2	Character Design	Demonstration Case Study	Observation Interaction/ Practice				lasses	

	Documentation	
		1

Elements of Character Design - personality, attitude, role, function.

Biography of character -

Visualizing the Character -

Creating Characters from life study.

Story and the role of characters.

The role, symbolism, and significance of all sorts of characters in animated films – human, imaginary – fantasy.

		Demonstration	Observation/ Demo/ Videos/	
Module 3	Character Bible	Case Study	Interaction/ Discussion/	15 Classes
		Documentation	Practice	

Topics:

Character Bible and model sheets, Stereotypes.

Design of Anthropomorphic Animals and Objects

Anthropomorphic and alien characters, animals, birds, objects.

List of Practical Tasks:

Project No. 1

Level 1: Creating characters with everyday objects.

Level 2: Study games characters.

Project No. 2:

Level 1: Simplifying the characters with shapes.

Level 2: Development of backstory for characters.

Project No. 3:

Level 1: Developing Anthropomorphic characters for games.

Project No. 4: Creating Character turnaround sheet for games.

Targeted Application & Tools that can be used: Targeted Application & Tools that can be used:

Understanding the requirements of the game industry and moving with the trend.

Tools used will be pencil, sketchbook and colors, and digital painting tools.

Course Description	This course introduces students to the fundamental concepts and techniques of 2D game design using the Unity game engine. Through a combination of lectures, hands-on projects, and collaborative activities, students will learn the key principles of game design, asset creation, scripting, and optimization to create engaging 2D games. By the end of this course, students will have a working prototype of a 2D Game.						

Course Objective	The objective of the course is to familiarize the learners with the concepts of 2D Game Design and attain Skill Development through Experiential Learning techniques.
	On successful completion of the course the students shall be able to:
	Understand concepts of 2D game design
Course Outcomes	Practical component:
Cutomics	Produce a concept for a 2D game.
	Develop a 2D game using game engine.
Course Content:	

Course Content:

2D Game Fundamentals, 2D Animation, Integration in Game Engine.

Module 1	Game Engine Fundamentals	Assignment Demonstration and	Illustrations Observation &	20 Classes
	Fundamentals	Participative learning. Documentation	comparison Visual Journal	

Topics:

Understanding the game development process

Introduction to Unity's interface and basic navigation

Creating a new 2D project in Unity

Importing and organizing assets

Exploring the Scene and Game views

Introduction to 2D game components in Unity

Module 2	2D Animation	Assignment Demonstration and Participative learning. Documentation	Info-graphics development Visual Journal Development of Samples for each	15 Classes
		Documentation		

Topics:

Working with sprites and textures

Creating 2D animations using Unity's Animation System

Designing levels using tilemaps

Camera setup for 2D games

Designing game animation using: jumping, running, smearing, etc.

Creating interactive	ve game juice			
Module 3	Integration in Game Engine	Assignment Demonstration and Participative learning. Documentation	Development of Samples for each Visual Journal	10 Classes

Improving game visuals through particle systems and lighting

Performance optimization techniques for 2D games

Finalizing and packaging the game for distribution

List of Practical Tasks:

Project No. 1

Level 1: Create a sprite sheet

Level 2: Create a level using tileset.

Project No. 2:

Level 1: Create a animation for character.

Level 2: Create a animation with smearing effect.

Project No. 3:

Level 1: Create a text adventure game.

Targeted Application & Tools that can be used:

Understanding 2D game design process.

Tools used will be unity, photoshop and spine.

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to design and develop a 2D game

Version No.	1.0		•		•	•
Course Pre- requisites	DES2055 C# Basics for Game Developmen	t				
Anti-requisites	NIL					
Course Description	This course will dive into advanced concepts and techniques in C# programming, with a focus on their practical application in game development. Topics covered will include data structures, algorithms, memory management, advanced scripting techniques, and optimization strategies. Students will also learn how to use Unity's built-in features to create advanced gameplay mechanics and will work on several hands-on projects to apply the concepts learned. By the end of this course, students will have a deeper understanding of the C# language and its capabilities and will have developed the skills to create complex and optimized games using Unity.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Advanced C# for Game Development and attain Skill Development through Experiential Learning techniques.					
Course Outcomes	On successful completion of the course the students shall be able to: Recognize different programming concepts.					

