## Table of Contents

| <b>Clause No.</b>                   | <b>Contents</b>  | <b>Page Number</b> |
|-------------------------------------|--|--------------------|
| <b>PART A - PROGRAM REGULATIONS</b> |  |                    |
| 1.                                  | Vision & Mission of the University and the School / Department   | 3                  |
| 2.                                  | Preamble to the Program Regulations and Curriculum   | 3                  |
| 3.                                  | Short Title and Applicability  | 3                  |
| 4.                                  | Definitions  | 4                  |
| 5.                                  | Program Description  | 5                  |
| 6.                                  | Minimum and Maximum Duration   | 6                  |
| 7.                                  | Programme Educational Objectives (PEO)   | 6                  |
| 8.                                  | Programme Outcomes (PO) and Programme Specific Outcomes (PSO)  | 6                  |
| 9.                                  | Admission Criteria (as per the concerned Statutory Body)   | 7                  |
| 10.                                 | Transfer Students requirements   | 8                  |
| 11.                                 | Change of Branch / Discipline / Specialization   | 9                  |
| 12.                                 | Specific Regulations regarding Assessment and Evaluation   | 9                  |
| 13.                                 | Additional clarifications - Rules and Guidelines for Transfer of Credits from MOOC, etc.   | 11                 |
| <b>PART B: PROGRAM STRUCTURE</b>    |  |                    |
| 14.                                 | Structure / Component with Credit Requirements Course Baskets & Minimum Basket wise Credit Requirements                              | 13                 |
| 15.                                 | Minimum Total Credit Requirements of Award of Degree   | 14                 |
| 16.                                 | Other Specific Requirements for Award of Degree, if any, as prescribed by the Statutory Bodies                                       | 14                 |
| <b>PART C: CURRICULUM STRUCTURE</b> |  |                    |
| 17.                                 | Curriculum Structure - Basket Wise Course List   | 15                 |
| 18.                                 | Practical / Skill based Courses - Internships / Thesis / Dissertation / Capstone Project Work / Portfolio / Mini project             | 16                 |
| 19.                                 | List of Elective Courses under various Specializations / Stream Basket   | 19                 |
| 20.                                 | List of Open Electives to be offered by the School / Department (Separately for ODD and EVEN Semesters).                             | 20                 |
| 21.                                 | List of MOOC (NPTEL) Courses   | 20                 |
| 22.                                 | Recommended Semester Wise Course Structure / Flow including the Program / Discipline Elective Paths / Options                        | 21                 |
| 23.                                 | Course Catalogue of all Courses Listed including the Courses Offered by other School / Department and Discipline / Program Electives | 24                 |

## **PART A - PROGRAM REGULATIONS**

### **1. Vision & Mission of the University and the School / Department**

#### **1.1 Vision of the University**

To be a Value-driven Global University, excelling beyond peers and creating professionals of integrity and character, having concern and care for society.

#### **1.2 Mission of the University**

- Commit to be an innovative and inclusive institution by seeking excellence in teaching, research and knowledge-transfer.
- Pursue Research and Development and its dissemination to the community, at large.
- Create, sustain and apply learning in an interdisciplinary environment with consideration for ethical, ecological and economic aspects of nation building.
- Provide knowledge-based technological support and services to the industry in its growth and development.
- To impart globally-applicable skill-sets to students through flexible course offerings and support industry's requirement and inculcate a spirit of new-venture creation.

#### **1.3 Vision of Presidency School of Information Science**

To be a value based, practice-driven School of Information Science, committed to developing globally-competent Professionals, dedicated to applying Modern Information Science for Social Benefit

#### **1.4 Mission of Presidency School of Information Science**

- Cultivate a practice-driven environment with an Information-Technology-based pedagogy, integrating theory and practice.
- Attract and nurture world-class faculty to excel in Teaching and Research, in the Information Science Domain.
- Establish state-of-the-art facilities for effective Teaching and Learning experiences.
- Promote Interdisciplinary Studies to nurture talent for global impact.
- Instil Entrepreneurial and Leadership Skills to address Social, Environmental and Community-needs.

### **2. Preamble to the Program Regulations and Curriculum**

This is the subset of Academic Regulations and it is to be followed as a requirement for the award of BCA degree.

The Curriculum is designed to take into the factors listed in the Choice Based Credit System (CBCS) with focus on Social Project Based Learning, Industrial Training, and Internship to enable the students to become eligible and fully equipped for employment in industries, choose higher studies or entrepreneurship.

In exercise of the powers conferred by and in discharge of duties assigned under the relevant provision(s) of the Act, Statutes and Academic Regulations, of the University, the Academic Council hereby makes the following Regulations.

### **3. Short Title and Applicability**

- a. These Regulations shall be called the Bachelor of Computer Applications Degree Program Regulations and Curriculum 2024-2027.
- b. These Regulations are subject to, and pursuant to the Academic Regulations.
- c. These Regulations shall be applicable to the ongoing Bachelor of Computer Applications Degree Programs of the 2024-2027 batch, and to all other Bachelor of Computer Applications Degree Programs which may be introduced in future.
- d. These Regulations shall supersede all the earlier Bachelor of Computer Applications Program Regulations and Curriculum, along with all the amendments thereto.
- e. These Regulations shall come into force from the Academic Year 2024-2025.

### **4. Definitions**

*In these Regulations, unless the context otherwise requires:*

- a. *"Academic Calendar" means the schedule of academic and miscellaneous events as approved by the Vice Chancellor;*
- b. *"Academic Council" means the Academic Council of the University;*
- c. *"Academic Regulations" means the Academic Regulations, of the University;*
- d. *"Academic Term" means a Semester or Summer Term;*
- e. *"Act" means the Presidency University Act, 2013;*
- f. *"AICTE" means All India Council for Technical Education;*
- g. *"Basket" means a group of courses bundled together based on the nature/type of the course;*
- h. *"BOE" means the Board of Examinations of the University;*
- i. *"BOG" means the Board of Governors of the University;*
- j. *"BOM" means the Board of Management of the University;*
- k. *"BOS" means the Board of Studies of a particular Department/Program of Study of the University;*
- l. *"CGPA" means Cumulative Grade Point Average as defined in the Academic Regulations;*
- m. *"Clause" means the duly numbered Clause, with Sub-Clauses included, if any, of these Regulations;*
- n. *"COE" means the Controller of Examinations of the University;*
- o. *"Course In Charge" means the teacher/faculty member responsible for developing and organising the delivery of the Course;*
- p. *"Course Instructor" means the teacher/faculty member responsible for teaching and evaluation of a Course;*
- q. *"Course" means a specific subject usually identified by its Course-code and Course-title, with specified credits and syllabus/course-description, a set of references, taught by some teacher(s)/course-instructor(s) to a specific class (group of students) during a specific Academic Term;*
- r. *"Curriculum Structure" means the Curriculum governing a specific Degree Program offered by the University, and, includes the set of Baskets of Courses*

along with minimum credit requirements to be earned under each basket for a degree/degree with specialization/minor/honours in addition to the relevant details of the Courses and Course catalogues (which describes the Course content and other important information about the Course). Any specific requirements for a particular program may be brought into the Curriculum structure of the specific program and relevant approvals should be taken from the BOS and Academic Council at that time.

- s. "DAC" means the Departmental Academic Committee of a concerned Department/Program of Study of the University;
- t. "Dean" means the Dean of the concerned School;
- u. "Degree Program" includes all Degree Programs;
- v. "Department" means the Department offering the degree Program(s) / Course(s) / School offering the concerned Degree Programs / other Administrative Offices;
- w. "Discipline" means specialization or branch of BCA Degree Program;
- x. "HOD" means the Head of the concerned Department;
- y. "L-T-P-C" means Lecture-Tutorial-Practical-Credit - refers to the teaching - learning periods and the credit associated;
- z. "MOOC" means Massive Open Online Courses;
- aa. "MOU" means the Memorandum of Understanding;
- bb. "NPTEL" means National Program on Technology Enhanced Learning;
- cc. "Parent Department" means the department that offers the Degree Program that a student undergoes;
- dd. "Program Head" means the administrative head of a particular Degree Program/s;
- ee. "Program Regulations" means the Bachelor of Computer Application Degree Program Regulations and Curriculum, 2024-2027;
- ff. "Program" means the Bachelor of Computer Application (BCA) Degree Program;
- gg. "PSIS" means the Presidency School of Information Science;
- hh. "Registrar" means the Registrar of the University;
- ii. "School" means a constituent institution of the University established for monitoring, supervising and guiding, teaching, training and research activities in broadly related fields of studies;
- jj. "Section" means the duly numbered Section, with Clauses included in that Section, of these Regulations;
- kk. "SGPA" means the Semester Grade Point Average as defined in the Academic Regulations;
- ll. "Statutes" means the Statutes of Presidency University;
- mm. "Sub-Clause" means the duly numbered Sub-Clause of these Program Regulations;
- nn. "Summer Term" means an additional Academic Term conducted during the summer break (typically in June-July) for a duration of about eight (08) calendar weeks, with a minimum of thirty (30) University teaching days;
- oo. "SWAYAM" means Study Webs of Active Learning for Young Aspiring Minds.
- pp. "UGC" means University Grant Commission;
- qq. "University" means Presidency University, Bengaluru; and

*rr. "Vice Chancellor" means the Vice Chancellor of the University.*

## **5. Program Description**

The Bachelor of Computer Applications Program Regulations and Curriculum 2024-2027 are subject to, and, pursuant to the Academic Regulations. These Program Regulations shall be applicable to the following ongoing Bachelor of Computer Applications Degree Programs of 2024-2027 offered by the Presidency School of Information Science (PSIS):

1. Bachelor of Computer Applications abbreviated as BCA.
2. Bachelor of Computer Applications in Artificial Intelligence and Machine Learning, abbreviated as BCI.
3. Bachelor of Computer Applications in Data Science, abbreviated as BCD.

5.1 These Program Regulations shall be applicable to other similar programs, which may be introduced in future.

5.2 These Regulations may evolve and get amended or modified or changed through appropriate approvals from the Academic Council, from time to time, and shall be binding on all concerned.

5.3 The effect of periodic amendments or changes in the Program Regulations, on the students admitted in earlier years, shall be dealt with appropriately and carefully, so as to ensure that those students are not subjected to any unfair situation whatsoever, although they are required to conform to these revised Program Regulations, without any undue favour or considerations.

## **6. Minimum and Maximum Duration**

- 6.1 Bachelor of Computer Applications Degree Program is a Three Year, Full-Time Semester based program. The minimum duration of the BCA Program is three (03) years and each year comprises of two academic Semesters (Odd and Even Semesters) and hence the duration of the BCA program is six (06) Semesters.
- 6.2 A student who for whatever reason is not able to complete the Program within the normal period or the minimum duration (number of years) prescribed for the Program, may be allowed a period of two years beyond the normal period to complete the mandatory minimum credits requirement as prescribed by the

concerned Program Regulations and Curriculum. In general, the permissible maximum duration (number of years) for completion of Program is 'N' + 2 years, where 'N' stands for the normal or minimum duration (number of years) for completion of the concerned Program as prescribed by the concerned Program Regulations and Curriculum.

- 6.3 The time taken by the student to improve Grades/CGPA, and in case of temporary withdrawal/re-joining (Refer to Clause 16.1 of Academic Regulations), shall be counted in the permissible maximum duration for completion of a Program.
- 6.4 In exceptional circumstances, such as temporary withdrawal for medical exigencies where there is a prolonged hospitalization and/or treatment, as certified through hospital/medical records, women students requiring extended maternity break (certified by registered medical practitioner), and, outstanding sportspersons representing the University/State/India requiring extended time to participate in National/International sports events, a further extension of one (01) year may be granted on the approval of the Academic Council.
- 6.5 The enrolment of the student who fails to complete the mandatory requirements for the award of the concerned Degree (refer Section 19.0 of Academic Regulations) in the prescribed maximum duration (Clauses 18.1 and 18.2 of Academic Regulations), shall stand terminated and no Degree shall be awarded.

## **7 Programme Educational Objectives (PEO)**

After four years of successful completion of the program, the graduates shall be able to:

**PEO 01:** Demonstrate success as a computer professional with innovative skills, having moral and ethical values.

**PEO 02:** Engage in lifelong learning through software development.

**PEO 03:** Serve as a leader in the profession through consultancy, extension activities and/ or entrepreneurship.

## **8 Programme Outcomes (PO) and Programme Specific Outcomes (PSO)**

### **8.1 Programme Outcomes (PO)**

**On successful completion of the Program, the students shall be able to:**

**PO 1.** Application of Domain Knowledge: Apply the domain knowledge such as mathematics, science and software engineering fundamentals into the Computer Application related professions.

**PO 2:** Problem Solving & Analysis: Identify, Formulate, Analyse and Solve Complex Scenarios related to Computer Applications.

**PO 3:** Design/development of Activities: Conceive, Design and Develop various activities of Computer Applications.

**PO 4:** Conduct Investigations of Events: Carry out Investigation of an event and

draw logical conclusions based on critical thinking and analytical reasoning.

**PO 5:** Modern Tool usage: Effectively apply relevant ICT Tools and digital tools to carry out Computer Application Attributes.

**PO 6:** Research: Identify suitable Research Methods and report the findings.

**PO 7:** Profession and Society: Apply the knowledge of the values and beliefs of multicultural society and a global perspective in the profession.

**PO 8:** Ethics: Identify ethical issues and embrace ethical values in conduct of Profession.

**PO 9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO 10:** Communication: Express thoughts and ideas effectively in writing and oral communication

**PO 11:** Project Management and Finance: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

**PO 12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of societal and technological change.

## **8.2 Program Specific Outcomes (PSOs):**

On successful completion of the Program, the students shall be able to:

**PSO-1: [Disciplinary knowledge]:** Demonstrate comprehensive knowledge and understanding of Computer Applications, Data Science and AI/ML techniques.

**PSO-2: [Problem Solving]:** Identify, formulate and apply appropriate techniques in the areas related to Software development, Big data, Network, Cloud computing technologies and related domains of varying complexities in real-time applications.

**PSO-3: [Design/development of Applications]:** design, develop, and test full stack applications by applying principles of software engineering, addressing real-world requirements across various domains.

## **9 Admission Criteria (as per the concerned Statutory Body)**

The University admissions shall be open to all persons irrespective of caste, class, creed, gender or nation. All admissions shall be made on the basis of merit in the qualifying examinations; provided that forty percent of the admissions in all Programs of the University shall be reserved for the students of Karnataka State and admissions shall be made through a Common Entrance Examination conducted by the State Government or its agency and seats shall be allotted as per the merit and reservation policy of the State Government from time to time. The admission criteria to the BCA Program is listed in the following Sub-Clauses:

- 9.1. An applicant who has successfully completed Pre-University course or Senior Secondary School course (+2) or equivalent such as (11+1), 'A' level in Senior School Leaving Certificate Course from a recognized university of India or outside or from Senior Secondary Board or equivalent, constituted or recognized by the Union or by the State Government of that Country for the purpose of issue of qualifying certificate on successful completion of the course, may apply for and be admitted into the Program.

- 9.2. Provided further A candidate seeking admission for BCA Program should have passed 10+2 or an equivalent examination from any recognized board with a minimum of 40 % marks in aggregate.
- 9.3. Reservation for the SC / ST and other backward classes shall be made in accordance with the directives issued by the Government of Karnataka from time to time.
- 9.4. Admissions are offered to Foreign Nationals and Indians living abroad in accordance with the rules applicable for such admission, issued from time to time, by the Government of India.
- 9.5. Candidates must fulfil the medical standards required for admission as prescribed by the University.
- 9.6. If, at any time after admission, it is found that a candidate had not in fact fulfilled all the requirements stipulated in the offer of admission, in any form whatsoever, including possible misinformation and any other falsification, the Registrar shall report the matter to the Board of Management (BOM), recommending revoking the admission of the candidate.
- 9.7. The decision of the BOM regarding the admissions is final and binding.

## **10 Transfer Students requirements**

### **Transfer of student(s) from another recognized University to the 2<sup>nd</sup> year (3<sup>rd</sup> Semester) of the BCA. Program of the University**

- 10.1 A student who has completed the 1st Year (i.e., passed in all the Courses / Subjects prescribed for the 1st Year) of the BCA Three-Year Degree Program from another recognized University, may be permitted to transfer to the 2nd Year (3rd Semester) of the BCA Program of the University as per the rules and guidelines prescribed in the following.
- 10.2 The student shall submit the Application for Transfer along with a non-refundable Application Fee (as prescribed by the University from time to time) to the University no later than July 10 of the concerned year for admission to the 2nd Year (3rd Semester) BCA Program commencing on August 1 on the year concerned.
- 10.3 The student shall submit copies of the respective Marks Cards / Grade Sheets / Certificates along with the Application for Transfer.

- 10.4 The concerned student fulfils the criteria specified in Clauses 10.2 and 10.3.
- 10.5 The transfer may be provided on the condition that the Courses and Credits completed by the concerned student in the 1st Year of the BCA three-year Degree Program from the concerned University, are declared equivalent and acceptable by the Equivalence Committee constituted by the Vice Chancellor for this purpose. Further, the Equivalence Committee may also prescribe the Courses and Credits the concerned students shall have to mandatorily complete, if admitted to the 2nd Year of the BCA Program of the University.
- 10.6 The Branch / Discipline allotted to the student concerned shall be the decision of the University and binding on the student.

## **11 Change of Branch / Discipline / Specialization**

A student admitted to a particular Branch of the BCA Program will normally continue studying in that Branch till the completion of the program. However, the University reserves the right to provide the option for a change of Branch, or not to provide the option for a change of Branch, at the end of 1st Year of the BCA Program to eligible students in accordance with the following rules and guidelines: framed by the University from time to time.

- 11.1. Normally, only those students, who have passed all the Courses prescribed for the 1st Year of the BCA Program and obtained a CGPA of not less than 6.50 at the end of the 2nd Semester, shall be eligible for consideration for a change of Branch.
- 11.2. Change of Branch, if provided, shall be made effective from the commencement of the 3rd Semester of the BCA Program. There shall be no provision for change of Branch thereafter under any circumstances whatsoever.
- 11.3. The student provided with the change of Branch shall fully adhere to and comply with the Program Regulations of the concerned Branch of the BCA Program, the Fee Policy pertaining to that Branch of the BCA Program, and, all other rules pertaining to the changed Branch existing at the time.
- 11.4. Change of Branch once made shall be final and binding on the student. No student shall be permitted, under any circumstances, to refuse the change of Branch offered.
- 11.5. The eligible student may be allowed a change in Branch, strictly in order of inter se merit, subject to the conditions 11.6 and 11.7:

- 11.6. The actual number of students in the 3rd Semester in any particular Branch to which the transfer is to be made, should not exceed the intake fixed by the University for the concerned Branch; and,
- 11.7. The actual number of students in any Branch from which transfer is being sought does not fall below 75% of the total intake fixed by the University for the concerned Branch.
- 11.8. The process of change of Branch shall be completed within the first five days of Registration for the 3rd Semester of the BCA Program.

**12. Specific Regulations regarding Assessment and Evaluation (including the Assessment Details of NTCC Courses, Weightages of Continuous Assessment and End Term Examination for various Course Categories)**

- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- 11
- 12

- 12.1. The academic performance evaluation of a student in a Course shall be according to the University Letter Grading System based on the class performance distribution in the Course.
- 12.2. Academic performance evaluation of every registered student in every Course registered by the student is carried out through various components of Assessments spread across the Semester. The nature of components of Continuous Assessments and the weightage given to each component of Continuous Assessments (refer Clause 8.8 of Academic Regulations) shall be clearly defined in the Course Plan for every Course, and approved by the DAC.
- 12.3. Format of the End-Term examination shall be specified in the Course Plan.
- 12.4. Grading is the process of rewarding the students for their overall performance in each Course. The University follows the system of Relative Grading with statistical approach to classify the students based on the relative performance of the students registered in the concerned Course except in the following cases:

- Non-Teaching Credit Courses (NTCC)
- Courses with a class strength less than 30

Absolute grading method may be adopted, where necessary with prior approval of concerned DAC.

Grading shall be done at the end of the Academic Term by considering the aggregate performance of the student in all components of Assessments prescribed for the Course. Letter Grades (Clause 8.10) shall be awarded to a student based on her/his overall performance relative to the class performance distribution in the concerned Course. These Letter Grades not only indicate a qualitative assessment of the student's performance but also carry a quantitative (numeric) equivalent called the Grade Point.

## 12.5. Assessment Components and Weightage

| <b>Table 1: Assessment Components and Weightage for different category of Courses</b>   |   |                  |
|---|---|------------------|
| <b>Nature of Course and Structure</b>   | <b>Evaluation Component</b>   | <b>Weightage</b> |
| <b>Lecture-based Course</b><br>L component in the L-T-P Structure is predominant (more than 1)<br>(Examples: 3-0-0; 3-0-2; 2-1-0; 2-0-2, 2-0-4 etc.)  | Continuous Assessments  | 50%              |
|   | End Term Examination  | 50%              |
| <b>Lab/Practice-based Course</b><br>P component in the L-T-P Structure is predominant<br>(Examples: 0-0-4; 1-0-4; 1-0-2; etc.)  | Continuous Assessments  | 75%              |
|   | End Term Examination  | 25%              |
| <b>Skill based Courses</b> like Industry Internship, Capstone project, Research Dissertation, Integrative Studio, Interdisciplinary Project, Summer / Short Internship, Social Engagement / Field Projects, Portfolio, and such similar Non-Teaching Credit Courses, where the pedagogy does not lend itself to a typical L-T-P structure | Guidelines for the assessment components for the various types of Courses, with recommended weightages, shall be specified in the concerned Program Regulations and Curriculum / Course Plans, as applicable. |                  |

The exact weightages of Evaluation Components shall be clearly specified in the concerned PRC and respective Course Plan.