	Differentiate the use	e of various types o	f algorithms in C#.

Topics:					
Rapid Prototyping	Rapid Prototyping Methodologies				
Designing and Implementing Game Mechanics					

Unity UI Design and Interaction

Prototyping Game Levels and Worlds

Iterative Development and Playtesting

Mod4le 4	Advanced Game Integration	Assignment Documentation	Examples/ Demo/Assignments	28 Sessions

Particle Systems and Visual Effects

Advanced Lighting and Rendering Techniques

Cinemachine for Camera Control

Audio Integration and Sound Design

Game Performance Optimization and Profiling

List of Practical Tasks:

Project No. 1: Core C# Game Development

Level 1: Task: Develop a basic game application that demonstrates object-oriented programming by creating a player character with simple attributes (e.g., health, score).

Level 2: Task: Extend the application to include an inventory system that allows adding, removing, and viewing items, with dynamic updates based on player actions.

Project No. 2: Advanced Algorithm Application

Level 1: Task: Implement a Finite State Machine (FSM) for an NPC with basic states like idle, move, and attack.

Level 2: Task: Enhance the FSM to include complex states such as patrol, flee, and interact, with optimized transitions based on real-time game conditions.

Project No. 3: Prototyping Game Mechanics

Level 1: Task: Create a basic 2D game prototype featuring core mechanics such as movement, simple physics interactions, and a scoring system.

Level 2: Task: Expand the prototype to include advanced mechanics like power-ups, enemy AI behaviors, and multiple level designs with progressive difficulty.

Project No. 4: Full Game Integration

Level 1: Task: Develop a game integrating core Unity features like basic particle effects, lighting setup, and simple sound effects.

Level 2: Task: Implement advanced integration, including dynamic lighting effects, complex particle systems, Cinemachine for advanced camera control, and adaptive audio that reacts to gameplay changes.

Targeted Application & Tools that can be used: Understanding the requirements of the game industry and moving with the trend

Tools Used:

Unity Profiler

Blender/Maya (Optional for Art Assets)

Adobe Photoshop/GIMP

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final product that includes all or most of the artwork which was taught in the Modules.

An important part of any hyper-casual game is its economy. As such, we will be studying different economic models and different monetization techniques used in the industry. A video game's UI is very important to inform the player of all relevant information. Such as player stats, enemy stats, health and damage points and much more. This course goes into the entire workflow of creating UI/UX for video games. By the end of this course, students will also understand the importance of game metrics and analytics by launching a game and tracking its performance live.						
Course Objective	Hyper-Casual Ga	The objective of the course is to familiarize the learners with the concepts of Hyper-Casual Game Design and attain Skill Development through Experiential Learning techniques.						
	On successful cor	On successful completion of the course, the students shall be able to:

	Hyper-Casual Games		
Topics:			

Understanding Game Economy and Monetization Models

Freemium Models: Components and Strategies

Types of In-Game Currencies (Soft, Hard, Energy, etc.)

Effective Use of Ads (Banner, Interstitial, Rewarded Ads)

Growth, Retention, and Key Performance Indicators (KPIs)

Modulo 2	UI/UX Design	Demonstration Case Study	Observation/ Demo/	25
Module 3	for Hyper- Casual Games	Case Study Documentation	Videos/ Interaction/ Discussion/ Practice	Sessions

Topics:

Basics of UI/UX and Their Importance in Games

Minimalist Design for Accessibility

Wireframing and Prototyping (Low-Fi to Hi-Fi)

Visual Feedback and Game Aesthetics

Case Studies of Minimal UI (e.g., Pick-up-and-Play, Instant Play)

List of Laboratory Tasks:

Experiment No 1: Deconstructing Popular Games.

Level 1: Take a popular hyper-casual game and deconstruct it. Understand the different elements and mechanics that make up the game. Create a proper document of your findings along with the gameplay loops.

Level 2:

Experiment No 2: Game Monetization.

Level 1: Decide the entire Monetization Model for your hyper-casual game. What are soft currencies? What are hard currencies?

Level 2: Develop a detailed monetization plan for the chosen hyper-casual game that incorporates multiple revenue streams.

Experiment No 2: Types of UI.

Level 1: Give examples for each of the four types of UI from popular games.

Level 2: Deep dive into key UI design principles such as usability, accessibility, aesthetics, and consistency.

Targeted Application & Tools that can be used: An important part of any hyper-casual game is its economy. As such, we will be studying about different economy models used in the industry and the different monetization techniques to make sure the games being designed turn a profit.

Module 4

Retopology,

Optimization, and

Session

Demo/Assignments

	Game Engine Integration	Documentation	
Topics:			

Introduction to Retopology

Retopology Techniques

UV Unwrapping and Texturing

Optimizing Models for Performance

Integrating Models into Game Engines

List of Practical Tasks:

Project No. 1: Basic Sculpting Techniques

Level 1: Create a simple 3D object (e.g., a stylized tree, basic character or creature) using fundamental sculpting tools in ZBrush or Blender.

Level 2: Design a more complex base mesh for a character or creature using advanced sculpting tools and ZSpheres.

Project No. 2: Anatomy and Proportions in Sculpting

Level 1: Sculpt a simple human or creature bust, paying attention to basic anatomical landmarks and proportions.

Level 2: Sculpt a full human body or creature with attention to detailed anatomical features such as muscles, joints, and realistic facial structures.

Project No. 3: Advanced Surface Detailing and Texturing

Level 1: Add basic surface details such as wrinkles, pores, and scars to a sculpted character or creature using alphas and custom brushes.

Level 2: Create a hyper-realistic character or creature, detailing skin textures, pores, wrinkles, and adding unique surface features (e.g., scales, fur).

Project No. 4: Retopology and Game Engine Integration

Level 1: Retopologize a simple sculpted model for game use, ensuring that it is low-poly and optimized for performance.

Level 2: Complete the retopology of a detailed character or creature, perform UV unwrapping, and prepare the model for texturing and export into a game engine.

Targeted Application & Tools that can be used:

Focus on creating high-quality, optimized 3D models for games, animation, VR, and 3D printing. Models must meet industry standards for performance, resolution, and integration with game engines.

Tools:

Traditional Sculpting Tools (pencil, sketchbook, colors)

Digital Sculpting Tools (ZBrush, Blender, Mudbox, Substance Painter, Unity/Unreal Engine)

Systems Design

Level Design and Worldbuilding

User Interface and Experience (UI/UX)

Module 3	Advanced 3D Game Development	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	15 Classes
		Boodinentation		

Topics:

Lighting and Post Processing

Advanced Blueprint Scripting

Particle Effects

Camera and Cinematics

Debugging

Building and Exporting Games

List of Laboratory Tasks:

Experiment NO 1: Designing a level using Game Engine.

Level 1: Student will learn to design a level, with player guidance and proper lighting and the critical path using game engine.

Experiment NO 2: Design a short Cinematic.

Level 1: Student will learn to design a short cinematic using game engine. By importing animations and understanding how the in-engine camera works.

Experiment NO 3: 3D Game Prototype.

Level 1: Students will create a working prototype for a 3D Game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a solid foundation in Unreal Engine, progressing from basic skills to the creation of a full 3D game by the end of the semester.

Advanced Combat Mechanics

Balancing Combat Systems

Enemy Classes

Synergy between Enemy Classes

Al Behavior in Combat

Creating Engaging Enemy Types

Module 3	Integrating Combat Systems	Demonstration Case Study Documentation	Observation/ Demo/ Videos/ Interaction/ Discussion/ Practice	15 Classes
----------	----------------------------------	--	--	---------------

Topics:

Integrating Combat Systems into Game Narratives

Environmental Design for Combat Scenarios

Playtesting and Iterating Combat Systems

User Experience and Feedback in Combat Design

List of Laboratory Tasks:

Experiment NO 1: Analyze the combat system of an existing game and identify its core mechanics.

Level 1: Student will learn to how contemporary games' combat systems work.

Experiment NO 2: Design and balance a combat system for multiple enemy classes.