Normally, for Practice/Skill based Courses, without a defined credit structure (L-T-P) [NTCC], but with assigned Credits (as defined in Clause 5.2 of the

Academic Regulations), the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous Assessments, the distribution of weightage among such components, and the method of evaluation/assessment, shall be as decided and indicated in the Course Plan/PRC. The same shall be approved by the respective DAC.

#### **12.6. Minimum Performance Criteria:**

##### **12.6.1. Theory only Course and Lab/Practice Embedded Theory Course**

A student shall satisfy the following minimum performance criteria to be eligible to earn the credits towards the concerned Course:

- a. A student must obtain a minimum of 30% of the total marks/weightage assigned to the End Term Examinations in the concerned Course.
- b. The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of the components of Continuous Assessments, Mid Term Examinations and End Term Examinations in the concerned Course.

##### **12.6.2. Lab/Practice only Course and Project Based Courses**

The student must obtain a minimum of 40% of the AGGREGATE of the marks/weightage of all assessment components in the concerned Course.

12.6.3. A student who fails to meet the minimum performance criteria listed above in a Course shall be declared as "Fail" and given "F" Grade in the concerned Course. For theory Courses, the student shall have to re-appear in the "Make-Up Examinations" as scheduled by the University in any subsequent semester, or, re-appear in the End Term Examinations of the same Course when it is scheduled at the end of the following Semester or Summer Term, if offered. The marks obtained in the Continuous Assessments (other than the End Term Examination) shall be carried forward and be included in computing the final grade, if the student secures the minimum requirements (as per sub-clauses 8.9.1 and 8.9.2 of Academic Regulations) in the "Make-Up Examinations" of the concerned Course. Further, the student has an option to re-register for the Course and clear the same in the summer term/ subsequent semester if he/she wishes to do so, provided the Course is offered.

#### **13. Additional clarifications - Rules and Guidelines for Transfer of Credits from MOOC, etc. - Note: These are covered in Academic Regulations**

The University allows students to acquire credits from other Indian or foreign institutions and/or Massive Open Online Course (MOOC) platforms, subject to prior approval. These credits may be transferred and counted toward fulfilling the minimum credit requirements for the award of a degree. The process of transfer of credits is governed by the following rules and guidelines:

## **13**

- 13.1. The transfer of credits shall be examined and recommended by the Equivalence Committee (Refer Annexure B of Academic Regulations) and approved by the Dean - Academics.
- 13.2. Students may earn credits from other Indian or foreign Universities/Institutions with which the University has an MOU, and that MOU shall have specific provisions, rules and guidelines for transfer of credits. These transferred credits shall be counted towards the minimum credit requirements for the award of the degree.
- 13.3. Students may earn credits by registering for Online Courses offered by *Study Web of Active Learning by Young and Aspiring Minds* (SWAYAM) and *National Program on Technology Enhanced Learning* (NPTEL), or other such recognized Bodies/ Universities/Institutions as approved by the concerned BOS and Academic Council from time to time. The concerned School/Parent Department shall publish/include the approved list of Courses and the rules and guidelines governing such transfer of credits of the concerned Program from time to time. The Rules and Guidelines for the transfer of credits specifically from the Online Courses conducted by SWAYAM/ NPTEL/ other approved MOOCs are as stated in the following Sub-Clauses:
  - 13.3.1. A student may complete SWAYAM/NPTEL/other approved MOOCs as mentioned in Clause 17.3(As per the academic regulations) and transfer equivalent credits to partially or fully complete the mandatory credit requirements of Discipline Elective Courses and/or the mandatory credit requirements of Open Elective Courses as prescribed in the concerned Curriculum Structure. However, it is the sole responsibility of the student to complete the mandatory credit requirements of the Discipline Elective Courses and the Open Elective Courses as prescribed by the Curriculum Structure of the concerned Program.
  - 13.3.2. SWAYAM/NPTEL/ other approved MOOCs as mentioned in Clause 17.3(As per the academic regulations) shall be approved by the concerned Board of Studies and placed (as Annexures) in the concerned PRC.
  - 13.3.3. Parent Departments may release a list of SWAYAM/NPTEL/other approved MOOCs for Pre-Registration as per schedule in the Academic Calendar or through University Notification to this effect.
  - 13.3.4. Students may Pre-Register for the SWAYAM/NPTEL/other approved MOOCs in the respective Departments and register for the same

Courses as per the schedule announced by respective Online Course Offering body/institute/ university.

- 13.3.5. A student shall request for transfer of credits only from such approved Courses as mentioned in Sub-Clause 13.3.2 above.
- 13.3.6. SWAYAM/NPTEL/other approved MOOCs Courses are considered for transfer of credits only if the concerned student has successfully completed the SWAYAM/NPTEL/other approved MOOCs and obtained a certificate of successful/satisfactory completion.
- 13.3.7. A student who has successfully completed the approved SWAYAM/NPTEL/ other approved MOOCs and wants to avail the provision of transfer of equivalent credits, must submit the original Certificate of Completion, or such similar authorized documents to the HOD concerned, with a written request for the transfer of the equivalent credits. On verification of the Certificates/Documents and approval by the HOD concerned, the Course(s) and equivalent Credits shall forwarded to the COE for processing of results of the concerned Academic Term.
- 13.3.8. The credit equivalence of the SWAYAM/NPTEL/other approved MOOCs are based on Course durations and/or as recommended by the Course offering body/institute/university. The Credit Equivalence mapped to SWAYAM/ NPTEL approved Courses based on Course durations for transfer of credits is summarised in Table shown below. The Grade will be calculated from the marks received by the Absolute Grading Table 8.11 in the Academic Regulations.

**Table 2: Durations and Credit Equivalence for Transfer of Credits from SWAYAM-NPTEL/ other approved MOOC Courses**

| <b>Sl. No.</b> | <b>Course Duration</b> | <b>Credit Equivalence</b> |
|----------------|------------------------|---------------------------|
| 1              | 4 Weeks                | 1 Credit                  |
| 2              | 8 Weeks                | 2 Credits                 |
| 3              | 12 Weeks               | 3 Credits                 |

- 13.3.9. The maximum permissible number of credits that a student may request for credit transfer from MOOCs shall not exceed 20% of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of the concerned Degree.
- 13.3.10. The University shall not reimburse any fees/expense; a student may incur for the SWAYAM/NPTEL/other approved MOOCs.

13.4 The maximum number of credits that can be transferred by a student shall be limited to forty percent (40%) of the mandatory minimum credit requirements specified by the concerned Program Regulations and Curriculum for the award of

the concerned Degree. However, the grades obtained in the Courses transferred from other Institutions/MOOCs, as mentioned in this Section (13), shall not be included in the calculation of the CGPA.

**13.5 Mandatory Non-Credit Course Completion Requirements:** All mandatory non-credit courses shall be satisfactorily completed by the student as part of the degree requirements. These courses will be evaluated and awarded letter grades based on the following criteria:

- **S (Satisfactorily Completed):** Awarded when the student successfully completes all prescribed course requirements.

- **NC (Not Completed):** Awarded when the student fails to meet the prescribed course requirements.

A student receiving an NC grade must reappear for and complete the course in accordance with the guidelines prescribed by the University.

In the case of non-taught and non-credited mandatory courses—where students are advised to undertake learning through MOOC platforms—there shall be a clearly defined Course Catalogue and a corresponding Course Plan. The Course Plan shall outline the assessment components, which will form the basis for evaluation.

## **PART B: PROGRAM STRUCTURE**

### **14. Structure / Component with Credit Requirements Course Baskets & Minimum Basket wise Credit Requirements**

The BCA Program Structure (2024-2027) totalling 120 credits. Table 3 summarizes the type of baskets, number of courses under each basket and the associated credits that are mandatorily required for the completion of the Degree.

| <b>Table 3: BCA 2024-2027: Summary of Mandatory Courses and Minimum Credit Contribution from various Baskets</b> |                                    |                            |
|--|------------------------------------|----------------------------|
| <b>Sl. No.</b>   | <b>Baskets</b>                     | <b>Credit Contribution</b> |
| 1  | Core Courses                       | 53                         |
| 2  | Ability Enhancement Courses        | 8                          |
| 3  | Multi-Disciplinary Elective course | 3                          |
| 4  | Value added Courses                | 2                          |
| 5  | Skill Enhancement courses          | 36                         |
| 6  | Discipline Specific Elective       | 18                         |

**Table 3: BCA 2024-2027: Summary of Mandatory Courses and Minimum Credit Contribution from various Baskets**

| <b>Sl. No.</b> | <b>Baskets</b>          | <b>Credit Contribution</b> |
|----------------|-------------------------|----------------------------|
| 7              | Mandatory Courses (MAC) | 0                          |
|                | Total Credits           | 120                        |

In the entire Program, the practical and skill-based course component contribute to an extent of approximately 62% out of the total credits of 120 for BCA program of three years' duration.

### **15. Minimum Total Credit Requirements of Award of Degree**

As per the AICTE guidelines, a minimum of 120 credits is required for the award of a BCA degree.

### **16. Other Specific Requirements for Award of Degree, if any, as prescribed by the Statutory Bodies,**

- 16.1 The award of the Degree shall be recommended by the Board of Examinations and approved by the Academic Council and Board of Management of the University.
- 16.2 A student shall be declared to be eligible for the award of the concerned Degree if she/he:
  - a. Fulfilled the Minimum Credit Requirements and the Minimum Credits requirements under various baskets;
  - b. Secure a minimum CGPA of 4.50 in the concerned Program at the end of the Semester/Academic Term in which she/he completes all the requirements for the award of the Degree as specified in Sub-Clause a of Academic Regulations;
  - c. No dues to the University, Departments, Hostels, Library, and any other such Centers/ Departments of the University; and
  - d. No disciplinary action is pending against her/him.

## PART C: CURRICULUM STRUCTURE

### 17. Curriculum Structure - Basket Wise Course List

| <b>Table 3.1: Ability Enhancement Courses (AEC)</b> |             |                                       |          |          |          |          |                       |

## **18. Practical / Skill based Courses - Internships / Thesis / Dissertation / Capstone Project Work / Portfolio / Mini projects**

Practical / Skill based Courses like internship, project work, capstone project, research project / dissertation, and such similar courses, where the pedagogy does not lend itself to a typical L-T-P-C Structure as defined in Clause 5.1 of the Academic Regulations, 2021, are simply assigned the number of Credits based on the quantum of work / effort required to fulfil the learning objectives and outcomes prescribed for the concerned Courses. Such courses are referred to as Non-Teaching Credit Courses (NTCC). These Courses are designed to provide students with hands-on experience and skills essential for their professional development. These courses aim to equip students with abilities in problem identification, root cause analysis, problem-solving, innovation, and design thinking through industry exposure and project-based learning. The expected outcomes are first level proficiency in problem solving and design thinking skills to better equip BCA graduates for their professional careers. The method of evaluation and grading for the Practical / Skill based Courses shall be prescribed and approved by the concerned Departmental Academic Committee (refer Annexure A of the Academic Regulations, 2021). The same shall be prescribed in the Course plan.

### **18.1 Internship**

A student may opt to undertake Internship for a duration of 10-12 weeks during the 6th semester, while concurrently completing the remaining registered courses for that semester. This project work shall be considered equivalent to an internship, subject to the following conditions:

**18.1.1.** The Internship shall be conducted in accordance with the Internship Policy prescribed by the University from time to time.

**18.1.2.** The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable / stipulated by the concerned Industry / Company or academic / research institution for award of the Internship to a student;

**18.1.3.** The number of Internships available for the concerned Academic Term. Further, the available number of internships shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry / Company or academic / research institution providing the Internship, as stated in Sub-Clause 18.1.2 above.

18.1.4. A student may opt for Internship in an Industry / Company or academic / research institution of her / his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her / his own. Provided further, that the Industry / Company or academic / research institution offering such Internship confirms to the University that the Internship shall be conducted in accordance with the Program Regulations and Internship Policy of the University.

18.1.5. A student selected for an Internship in an industry / company or academic / research institution shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.

## **18.2 Project Work**

A student may opt to do a Project Work for a period of 10-12 weeks in an Industry / Company or academic / research institution or the University Department(s) as an equivalence of Internship during the 6th Semester as applicable, while concurrently completing the remaining registered courses for that semester. subject to the following conditions:

**18.2.1** The Project Work shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.

**18.2.2** The student may do the project work in an Industry / Company or academic / research institution of her / his choice subject to the above mentioned condition (Sub-Clause 18.2.1). Provided further, that the Industry / Company or academic / research institution offering such project work confirms to the University that the project work will be conducted in accordance with the Program Regulations and requirements of the University.

## **18.3 Capstone Project**

A student may undergo a Capstone Project for a period of 8-12 weeks in an industry / company or academic / research institution in the 4th Semester as applicable, while concurrently completing the remaining registered courses for that semester. subject to the following conditions:

**18.3.1** The Capstone Project shall be conducted in accordance with the Capstone Project Policy prescribed by the University from time to time.

**18.3.2** The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable / stipulated by the concerned Industry / Company or academic / research institution for award of the Capstone Project to a student;

**18.3.3** The number of Capstone Project available for the concerned

Academic Term. Further, the available number of Capstone Project shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry / Company or academic / research institution providing the Capstone Project, as stated in Sub-Clause 2.6.3.2 above.

**18.3.4** A student may opt for Capstone Project in an Industry / Company or academic / research institution of her / his choice, subject to the condition that the concerned student takes the responsibility to arrange the Capstone Project on her / his own. Provided further, that the Industry / Company or academic / research institution offering such Capstone Project confirms to the University that the Capstone Project shall be conducted in accordance with the Program Regulations and Capstone Project Policy of the University.

**18.3.5** A student selected for a Capstone Project in an industry / company or academic / research institution shall adhere to all the rules and guidelines prescribed in the Capstone Project Policy of the University.

#### **18.4 Research Project / Dissertation**

A student may opt to do a Research Project / Dissertation for a period of 12-14 weeks in an Industry / Company or academic / research institution or the University Department(s) as an equivalence of Capstone Project/Internship/Project, subject to the following conditions:

18.4.1 The Research Project / Dissertation shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.

The student may do the Research Project / Dissertation in an Industry / Company or academic / research institution of her / his choice subject to the above-mentioned condition (Sub-Clause 2.6.4.1). Provided further, that the Industry / Company or academic / research institution offering such Research Project / Dissertation confirms to the University that the Research Project / Dissertation work will be conducted in accordance with the Program Regulations and requirements of the University.

**ENG2005 Technical Written Communication**

|  |   |                     |  |
|--|---|---------------------|--|
| Course Code:<br>ENG2005  | Course Name: Technical Written<br>Communication<br>Type of Course: Theory Course  | L- T-P- C           | 2-0-0-2  |
| Version No.  | 1   |                     |  |
| Course Pre-<br>requisites  | NIL   |                     |  |
| Anti-<br>requisites  | NIL   |                     |  |
| Course<br>Description  | In any workplace, people use their computers and mobiles to help them research, compose, design, revise, and deliver information and documents. Networked computers and mobile devices are the central nervous system of the technical workplace, and the course helps students to practice technical communication. The course aims at initiating writing skills in the field of technical communication concentrating product descriptions, letters, emails, memos etc. New media and communication technologies are dramatically altering technical fields at an outstanding rate. Students are prone to work more efficiently, more globally and more visually. These changes are incorporated in the course giving importance to online communication, such as, blog and online content writing. |                     |  |
| Course<br>Objective  | This course is designed to improve the learners' employability skills by using problem solving methodologies.   |                     |  |
| Course Out<br>comes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Apply strategies and techniques for organizing and drafting descriptions and specifications. [Understand]</li> <li>Develop skills in writing sentences and paragraphs for content on websites and blogs. [Understand]</li> <li>Write technical/professional emails, letters and memo [Understand]</li> </ul>   |                     |  |
| <b>Course Content:</b>   |   |                     |  |
| Module 1   | Technical Descriptions<br>and specifiacations   | Assignment          | Technical<br>Descriptions and<br>specifiacations |
| Topics:<br><ul style="list-style-type: none"> <li>Technical ICT vocabulary errors/full forms of common ICT words</li> <li>Using proper punctuation</li> <li>ICT product descriptions</li> <li>Writing instructions</li> <li>User guides (step-by-step instructions, procedures, manuals)</li> </ul>  |   |                     |  |
| Module 2   | Informative summaries   | Quiz/<br>Assignment | Informative<br>summaries                         |
| Topics:<br>1: Creating Infographics<br>2: Creating summary maps  |   |                     |  |
| Module 3   | Technical<br>Correspondence   | Assignment          | Technical<br>Correspondence                      |
| Topics:<br>Business & Official Letters, Memos and Email  |   |                     |  |

## **PPS1006 Employability for young professionals**

|   |   |                  |  |
|---|---|------------------|--|
| <b>Course Code:</b><br>PPS1006  | <b>Course Name:</b> Employability for Young Professionals<br><b>Type of Course:</b> Lab / Lab Integrated Course   | <b>L- T-P- C</b> | 0-0-2-1  |
| <b>Version No.</b>  | 1   |                  |  |
| <b>Course Pre-requisites</b>  | Students are expected to understand Basic English. Students should have desire and enthusiasm to involve, participate and learn.  |                  |  |
| <b>Anti-requisites</b>  | NIL   |                  |  |
| <b>Course Description</b>   | This course is designed to develop effective communication skills and boost confidence levels. The activity-based modules cover the art of Questioning, how to ask questions, goal setting with emphasis on time and stress management, creating the first impression and introducing one self and finally culminating with the etiquettes of email writing. The pedagogy used will be research, group discussions, flipped classrooms, continuous feedback, role-play and mentoring.                               |                  |  |
| <b>Course Objective</b>   | NIL   |                  |  |
| <b>Course Outcomes</b>  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Show effective communication skills through self- [Understand] introduction</p> <p><b>CO2</b> Analyse information through questioning technique for [Understand] better decision making</p> <p><b>CO3</b> Identify individual strengths and weaknesses for self- [Understand] awareness and stress management</p> <p><b>CO4</b> Apply SMART technique to achieve goals and increase [Understand] productivity</p> |                  |  |
| <b>Course Content:</b>  |   |                  |  |
| <b>Module 1</b>   | Art of Questioning  | Assignment       | Art of Questioning<br>4 Sessions                             |
| <p><b>Topics:</b><br/>Note Taking, Framing Questions, Open-ended and Close-ended questions, Funnel technique, Probing questions, Leading questions, Rhetorical questions, 5W1H Technique</p>  |   |                  |  |
| <b>Module 2</b>   | Goal Setting & Time management  | Assignment       | Goal Setting & Time management<br>8 Sessions                 |
| <p><b>Topics:</b><br/>Goal Setting (SMART Goals), Time Management Matrix, Steps to managing time through outbound group activity, Making a schedule, Daily Plan and calendars (To Do List), Monitoring/charting daily activity</p>  |   |                  |  |
| <b>Module 3</b>   | Self - Introduction and creating an Impression  | Assignment       | Self - Introduction and creating an Impression<br>8 Sessions |
| <p><b>Topics:</b><br/>Body Language, Grooming guidelines for boys/girls, Common mistakes in Grooming at workplace and social gathering, Etiquettes at work place &amp; social gathering, SWOT - Self-awareness analysis, Self-introduction template, evaluation of self-introduction in class</p> |   |                  |  |
| <b>Module 4</b>   | E-Mail Etiquette  | Assignment       | E-Mail Etiquette<br>6 Sessions                               |
| <p><b>Topics:</b><br/>Dos and Don'ts of professional email etiquette, practice writing emails (activity)</p>  |   |                  |  |