Level 1: Student will learn to design and balance combat system for different enemy classes and understand how synergy between them can lead to interesting and engaging encounters.

Experiment NO 3: Create a boss fight for a game.

Level 1: Students will design the different systems and balance a boss encounter for a game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a thorough understanding of combat design for video game applications, from foundational principles to advanced techniques and project development, enabling them to create engaging and balanced combat systems by the end of the semester.

Anti-requisites	NA					
Course Description	This course will introduce students to advanced principles of level design such as pacing, difficulty, flow, player guidance and aesthetics. They will also learn how to design levels for mobile and hyper-casual games, considering their simple mechanics, short play sessions, and puzzle elements. Throughout the course, students will be given opportunities to create and test their own levels using level design tools in-built in Game Engines. At the end of the course, students will understand the entire process of creating a level for diverse types of game.					
Course Objective	The objective of the course is to familiarize the learners with the concepts of Advanced Level Design and attain Skill Development through Experiential Learning techniques.					

	On successful	completion of the co	urse, the students shall be abl	le to:		
	Identify the process of game-level creation.					
	Practical Com	ponent:				
Course Out Comes	Understand level design principles for puzzle design and environment design.					
	Apply level design techniques and create levels for a hyper-casual game.					
	Identify the critical path in a 3D level and construct the game level using the principles taught.					
Course Content:	Level Design Introduction, Level Design Principles, 2D Level Design, 3D Level Design.					
Module 1	Level Design Introduction	Assignment Case Study Documentation	Observation/ Videos/ Interaction/ Discussion	10 Class		
- ·			•	•		

Topics:

Level Design Introduction.

Fundamentals of Level Design.

Level Design: The Process.

Level Design Fundamentals: Case Studies.

Level Deconstruction: Finding The Critical Path.

Assignment: Level Map Creation: Creating the Critical Path.

Module 2 Level Design Principles	Assignment Case Study Documentation	Observation/ Tutorials/ Videos/ Interaction/ Discussion	10 Class
----------------------------------	-------------------------------------	---	----------

Topics:

Fundamentals of Puzzle Design.

Hyper casual Level Design.

Puzzle Design: Case Studies.

Fundamentals of Environment Design.

Level Flow Design.

Player Guidance.

Environment Design: Case Studies.

Module 3	2D Level Creation	Assignment Case Study	Observation/ Tutorials/ Videos/ Interaction/ Discussion/Practice	20 Class
----------	----------------------	-----------------------	--	----------

Demonstration &	
Participative	
Learning	

Topics:

2D Level Creation Tools.

Basics of UI.

Creating Levels for a Hyper Casual Game.

Minor Project: Create levels for a Hyper Casual Game.

Module 4	3D Level Creation	Assignment Case Study Demonstration & Participative	Observation/ Tutorials/ Videos/ Interaction/ Discussion/Practice	20 Class
		Learning		

Topics:

Outdoor Level Design.

Unity Terrain Tools.

Blockout Level.

Asset Collection.

Level Creation.

Lighting.

Major Project: Create a 3D level using the map you created as a reference.

List of Laboratory Tasks:

Experiment N0 1: Breaking down a game-level.

Level 1: Student will learn to breakdown levels from existing games and understand how the levels were designed.

Experiment N0 2: Designing the Critical Path.

Level 1: Student will learn to design the critical path for a level and create a Level Map using software.

Experiment No. 3: Puzzle Design Creation.

Level 1: Students will create levels for a small hyper casual game, using a Game Engine.

Experiment N0 4: Environment Design.

Level 1: Students will learn to design the environment of a level, using a Game Engine.

Targeted Application & Tools that can be used: Level Design is used to design various kinds of levels in a game. It also helps to understand the concept of the game and the game flow. Level Design is used to guide to player to points of interest and make sure the player is never lost within the game-world.

Digital Drawing Application,

Game Engine.

Text Book: Level Up! The Guide to Great Video Game Design (ISBN-10 1118877160)

Architectural Approach to Level Design (ISBN-10 081536136X)

The Art of Game Design (ISBN- 10: 9781466598645)

Date of Approval by the Academic Council	23rd AC meeting held on 27/03/2024

Course Code: DES3024	Course Title: 3D Animation Type of Course: 1] Program Core 2] Integrated	L-T- P-C	1	0	6	4
Version No.	1.0					
Course Pre- requisites	DES2075					
Anti-requisites	NIL					
Course Description	This course builds upon students' existing knowledge of 3D modeling, texturing, and basic animation principles to focus specifically on creating high-quality animations for game environments. Students will delve into advanced animation techniques, rigging, optimization for real-time engines,					

	and game-specific animation workflows. Through a combination of theoretical lectures and practical exercises, students will gain the skills necessary to bring characters, objects, and environments to life in a game setting.
Course Objective	The objective of the course is to familiarize the learners with the concepts of 3D Animation and attain Skill Development through Experiential Learning techniques.
	On successful completion of the course the students shall be able to:
	Theory Components:
	Define core principles of advanced animation techniques, rigging for animation, and game animation workflows
Course	Practical component:
Outcomes	Explain the importance of optimization techniques for real-time performance in game animation.
	Apply advanced animation techniques to create high-quality animation cycles for characters and objects in a game environment.
	Apply rigging principles to create functional rigs for characters and objects, ensuring proper weight distribution and deformation.

Course Content:

		Assignment		
Module 1	Introduction to Game Animation	Demonstration and Participative learning. Documentation	Examples/ Demo/Assignments	26 Hours

Topics: Theory (5 hours):

Game animation pipeline

Character design for animation

Animation principles in game development

Game animation tools (e.g., industry-standard software overview)

Practical (21 hours):

Introduction to game animation workflow

Basic rig exploration and understanding

Animating simple game mechanics (jumping, running, etc.)

Creating basic idle and walk cycles

Module 2	Advanced Modeling	Assignment	Examples/	26			
Wioduic 2	for Games	Documentation	Demo/Assignments	Hours			
Topics: Theory (3	Topics: Theory (3 hours):						
Low poly vs. high	Low poly vs. high poly modeling for games						
Optimization techniques for game assets							
retopology for ga	retopology for game animation						

Practical (23 hours):

Creating game-ready character models (low poly)

UV unwrapping for efficient texturing

Basic retopology techniques for animation

Module 3	Character Animation	Assignment	Examples/	26
Module 3	for Games	Documentation	Demo/Assignments	hours

Topics: Theory (2 hours):

Advanced animation principles for game characters

Forward Kinematics vs. Inverse Kinematics (FK vs. IK)

Acting for game animation

Practical (24 hours):

Advanced character rigging for animation

Applying IK and FK for different scenarios

Creating complex character animations (attacks, special moves)

Introduction to motion capture for games (optional)

Mod4le 4	Game Environment Animation and	Assignment	Examples/	26
WOUTIC T	Integration	Documentation	Demo/Assignments	hours

Topics: Theory (3 hours):

Animating game environments (props, objects)

Creating cinematics for games (cutscenes)

Integrating animation into game engines (e.g., Unity, Unreal)

Practical (23 hours):

Animating game props and objects

Creating basic cinematics using animation tools

Exporting and importing animations into a game engine (using a chosen engine)

Basic optimization for in-game animation playback

List of Practical Tasks:

Project No. 1

Level 1: Character Animation Basics

Level 2: Rig Exploration.

Level 3: Interactive Game Mechanic Animation.

Project No. 2:

Level 1: Low-Poly Character Creation.

Level 2: UV Unwrapping Practice.

Level 3: Game-Ready Asset Creation.

Project No. 3:

Level 1: Advanced Character Rigging.

Level 2: Complex Character Animation.

Level 3: Introduction to Motion Capture Integration (Optional)

Project No. 4:

Level 1: Game Environment Prop Animation.

Level2: Basic Cinematic Creation.

Level3: Game Engine Integration.

Targeted Application & Tools that can be used:

Understanding the requirements of the game industry and moving with the trend

Tools used will be 3D Software and game engine(Unity/Unreal).

Project work/Assignment: Mention the Type of Project /Assignment proposed for this course

A final project work integrating all the modules. Students have to create a final product that includes all or most of the artwork which was taught in the Modules.