**PPS2002**

**Being Corporate Ready**

|  |  |            |   |
|--|--|------------|---|
| Course Code:<br>PPS2002  | Course Name: Being Corporate Ready<br>Type of Course: Lab / Lab Integrated Course  | L-T-P-C    | 0-0-2-1   |
| Version No.  | 1  |            |   |
| Course Pre-requisites  | Students are expected to understand Basic English. Students should have desire and enthusiasm to involve, participate and learn.   |            |   |
| Anti-requisites  | NIL  |            |   |
| Course Description   | The course is designed to enhance confidence level through effective communication, presentation and group discussion skills. The corporate etiquette module intends to provide an understanding of the culture and etiquettes to be followed in the corporate world. The pedagogy used will be research, group discussions, flipped classrooms, continuous feedback, role-play and mentoring. |            |   |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of "Being Corporate Ready" and attain SKILL DEVELOPMENT through PARTICIPATIVE LEARNING techniques.  |            |   |
| Course Outcomes  | <b>On successful completion of the course the students shall be able to:</b><br><b>CO1</b> Recognize the fundamental nuances of Corporate Etiquette [Understand]<br><b>CO2</b> Express thoughts/opinions in an acceptable manner in group discussions [Understand]<br><b>CO3</b> Demonstrate effective presentation skills [Understand]  |            |   |
| Course Content:  |  |            |   |
| Module 1   | Presentation skills – practice and evaluation of individual presentation   | Assignment | Presentation skills – practice and evaluation of individual presentation<br>14 Sessions |
| <b>Topics:</b><br>Presentation Skills, Opening Body & Closing Body, Audibility, Speech Clarity, Fluency, Voice Modulation, Non-verbal Communication and Body Language, Talk by Industry Expert-Outbound activity.<br>Activity: Individual presentations (10 hours)   |  |            |   |
| Module 2   | Group Discussions – Practice and feedback  | Assignment | Group Discussions – Practice and feedback<br>8 Sessions                                 |
| <b>Topics:</b><br>Group Discussion techniques, Idea Generation, Mind Mapping, DEF, GOD, Action Plans for GD, Alumni Talk.<br>Activity: Group Discussions   |  |            |   |
| Module 3   | Corporate Etiquette  | Assignment | Corporate Etiquette<br>2 Sessions   |
| <b>Topics:</b><br>Do's and Don'ts in an Office Meeting, Handshake, Use of Business Card, Understanding Dress Code, Accessorizing Professionally, Telephone Etiquette, Interacting with Colleagues, Culture & Gender sensitization, Introduction to common tools at workplace for example CRM, POS, LMS, CANVA etc. |  |            |   |
| Module 4   | Recap, Revision & Feedback session   | Assignment | Recap, Revision & Feedback session<br>2 Sessions  |
| <b>Topics:</b><br>Revision of all the modules, overall feedback from the students about the syllabus.  |  |            |   |
| <b>E-Resources</b><br>YouTube Links: <a href="https://youtu.be/z_jxoczNWc">https://youtu.be/z_jxoczNWc</a><br>TED Talks: <a href="https://youtu.be/xkq8dr_5ofs">https://youtu.be/xkq8dr_5ofs</a>   |  |            |   |

## PPS3001 Problem Solving through Aptitude

|   |  |            |                                  |
|---|--|------------|----------------------------------|
| Course Code:<br>PPS3001   | Course Name: Problem Solving through Aptitude<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 0-0-2-1                          |
| Version No.   | 1  |            |                                  |
| Course Pre-requisites   | Students should know the basic Mathematics & aptitude along with understanding of English  |            |                                  |
| Anti-requisites   | NIL  |            |                                  |
| Course Description  | The objective of this course is to prepare the trainees to tackle the questions on various topics and various difficulty levels based on Quantitative Ability, and Logical Reasoning asked during the placement drives. There will be sufficient focus on building the fundamentals of all the topics, as well as on solving the higher order thinking questions. The focus of this course is to teach the students to not only get to the correct answers, but to get there faster than ever before, which will improve their employability factor. |            |                                  |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Aptitude and attain Skill Development through Problem Solving techniques.  |            |                                  |
| Course Out Comes  | <b>On successful completion of the course the students shall be able to:</b><br><b>CO1</b> Recall all the basic mathematical concepts they learnt in [Understand] high school.<br><b>CO2</b> Identify the principle concept needed in a question. [Understand]<br><b>CO3</b> Solve the quantitative and logical ability questions with [Understand] the appropriate concept.<br><b>CO4</b> Analyze the data given in complex problems. [Understand]  |            |                                  |
| Course Content:   |  |            |                                  |
| Module 1  | Quantitative Ability   | Assignment | Quantitative Ability 10 Sessions |
| <b>Topics:</b><br>Introduction to Aptitude, working of Tables, Squares, Cubes, Number Series, Wrong number series, Letter series.   |  |            |                                  |
| Module 2  | Logical Reasoning  | Assignment | Logical Reasoning 20 Sessions    |
| <b>Topics:</b><br>Linear & Circular Arrangement Puzzle, Coding & Decoding, Blood Relations, Directions, Ordering and Ranking, Clocks and Calendars  |  |            |                                  |
| <b>Text Book</b><br>T1. Quantitative Aptitude by R S Aggarwal<br>T2. Verbal & Non-Verbal Reasoning by R S Aggarwal  |  |            |                                  |

## Skill Enhancement Courses

### CSA1001 Problem solving using C

|  |  |            |              |             |   |   |   |  |  |  |  |
|--|--|------------|--------------|-------------|---|---|---|--|--|--|--|
| CSA1001  | Course Title: Problem solving using C<br>Type of Course: Program Core Theory and Laboratory Integrated   |            | L-T-P-C      | 2           | 0 | 4 | 4 |  |  |  |  |
| Version No.  | 1.0  |            |              |             |   |   |   |  |  |  |  |
| Course Pre-requisites  | Basic knowledge about the computer and its usage   |            |              |             |   |   |   |  |  |  |  |
| Anti-requisites  | NIL  |            |              |             |   |   |   |  |  |  |  |
| Course Description   | This Course will provide an introduction to foundational concepts of computer programming to students of BCA program. Topics covered in this Course are problem formulation and development of simple programs, Pseudo code, Flow Chart, Algorithms, data types, operators, decision making and branching, looping statements, arrays, functions, structures, Union, File handling and pointers. In the lab session students are required to solve problems based on the above concepts to illustrate the features of the structured programming |            |              |             |   |   |   |  |  |  |  |
| Course Objectives  | The objective of the course is to familiarize the learners with the concepts of Problem-Solving Using C and attain Skill Development through Experiential Learning techniques.   |            |              |             |   |   |   |  |  |  |  |
| Course Out Comes   | On successful completion of the course the students shall be able to:<br>CO1: Identify the solution to the problem through programming [Understand]<br>CO2: Apply the basic concepts and control structures of programming to solve the problem. [Apply]<br>CO3: Interpret the concepts of array and strings to represent data and its operations. [Apply]<br>CO4: Demonstrate the concepts of functions, structures and unions in solving the related scenarios. [Apply]  |            |              |             |   |   |   |  |  |  |  |
| Course Content:  |  |            |              |             |   |   |   |  |  |  |  |
| Module 1   | Introduction to C Programming  | Assignment | Case Studies | 12 Sessions |   |   |   |  |  |  |  |
| Topics:<br>Introduction to C: Background, Computer basics, Problem solving techniques, Tokens, Input/ Output statements, Structure of C program. |  |            |              |             |   |   |   |  |  |  |  |
| Module 2   | Control statements in C  | Assignment | Programming  | 20 Sessions |   |   |   |  |  |  |  |
| Topics: Type Casting, Expression Evaluation, Conditional and unconditional statement, Looping statements   |  |            |              |             |   |   |   |  |  |  |  |
| Module 3   | Arrays and Strings   | Assignment | Mini Project | 21 Sessions |   |   |   |  |  |  |  |
| Topics: One dimensional Array, Array operations, 2D Array, 2D Array operations, Strings and its operations, String manipulation functions.       |  |            |              |             |   |   |   |  |  |  |  |
| Module 4   | Functions, Structures and Unions, Pointers   | Assignment | Programming  | 10 Sessions |   |   |   |  |  |  |  |
| Topics: Categories of functions, concept of modular programming, user defined datatypes, structures, union, pointers, file handling              |  |            |              |             |   |   |   |  |  |  |  |
|  |  |            |              |             |   |   |   |  |  |  |  |

| Course Code:<br>CSA1002 | Course Title: Web Design and Development<br>Type of Course: Laboratory integrated   | L-T-P-C    | 1 0 4 3                      |
| Version No.             | 1.0   |            |                              |
| Course Pre-requisites   |   |            |                              |
| Anti-requisites         | NIL   |            |                              |
| Course Description      | <p>This course is designed to build the student's knowledge on web design and development to an intermediate level. Students will learn the fundamental languages and markups for front-end web programming and back end languages. By the end of this course, students should be able to design, program and publish a working and atheistic website. Students will also go through the process of working in a client/server side programming and learning skills which is necessary to successfully fulfill each role.</p> <p>The associated laboratory provides a platform to implement the various programming language to design web pages and enhance critical thinking and analytical skills.</p> |            |                              |
| Course Objectives       | The objective of the course is to familiarize the learners with the concepts of Web Design and Development and attain Skill Development through Experiential Learning techniques.   |            |                              |
| Course Outcomes         | <p>On successful completion of this course the students shall be able to:</p> <ul style="list-style-type: none"> <li>Design static and dynamic web pages using HTML, CSS and Java Script.<br/>[Application]</li> <li>Use JavaScript to write modern, reactive dynamic Websites (Client-side programming). [Application]</li> <li>Understand PHP language and use them while applying the principles of object-oriented development. [Application]</li> <li>Design server-side programming on the web using PHP.<br/>[Application]</li> </ul>  |            |                              |
| Course Content:         |   |            |                              |
| Module 1                | Introduction to HTML and CSS(Application)   | Assignment | Programming activity 6 Hours |
| Topics:                 | <p>Introduction to HTML: fundamentals of HTML elements, Document body, text, hyperlink, lists, tables, color and images, frames;</p> <p>Cascading Style Sheets: Introduction, defining your own styles, properties and values in styles, style sheets, formatting blocks, and layers.</p>   |            |                              |
| Module 2                | Designing of simple pages<br>(Application)  | Assignment | Programming activity 6 Hours |
| Topics:                 | <p>JavaScript: JavaScript basics, variables, string manipulation, mathematical functions, statements, operators, arrays and functions. Objects in JavaScript: Data and objects in JavaScript, regular expressions, exception handling, built-in objects, events;</p> <p>Dynamic HTML with JavaScript: Data validation, opening a new window, Rollover buttons, moving images, multiple pages in a single download, floating logos.</p>  |            |                              |
| Module 3                | Server Side Development<br>(Application)  | Assignment | Programming activity 6 Hours |
| Topics:                 | <p>Introduction to PHP, variables, control statements, loops, Arrays, string handling, PHP forms, Global variables in PHP, Regular expression and pattern matching. State management in web applications, cookies, Application and session state. Basic database concepts, connecting to a My SQL database, retrieving and displaying results, modifying, updating and deleting data</p>  |            |                              |
| Errors Handling:        | <p>Error Handling and Validation, What are errors and Exceptions?, PHP Error Reporting, PHP Error and Exceptions Handling</p>   |            |                              |

## CSA1004 Programming in Python

|  |  |                         |   |                    |   |   |
|--|--|-------------------------|---|--------------------|---|---|
| <b>Course Code:</b><br><b>CSA1004</b>  | <b>Course Title:</b> Programming In Python<br><b>Type of Course:</b> Theory & Integrated Laboratory  | <b>L-T-P-C</b>          | 1   | 0                  | 4 | 3 |
| <b>Version No.</b>   | 1.0  |                         |   |                    |   |   |
| <b>Course Pre-requisites</b>   | Nil  |                         |   |                    |   |   |
| <b>Anti-requisites</b>   | NIL  |                         |   |                    |   |   |
| <b>Course Description</b>  | <p>This course provides the opportunity for the students of Computer Science engineering to develop Python scripts using its powerful programming features like lists, sets, tuples, dictionaries and sets. Students will also be introduced to object oriented programming concepts and packages for data visualization.</p> <p>Topics include: Basics of Python programming, operators and expressions, decision statements, loop control statements, functions, strings, lists, list processing : searching and sorting, nested list, list comprehension, tuples and dictionaries, sets, file handling, exception handling, object oriented programming concepts, modules and packages for data visualization</p> |                         |   |                    |   |   |
| <b>Course Objective</b>  | <p>The objective of the course is to familiarize the learners with the concepts of Problem Solving Using Python and attain <b>Skill Development</b> through <b>Experiential Learning</b> techniques.</p>   |                         |   |                    |   |   |
| Course Out Comes   | <p>On successful completion of the course the students shall be able to:</p> <ol style="list-style-type: none"> <li>1. Demonstrate problem solving through understanding the basics of python (Apply)</li> <li>2. Manipulate functions and data structures. (Apply)</li> <li>3. Apply Tuple, Dictionaries, File and Exception Handling concepts to solve real time problems (Apply)</li> <li>4. Practice object-oriented programming (Apply)</li> <li>5. Produce data visualization using modules and packages (Apply)</li> </ol>  |                         |   |                    |   |   |
| <b>Course Content:</b>   |  |                         |   |                    |   |   |
| <b>Module 1</b>  | <b>Problem Solving Techniques and Basics of Python Programming</b>   | assignments             | Quizzes form basics of python               | <b>15 Sessions</b> |   |   |
| Basics of problem solving techniques, Basics of Python programming, operators and expressions, decision statements, loop control statements. |  |                         |   |                    |   |   |
| <b>Module 2</b>  | <b>Function, String and List</b>   | Quizzes and assignments | Comprehension based Quizzes and assignments | <b>20 Sessions</b> |   |   |

**CSA1504      Object Oriented Programming using Java**

|  |  |            |  |
|--|--|------------|--|
| Course Code: CSA1504   | Course Name: Object Oriented Programming using Java<br>Type of Course: Lab Course  | L- T-P- C  | 1-0-4-3  |
| Version No.  | 1  |            |  |
| Course Pre-requisites  | Nil  |            |  |
| Anti-requisites  | Nil  |            |  |
| Course Description   | The main objective is to learn the basic concept and techniques which form the object-oriented programming paradigm. Object-oriented programming is a new way of thinking about problem using models organized around real world concept. It investigates the software engineering principles of encapsulation, information hiding and code reuse, and discusses how these concepts are used to build abstract data types. The object oriented programming features of classes, inheritance, polymorphism and composition are studied, along with constructors and method overloading. Students implement Java programs incorporating features from the Java programming language. |            |  |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Object Oriented Programming Using Java and attain Skill Development through Experiential Learningtechniques.   |            |  |
| Course Out Comes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> 1. Discuss the OOP's concept and Apply the [Apply] concepts to design, implement, compile, test and execute simple Java programs</p> <p><b>CO2</b> Explain the concepts related to classes and Use built-in [Understand] methods of String and String Buffer classes.</p> <p><b>CO3</b> Implement concepts of Constructors, Polymorphism, [Apply] Inheritance, Interfaces and Packages with programs</p> <p><b>CO4</b> Design the GUI form using Applet and Swing [Apply] components</p>   |            |  |
| Course Content:  |  |            |  |
| Module 1   | Introduction to OOP : Class and Object   | Assignment | Introduction to OOP : Class and Object<br>20 Sessions    |
| <p><b>Topics:</b><br/>Defining an Array, Initializing &amp; Accessing Array, Multi -Dimensional Array, Strings: Operation on String, Mutable &amp; Immutable String, Creating Strings using String Buffer or StringBuilder. String Constant Pool, String Internal representation, String Application. Tokenizing a String.<br/>Inheritance and Polymorphism: Use and benefits of inheritance in OOP, Types of Inheritance, Method overriding, super keyword, Final, Polymorphism in inheritance, Abstract, this keyword.</p> |  |            |  |
| Module 2   | Arrays, Strings , Extending Class  | Assignment | Arrays, Strings , Extending Class<br>20 Sessions         |
| <p><b>Topics:</b><br/>Defining an Array, Initializing &amp; Accessing Array, Multi -Dimensional Array, Strings: Operation on String, Mutable &amp; Immutable String, Creating Strings using String Buffer or StringBuilder. String Constant Pool, String Internal representation, String Application. Tokenizing a String.<br/>Inheritance and Polymorphism: Use and benefits of inheritance in OOP, Types of Inheritance, Method overriding, super keyword, Final, Polymorphism in inheritance, Abstract, this keyword.</p> |  |            |  |
| Module 3   | Interface, Package and Exception Handling  | Assignment | Interface, Package and Exception Handling<br>20 Sessions |
| <p><b>Topics:</b><br/>Introduction to threads, life cycle of a thread, Creating Threads, Extending the Thread Class, Implementing the Runnable interface, priority of a thread, synchronization, Inter communication of Threads.<br/>JAVA File I/O - Byte Stream - InputStream - OutputStream - FileInputStream - FileOutputStream - The Character Streams - Reader - Writer - FileReader - FileWriter</p>   |  |            |  |
| Module 4   | Collection & GUI Programming   | Assignment | Collection & GUI Programming<br>15 Sessions              |
| <p><b>Topics:</b><br/>The Collection Framework : Collections of Objects , Collection Types, Sets , Sequence, Map, Understanding Hashing, Use of ArrayList&amp; Vector<br/>Graphics Programming: Introduction, the abstract window toolkit (AWT), Layout managers, Frames, Panels, Drawing geometric figures, Keyboard Event and Mouse Event.<br/>Creating User Interface: Introduction, describe various user interface Components: button, label, text field, text area, choice, list, check box.</p>                       |  |            |  |

### List of Laboratory Tasks

List of Laboratory Tasks:

43

Lab sheet -1

Experiment No 1:

Level1 -Programs using Control statements Methods with Parameters, Methods with control statements

Level2 - Demonstrations of Class, Object, Constructor, Static member, Encapsulation, Inner Class

|   |  |            |   |
|---|--|------------|---|
| Course Code:<br>CSA2511   | Course Name: Android Mobile Application Development<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 0-0-6-3   |
| Version No.   | 1  |            |   |
| Course Pre-requisites   | CSA1504  |            |   |
| Anti-requisites   | NIL  |            |   |
| Course Description  | The course provides a basics of android platform and application life cycle. The goal of the course is to develop mobile applications with Android containing at least one of the following phone material components: GPS, accelerometer or phone camera, use simple GUI applications and work with database to store data locally or in a server. Topics include user interface design; user interface building; input methods; data handling; network techniques and URL loading; GPS and motion sensing. Android application framework and deployment. Power management, Screen resolution, Touch interface, Store data on the device. |            |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Android Application Development and attain Skill Development through Experiential Learning techniques.   |            |   |
| Course Out Comes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Discuss the fundamentals of mobile application [Understand] development and architecture. [Understand]</p> <p><b>CO2</b> Illustrate mobile applications with appropriate android [Apply] view.</p> <p><b>CO3</b> Demonstrate the use of services, broadcast receiver, [Apply] Notifications and content</p> <p><b>CO4</b> Apply data persistence techniques, to perform CRUD [Apply] operations.</p>   |            |   |
| <b>Course Content:</b>  |  |            |   |
| Module 1  | Introduction and Architecture of Android   | Assignment | Introduction and Architecture of Android<br>20 Sessions |
| <p><b>Topics:</b><br/>Android: History and features, Architecture, Development Tools, Android Debug Bridge (ADB), and Life cycle.</p>   |  |            |   |
| Module 2  | User Interfaces, Intent and Fragments  | Assignment | User Interfaces, Intent and Fragments<br>20 Sessions    |
| <p><b>Topics:</b><br/>Views, Layout, Menu, Intent and Fragments.</p>  |  |            |   |
| Module 3  | Components of Android  | Assignment | Components of Android<br>20 Sessions                    |
| <p><b>Topics:</b><br/>Activities, Services, Broadcast receivers, Content providers, User Navigation</p>   |  |            |   |
| Module 4  | Notifications and Data Persistence   | Assignment | Notifications and Data Persistence<br>30 Sessions       |
| <p><b>Topics:</b><br/>Notification, Shared Preferences, SQLite database, Android Room with a View, Firebase</p>   |  |            |   |
| <p><b>List of Laboratory Tasks</b></p> <p>Graphics and Animation, Sensors, Performance, Location, Places, Mapping, Custom Views, Canvas.</p> <p>List of Laboratory Tasks</p> <p>1.a. Design an app to read user inputs using edit text and display the result of arithmetic operations using toast message.</p> <p>1.b. Create an android app to calculate the current age of yourself, select your DOB using date picker.</p> <p>2.a. Design an app to input your personal information. Use autocomplete text view to select your place of birth.</p> <p>2.b. Design an app to select elective course using spinner view and on click of the display button, toast your ID and selected elective course.</p> <p>3. Design a restaurant menu app to print the total amount of orders.</p> <p>4. Develop an android app that uses intent to maintain the following scenario. Check the eligibility criteria for voting. Input the Aadhar no., Name &amp; age in the first activity. If the age is above 18, display the voter's detail in the second activity. Else, display, "You are not eligible to vote" in the second Activity.</p> <p>5. Demonstrate the use of fragment with list of buttons representing various colors, and on click of these buttons, the appropriate color is filled in the next fragment.</p> <p>Create an Android application to input the vitals of a person (temperature, BP). If the vitals are abnormal, give proper notification to the user.</p> <p>6. Create an android app to for movie ticket booking. Save the user name of the customer using shared preferences. After completion of booking, retrieve the username from the shared preferences and print the ticket details.</p> <p>7. Create an android application to manage the details of students' database using SQLite. Use necessary UI components, which perform the operations such as insertion, modification, removal and view. Presidency University needs an APP for Admission eligibility checking for students, for that you need to take the following information from the Student: registration ID, physics, chemistry and mathematics marks (PCM), fees is allotted as below criteria.</p> |  |            |   |

**CSA2519   Database System Administration**

|  |   |            |   |
|--|---|------------|---|
| Course Code: CSA2519   | Course Name: Database System Administration<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 1-0-4-3   |
| Version No.  | 1   |            |   |
| Course Pre-requisites  | Relational Database Management Systems  |            |   |
| Anti-requisites  | Nil   |            |   |
| Course Description   | This lab-oriented course provides hands-on experience in the core functions of a Database Administrator (DBA). Students will gain practical skills in installing and configuring database systems, managing users and roles, implementing data security, performing backup and recovery, tuning system performance, and automating routine tasks. The course emphasizes real-world administrative scenarios to prepare students for roles in database management and enterprise system maintenance. By the end of the course, students will be able to manage a fully functioning database environment with a focus on security, efficiency, and reliability. |            |   |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Database Administrator Lab and attain Employability Skills through Experiential Learning techniques.  |            |   |
| Course Out Comes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Apply database installation and configuration procedures [Apply] to set up and manage a secure DBMS environment.</p> <p><b>CO2</b> Implement backup, recovery, and user management [ Apply] operations for maintaining database integrity and availability.</p> <p><b>CO3</b> Implement security and Access management in cloud [Apply] services</p>  |            |   |
| Course Content:  |   |            |   |
| Module 1   | Database Setup, User Management & Security  | Assignment | Authentication mechanisms and access control<br>25 Sessions |
| <p><b>Topics:</b><br/>Installation and configuration of DBMS - Creating and managing databases - Tablespace and storage structure management - User creation, role assignment, and privilege management - Authentication mechanisms and access control- Database auditing and security best practices- Tools: Command-line utilities, pgAdmin/phpMyAdmin/SQL Developer</p>   |   |            |   |
| Module 2   | Backup, Recovery, Performance & Automation  | Assignment | 25 Sessions   |
| <p><b>Topics:</b><br/>Backup strategies: full, incremental, and differential backups - Recovery techniques and crash simulation - Query performance tuning and indexing strategies - Using EXPLAIN PLAN, slow query logs, and optimization tips - Scheduling tasks using cron jobs or DBMS schedulers - Automation of maintenance tasks (backup scripts, health checks) - Basic replication setup</p>  |   |            |   |
| Module 3   | Introduction to Cloud-Based Database Administration   | Assignment | Design methodologies<br>25 Sessions                         |
| <p><b>Topics:</b><br/>Introduction to Cloud Computing and Database as a Service (DBaaS) - Creating and Managing AWS RDS Instances - Provisioning and Configuring Azure SQL Databases - Security and Access Management in Cloud Databases - Backup and Restore Operations on Cloud Platforms - Connecting Cloud Databases from Local Clients and Tools</p>  |   |            |   |
| <p><b>List of Laboratory Tasks</b></p> <ol style="list-style-type: none"> <li><b>Experiment 1:</b> Install and configure MySQL/PostgreSQL/Oracle Database</li> <li><b>Experiment 2:</b> Create a new database and manage tablespaces (MySQL/PostgreSQL)</li> <li><b>Experiment 3:</b> Create and manage database users and roles</li> <li><b>Experiment 4:</b> Implement user privileges and access control (GRANT, REVOKE)</li> <li><b>Experiment 5:</b> Perform basic security hardening of a DBMS</li> <li><b>Experiment 6:</b> Implement database authentication mechanisms (password, SSL)</li> <li><b>Experiment 7:</b> Setup and configure database auditing and logging</li> <li><b>Experiment 8:</b> Manage database backups using mysqldump/pg_dump and Oracle RMAN</li> <li><b>Experiment 9:</b> Restore a database from backup and perform crash recovery</li> <li><b>Experiment 10:</b> Create and configure database replication (Master-Slave for MySQL/PostgreSQL)</li> <li><b>Experiment 11:</b> Perform full, incremental, and differential backups</li> <li><b>Experiment 12:</b> Set up and configure automated backup schedules using cron jobs (Linux)</li> <li><b>Experiment 13:</b> Monitor database health using performance views and logs</li> <li><b>Experiment 14:</b> Optimize slow queries using EXPLAIN PLAN and indexing strategies</li> <li><b>Experiment 15:</b> Analyze and tune system performance based on query execution plans</li> <li><b>Experiment 16:</b> Set up automated database maintenance tasks (index rebuilding, backups)</li> <li><b>Experiment 17:</b> Use Linux tools like iostat, vmstat, and top to monitor system resources</li> <li><b>Experiment 18:</b> Setup and configure a basic MySQL/PostgreSQL database cluster (if applicable)</li> <li><b>Experiment 19:</b> Implement database partitioning for performance optimization</li> <li><b>Experiment 20:</b> Perform database scaling on cloud platforms (AWS RDS / Azure SQL) and monitor performance</li> </ol> |   |            |   |

|---|---|------------|---|
| Course Code: CSA2211  | Course Name: UI/UX Design<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 0-0-6-3   |
| Version No.   | 1   |            |   |
| Course Pre-requisites   | Nil   |            |   |
| Anti-requisites   | Nil   |            |   |
| Course Description  | The UI/UX Design brings a design-centric approach to user interface and user experience design, and offers practical, skill-based instruction centered on a visual communications perspective, rather than one focused on marketing or programming alone. User interface and user experience design is a high-demand field, but the skills and knowledge you will learn in this Specialization are applicable to a wide variety of careers, from marketing to web design to human-computer interaction. The course is foundational and hands-on learning in using popular design tools such as Figma. |            |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of UI/UX Design and attain Employability Skills through Experiential Learning techniques.  |            |   |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> CO1 : Explain the UX Design principles [Understand] [Understand]</p> <p><b>CO2</b> CO2 : Summarize the ideal user experience. [Understand] [Understand]</p> <p><b>CO3</b> CO3 : Develop wireframes using digital tools [Apply] [Apply]</p> <p><b>CO4</b> CO4 : Construct personas and evaluate designs [Apply] [Apply]</p>  |            |   |
| Course Content:   |   |            |   |
| Module 1  | Introduction to UI/UX   | Assignment | Introduction to UI/UX<br>20 Sessions                    |
| <p><b>Topics:</b><br/>Introduction to User Experience, Importance of UX-design, Different sub- disciplines within UX, job opportunities in UX field/domain. Rol, KPI, Stakeholders of UX team, trade-offs, UX Design definition. Basics of Interaction Design, User Research, Visual Design, Motion Design.</p>   |   |            |   |
| Module 2  | Users and User Centered Design  | Assignment | Users and User Centered Design<br>20 Sessions           |
| <p><b>Topics:</b><br/>Users and end users, User Centered design framework, 7 principles of UX design, 4 stages of user centered design, 5-elements framework. Design thinking process, Lean UX, Double Diamond, designing for the next billion users, designing for multiple platforms, the four Cs of designing for multiple platform</p>  |   |            |   |
| Module 3  | Design methodologies  | Assignment | Design methodologies<br>20 Sessions                     |
| <p><b>Topics:</b><br/>Universal design, 7 principles of universal design, inclusive design and accessible design, and equity-focused design. Equality and equity. Designing for accessibility, Lenses of Accessibility, assistive technology, design sprints. Wireframing, importance of wireframing. Compatibility with wearable devices.</p>  |   |            |   |
| Module 4  | Personas, developing mockups using Figma  | Assignment | Personas, developing mockups using Figma<br>30 Sessions |
| <p><b>Topics:</b><br/>Basics of personas, creating personas, perspectives on personas. Gestalt principles of perception, Usability Testing, acceptance testing, creating mockups and prototypes in Figma.</p>   |   |            |   |
| <p><b>List of Laboratory Tasks</b></p> <p>List of Laboratory Tasks:</p> <p>Experiment No. 1: Installation and Interface of Balsamiq and/or Figma</p> <p>Level 1: Ensure that both Balsamiq and Figma are up and running with user accounts.</p> <p>Level 2: Download and import design files from internet to familiarize with them.</p> <p>Experiment No. 2: Create wireframe of the login screen of a mobile app</p> <p>Level 1: Make first wireframe of one login page</p> <p>Level 2: Make two pages that are hyperlinked and critique the design</p> <p>Experiment No. 3: Final wireframe experiment.</p> <p>Level 1: Prepare the wireframe of all the pages of a selected website</p> <p>Level 2: Change the wireframe to make the design changes to the website</p> <p>Experiment No. 4: First Figma experiment.</p> <p>Level 1: Figma interface, shortcuts and tools.</p> <p>Level2: Create and move between frames.</p> <p>Experiment No. 5: Design App Screen</p> <p>Level 1: Create layout, layers, fill colours</p> <p>Level 2: Set layer opacity, lock and unlock layers</p> <p>Experiment No. 6: Logo and icon</p> <p>Level 1: Boolean operations on shapes, pen tool</p> <p>Level2: Make smiley face</p> <p>Experiment No.7: Create an app face.</p> <p>Level1: Insert image, design nav bar using logo and icons</p> <p>Level 2: Duplicate frame</p> <p>Experiment No.8: Create a prototype</p> <p>Level1: Use designing and prototyping modes</p> <p>Level 2: Create connections between frames and layers</p> <p>Experiment No.9: Create a mobile application</p> |   |            |   |

**CSA2212    Internet of Things**

|  |  |            |  |
|--|--|------------|--|
| Course Code:<br>CSA2212  | Course Name: Internet of Things<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 1-0-4-3  |
| Version No.  | 1  |            |  |
| Course Pre-requisites  | The IoT course requires basic knowledge of programming (Python, C, or Arduino), electronics (sensors, actuators, microcontrollers), and networking (IP addressing, communication protocols). Familiarity with cloud computing for data storage and processing is beneficial. Logical thinking and problem-solving skills are essential for designing and troubleshooting IoT systems. These prerequisites ensure a smooth learning experience and practical application of IoT concepts. |            |  |
| Anti-requisites  | NIL  |            |  |
| Course Description   | The Internet of Things (IoT) course provides a comprehensive understanding of IoT concepts, architectures, and applications. It covers hardware and software components, communication protocols, data analytics, and security. Learners will gain hands-on experience in building and deploying IoT solutions.  |            |  |
| Course Objective   | To understand the fundamental concepts and architecture of IoT. To explore IoT communication protocols and networking technologies. To develop hands-on skills in sensor interfacing, data acquisition, and cloud integration. To implement security measure   |            |  |
| Course Out Comes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Explain IoT architecture, components, and [Understand] communication protocols.</p> <p><b>CO2</b> Implement IoT networks using different communication [Apply] protocols.</p> <p><b>CO3</b> Process and analyze IoT-generated data for decision-making. [Analyze]</p> <p><b>CO4</b> Secure IoT applications and optimize performance. [Create]</p>                                     |            |  |
| Course Content:  |  |            |  |
| Module 1   | Introduction to IoT  | Assignment | Introduction to IoT<br>19 Sessions               |
| <p><b>Topics:</b><br/>IoT Fundamentals and Architecture, IoT Components: Sensors, Actuators, and Microcontrollers, IoT Communication Technologies (Wi-Fi, Bluetooth, LoRa, Zigbee), Hands-on: Setting up a Basic IoT System</p>  |  |            |  |
| Module 2   | IoT Communication and Networking   | Assignment | IoT Communication and Networking<br>19 Sessions  |
| <p><b>Topics:</b><br/>IoT Networking Protocols: MQTT, CoAP, HTTP, Cloud Computing for IoT: AWS, Google Cloud, and Azure IoT, Edge Computing and Fog Computing in IoT, Hands-on: Implementing MQTT for IoT Data Transmission</p>  |  |            |  |
| Module 3   | IoT Data Processing and Analytics  | Assignment | IoT Data Processing and Analytics<br>19 Sessions |
| <p><b>Topics:</b><br/>IoT Data Collection and Storage Techniques, Real-time Data Analytics in IoT, AI and Machine Learning for IoT Applications, Hands-on: Building an IoT Dashboard for Data Visualization</p>  |  |            |  |
| Module 4   | IoT Security and Applications  | Assignment | IoT Security and Applications<br>18 Sessions     |
| <p><b>Topics:</b><br/>Security Challenges in IoT: Authentication, Encryption, and Privacy, Case Studies of IoT in Smart Cities, Healthcare, and Industrial Automation, IoT System Optimization and Power Management, Hands-on: Securing an IoT Network with Encryption Techniques</p>  |  |            |  |
| <p><b>List of Laboratory Tasks</b></p> <p>Basic IoT Hardware and Setup</p> <ol style="list-style-type: none"> <li>1. Getting Started with Arduino/Raspberry Pi - Set up and run a simple LED blinking program.</li> <li>2. Sensor Interfacing - Connect and read data from temperature, humidity, and motion sensors.</li> <li>3. Actuator Control - Control a servo motor and buzzer based on sensor inputs.</li> <li>4. Building a Smart Home Automation System - Control lights and fans using IoT-based relays.</li> </ol> <p>IoT Communication and Networking</p> <ol style="list-style-type: none"> <li>5. Connecting IoT Devices to Wi-Fi - Establish communication between a microcontroller and a Wi-Fi module.</li> <li>6. Data Transmission using MQTT Protocol - Implement a publisher-subscriber model for IoT messaging.</li> <li>7. HTTP and REST API Integration - Send sensor data to a cloud server and retrieve responses.</li> <li>8. Bluetooth-based IoT Communication - Transfer data between IoT devices using Bluetooth.</li> </ol> <p>Cloud Computing and Data Analytics</p> <ol style="list-style-type: none"> <li>9. Storing IoT Data on the Cloud - Send real-time sensor data to Firebase/AWS IoT Core.</li> <li>10. Visualizing IoT Data with Dashboards - Create live data graphs using ThingSpeak or Grafana.</li> </ol> <p>11. Edge Computing for IoT - Process IoT data locally before sending it to the cloud</p> |  |            |  |

**CSA7000      Summer Internship**

|                         |  |         |   |   |   |   |  |  |  |  |  |
|-------------------------|--|---------|---|---|---|---|--|--|--|--|--|
| Course Code:<br>CSA7000 | Course Name: Summer Internship<br>Type of Course: NTCC   | L-T-P-C | - | - | - | 3 |  |  |  |  |  |
| Version No.             | 1  |         |   |   |   |   |  |  |  |  |  |
| Course Description      | The <b>Summer Internship</b> program is designed to provide students with industry exposure and hands-on experience in real-world IT environments. It allows students to apply their theoretical knowledge to practical scenarios, develop technical and professional skills, and understand workplace dynamics. The internship helps bridge the gap between academic learning and industry expectations, preparing students for future employment or entrepreneurship.  |         |   |   |   |   |  |  |  |  |  |
| Course Objective        | The objective of the course is to familiarize the learners with the concepts of Summer Internship and attain Employability Skills through Experiential Learning techniques.  |         |   |   |   |   |  |  |  |  |  |
| Course Outcomes         | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Analyze industry requirements and understand [ Analyze] workplace expectations.</p> <p><b>CO2</b> Apply programming, design, and development skills to [ Apply] real-world projects.</p> <p><b>CO3</b> Evaluate project challenges, propose solutions, and [ Evaluate] document technical work effectively</p> <p><b>CO4</b> Demonstrate professional ethics, teamwork, and [ Apply] communication skills in an industry setting</p> |         |   |   |   |   |  |  |  |  |  |

#### **Internship - Schedule**

| Week            | Activity                                 | Deliverable                                |
|-----------------|--|--|
| <b>Week 1</b>   | Orientation & Onboarding                 | Internship Proposal & Work Plan Submission |
| <b>Week 2-3</b> | Initial Project Research & Training      | Daily Work Log                             |
| <b>Week 4-5</b> | Mid-Term Review & Progress Update        | Mid-Term Progress Report                   |
| <b>Week 6-7</b> | Project Implementation & Problem Solving | Codebase/Prototype Development             |
| <b>Week 8</b>   | Documentation & Final Review             | Final Internship Report                    |
| <b>Week 9</b>   | Presentation & Viva                      | Internship Presentation & Evaluation       |

#### **Rubrics:**

Component  
 Internship Proposal & Work Plan  
 Technical Contribution & Performance  
 Final Report & Documentation  
 Presentation & Viva

#### **Mini Project Schedule**

1. Title confirmation with the Project Supervisors
2. Project Titles confirmation/Submission of Abstracts.
3. I - Review
4. Problem Statement and Module Design
5. II - Review
6. Application Development
7. III - Review
8. Complete Implementation Results/ Demonstrations
9. Project Documentation Submission
10. Final Documentation submission/ Review the Status of Research Paper
11. Final Review
12. Results and Project Document/Presentation

#### **Rubrics:**

1. Project Scope, Planning And Task Definition
2. Literature Review And Problem identification
3. Preliminary Design Selection
4. Detailed System Design/Technical Details
5. End Term Viva
6. Project Report
7. \*Supervisor
8. Publication/Certification

## CSA7300 Project

|  |  |         |   |   |   |   |  |  |  |  |  |  |
|--|--|---------|---|---|---|---|--|--|--|--|--|--|

## Core Courses

### MAT2007 Applied Mathematics

|  |   |  |                  |   |                   |   |   |  |  |  |
|--|---|--|------------------|---|-------------------|---|---|--|--|--|
| <b>Course Code:</b><br><b>MAT2007</b>  | <b>Course Title:</b> Applied Mathematics<br><b>Type of Course:</b> School Core  |  | <b>L- T-P- C</b> | 3 | 0                 | 0 | 3 |  |  |  |
| <b>Version No.</b>   | 2.0   |  |                  |   |                   |   |   |  |  |  |
| <b>Course Pre-requisites</b>   | Nil   |  |                  |   |                   |   |   |  |  |  |
| <b>Anti-requisites</b>   | Nil   |  |                  |   |                   |   |   |  |  |  |
| <b>Course Description</b>  | The course provides an overview of the fundamental ideas of trigonometry and analytical geometry keeping in mind the geometrical approach to solving real-world problems. The course provides insights into the deeper aspects of differential calculus and its applications. It also covers various methods of integration and their significance. In addition, the course highlights the importance of matrix techniques and their advantages.      |  |                  |   |                   |   |   |  |  |  |
| <b>Course Objective</b>  | The objective of the course is to <b>familiarize the learners with the concepts of “Applied Mathematics” and attain Skill Development through Problem Solving techniques.</b>   |  |                  |   |                   |   |   |  |  |  |
| <b>Course Outcomes</b>   | On successful completion of the course the students shall be able to:<br>CO1: Understand the basic principles of trigonometry and analytical geometry and their applications. [Understand]<br>CO2: Comprehend the concepts of differential calculus and its applications. [Understand]<br>CO3: Explain various methods of integration and their advantages. [Understand]<br>CO4: Apply matrix techniques to solve system of linear equations. [Apply] |  |                  |   |                   |   |   |  |  |  |
| <b>Course Content:</b>   |   |  |                  |   |                   |   |   |  |  |  |
| <b>Module 1</b>  | <b>Trigonometry and Analytical Geometry</b>   |  |                  |   | <b>10 classes</b> |   |   |  |  |  |
| Introduction, trigonometric ratios, transformations, identities, inverse trigonometric functions (only elementary topics). |   |  |                  |   |                   |   |   |  |  |  |
| Scalar product, vector product, angle between two vectors, shortest distance between two                                   |   |  |                  |   |                   |   |   |  |  |  |

lines, conditions for two lines to intersect, point of intersection, collinearity of three points (self- study topics).

Direction ratios, direction cosines of a line passing through two points, equation of a line in space, angle between two lines, shortest distance between two lines, plane, equation of a plane in normal form.

|   |                              |  |  |                   |
|---|------------------------------|--|--|-------------------|
| <b>Module 2</b>   | <b>Differential Calculus</b> |  |  | <b>12 classes</b> |
| Limit, continuity, differentiability, Test of convergence, Rolle's Theorem, Mean value theorems (Cauchy's and Lagrange's), Power series expansions of functions in Taylor's and Maclaurin's forms; indeterminate forms and L'Hospital's rule.   |                              |  |  |                   |
| <b>Module 3</b>   | <b>Integral Calculus</b>     |  |  | <b>10 classes</b> |
| Integral as limit of sum, fundamental theorem of calculus, indefinite integrals, methods of Integration: substitution method, integration by parts and by partial fraction technique.   |                              |  |  |                   |
| <b>Module 4</b>   | <b>Matrices</b>              |  |  | <b>12 classes</b> |
| Matrices, types of matrices, elementary properties of matrices, inverse matrices, rank of a matrix, symmetric, skew symmetric and orthogonal matrices, system of linear equations, Gauss elimination method.  |                              |  |  |                   |
| <p><b>Targeted Application &amp; Tools that can be used:</b><br/> Applied Mathematics provides the mathematical foundations for technological engineering, scientific computing, management science, operations research, statistics, actuarial science, mathematical economics and the like.<br/> Tools used: Mathematica / Matlab / Maple</p>   |                              |  |  |                   |
| <p><b>Project work/Assignment:</b><br/> Assignment 1: Trigonometry and Analytical Geometry.<br/> Assignment 2: Differential and Integral Calculus.<br/> Assignment 3: Matrix Techniques.</p>  |                              |  |  |                   |

9. Robert E, Moyer, Trigonometry, Mc. Graw Hill, Addison-Wesely, 4<sup>th</sup> Edition, 2009.

**Topics relevant to SKILL DEVELOPMENT:** The course provides an overview of the fundamental ideas of trigonometry and analytical geometry keeping in mind the geometrical approach to solving real-world problems. The course provides insights into the deeper aspects of differential calculus and its applications for **Skill Development through Problem Solving methodologies**. This is attained through assessment component mentioned in course handout.

## **ECE2009      Digital Computer Fundamentals**

|                                |   |                |   |   |   |   |
|--------------------------------|---|----------------|---|---|---|---|
| <b>Course Code:</b><br>ECE2009 | <b>Course Title:</b> Digital Computer Fundamentals<br><b>Type of Course:</b><br>Program Core& Theory& Integrated Laboratory   | <b>L-T-P-C</b> | 2 | 0 | 2 | 3 |
| <b>Version No.</b>             | 1.0   |                |   |   |   |   |
| <b>Course Pre-requisites</b>   | Basic concepts of number representation, Boolean Algebra, Arithmetic and Logic Computation.   |                |   |   |   |   |
| <b>Anti-requisites</b>         | NIL   |                |   |   |   |   |
| <b>Course Description</b>      | The purpose of this course is to enable the students to appreciate the fundamentals of digital logic circuits and Boolean algebra focusing on both combinational and sequential logic circuits. This course is analytical in nature |                |   |   |   |   |

|  |  |            |                                 |            |
|--|--|------------|---------------------------------|------------|
|  | <p>and needs a fundamental knowledge on logical computation with Boolean Algebra. The focus of the course will be to discuss the minimization techniques for making canonical and low-cost digital circuit implementations. In this course we emphasize on analysis and design of digital electronic circuits. Additionally, this course will create a foundation for future courses includes Computer Architecture, Microprocessors, Microcontrollers, and Embedded Systems etc. The course also enhances the Design, Implementation and Programming abilities through laboratory tasks. The associated laboratory provides an opportunity to verify the theoretical knowledge.</p> |            |                                 |            |
| <b>Course Objective</b>  | <p>The objective of the course is to familiarize the learners with the concepts of Digital Computer Fundamentals and attain the Skill Development Through Experiential Learning.</p>   |            |                                 |            |
| <b>Course Outcomes</b>   | <p>On successful completion of this course the students shall be able to:</p> <p>CO1. Apply minimization techniques to simplify Boolean expressions. [Apply]<br/> CO2. Demonstrate the Combinational circuits for a given logic. [Understand]<br/> CO3. Illustrate the Sequential logic circuits. [Understand]<br/> CO4. Implement various combinational logic circuits using gates. [Apply]</p>   |            |                                 |            |
| <b>Course Content:</b>   |  |            |                                 |            |
| <b>Module 1</b>  | Boolean function simplification  | Assignment | Programming and Simulation task | 10 Session |
| <p><b>Topics:</b><br/> Review of Number systems and logic gates, Number base conversions, Overview of Boolean functions and simplifications, two, three, four variable K-Maps- Don't care conditions- Both SOP and POS- Universal Gates (NAND &amp; NOR) Implementations.</p>  |  |            |                                 |            |
| <b>Module 2</b>  | Combinational Logic circuits   | Assignment | Programming and Simulation task | 10 Session |
| <p><b>Topics:</b><br/> Introduction to Combinational circuits, Analysis, Design procedure, Binary Adder and Subtractor, Magnitude comparator, Parity generator and checker, Multiplexers-Demultiplexers, Decoders, Encoders and Priority Encoders.</p>   |  |            |                                 |            |
| <b>Module 3</b>  | Sequential and Programmable logic circuits   | Assignment | Programming and Simulation task | 10 Session |
| <p><b>Topics:</b><br/> Introduction to sequential circuits, Storage elements: latches and flip flops, Characteristic tables and equations, excitation table, Analysis of clocked sequential circuits, Mealy &amp; Moore Models of finite state machines - Registers &amp; Counters.</p>  |  |            |                                 |            |
| <p><b>List of Laboratory Tasks:</b></p> <p><b>Experiment No 1:</b> Verify the Logic Gates truth table</p> <p><b>Level 1:</b> Verify basic logic gates on Digital Logic simulator.</p> <p><b>Level 2:</b> Construct basic logic gates using universal gates and verify using Digital Logic Simulator</p> <p><b>Experiment No. 2:</b> Construct and verify 2-bit and 3-bit adder and subtractor logic circuits</p> <p><b>Level 1:</b> By using basic logic and XOR gates on Simulator</p> <p><b>Level 2:</b> By using Universal logic gates on Simulator</p> <p><b>Experiment No. 3:</b> Construct and verify the Multiplexer and Demultiplexer logic circuits</p> <p><b>Level 1:</b> By using basic logic and XOR gates on Simulator</p> <p><b>Level 2:</b> By using Universal logic gates on Simulator.</p> <p><b>Experiment No. 4:</b> Construct and verify the Encoder and Decoder logic circuits</p> <p><b>Level 1:</b> By using basic logic gates on Simulator</p> |  |            |                                 |            |

**Level 2:** Design and simulate Priority encoder.

**Experiment No. 5:** Construct and verify the combinational logic circuit for given specifications.

**Level 1:** Specifications given in the form of Truth table. Implement using basic gates.

**Level 2:** Specification should be extracted from the given scenario. Implement using universal gates only.

**Experiment No. 6:** Study of Flip flops

**Level 1:** Verify the operation of Flip-Flops on Digital Logic Simulator

**Level 2:** Conversion of one FF to another and verify on Digital Logic Simulator.

**Experiment No. 7:** Construct and verify the synchronous counter circuit.

**Level 1:** 3-Bit up counter using JK excitation table.

**Level 2:** Specification should be extracted from the given scenario and design.

**Experiment No. 8:** Construct and verify the Asynchronous counter circuit.

**Level 1:** 3-Bit up counter.

**Targeted Application & Tools that can be used:**

Application Area includes all modern electronic devices (cellular phones, MP3 players, laptop computers, digital cameras, high-definition televisions, Home Automation, Communication systems). The students will be able to join a profession which involves basics to high level of digital circuit design and analysis.

Professionally Used Software: MultiSim Simulator

Besides these software tools Digital IC Trainer kit and Integrated Circuits (ICs) can be used to perform circuit testing and analysis.

## CSA 2101 Data Structures and Algorithms

|  |   |                 |                  |   |                     |   |  |  |
|--|---|-----------------|------------------|---|---------------------|---|--|--|
| <b>Course Code:</b><br><b>CSA 2101</b>   | <b>Course Title:</b> Data Structures and Algorithms<br><b>Type of Course:</b> Theory  | <b>L- T-P-C</b> | 3                | 0 | 0                   | 3 |  |  |
| <b>Version No.</b>   | 1.0   |                 |                  |   |                     |   |  |  |
| <b>Course Pre-requisites</b>   | Problem Solving Using C   |                 |                  |   |                     |   |  |  |
| <b>Anti-requisites</b>   | NIL   |                 |                  |   |                     |   |  |  |
| <b>Course Description</b>  | This course introduces the fundamental concepts of data structures and to emphasize the importance of choosing an appropriate data structure and technique for program development. This course has theory and lab component which emphasizes on understanding the implementation and applications of data structures using Java programming language. With a good knowledge in the fundamental concepts of data structures and practical experience in implementing them, the student can be an effective designer, developer for new software applications. |                 |                  |   |                     |   |  |  |
| <b>Course Objective</b>  | The objective of the course is SKILL DEVELOPMENT of student by using EXPERIENTIAL LEARNING techniques   |                 |                  |   |                     |   |  |  |
| <b>Course Outcomes</b>   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1:</b> Implement program for given problems using fundamentals of data structures.[Understand]</p> <p><b>CO2:</b> Apply an appropriate linear data structure for a given scenarios. [Apply]</p> <p><b>CO3:</b> Apply an appropriate non-linear data structure for a given scenarios. [Apply]</p> <p><b>CO4:</b> Explain the performance analysis of given searching and sorting algorithms.[Apply]</p>  |                 |                  |   |                     |   |  |  |
| <b>Course Content:</b>   |   |                 |                  |   |                     |   |  |  |
| <b>Module 1</b>  | <b>Introduction to Data Structure and Linear Data Structure - Stacks and Queues</b>   | Assignment      | Program activity |   | <b>11 Session s</b> |   |  |  |
| <b>Introduction</b> - Introduction to Data Structures, Types and concept of Arrays.                |   |                 |                  |   |                     |   |  |  |
| <b>Stack</b> - Concepts and representation, Stack operations, stack implementation using array and |   |                 |                  |   |                     |   |  |  |

Applications of Stack.

**Queues** - Representation of queue, Queue Operations, Queue implementation using array, Types of Queue and Applications of Queue.

|                 |   |            |                  |                             |
|-----------------|---|------------|------------------|-----------------------------|
| <b>Module 2</b> | <b>Linear Data Structure-<br/>Linked List</b> | Assignment | Program activity | <b>11<br/>Session<br/>s</b> |
|-----------------|---|------------|------------------|-----------------------------|

**Topics: Linked List** - Singly Linked List, Operation on linear list using singly linked storage structures, Circular List, Applications of Linked list.

**Recursion** - Recursive Definition and Processes, Programming examples.

|                 |   |            |                  |                             |
|-----------------|---|------------|------------------|-----------------------------|
| <b>Module 3</b> | <b>Non-linear Data<br/>Structures - Trees and<br/>Graph</b> | Assignment | Program activity | <b>11<br/>Session<br/>s</b> |
|-----------------|---|------------|------------------|-----------------------------|

**Topics: Trees** - Introduction to Trees, Binary tree: Terminology and Properties, Use of Doubly Linked List, Binary tree traversals: Pre-Order traversal, In-Order traversal, Post-Order traversal.

**Graph** - Basic Concept of Graph Theory and its Properties, Representation of Graphs.

|                 |   |            |                     |                    |
|-----------------|---|------------|---------------------|--------------------|
| <b>Module 4</b> | <b>Searching &amp;<br/>Sorting<br/>Performance<br/>Analysis</b> | Assignment | Program<br>activity | <b>12 sessions</b> |
|-----------------|---|------------|---------------------|--------------------|

**Topic: Sorting & Searching** - Sequential and Binary Search, Sorting - Selection and Insertion sort.

**Performance Analysis** - Time and space analysis of algorithms - Average, best and worst case analysis.

**Assignment:** Students should complete the lab programs associated with each module by end of each practical session and module wise assignments before the deadline.

| <b>Course Pre-requisites</b>          | Problem Solving Using C   |                  |         |
| <b>Anti-requisites</b>                | NIL   |                  |         |
| <b>Course Description</b>             | This course introduces the fundamental concepts of data structures and to emphasize the importance of choosing an appropriate data structure and technique for program development. This course has theory and lab component which emphasizes on understanding the implementation and applications of data structures using Java programming language. With a good knowledge in the fundamental concepts of data structures and practical experience in implementing them, the student can be an effective designer, developer for new software applications. |                  |         |
| <b>Course Objective</b>               | The objective of the course is SKILL DEVELOPMENT of student by using EXPERIENTIAL LEARNING techniques   |                  |         |
| <b>Course Out Comes</b>               | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1:</b> Implement program for given problems using fundamentals of data structures. [Application]</p> <p><b>CO2:</b> Apply an appropriate linear data structure for a given scenario. [Application]</p> <p><b>CO3:</b> Apply an appropriate non-linear data structure for a given scenario. [Application]</p> <p><b>CO4:</b> Explain the performance analysis of given searching and sorting algorithms. [Application]</p>   |                  |         |
| <b>Course Content:</b>                |   |                  |         |

|  |   |            |                  |                   |
|--|---|------------|------------------|-------------------|
| <b>Module 1</b>  | <b>Introduction to Data Structure and Linear Data Structure - Stacks and Queues</b> | Assignment | Program activity | <b>8 Sessions</b> |
| <p><b>Introduction</b> - Introduction to Data Structures, Types and concept of Arrays.</p> <p><b>Stack</b> - Concepts and representation, Stack operations, stack implementation using array and Applications of Stack.</p> <p><b>Queues</b> - Representation of queue, Queue Operations, Queue implementation using array, Types of Queue and Applications of Queue.</p>  |   |            |                  |                   |
| <p><b>Module 2</b></p>   | <b>Linear Data Structure- Linked List</b>   | Assignment | Program activity | <b>8 Sessions</b> |
| <p><b>Topics: Linked List</b> - Singly Linked List, Operation on linear list using singly linked storage structures, Circular List, Applications of Linked list.</p> <p><b>Recursion</b> - Recursive Definition and Processes, Programming examples.</p>   |   |            |                  |                   |
| <b>Module 3</b>  | <b>Non-linear Data Structures - Trees and Graph</b>                                 | Assignment | Program activity | <b>8 Sessions</b> |
| <p><b>Topics: Trees</b> - Introduction to Trees, Binary tree: Terminology and Properties, Use of Doubly Linked List, Binary tree traversals: Pre-Order traversal, In-Order traversal, post-order traversal.</p> <p><b>Graph</b> - Basic Concept of Graph Theory and its Properties, Representation of Graphs.</p>  |   |            |                  |                   |
| <b>Module 4</b>  | <b>Searching &amp; Sorting Performance Analysis</b>                                 | Assignment | Program activity | <b>6 Sessions</b> |
| <p><b>Topic: Sorting &amp; Searching</b> - Sequential and Binary Search, Sorting - Selection and Insertion sort.</p> <p><b>Performance Analysis</b> - Time and space analysis of algorithms - Average, best and worst case analysis.</p>   |   |            |                  |                   |
| <p><b>List of Laboratory Tasks:</b></p> <p><b>Lab sheet -1</b></p> <p><b>Level 1:</b> Program to Create, display, insert, and delete for elements in an array.</p> <p><b>Level 2:</b> Program to merge two sorted arrays into a single sorted array.</p> <p><b>Lab sheet -2</b></p> <p><b>Level 1:</b> Program to demonstrate the working of stack using array.</p> <p><b>Level 2:</b> Program for Towers of Hanoi problem.</p> <p><b>Lab sheet -3</b></p> |   |            |                  |                   |

**Level 1:** Program to convert infix arithmetic expression to post fix expression.

**Level 2:** Program to simulate the working of an ordinary queue using an array.

**Lab sheet -4**

**Level 1:** Program to simulate the working of Circular Queue using an array.

**Level 2:** Program to Insert and delete a node in a Singly Linked List

**Lab sheet -5**

**Level 1:** Program to find the GCD of two numbers using recursion.

**Level 2:** Program to find the Factorial of a Number using recursion

**Lab sheet -6**

**Level 1:** Program to calculate the sum of the first N natural numbers using recursion.

**Level 2:** Program to create and display a general Tree without traversal operations.

**Lab sheet -7**

**Level 1:** program to perform basic Operations on binary tree

- a) Create a binary tree
- b) Insertion
- c) Deletion

**Level 2:** Program to perform In-order traversal operation.

**Lab sheet -8**

**Level 1:** Program to perform Pre-order traversal operation.

**Level 2:** Program to perform post-order traversal operation.

**Lab sheet -9**

**Level 1:** program to search an element using linear search.

**Lab sheet -10**

**Level 1:** program to search an element using Binary search.

**Lab sheet -11**

**Level 2:** Program to Sort the elements using Bubble sort technique.

**Lab sheet -12**

**Level 1:** Program to sort the elements using Insertion Sort.

**Lab sheet -13**

**Level 1:** Program to sort the elements using Selection Sort.

**Targeted Application & Tools that can be used**

Use of PowerPoint software for lecture slides and use of Ubuntu for lab programs to execute.  
Tool is Codetantra tool.

**Project work/Assignment:**

**Assignment:** Students should complete the lab programs by end of each practical session and module wise assignments before the deadline.

## CSA2004 Computer Networks

|                                |  |                    |
|--------------------------------|--|--------------------|
| Course Code:<br><b>CSA2004</b> | Course Title: Computer Networks<br>Type of Course: Program Core -Theory  | L-T-P-C<br>3 0 0 3 |
| Version No.                    | 1.0  |                    |
| Course Pre-requisites          | Computer Organization  |                    |
| Anti-requisites                | NIL  |                    |
| Course Description             | This course gives a thorough introduction to all the layers of computer network following the top down approach. Application, Transport, Network, and Data link layer protocols are taught with analysis wherever applicable. All important concepts required to take up advanced courses and to face placement tests by an undergraduate student will be covered in this course. This course can be followed up with an advanced computer networks by the student to get a complete understanding of this domain. |                    |
| Course Objective               | The objective of the course is to familiarize the learners with the concepts of Computer Networks and attain Skill Development through Participative Learning techniques.  |                    |
| Course Outcomes                | On successful completion of the course the students shall be able to:<br>1] List the Basic Concepts of Computer Networks and Transport-Layer Services. (Remember)<br>2] Apply the Knowledge of IP Addressing and Routing Mechanism in Computer Networks. (Apply)<br>3] Develop the functionalities of Data Link Layer. (Apply)<br>4] Relate the working principles of wireless devices and security aspects of Networks. (Remember)  |                    |

| Course Content  |  |            |                 |            |
|---|--|------------|-----------------|------------|
| <b>Module 1</b>   | Overview, Application, and Transport Layer | Assignment | Problem Solving | 12 Classes |
| <p>Introduction: Computer Networks, Topologies, OSI Reference Model, Functions of Each Layer, TCP/IP model.</p> <p>Principles of Network Applications, The Web and HTTP, DNS—The Internet's Directory Service, Socket Programming: Creating Network Applications</p> <p>Introduction and Transport-Layer Services, Connectionless Transport: UDP, Principles of Reliable Data Transfer, Connection-Oriented Transport: TCP, Principles of Congestion Control, TCP Congestion Control.</p> |  |            |                 |            |
| <b>Module 2</b>   | Network Layer                              | Assignment | Problem Solving | 12 Classes |
| <p>Overview of Network Layer, Forwarding and Routing, The Data and Control Planes</p> <p>The Internet Protocol (IP): IPv4 Addressing, IPv4 Datagram Format, Network Address Translation (NAT), IPv6</p> <p>Introduction Routing Algorithms: The Link-State (LS) Routing Algorithm, The Distance-Vector (DV) Routing Algorithm, Intra-AS Routing in the Internet, OSPF Routing Among the ISPs: BGP, Introduction to BGP. ICMP: The Internet Control Message Protocol</p>                   |  |            |                 |            |
| <b>Module 3</b>   | Data Link Layer                            | Assignment | Problem Solving | 08 Classes |
| <p>Introduction to the Link Layer, The Services Provided by the Link Layer, Error-Detection and - Correction Techniques, Parity Checks, Check summing Methods, Cyclic Redundancy Check (CRC), <i>MAC Sub Layer, Frame Format, Frame Types;</i></p> <p>Switched Local Area Networks, Link-Layer Addressing and ARP, Ethernet, Link-Layer Switches, Virtual Local Area Networks (VLANs)</p>   |  |            |                 |            |
| <b>Module 4</b>   | Wireless and Security in Computer Networks | Assignment | Problem Solving | 08 Classes |
| <p>Introduction, Wireless Links and Network Characteristics, Wi-Fi: 802.11 Wireless LANs, Cellular Networks: 4G and 5G.</p> <p>Security in Computer Networks: Principles of Cryptography, End-Point Authentication, Securing E-Mail, Operational Security: Firewalls and Intrusion Detection Systems.</p>   |  |            |                 |            |
| <p><b>Targeted Application &amp; Tools that can be used:</b> Cisco Packet Tracer, Wireshark</p>   |  |            |                 |            |
| <p><b>Case Study/Assignment:</b> Assignment proposed for this course in CO1-CO4</p> <p>Assume that a computer sends a frame at the transport layer to another computer and the destination port address is not running. According to what you read from chapter 2, what will happen to that process?</p> <p>Determine the possible bit rate and the number of levels over a channel for these cases? a. B =</p>   |  |            |                 |            |

2.4K Hz, noiseless channel with L = 16. b. B= 2.4K Hz, SNR = 20 dB. c. B = 3.0K Hz, SNR = 40 db.

#### Using CISCO Packet Tracer Configuring Static and Default Routes Objectives

- Configure static routes on each router to allow communication between all clients.
- Test connectivity to ensure that each device can fully communicate with all other devices.

Getting familiar with Wireshark software by installing it on your system, and perform following task:

List out the packets which are having DNS protocols

List of IP address present in the cache along with its MAC addresses

Display all the packets which are having the DNS or HTTP protocol

Problem Solving: Choose and appropriate devices and implement various network concepts.

## CSA2503-Relational Database Management Systems

|   |   |                 |  |
|---|---|-----------------|--|
| Course Code:<br>CSA2503   | Course Name: Relational Database Management Systems<br>Type of Course: Theory Course  | L- T-P- C       | 3-0-0-3  |
| Version No.   | 1   |                 |  |
| Course Pre-requisites   | Computer Organization   |                 |  |
| Anti-requisites   | Nil   |                 |  |
| Course Description  | This course introduces the core principles and techniques required in the design and implementation of database systems. It covers concepts of relational database systems (RDBMS). More emphasis is set on how to design, develop, organize, maintain and retrieve the information efficiently. It helps the students to learn and practice data modeling and database designs.                                  |                 |  |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Relational Database Management Systems and attain Skill Development through Participative Learning techniques.  |                 |  |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Describe a database system using ER model and relational algebra. [Understand]</li> <li>Apply Relational Algebra and Database Querying concepts in designing the database. [Apply]</li> <li>Solve various normalization techniques for designing a robust database. [Apply]</li> </ul> |                 |  |
| Course Content:   |   |                 |  |
| Module 1  | Introduction to Database Modelling and Relational Algebra   | Assignment      | Introduction to Database Modelling and Relational Algebra<br>15 Sessions |
| <p>Topics:</p> <p>Introduction to Database: Schema, Instance, 3-schema architecture, physical and logical data independence, Data isolation problem in traditional file system, advantages of database over traditional file systems. Entity Relationship (ER) Model, ER Model to Relational Model, Examples on ER model.</p> <p>Relational Algebra with selection, projection, rename, set operations, Cartesian product, joins (inner and outer joins), and division operator. Examples on Relational Algebra Operations.</p> |   |                 |  |
| Module 2  | Fundamentals of SQL and Query Optimization  | Quiz/Assignment | Fundamentals of SQL and Query Optimization<br>15 Sessions                |
| <p>Topics:</p> <p>Database Querying: DDL, DML, Constraints, Operators- BETWEEN, IN, LIKE, where clause, order by command, Set Operators, Aggregate Functions, having, group by clauses, Views, Procedures, Cursors and Triggers.</p> <p>Query Optimization: Purpose, transformation of relational expressions, estimating cost and statistics of expression, choosing evaluation plans, linear and bushy plans, dynamic programming algorithms.</p>   |   |                 |  |
| Module 3  | Designing and Refining Database Schema  | Assignment      | Designing and Refining Database Schema<br>15 Sessions                    |
| <p>Topics:</p> <p>Schema Design: Problems in schema design, redundancy and anomalies. Schema refinement: Functional Dependencies, Normalization and forms - First, Second, Third, Dependency Preservation – Boyce/Codd Normal Form, Multivalued Dependency and Fourth Normal Form, Join Dependencies and Fifth Normal Form. Fundamentals of Transaction: Introduction to Transaction Processing, Transaction and System concepts, Desirable properties (ACID) of Transactions.</p>  |   |                 |  |
| <p><b>Text Book</b></p> <ul style="list-style-type: none"> <li>Elmasri R and Navathe S B, "Fundamentals of Database System", Pearson Publication, 7th Edition, 2018.</li> <li>RamaKrishna &amp; Gehrke, "Database Management Systems" 3rd Edition, 2018, McGraw-Hill Education.</li> </ul>  |   |                 |  |

| Course Pre-requisites   | CSA2103 – Relational Database Management Systems (Basics of Database)  |                 |  |
| Anti-requisites         | NIL  |                 |  |
| Course Description      | This course is designed to implement various databases using MySQL DATABASE in information technology applications. All the exercises will focus on the fundamentals for creating, populating, sophisticated, interactive way of querying, and simultaneous execution of the transactions of database.   |                 |  |
| Course Objective        | The objective of the course is to familiarize the learners with the concepts of Relational Database Management Systems and attain Skill Development through Experiential Learning techniques.  |                 |  |
| Course Outcomes         | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Describe a database system using ER model and [Understand] relational algebra.</p> <p><b>CO2</b> Apply Relational Algebra and Database Querying [Apply] concepts in designing the database.</p>  |                 |  |
| Course Content:         |  |                 |  |
| Module 1                | Introduction to Database Modelling and Relational Algebra  | Assignment      | Introduction to Database Modelling and Relational Algebra<br>15 Sessions |
| Topics:                 | <p>Introduction to Database: Schema, Instance, 3-schema architecture, physical and logical data independence, Data isolation problem in traditional file system, advantages of database over traditional file systems. Entity Relationship (ER) Model, ER Model to Relational Model, Examples on ER model.</p> <p>Relational Algebra with selection, projection, rename, set operations, Cartesian product, joins (inner and outer joins), and division operator. Examples on Relational Algebra Operations.</p> |                 |  |
| Module 2                | Fundamentals of SQL and Query Optimization   | Quiz/Assignment | Fundamentals of SQL and Query Optimization<br>15 Sessions                |
| Topics:                 | Database Querying: DDL, DML, Constraints, Operators- BETWEEN, IN, LIKE, where clause,  |                 |  |

order by command, Set Operators, Aggregate Functions, having, group by clauses, Views, Procedures, Cursors and Triggers.

Query Optimization: Purpose, transformation of relational expressions, estimating cost and statistics of expression, choosing evaluation plans, linear and bushy plans, dynamic programming algorithms.

|          |  |            |  |             |
|----------|--|------------|--|-------------|
| Module 3 | Designing and Refining Database Schema | Assignment | Designing and Refining Database Schema | 15 Sessions |
|----------|--|------------|--|-------------|

Topics:

Schema Design: Problems in schema design, redundancy and anomalies. Schema refinement: Functional Dependencies, Normalization and forms - First, Second, Third, Dependency Preservation – Boyce/Codd Normal Form, Multivalued Dependency and Fourth Normal Form, Join Dependencies and Fifth Normal Form. Fundamentals of Transaction: Introduction to Transaction Processing, Transaction and System concepts, Desirable properties (ACID) of Transactions.

#### **List of Laboratory Tasks**

Labsheet-1 [3 Practical Sessions]

Experiment No 1:

To study and implement the different language of Structured Query Language.

Level 1: Perform operations using Data Definition Language and Data Manipulation Language commands including different variants of SELECT on Student DB.

Level 2: Identify the given requirements; valid attributes and data types and Perform DDL and DML operations on a given scenario. [Banking Databases]

Experiment No. 2:

1. To study and implement the concept of integrity constraints in SQL.

Level 1: Create tables on Banking database using PRIMARY KEY, NOT NULL, UNIQUE, FOREIGN KEY and demonstrate the working of relational, logical, pattern matching, BETWEEN, IS NULL, IN and NOT IN Special Operators on Student Database.

Level 2: Enforce different types of data and referential integrity constraints. Then try queries with special operators based on the student database. [Banking Database].

Labsheet-2 [4 Practical Sessions]

Experiment No. 3:

2. Implement complex queries in SQL.

Level 1: Implement the conjugate of GROUP BY, ORDER BY and aggregate functions on Banking Database. Level 2: Implement MySQL DB queries on library database using appropriate clauses and aggregate functions. Also order the data either in ascending and descending order using corresponding clause. [Library databases].

Experiment No. 4:

3. To study and implement different types of Set and Join Operations

Level 1: Demonstrate different types of Set Operations (UNION, UNION ALL, INTERSECT, MINUS) and Join Operations (INNER JOINS, OUTER JOINS, CROSS JOIN, NATURAL JOIN) on two or more tables of Airline Database. Level 2: Use Set and Join operations to retrieve the data from two or more relations(tables) as per the given scenario. [Airline Database]

Labsheet-3 [3 Practical Sessions]

Experiment No. 5:

5. To study and implement Views, and Procedures in MySQL DB.

Level 1: Implement MySQL Views, and Procedures in ORACLE DB on Employee database.

Level 2: Analyze the requirement and construct views, and Procedures on Mini Project Domain. [Banking Database]

Labsheet-4 [2 Practical Sessions]

Experiment No. 6:

6. To study and implement Functions, and Triggers in MySQL DB.

Level 1: Implement Oracle Functions and Triggers in Oracle on Employee database.

Level 2: Analyze the requirement and construct Functions and Triggers. [Supply chain Database]

Labsheet-5 [2 Practical Sessions]

Experiment No. 7:

To implement the concept of forms and reports.

|  |
|--|
| <p>Level 1: Implement the concept of forms and reports.</p> <p>Level 2: Analyze the schema relationship.</p> <p>Labsheet-6 [3 Practical Sessions]</p> <p>Experiment No. 8:</p> <p>Design a mini project based on the databases such as Inventory Management System, University Management System, Hospital Management System, etc.</p> <p>Level 1: Implement the real time database.</p> <p>Level 2: Analyze the working of database in real time.</p> |

### **CSA1703 Data Mining**

|  |  |                 |                             |             |
|--|--|-----------------|-----------------------------|-------------|
| Course Code:<br>CSA1703  | Course Name: Data Mining<br>Type of Course: Theory Course  |                 | L- T-P- C                   | 2-1-0-3     |
| Version No.  | 1  |                 |                             |             |
| Course Pre-requisites  | Relational Database Management Systems   |                 |                             |             |
| Anti-requisites  | Nil  |                 |                             |             |
| Course Description   | The purpose of this Course is to introduce the students to issues in data mining, data pre- processing techniques, data mining tasks, association rules, advanced association rules, classification, and different approaches for classification, clustering, and outlier detection. Topics include: Association rule mining, classification, clustering and outlier detection.  |                 |                             |             |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Data Mining and attain Skill Development through Participative Learning techniques.  |                 |                             |             |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Explain the basic concepts and issues involved in Data Mining. [Remember]</li> <li>Discuss different preprocessing techniques on Data Analysis. [Understand]</li> <li>Discover frequent item sets by using Association rule algorithms. [Apply]</li> <li>Apply different Classification and Clustering techniques used in data mining. [Apply]</li> </ul> |                 |                             |             |
| Course Content:  |  |                 |                             |             |
| Module 1   | Introduction to Data mining  | Assignment      | Introduction to Data mining | 05 Sessions |
| Topics:  |  |                 |                             |             |
| Introduction to Data mining – Data Mining Goals- Stages of the Data Mining Process-Data Mining Techniques- Applications.   |  |                 |                             |             |
| Module 2   | Types of data  | Quiz/Assignment | Types of data               | 09 Sessions |
| Topics:  |  |                 |                             |             |
| Types of data – Data Quality – Data Preprocessing Techniques – Similarity and Dissimilarity measures.  |  |                 |                             |             |
| Module 3   | Motivation and terminology   | Assignment      | Motivation and terminology  | 07 Sessions |
| Topics:  |  |                 |                             |             |
| Motivation and terminology – Basic idea: item sets – Generating frequent item sets and rules efficiently – Apriori Algorithm- FP Growth.   |  |                 |                             |             |
| Module 4   | Decision tree Induction  | Assignment      | Decision tree Induction     | 17 Sessions |
| Topics:  |  |                 |                             |             |
| Decision tree Induction – Bayesian classification – Rule based classification – Classification by Back Propagation - Lazy learners – Modern evaluation and selection techniques to improve classification accuracy. Clustering Analysis – portioning method – Hierarchical methods –Basics of Density based method – Grid based methods. Anomaly detection preliminaries - Different <sup>76</sup> Outlier detection techniques-Web mining- Text mining- Data mining software Application. |  |                 |                             |             |
| Text Book  |  |                 |                             |             |

## **CSA2505-Analysis of Algorithms**

|   |   |                 |   |
|---|---|-----------------|---|
| Course Code: CSA2505  | Course Name: Analysis of Algorithms<br>Type of Course: Theory Course  | L- T-P- C       | 2-1-0-3   |
| Version No.   | 1   |                 |   |
| Course Pre-requisites   | Data Structures and Algorithms  |                 |   |
| Anti-requisites   | NIL   |                 |   |
| Course Description  | This Course introduces techniques for the design and analysis of efficient algorithms and methods of applications. Deals with analyzing time and space complexity of algorithms, and to evaluate trade-offs between different algorithms.   |                 |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Analysis of Algorithms and attain Skill Development through Problem Solving Methodologies.  |                 |   |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Classify the types of asymptotic notations. [Apply]</li> <li>Discuss the Brute Force Technique used for solving a problem. [Understand]</li> <li>Explain divide and conquer technique for searching and sorting problems. [Understand]</li> <li>Discuss the Dynamic Programming Algorithm used for solving a problem [Understand]</li> </ul> |                 |   |
| <b>Course Content:</b>  |   |                 |   |
| Module 1  | Introduction  | Assignment      | Introduction  |
| Topics:<br>Important Problem types, Asymptotic Notations and its properties, Mathematical analysis for Recursive and Non-recursive algorithms.  |   |                 |   |
| Module 2  | Algorithm design techniques-Brute force   | Quiz/Assignment | Algorithm design techniques-Brute force                       |
| Topics:<br>Selection Sort, sequential search, Uniqueness of Array, Exhaustive search Travelling Salesman, Knapsack Problem.   |   |                 |   |
| Module 3  | Divide-and-conquer  | Assignment      | Divide-and-conquer  |
| Topics:<br>Master Theorem, Merge sort, Quick sort, Binary search.   |   |                 |   |
| Module 4  | Dynamic programming and greedy technique & Complexity Classes   | Assignment      | Dynamic programming and greedy technique & Complexity Classes |
| Topics:<br>Introduction, Coin changing problem, Multi stage graph - Optimal Binary Search Trees, warshall's, floyds,0/1 Knapsack, Prim's, Kruskal's, Dijkstra's Algorithm.<br>Complexity Classes- P,NP- NP Hard and NP Complete - Boolean Satisfiability Problem (SAT).<br>Hamiltonian Path Problem, M Coloring Problem. Backtracking, - Backtracking – n-Queens problem. |   |                 |   |
| <b>Text Book</b> <ul style="list-style-type: none"> <li>Thomas H.Cormen, Charles E.Leiserson, Ronald L. Rivest and Clifford Stein, "Introduction to Algorithms", PHI Learning Private Limited.</li> </ul>   |   |                 |   |

## **CSA2506-Operating Systems and Unix Programming**

|   |   |                 |   |
|---|---|-----------------|---|
| Course Code:<br>CSA2506   | Course Name: Operating Systems and Unix Programming<br>Type of Course: Theory Course  | L- T-P- C       | 2-0-0-2   |
| Version No.   | 1   |                 |   |
| Course Pre-requisites   | Data Structures and Computer Organization   |                 |   |
| Anti-requisites   | NIL   |                 |   |
| Course Description  | The main objective of this course is to cover basic concepts of operating systems. Operating Systems functions, Basic Concepts, Notion of a process, Concurrent processes, Problem of mutual exclusion, Deadlock, Process Scheduling, Memory management, Multiprogramming, File systems; time sharing systems and their design consideration. This course will prepare students to develop software in and for Linux/UNIX environments. Also this course helps the students in UNIX operating system and their effective use for problem solving. |                 |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Operating Systems and Unix Programming and attain Skill Development through Experiential Learning techniques.   |                 |   |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Recall OS types, services, structures, layers, and system calls. [Remember]</p> <p><b>CO2</b> Explain IPC, deadlocks, synchronization, and memory management. [Understand]</p> <p><b>CO3</b> Describe memory allocation, page replacement, and virtual memory. [Understand]</p> <p><b>CO4</b> Summarize CPU scheduling, file management, and OS security. [Understand]</p>  |                 |   |
| Course Content:   |   |                 |   |
| Module 1  | Introduction to OS and System Structure   | Assignment      | Introduction to OS and System Structure<br>8 Sessions |
| <p>Topics:</p> <p>Introduction: Concept of Operating Systems (OS), Generations of OS, Types of OS, OS Services,</p> <p>Interrupt handling and System Calls, Basic architectural concepts of an OS, Concept of Virtual Machine,</p> <p>Resource Manager view, process view and hierarchical view of an OS.</p> <p>Processes: Definition, Process Relationship, Different states of a Process, Process State transitions, Process Control Block (PCB), Context switching.</p> <p>Process Scheduling: Scheduling algorithms:, Multiprocessor scheduling: Real Time scheduling:</p> |   |                 |   |
| Module 2  | IPC and Deadlocks   | Quiz/Assignment | IPC and Deadlocks<br>7 Sessions                       |
| <p>Topics:</p> <p>Inter-process Communication: Concurrent processes, precedence graphs, Critical Section, Race</p> <p>Conditions, Mutual Exclusion, Deadlocks - prevention, avoidance, detection and recovery.</p> <p>Thread: Definition, Various states, Benefits of threads, Types of threads, Concept of multithreads.</p> <p>Banker's algorithm, Deadlock detection and Recovery</p>  |   |                 |   |
| Module 3  | Memory Management   | Assignment      | Memory Management<br>8 Sessions                       |
| <p>Topics:</p> <p>Memory Management: Logical and Physical address maps, Memory allocation:</p> <p>Contiguous Memory allocation – Fixed and variable partition- Internal and External fragmentation and Compaction.</p>  |   |                 |   |
| Module 4  | Virtual Memory and File Management  | Assignment      | Virtual Memory and File Management<br>7 Sessions      |
| <p>Topics:</p> <p>Virtual Memory: Basics of Virtual Memory – Hardware and control structures – Locality of reference, Page allocation, Partitioning, Paging, Page fault, Working Set, Segmentation, Demand paging,</p> <p>Page Replacement algorithms: Optimal, First in First Out (FIFO), Second Chance (SC), Not recently used</p>  |   |                 |   |

## **CSA2507- Operating Systems and Unix Programming Lab**

|  |   |            |   |
|--|---|------------|---|
| Course Code: CSA2507   | Course Name: Operating Systems and Unix Programming Lab<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 0-0-2-1   |
| Version No.  | 1   |            |   |
| Course Pre-requisites  | Data Structures and Computer Organization   |            |   |
| Anti-requisites  | NIL   |            |   |
| Course Description   | The main objective of this course is to cover basic concepts of operating systems. Operating Systems functions, Basic Concepts, Notion of a process, Concurrent processes, Problem of mutual exclusion, Deadlock, Process Scheduling, Memory management, Multiprogramming, File systems; time sharing systems and their design consideration. This course will prepare students to develop software in and for Linux/UNIX environments. Also this course helps the students in UNIX operating system and their effective use for problem solving. |            |   |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Operating Systems and Unix Programming and attain Skill Development through Experiential Learning techniques.   |            |   |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Describe the different stages of process states. [Understand]</p> <p><b>CO2</b> Explore the algorithms related to main memory and virtual memory techniques. [Understand]</p> <p><b>CO3</b> Understand the Memory Management and Allocation concepts [Understand]</p> <p><b>CO4</b> Design Virtual Memory and File Management with CPU scheduling algorithms. [Apply]</p>   |            |   |
| <b>Course Content:</b>   |   |            |   |
| Module 1   | Introduction to OS and System Structure   | Assignment | Introduction to OS and System Structure<br>8 Sessions |
| <p><b>Topics:</b></p> <p>Introduction: Concept of Operating Systems (OS), Generations of OS, Types of OS, OS Services, Interrupt handling and System Calls, Basic architectural concepts of an OS, Concept of Virtual Machine, Resource Manager view, process view and hierarchical view of an OS. | Module 3   | Memory Management   | Assignment | Memory Management<br>8 Sessions                       |
| <p><b>Topics:</b></p> <p>Memory Management: Logical and Physical address maps, Memory allocation: Contiguous Memory allocation - Fixed and variable partition- Internal and External fragmentation and Compaction.</p>   |   |            |   |
| Module 4   | Virtual Memory and File Management  | Assignment | Virtual Memory and File Management<br>7 Sessions      |
| <p><b>Topics:</b></p> <p>Virtual Memory: Basics of Virtual Memory – Hardware and control structures – Locality of reference, Page allocation, Partitioning, Paging, Page fault, Working Set, Segmentation, Demand paging, Page Replacement algorithms: Optimal, First in First Out (FIFO), Second Chance (SC), Not recently used (NRU) and Least Recently used (LRU)</p> <p>File Management: Concept of File, Access methods, File types, File operation, Directory structure, File System structure, Allocation methods , Free-space management , directory implementation , efficiency and performance</p> |   |            |   |
| <p><b>List of Laboratory Tasks</b></p> <p>Experiment 1</p> <p>Level 1 : To study of Basic UNIX Commands and various UNIX editors such as vi</p> <p>Level 2 : To study the File manipulation Commands</p> <p>Experiment 2</p> <p>Level 1 : Programs using the following system calls of UNIX operating system fork, exec, getpid, exit, wait</p> <p>Level 2 : Programs using the following system calls of UNIX operating system close, stat, opendir, readdir</p> <p>Experiment 3</p>  |   |            |   |

## **CSA1202- Software Engineering**

|  |   |                 |   |
|--|---|-----------------|---|
| Course Code:<br>CSA1202  | Course Name: Software Engineering<br>Type of Course: Theory Course  | L- T-P- C       | 3-0-0-3   |
| Version No.  | 1   |                 |   |
| Course Pre-requisites  | NIL   |                 |   |
| Anti-requisites  | NIL   |                 |   |
| Course Description   | This course aims to equip students with a comprehensive understanding of the software development process and software project management principles. It covers key aspects such as software process models, requirement engineering, system analysis, design, implementation, and testing. Additionally, students will explore project evaluation, planning, effort estimation, and risk management, essential for effective software project execution. Through this course, students will gain the skills necessary to develop reliable software systems while managing project constraints effectively. |                 |   |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Fundamentals of Software Engineering and attain Skill Development through Participative Learning techniques.  |                 |   |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Understand the software engineering principles, ethics and process models. [Understand]</li> <li>Identify the requirements and design appropriate models for a given application. [Understand]</li> <li>Apply various types of testing methods and Quality Assurance techniques. [Remember]</li> <li>Apply project planning, scheduling, evaluation and risk management principles for a given project. [Apply]</li> </ul>   |                 |   |
| Course Content:  |   |                 |   |
| Module 1   | Introduction to Software Engineering & Process Models   | Assignment      | Introduction to Software Engineering & Process Models<br>11 Sessions            |
| Topics:<br>Software and Software Engineering: Nature of Software, Software Engineering Practice, Software Myths, SDLC and Software Processes: Generic Model, Prescriptive Process Model, Unified Process Model, Agile Development: Extreme Programming, SCRUM  |   |                 |   |
| Module 2   | Software Requirements and Design  | Quiz/Assignment | Software Requirements and Design<br>10 Sessions                                 |
| Topics:<br>Requirements Engineering: Eliciting requirements, Functional and non- Functional requirements, SRS, Requirements modeling : Developing Use Cases, Developing Activity diagram and Swimlane diagram, Design: Design concepts, Architectural design, Component based design, User interface design  |   |                 |   |
| Module 3   | Software Testing And Quality Assurance  | Assignment      | Software Testing And Quality Assurance<br>Software Testing And Quality Sessions |
| Topics:<br>Introduction to Software Testing: verification and validation, Test Strategies for conventional Software, Validation Testing, Whitebox Testing: Basis path testing, Blackbox Testing. Software Quality Assurance: Elements of software quality assurance, SQA Tasks, Goals and Metrics, Software configuration management: SCM process. |   |                 |   |
| Module 4   | Software Project Management   | Assignment      | Software Project Management<br>13 Sessions                                      |
| Topics:<br>Project Management Concepts, Project Planning, Overview of metrics, Estimation for Software projects, Project Scheduling, Risk Management, Maintenance and Reengineering, Software Process Improvement (SPI): CMM Levels.   |   |                 |   |

## **CSA1704-Principles of Artificial Intelligence**

|   |   |                 |  |             |
|---|---|-----------------|--|-------------|
| Course Code:<br>CSA1704   | Course Name: Principles of Artificial Intelligence<br>Type of Course: Theory Course   | L- T-P- C       | 3-0-0-3  |             |
| Version No.   | 1   |                 |  |             |
| Course Pre-requisites   | Mathematics: Logic, Algebra, Probability  |                 |  |             |
| Anti-requisites   | Nil   |                 |  |             |
| Course Description  | This Course will introduce the basic principles in artificial intelligence. It will cover representation schemes, problem solving paradigms, search strategies, knowledge representation and Probabilistic Reasoning. Topics include: AI methodology and fundamentals, intelligent agents, search algorithms, game playing, supervised and unsupervised learning, uncertainty and probability theory, probabilistic reasoning in AI and Bayesian networks   |                 |  |             |
| Course Objective  | This course is designed to improve the learners' EMPLOYABILITY SKILLS by using PROBLEM SOLVING Methodologies.   |                 |  |             |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Explain the basic concepts of Artificial Intelligence and application of AI in several domains such as business and governance domains. [Understand]</li> <li>Demonstrate knowledge of reasoning and knowledge representation for solving real world problems [Apply]</li> <li>Analyze and illustrate how informed and uninformed search algorithms play vital role in problem solving. [Apply]</li> <li>Explain learning probabilistic reasoning in AI. [Understand]</li> </ul> |                 |  |             |
| Course Content:   |   |                 |  |             |
| Module 1  | Introduction to Artificial Intelligence   | Assignment      | Introduction to Artificial Intelligence            | 06 Sessions |
| Topics:<br>Introduction to Artificial Intelligence, Definitions, foundation, History and Applications; Agents: Types of Agents, Structure of Intelligent agent and its functions, Agents and Environment. Case Studies: Agricultural Domain, Business and Marketing, Automatic Car Parking System.  |   |                 |  |             |
| Module 2  | Logic based Knowledge Representation and Reasoning  | Quiz/Assignment | Logic based Knowledge Representation and Reasoning | 07 Sessions |
| Topics:<br>Introduction to Knowledge representation, Knowledge-based Agents, Knowledge-Based Systems; Frame Structures, Propositional Logic, First order Logic, Inference in First Order Logic (FOL), Introduction to Reasoning, types of reasoning.  |   |                 |  |             |
| Module 3  | Problem Solving by searching  | Assignment      | Problem Solving by searching                       | 09 Sessions |
| Topics:<br>Problem space and search, State space search techniques solving problems by searching: Classical Search, Adversarial Search, and Constraint Satisfaction Problem, Adversarial Search Methods.  |   |                 |  |             |
| Module 4  | Learning and Probabilistic reasoning in AI  | Assignment      | Learning and Probabilistic reasoning in AI         | 16 Sessions |
| Topics:<br>Introduction to learning, Learning Concepts, Methods and Models: Supervised Learning, Unsupervised Learning, Reinforcement Learning, ANN-based Learning, Probabilistic reasoning in AI, Bayesian networks. Making Simple Decisions: Beliefs and Desires under Uncertainty, Utility Theory, Making Complex Decisions: Sequential Decision Problems, Multiagent Decision Making. |   |                 |  |             |
| <p><b>Text Book</b></p> <ul style="list-style-type: none"> <li>Stuart J. ## CSA2508-Software Testing

|                         |   |                 |                                      |
|-------------------------|---|-----------------|--------------------------------------|
| Course Code:<br>CSA2508 | Course Name: Software Testing<br>Type of Course: Theory Course  | L- T-P- C       | 2-0-2-3                              |
| Version No.             | 1   |                 |                                      |
| Course Pre-requisites   | Software Engineering  |                 |                                      |
| Anti-requisites         | NIL   |                 |                                      |
| Course Description      | This course will examine fundamental software testing and related program analysis techniques. In particular, the important phases of testing will be reviewed, emphasizing the significance of each phase when testing different types of software. The course will also include concepts such as test generation, test oracles, test coverage, regression testing, mutation testing, program analysis (e.g., program-flow and data-flow analysis), and test prioritization. |                 |                                      |
| Course Objective        | The objective of the course is to familiarize the learners with the concepts of Software Testing and attain Employability through Experiential learning.  |                 |                                      |
| Course Out Comes        | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Describe the fundamentals of software testing for Quality assurance. [Understand]</li> <li>Develop Test cases to test Applications / Software's [Create]</li> <li>Write Bug reports found in Testing Applications / Software's. [Apply]</li> </ul>   |                 |                                      |
| Course Content:         |   |                 |                                      |
| Module 1                | Fundamentals of Software Testing  | Assignment      | Fundamentals of Software Testing     |
| Topics:                 | Phases of Software Project – Quality assurance and Quality Control – Software Development Life Cycle (SDLC) Models – Software Testing and Its Types Software Testing Life Cycle (STLC).   |                 |                                      |
| Module 2                | Test Case Development and Execution   | Quiz/Assignment | Test Case Development and Execution  |
| Topics:                 | Test Cases – Identification of Test case Scenarios – Test Case Template – Writing Test cases for Problems –Test Case Execution and Examples for Lab Exercises.  |                 |                                      |
| Module 3                | Bug Reporting and Automation Testing  | Assignment      | Bug Reporting and Automation Testing |
| Topics:                 | Defect Life Cycle, Bug Reporting – Template and Examples for Lab Exercises – Basics of Software Test Automation – Software Testing Metrics.   |                 |                                      |

## **CSA1700-Essentials of Cloud Computing**

|  |   |                  |   |
|--|---|------------------|---|
| Course Code:<br>CSA1700  | Course Name: Essentials of Cloud Computing<br>Type of Course: Theory Course   | L- T-P- C        | 3-0-0-3   |
| Version No.  | 1   |                  |   |
| Course Pre-requisites  | Computer Networks   |                  |   |
| Anti-requisites  | NIL   |                  |   |
| Course Description   | This course aims to introduce the core concepts of cloud computing to gain the foundational knowledge required for understanding cloud computing from a business perspective as also for becoming a cloud practitioner. From the course student will understand the definition and essential characteristics of cloud computing, its history, the business case for cloud computing, and emerging technology use cases enabled by cloud. This course covers on various cloud service models (IaaS, PaaS, SaaS), deployment models (Public, Private, Hybrid), the key components of a cloud infrastructure (VMs, Networking, Storage - File, Block, Object) and security issues in the cloud |                  |   |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Essentials of Cloud Computing and attain Skill Development through Participative Learning techniques.   |                  |   |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Understand the significance of Cloud computing technologies. [Understand]</li> <li>Identify appropriate Virtualization techniques to virtualize infrastructures. [Understand]</li> <li>Demonstrate the different services provided by cloud [Apply]</li> <li>Analyze cloud security issues in cloud computing. [Analyze]</li> </ul>  |                  |   |
| <b>Course Content:</b>   |   |                  |   |
| Module 1   | Introduction to Cloud   | Assignment       | Introduction to Cloud<br>10 Sessions                          |
| Topics:<br>Cloud computing basics: - Cloud computing components- Infrastructure-services- storage applications database services – Deployment models of Cloud- Services offered by Cloud- Benefits and Limitations of Cloud Computing  |   |                  |   |
| Module 2   | Virtualization Fundamentals   | Quiz/ Assignment | Virtualization Fundamentals<br>10 Sessions                    |
| Topics:<br>Virtualization - Enabling technology for cloud computing- Types of Virtualization- Server Virtualization- Desktop Virtualization – Memory Virtualization – Application and Storage Virtualization- Tools and Products available for Virtualization  |   |                  |   |
| Module 3   | Cloud Services(SAAS, PAAS,IAAS)   | Assignment       | Cloud Services(SAAS, PAAS,IAAS)<br>13 Sessions                |
| Topics:<br>Getting started with SaaS - Understanding the multitenant nature of SaaS solutions- Understanding Open SaaS Solutions. Understanding Service Oriented Architecture PaaS- Benefits and Limitations of PaaS, Security as a Service, Understanding IaaS- Improving performance through Load balancing- Server Types within IaaS solutions- Utilizing cloud based NAS devices – Understanding Cloud based data storage- Cloud based database solutions- Cloud based block storage |   |                  |   |
| Module 4   | Cloud Computing Software Security Fundamentals  | Assignment       | Cloud Computing Software Security Fundamentals<br>12 Sessions |
| Topics:<br><br>Cloud Information Security Objectives, Cloud Security Services , Authentication , Authorization, Auditing, Accountability, Secure Cloud Software Requirements, Secure Development Practices, Approaches to Cloud Software Requirements Engineering.<br>Problem Solving: Design and implement dynamic resource allocation for virtual machine using cloud computing environment.   |   |                  |   |
| <p><b>Text Book</b></p> <ul style="list-style-type: none"> <li>R. Buyya, C. Vecchiola, S T. Selvi, Mastering Cloud Computing, McGraw Hill (India) Ltd., 2013.</li> <li>Ronald L.Krutz, Russell vines, Cloud Security: A Comprehensive Guide to Secure Cloud Computing, Wiley Publishing Inc., 2010</li> </ul>  |   |                  |   |

## **CSA1705-Blockchain Technology**

|   |   |                     |   |
|---|---|---------------------|---|
| Course Code:<br>CSA1705   | Course Name: Blockchain Technology<br>Type of Course: Theory Course   | L- T-P- C           | 3-0-0-3                                   |
| Version No.   | 1   |                     |   |
| Course Pre-requisites   | Nil   |                     |   |
| Anti-requisites   | Nil   |                     |   |
| Course Description  | The purpose of the course is to provide an introduction to Blockchain technology with specific focus on industrial applications like Blockchain in Financial system, trade/supply chain management, agriculture industry, Healthcare sectors and Insurance system. With the knowledge of blockchain technology, Students will learn how these systems are built, how to interact with them.   |                     |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Blockchain Technology and Applications and attain Skill Development through Problem solving methodologies.  |                     |   |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Understand the concepts of Blockchain technology [Remember]</li> <li>Explain the methods for verification and validation of Bitcoin transactions [Understand]</li> <li>Explore the use the Ethereum programming [Apply]</li> <li>Illustrate the role of blockchain in various domain [Understand]</li> </ul> |                     |   |
| Course Content:   |   |                     |   |
| Module 1  | Introduction to Blockchain  | Assignment          | Introduction to Blockchain<br>08 Sessions |
| Topics:<br>Incentives and proof of work. Simple Local Storage, Hot and Cold Storage, Online Wallets and Exchanges, Payment Services, Transaction Fees, Cryptographic Hash Functions, Hash Pointers and Data Structures, Digital Signatures.   |   |                     |   |
| Module 2  | Bitcoin   | Quiz/<br>Assignment | Bitcoin<br>10 Sessions                    |
| Topics:<br>Bitcoin Mechanics: Bitcoin transactions, Bitcoin Scripts, Applications of Bitcoin scripts, Bitcoin blocks, The Bitcoin network, Limitations and improvements. Bitcoin mining: The task of Bitcoin miners, Mining Hardware, Energy consumption, Mining pools, Mining incentives and strategies. |   |                     |   |
| Module 3  | Ethereum  | Assignment          | Ethereum<br>10 Sessions                   |
| Topics:<br>The Ethereum Network – Components of Ethereum Ecosystem – Ethereum Programming Languages: Runtime Byte Code, Blocks and Blockchain, Fee Schedule – Supporting Protocols – Solidity Language.   |   |                     |   |
| Module 4  | Blockchains in Business   | Assignment          | Blockchains in Business<br>10 Sessions    |
| Topics:<br>Blockchain in Supply Chain - Blockchain in Manufacturing - Blockchain in Automobiles - Blockchain in Healthcare- Blockchain in Financial Industry  |   |                     |   |
| <b>Text Book</b> <ul style="list-style-type: none"> <li>Bellaj Badr, Richard Horrocks, Xun (Brian) Wu, "Blockchain By Example: A developer's guide to creating decentralized applications using Bitcoin, Ethereum, and Hyperledger", Packt Publishing Limited, 2018.</li> <li>NA</li> </ul>               |   |                     |   |

## **CSA2510-Computer Network and Administration Lab**

|   |  |            |                                      |             |
|---|--|------------|--------------------------------------|-------------|
| Course Code:<br>CSA2510   | Course Name: Computer Network and Administration Lab<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 0-0-6-3                              |             |
| Version No.   | 1  |            |                                      |             |
| Course Pre-requisites   | Computer Networks  |            |                                      |             |
| Anti-requisites   | Nil  |            |                                      |             |
| Course Description  | The Computer Network and Administration Lab provides hands-on experience in configuring, managing, and troubleshooting computer networks. Students learn network protocols, IP addressing, subnetting, and routing using simulation tools and real hardware. The course covers network security, firewall configuration, and VPN setup. Practical exercises include server administration, network monitoring, and performance analysis. By the end, students gain skills in network setup, maintenance, and troubleshooting.  |            |                                      |             |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Computer Network and Administration and attain Skill Development through Experiential Learning techniques.   |            |                                      |             |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Apply networking concepts by configuring IP addressing, [Apply] subnetting, and routing in a simulated environment. (Apply)</p> <p><b>CO2</b> Analyze network traffic and performance using [Analyze] monitoring tools to identify issues and optimize efficiency. (Analyze)</p> <p><b>CO3</b> Evaluate security threats and implement firewall and [Evaluate] VPN configurations to protect network resources. (Evaluate)</p> <p><b>CO4</b> Troubleshoot network connectivity and administration [Apply] issues using diagnostic tools and systematic approaches. (Apply)</p> |            |                                      |             |
| <b>Course Content:</b>  |  |            |                                      |             |
| Module 1  | Basic Network Configuration  | Assignment | Basic Network Configuration          | 15 Sessions |
| <p><b>Topics:</b><br/>Introduction to Networking and OSI Model -IP Addressing, Subnetting, and VLAN Configuration<br/>Configuring and Managing Switches &amp; Routers- Network Simulation using Packet Tracer or GNS3</p>   |  |            |                                      |             |
| Module 2  | Network Services and Administration  | Assignment | Network Services and Administration  | 15 Sessions |
| <p><b>Topics:</b><br/>DHCP, DNS, and Web Server Configuration- File Sharing and Remote Access (FTP, SSH, Telnet)<br/>Firewall and NAT Configuration for Security- Virtual Private Network (VPN) Setup</p>   |  |            |                                      |             |
| Module 3  | Network Security and Troubleshooting   | Assignment | Network Security and Troubleshooting | 15 Sessions |
| <p><b>Topics:</b><br/>Network Traffic Monitoring and Packet Analysis (Wireshark)- Intrusion Detection and Prevention Systems (IDS/IPS)- Troubleshooting Network Connectivity Issues- Performance Optimization and Load Balancing</p>  |  |            |                                      |             |
| Module 4  | NA   | Assignment | NA                                   | NA Sessions |
| <p><b>Topics:</b><br/>NA</p>  |  |            |                                      |             |
| <p><b>List of Laboratory Tasks</b></p> <ol style="list-style-type: none"> <li>1. Study of Networking Devices and Topologies – Identify and understand different network devices (switches, routers, hubs) and topologies.</li> <li>2. IP Addressing and Subnetting – Configure IPv4/IPv6 addressing and subnet networks for efficient allocation.</li> <li>3. Configuring Basic Switch and Router Settings – Set up hostname, passwords, and basic commands for network devices.</li> <li>4. VLAN Configuration and Inter-VLAN Routing – Implement VLANs and establish communication between them.</li> <li>5. Static and Dynamic Routing (RIP, OSPF, EIGRP) – Configure and analyze routing protocols using Packet Tracer or GNS3.</li> <li>6. Network Address Translation (NAT) and Port Forwarding – Set up NAT to allow internal network access to the internet.</li> <li>7. Configuring DHCP Server – Set up and test dynamic IP allocation using a DHCP server.</li> <li>8. Configuring DNS Server – Implement a DNS server for domain name resolution.</li> <li>9. Setting Up Web Server (Apache/IIS) – Deploy and host a simple website on a web server.</li> <li>10. File Transfer Protocol (FTP) Server Setup – Configure and test FTP file transfer.</li> <li>11. Secure Shell (SSH) and Telnet Implementation – Establish remote access using SSH and Telnet.</li> <li>12. Virtual Private Network (VPN) Configuration – Create and test a secure VPN connection.</li> <li>13. Packet Sniffing and Network Traffic Analysis – Use Wireshark to capture and analyze network packets.</li> <li>14. Intrusion Detection System (IDS) Setup – Install and test Snort IDS for network security.</li> <li>15. Configuring Firewalls (iptables/PFsense) – Set up and test firewall rules for securing</li> </ol> |  |            |                                      |             |

## **CSA2520 - Virtualization and Cloud Infrastructure**

|   |   |                 |                                |             |
|---|---|-----------------|--------------------------------|-------------|
| Course Code:<br>CSA2520   | Course Name: Virtualization and Cloud Infrastructure<br>Type of Course: Theory Course   | L- T-P- C       | 1-0-4-3                        |             |
| Version No.   | 1   |                 |                                |             |
| Course Pre-requisites   | Computer Networks   |                 |                                |             |
| Anti-requisites   | NIL   |                 |                                |             |
| Course Description  | <p>This course provides a comprehensive introduction to the principles and practices of virtualization and cloud computing infrastructure. It covers the fundamental concepts, technologies, and architectures of virtualization, including hypervisors, virtual machines, containers, and virtual networks. The course also explores the architecture and service models of cloud computing—Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS)—along with deployment models such as public, private, hybrid, and community clouds.</p> <p>Students will gain practical experience in configuring and managing virtualization environments using tools such as VMware, VirtualBox, and KVM, and in deploying applications on cloud platforms like AWS, Microsoft Azure, and Google Cloud Platform. The course also addresses key issues such as resource management, scalability, security, cloud storage, orchestration, and cloud-native technologies like Docker and Kubernetes.</p> |                 |                                |             |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Virtualization and Cloud Infrastructure and attain Skill Development through Participative Learning techniques.   |                 |                                |             |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Explain the core concepts and benefits of virtualization and cloud infrastructure. <b>(Understand)</b></li> <li>Compare the performance and security challenges in virtualized and cloud environments and recommend best practices. <b>(Understand)</b></li> <li>Configure and manage virtual machines and containers using popular virtualization tools. <b>(Apply)</b></li> <li>Analyze different cloud service models (IaaS, PaaS, SaaS) and deployment models (public, private, hybrid). <b>(Analyze)</b></li> </ul>   |                 |                                |             |
| <b>Course Content:</b>  |   |                 |                                |             |
| Module 1  | Introduction to Virtualization  | Assignment      | Introduction to Cloud          | 15 Sessions |
| <p>Topics:</p> <p>Concepts and benefits of virtualization, Types of virtualization: hardware, software, network, storage, Hypervisors: Type 1 vs Type 2, Virtual Machines and their architecture</p>  |   |                 |                                |             |
| Module 2  | Virtualization Tools and Technologies   | Quiz/Assignment | Virtualization Fundamentals    | 15 Sessions |
| <p>Topics:</p> <p>Installation and configuration of virtualization platforms (e.g., VMware, VirtualBox, KVM), Containerization concepts and tools (Docker basics), Managing virtual networks and storage in virtual environments</p>  |   |                 |                                |             |
| Module 3  | Advanced Cloud Computing Architectures and Services   | Assignment      | Cloud Services                 | 15 Sessions |
| <p>Topics:</p> <p>Serverless computing and Function as a Service (FaaS), Multi-cloud and hybrid cloud architectures- Virtual networking in the cloud (VPCs, subnets, gateways, load balancers) - Cloud storage options (object, block, file storage) and data lifecycle management - Introduction to microservices and container orchestration (Kubernetes architecture and components)</p> |   |                 |                                |             |
| Module 4  | Performance, Security, and Best Practices   | Assignment      | Software Security Fundamentals | 15 Sessions |
| <p>Topics:</p> <p>Performance metrics and monitoring in virtual/cloud environments - Security challenges and solutions in virtualization and cloud - Scalability and resource management - Best practices for deployment and management of virtualized/cloud infrastructure</p>   |   |                 |                                |             |
| <b>Lab Experiments :</b>  |   |                 |                                | 95          |
| Lab Experiments   |   |                 |                                |             |
| Module 1: Virtualization Basics   |   |                 |                                |             |

**Discipline Specific Electives**  
**Track 1 - Full Stack and Front End**  
**CSA3422 .Net Programming Using C#**

|   |  |            |  |
|---|--|------------|--|
| Course Code: CSA3422  | Course Name: .Net Programming Using C#<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 1-0-4-3  |
| Version No.   | 1  |            |  |
| Course Pre-requisites   | Familiarity with any programming language such as C, C++, Java, or Python including Basic knowledge of OOP concepts, including classes, objects, inheritance, polymorphism, and encapsulation  |            |  |
| Anti-requisites   | Nil  |            |  |
| Course Description  | This course provides an in-depth exploration of .NET programming using C#, enabling students to design and develop modern applications efficiently. The students will gain a solid foundation in the .NET framework and C# programming language, focusing on object-oriented principles, graphical user interface development, web and desktop application creation, and integration with databases. The course also emphasizes best practices and design patterns, ensuring the development of robust, scalable, and secure applications. |            |  |
| Course Objective  | The objective of the course .NET programming using C# is to familiarize the learners with the concepts of .Net Framework architectures, C# Programming language and attain SKILL DEVELOPMENT through EXPERIENTIAL LEARNING techniques  |            |  |
| Course Out Comes  | <b>On successful completion of the course the students shall be able to:</b><br><b>CO1</b> Use OOPS concepts in C# for solutions to real-world problems [Apply]<br><b>CO2</b> Design and implement robust console-based and desktop applications using C# and the .NET framework. [Create]<br><b>CO3</b> Create interactive GUI-based applications in C# to enhance user experience. [Create]<br><b>CO4</b> Develop database-driven applications using ADO.NET for efficient data management [Create]                                      |            |  |
| <b>Course Content:</b>  |  |            |  |
| Module 1  | Introduction to .NET Framework   | Assignment | Introduction to .NET Framework 15 Sessions     |
| <b>Topics:</b><br>Understanding .NET Framework: An overview of the .NET, Key benefits of .NET Platform, Introduction to .NET framework and .NET, Architecture-.Net Framework Class Libraries-CLR- Name Space, Assemblies, MSIL, Understanding Common Type Systems (CTS), Common Language Specifications, Introduction to Visual Studio.Net, Languages supported by .NET, Different Applications of .NET.  |  |            |  |
| Module 2  | C# Language Basics   | Assignment | C# Language Basics 15 Sessions                 |
| <b>Topics:</b><br>The C# Language: Working with system Data Types and C# Keywords, Literals, and Variables, Operators, Type Conversion and Casting, Program Control Statements, Looping Statements, Understanding Arrays and Strings, Methods and Classes. Collections. Collections. Introduction to Windows Forms- The System Windows.Forms Namespace, Windows Forms Development, Windows Forms and Web Services   |  |            |  |
| Module 3  | Object oriented with C#  | Assignment | Object oriented with C# 25 Sessions            |
| <b>Topics:</b><br>The architecture of a class in C#, Instance, Class & Reference variables, Access Modifier, Abstract Classes, Constructors, Destructors, Inheritance in C#, Method Overloading, Method Overriding, Operator Overloading, Method Hiding, Access modifies: private, public, protected, internal, protected internal, new, Abstract classes, Sealed classes, Creating Interfaces, Implementing Interface inheritance.   |  |            |  |
| Module 4  | Database Programming Using ADO.NET   | Assignment | Database Programming Using ADO.NET 20 Sessions |
| <b>Topics:</b><br>Database Programming Using ADO.NET -Introduction, and Evolution of ADO.NET, Understanding the Role of Managed Provider and ADO.NET Objects, Connecting to Database and Connection Pooling, Performing Insert, Update and Delete Operations, Fetching Data from the database - Executing Select Statements   |  |            |  |
| <b>List of Laboratory Tasks</b>   |  |            |  |
| <p>Experiment No. 1:</p> <p>Level 1: Install Visual Studio, a robust IDE for developing .NET applications on Windows.</p> <p>Level 2: Identify the Components of Integrated Development Environments.</p> <p>Experiment No. 2:</p> <p>Level 1: Identify the types of Projects supported by the .NET Framework</p> <p>Level 2: Identify the controls that are available for Windows Form Applications. List any 10 Common Controls and their basic Properties</p> <p>Experiment No. 3:</p> <p>Level 1: Create a console application in C# that performs basic arithmetic operations (addition, subtraction, multiplication, and division).</p> <p>Level 2: Create a console application in C# for Simple Interest and Compound Interest</p> <p>Experiment No. 4:</p> <p>Level 1: University wants to store the student details. Get the student details such as Roll number, fname, lname, Semester, Specialization and display all details. Design a windows application form to accept user input.</p> <p>Level 2: Design a Windows application to calculate the Simple Interest (SI) by providing Principal (p), Rate(r) and Time (t). Hint: <math>S.I = (p \times r \times t)/100</math></p> |  |            |  |

**CSA3423 No SQL**

|  |  |            |  |
|--|--|------------|--|
| Course Code: CSA3423   | Course Name: No SQL<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 1-0-4-3  |
| Version No.  | 1  |            |  |
| Course Pre-requisites  | Basic understanding of database concepts. Familiarity with SQL and relational database management systems.   |            |  |
| Anti-requisites  | Nil  |            |  |
| Course Description   | This course provides an in-depth understanding of NoSQL databases, their architecture, and their applications in modern data-driven environments. Students will explore the key concepts, types, and use cases of NoSQL databases, focusing on their scalability, flexibility, and performance advantages over traditional relational databases. The course covers various NoSQL database models, including Key-Value, Document-Oriented, Column-Family, and Graph Databases, with practical examples and hands-on experience. Students will gain the skills to design, implement, and manage NoSQL databases for real-world applications such as Big Data, IoT, and E-commerce systems. |            |  |
| Course Objective   | The course No SQL aims to equip BCA students with foundational knowledge and practical skills in NoSQL databases, focusing on their architecture, types, and applications. Students will learn to design, implement, and manage scalable, distributed systems u  |            |  |
| Course Out Comes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Understand NoSQL Fundamentals [Understand]<br/> <b>CO2</b> Perform Practical NoSQL Operations [Apply]<br/> <b>CO3</b> Design Scalable Systems [Create]<br/> <b>CO4</b> Apply NoSQL in Real-World Scenarios [Apply]</p>   |            |  |
| Course Content:  |  |            |  |
| Module 1   | Introduction to NoSQL Databases  | Assignment | Introduction to NoSQL Databases<br>15 Sessions           |
| <p><b>Topics:</b><br/>Overview of NoSQL and its importance, Differences between SQL and NoSQL databases, Installation and setup of NoSQL databases (MongoDB, Cassandra, Redis, Neo4j) , Introduction to basic NoSQL commands.</p>  |  |            |  |
| Module 2   | Document-Oriented and Key-Value Databases  | Assignment | Document-Oriented and Key-Value Databases<br>15 Sessions |
| <p><b>Topics:</b><br/>Understanding document-oriented databases (MongoDB) , CRUD operations in MongoDB, Data modeling and schema design in MongoDB, Introduction to key-value stores (Redis) , Working with Redis data structures (strings, lists, sets, and hashes).</p>  |  |            |  |
| Module 3   | Column-Family Databases (Cassandra)  | Assignment | Column-Family Databases (Cassandra)<br>20 Sessions       |
| <p><b>Topics:</b><br/>Introduction to column-family databases and their architecture, Basics of Apache Cassandra and its use cases , Creating keyspaces and tables in Cassandra, Performing CRUD operations using CQL (Cassandra Query Language) , Data partitioning, replication, and consistency in Cassandra.</p>   |  |            |  |
| Module 4   | Graph Databases (Neo4j)  | Assignment | Graph Databases (Neo4j)<br>25 Sessions                   |
| <p><b>Topics:</b><br/>Introduction to graph databases and their applications Nodes, relationships, and properties in Neo4j , Querying graph databases using Cypher ,Real-world use cases of graph databases, Indexing, aggregation, and performance optimization in MongoDB, Sharding and replication in NoSQL databases, Security and access control in NoSQL databases</p>   |  |            |  |
| List of Laboratory Tasks   |  |            |  |
| Module 1: Introduction to NoSQL Databases (MongoDB, Cassandra, Redis, Neo4j)<br>(6 Experiments)  |  |            |  |
| <ol style="list-style-type: none"> <li>1. Install MongoDB locally and connect using Mongo Shell.</li> <li>2. Install Cassandra and verify cluster setup.</li> <li>3. Install Redis and perform basic commands (SET, GET).</li> <li>4. Install Neo4j Desktop and explore Neo4j Browser.</li> <li>5. Compare SQL vs NoSQL data models using simple examples.</li> <li>6. Execute basic commands (create database, insert record, retrieve) in all four NoSQL databases.</li> </ol>   |  |            |  |
| Module 2: Document-Oriented and Key-Value Databases (MongoDB, Redis)<br>(8 Experiments)  |  |            |  |
| <ol style="list-style-type: none"> <li>7. Create a MongoDB collection and insert multiple documents.</li> <li>8. Perform CRUD operations on MongoDB documents.</li> <li>9. Design a MongoDB schema for an e-commerce application (products, users, orders).</li> <li>10. Perform indexing in MongoDB for faster search.</li> <li>11. Insert and retrieve different data types (strings, lists, sets, hashes) in Redis.</li> <li>12. Implement expiration (TTL) of keys in Redis.</li> <li>13. Simulate a simple leaderboard using Redis Sorted Sets.</li> <li>14. Create a session store system using Redis (e.g., for login sessions).</li> </ol> |  |            |  |
| Module 3: Column-Family Databases (Apache Cassandra)<br>(8 Experiments)  |  |            |  |
| <ol style="list-style-type: none"> <li>15. Create a keyspace and table in Cassandra using CQL.</li> </ol>  |  |            |  |

**CSA3426 Front-End Development using Java Script**

|  |  |            |  |             |
|--|--|------------|--|-------------|
| Course Code: CSA3426   | Course Name: Front-End Development using Java Script<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 1-0-4-3  |             |
| Version No.  | 1  |            |  |             |
| Course Pre-requisites  | NIL  |            |  |             |
| Anti-requisites  | NIL  |            |  |             |
| Course Description   | This intermediate course enables students to perform front-end development using Javascript, with emphasis on employability skills. The course covers key technologies and architectures that enables the student to design and implement front-end. On successful completion of this course, the student shall be able to pursue a career in front end development. The students shall develop strong problem-solving skills as part of this course.      |            |  |             |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Front-end Development using Javascripts and attain Employability Skills through Experiential Learning techniques.  |            |  |             |
| Course Out Comes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Design and develop static web pages using HTML5 [Apply] elements and CSS3</p> <p><b>CO2</b> Develop responsive web pages using CSS, JavaScript and bootstrap.</p> <p><b>CO3</b> Demonstrate the concepts of Angular.js to develop a [Apply] web front-end.</p> <p><b>CO4</b> Illustrate the concepts of React.js to develop a web [Apply] front-end.</p> |            |  |             |
| Course Content:  |  |            |  |             |
| Module 1   | Introduction to Front-End Development  | Assignment | Introduction to Front-End Development          | 20 Sessions |
| <p><b>Topics:</b><br/>Web development basics, Introduction to HTML5 structure, Semantic elements, Forms and inputs, Introduction to CSS3 styling, Selectors and properties, Box model, Flexbox and Grid, Introduction to JavaScript, Variables, Data types, Operators, Conditional statements, Loops, Functions.</p>   |  |            |  |             |
| Module 2   | Advanced JavaScript & Interactive Web Elements   | Assignment | Advanced JavaScript & Interactive Web Elements | 25 Sessions |
| <p><b>Topics:</b><br/>JavaScript Events, DOM Manipulation, Form validation, Local and session storage, ES6 concepts (Arrow functions, Spread/Rest Operators, Destructuring), Introduction to Bootstrap, Grid system, Forms, Navigation bars, Buttons, Cards, Tables, Modal windows.</p>  |  |            |  |             |
| Module 3   | AJAX, jQuery & Responsive Web Design   | Assignment | AJAX, jQuery & Responsive Web Design           | 15 Sessions |
| <p><b>Topics:</b><br/>Understanding AJAX and asynchronous JavaScript, Fetch API vs. XMLHttpRequest, Handling JSON data, jQuery basics, Selectors, Effects (Hide, Show, Toggle, Fade, Slide), Event handling in jQuery, Animations, Creating a dynamic content loader with AJAX &amp; jQuery.</p>   |  |            |  |             |
| Module 4   | AngularJS & Django Integration   | Assignment | AngularJS & Django Integration                 | 15 Sessions |
| <p><b>Topics:</b><br/>Introduction to AngularJS, Directives, Controllers, Data binding, Routing, Creating Angular components, Fetching API data with Angular, Introduction to Django, Creating views and templates, Static files and media, Connecting Django with Angular for dynamic web applications.</p>   |  |            |  |             |
| <p><b>List of Laboratory Tasks</b></p> <p>Experiment No. 1: [4 + 1 Practical Sessions]<br/>Level 1: Familiarization of HTML and CSS basics.<br/>Level 2: Create an HTML webpage showcasing biodata with CSS styling.<br/>Shape</p> <p>Experiment No. 2: [4 + 1 Practical Sessions]<br/>Level 1: Design an interactive web page for a new restaurant using CSS3 features.<br/>Level 2: Create a simple web form to gather user information.<br/>Shape</p> <p>Experiment No. 3: [5 + 1 Practical Sessions]<br/>Level 1: Practice basic JavaScript exercises, including creating a canvas drawing application.<br/>Level 2: Implement JavaScript exercises for form validation.<br/>Shape</p> <p>Experiment No. 4 [5 + 1 Practical Sessions]<br/>Level 1: Create a student registration form using JavaScript.<br/>Level 2: Design an RSVP form using Bootstrap form controls.</p> <p>Experiment No. 5 [4 + 1 Practical Sessions]<br/>Level 1: Create a responsive image grid using Bootstrap 5.<br/>Level 2: Write a JavaScript program using AJAX to dynamically load content and implement jQuery effects like fading.</p> |  |            |  | 101         |

## **CSA3427-Web Application Development**

|  |   |            |   |
|--|---|------------|---|
| Course Code: CSA3427   | Course Name: Web Application Development<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 1-0-4-3   |
| Version No.  | 1   |            |   |
| Course Pre-requisites  | NIL   |            |   |
| Anti-requisites  | NIL   |            |   |
| Course Description   | This course is designed to build the student's knowledge on web design and development to an intermediate level. Students will learn the fundamental languages and markups for front-end web programming and back end languages. By the end of this course, students should be able to design, program and publish a working and aesthetic website. Students will also go through the process of working in a client/server side programming and learning skills which is necessary to successfully fulfill each role. The associated laboratory provides a platform to implement the various programming language to design web pages and enhance critical thinking and analytical skills. |            |   |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Web Application and attain Skill Development through Participative Learning techniques.   |            |   |
| Course Out Comes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Understand and briefly explained the semantics and [Apply] syntax of HTML and CSS.</p> <p><b>CO2</b> Design and develop client side scripts and web pages [Apply] using HTML, CSS and Java script</p> <p><b>CO3</b> Understand PHP language and use them while applying [Apply] the principles of object oriented development</p> <p><b>CO4</b> Develop dynamic and interactive web applications by [Apply] integrating front-end and back-end technologies.</p>  |            |   |
| <b>Course Content:</b>   |   |            |   |
| Module 1   | Web Development Basics  | Assignment | Web Development Basics<br>15 Sessions             |
| <p><b>Topics:</b><br/>Introduction to web development, HTML structure, head, body, footer, text formatting, image embedding, hyperlinks, tables, forms, CSS styling, inline vs external CSS, CSS box model, tables &amp; lists, basic layout design.</p>   |   |            |   |
| Module 2   | JavaScript & Client-Side Scripting  | Assignment | JavaScript & Client-Side Scripting<br>25 Sessions |
| <p><b>Topics:</b><br/>Introduction to JavaScript, variables, operators, functions, events, form validation, loops, DOM manipulation, timers, JavaScript objects, JavaScript math operations, event handling, HTML-CSS-JS integration.</p>  |   |            |   |
| Module 3   | Introduction to PHP,  | Assignment | Introduction to PHP,<br>15 Sessions               |
| <p><b>Topics:</b><br/>Introduction to PHP, syntax, variables, operators, conditional statements, loops, arrays, functions, handling user input, form validation, sessions and cookies, file handling in PHP, PHP and database connectivity using MySQL.</p>  |   |            |   |
| Module 4   | XML & Web Application Development   | Assignment | XML & Web Application Development<br>20 Sessions  |
| <p><b>Topics:</b><br/>Introduction to XML, XML structure and syntax, XML with CSS &amp; XSLT, data storage, integrating XML with PHP, designing dynamic web applications, client-server communication, validations, security considerations.</p>   |   |            |   |
| <p><b>List of Laboratory Tasks</b></p> <p>Lab Sheet - 1<br/>Experiment No. 1<br/>Level 1: Design a simple web page with head, body, and footer, including heading tags and an image.<br/>Level 2: Design a product information page displaying product name, brand, price, etc., using a table.<br/>Experiment No. 2<br/>Level 1: Create a book information website with a homepage listing books. Clicking a book should open its details page.<br/>Level 2: Design a user information form with fields like name, gender, mobile number, email, city, state, and country.<br/>Lab Sheet - 2<br/>Experiment No. 1<br/>Level 1: Design a web page with background images, text colors, and borders using external CSS.<br/>Level 2: Implement a JavaScript calculator for addition, subtraction, multiplication, and division.<br/>Experiment No. 2<br/>Level 1: Create a JavaScript timer on the left side of a webpage.<br/>Level 2: Capture student details (ID, name, age, marks) using JavaScript objects.<br/>Lab Sheet - 3<br/>Experiment No. 1<br/>Level 1: Write a JavaScript program to calculate the squares and cubes of numbers from 0 to 10.</p> |   |            |   |

| Course Code:<br>CSA3424 | Course Name: Agile Structures and Frameworks<br>Type of Course: Theory Course  | L- T-P- C       | 3-0-0-3                       |             |
| Version No.             | 1  |                 |                               |             |
| Course Pre-requisites   | Software Engineering   |                 |                               |             |
| Anti-requisites         | Nil  |                 |                               |             |
| Course Description      | This course imparts knowledge to students in the basic concepts of Agile Software Process, methodology and its development. The objective of this course is to provide the fundamentals concepts of Agile and its Significance. This course covers the Agile and its methodologies. The objective of the course is to understand the Agility and Assurance.  |                 |                               |             |
| Course Objective        | The objective of the course Agile Structures and Frameworks is EMPLOYABILITY of student by using PARTICIPATIVE LEARNING techniques   |                 |                               |             |
| Course Outcomes         | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Understand the basic concepts of Agile Software Process [Understand]</li> <li>Comprehend the various Agile Methodologies [Understand]</li> <li>Design Agile Software Process [Apply]</li> <li>Apply principles of Agile Testing [Apply]</li> </ul>                                      |                 |                               |             |
| Course Content:         |  |                 |                               |             |
| Module 1                | Introduction   | Assignment      | Introduction                  | 10 Sessions |
| Topics:                 | Introduction to Agile technology, Iterative and Evolutionary Methods, Agile – Agile Development. Agile Values, Agile Principles, Compare and Contrast the agile with traditional methods. Agile Benefits. Agile Estimation Techniques. Case Study  |                 |                               |             |
| Module 2                | Agile and Its Significance   | Quiz/Assignment | Agile and Its Significance    | 12 Sessions |
| Topics:                 | Agile Story : Evolutionary delivery ,Scrum Demo, Planning game, Sprint back log, adaptive planning. Agile Motivation – Problems With The Waterfall - Research Evidence. Scrum : Method Overview ,Life cycle phases and Work product roles and practices.   |                 |                               |             |
| Module 3                | Agile methodology  | Assignment      | Agile methodology             | 13 Sessions |
| Topics:                 | Extreme Programming: Method Overview ,Life cycle phases and Work product roles and practices. Unified process : Method Overview ,Life cycle phases and Work product roles and practices. EVO : Method Overview ,Life cycle phases and Work product roles and practices. Case Study.  |                 |                               |             |
| Module 4                | Agility and Quality Assurance  | Assignment      | Agility and Quality Assurance | 10 Sessions |
| Topics:                 | Agile product development – Agile Metrics – Feature Driven Development (FDD). Agile approach to Quality Assurance. Test Driven Development – Agile approach in Global Software Development. Agile Technology Tools.  |                 |                               |             |

**CSA3425   Introduction to Devops**

|   |   |                 |  |
|---|---|-----------------|--|
| Course Code: CSA3425  | Course Name: Introduction to Devops<br>Type of Course: Theory Course  | L- T-P- C       | 3-0-0-3  |
| Version No.   | 1   |                 |  |
| Course Pre-requisites   | Agile frameworks  |                 |  |
| Anti-requisites   | Nil   |                 |  |
| Course Description  | The course Introduction to DevOps is designed to offer profound