SEMESTER 7

Course Code: DES3001	Course Title: Professional Practice -I Type of Course: NTCC	L- T-P- C	0	0	0	8
Version No.	1.0					
Course Pre- requisites	Knowledge and Skills related to all the courses studied in previous semesters.					
Anti-requisites	NIL					

	During their 60-day internship, the student should maximize learning and contribution by immersing themselves fully in the company's culture and projects. They should begin with a thorough orientation to understand the organization's goals and values. Setting clear objectives with their supervisor and aligning them with personal development goals is crucial. Active participation in team activities, meetings, and training sessions helps them grasp the company's workflow and expectations.
Course Description	Early on, the student should focus on observation and learning from experienced colleagues. Asking questions, seeking feedback, and taking initiative in small tasks demonstrate their skills. As they gain confidence, they should engage more deeply in project work, ensuring to meet deadlines and exceed quality standards. Regularly reviewing progress with supervisors and adjusting goals as needed maximizes their impact.
	Networking with colleagues across departments and seeking mentorship opportunities broadens their understanding of the industry and career paths. Documenting achievements and lessons learned to update their portfolio is essential. Finally, reflecting on the internship experience helps them identify strengths and areas for growth. By embracing challenges with enthusiasm and professionalism, they not only contribute effectively but also lay a solid foundation for future career endeavors.
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through internship in companies and attain Employability Skills through Experiential Learning techniques.
	On successful completion of this course the students shall be able to:
	□ Remembering:
	The student recalls and describes the company's goals, values, and workflow from their orientation and ongoing activities.
	□ Understanding:
	They demonstrate understanding by explaining how their internship tasks contribute to the company's objectives and adapting to its culture.
Course Outcomes	□ Applying:
	Through active participation and project work, they apply their knowledge and skills in design, software tools, and teamwork to real-world challenges.
	□ Analyzing:
	They analyze feedback from supervisors and colleagues to improve their work quality and efficiency, adjusting their approach as needed.
	□ Evaluating:
	The student evaluates their own performance and contributions, reflecting on achievements, challenges, and areas for growth during the internship.
	□ Creating:

	By documenting their achievements and updating their portfolio, they create a comprehensive record of their internship experience and design accomplishments.

Creating Immersive Storytelling Experiences						
Integrating AR an	d VR with AI and I	οΤ				

Testing, Iteration, and User Feedback in AR and VR

List of Laboratory Tasks:

Experiment NO 1: Research and present on the history and evolution of AR and VR in gaming.

Level 1: Student will learn the evolution of AR and VR in gaming.

Experiment NO 2: Design a user experience flow for an AR or VR application.

Level 1: Student will learn to design a short experience flow for their project. This can be done in Figma or game engine directly.

Experiment NO 3: Create a 3D environment for an AR or VR game.

Level 1: Students will use assets from their previous projects or create new ones and create an immersive 3D environment for their final XR project.

Experiment NO 4: Design, develop, and present a complete AR or VR game prototype.

Level 1: Students will create a working prototype for an XR game.

Targeted Application & Tools that can be used: This curriculum ensures that students gain a thorough understanding of AR and VR development for video game applications, from foundational principles to advanced project development, enabling them to create immersive game experiences by the end of the semester.

	For their graduation project in Design, students should choose a topic that aligns with their interests and career goals. Begin with a well-defined proposal and timeline, ensuring the project is feasible within the given resources and time frame.				
Course Description	Conduct thorough research, including a literature review and market/user analysis, to ground the project in current trends and needs. Develop concepts, create prototypes, and iterate based on feedback from mentors and peers. Schedule regular check-ins with mentors for guidance and engage in peer reviews for diverse perspectives. Compile the project into a professional portfolio, documenting the process and final outcomes. Write a detailed thesis report and prepare a compelling final presentation to showcase your work. Reflect on the learning experience, assessing strengths and areas for improvement, and consider future developments or				

	opportunities for further research or publication. This structured approach ensures a comprehensive and impactful graduation project.
Course Objectives	The objective of this course is to familiarize the learners with the concepts of Tasks based learning through portfolio making and attain Employability Skills through Experiential Learning techniques.
	On successful completion of this course the students shall be able to:
	□ Remembering:
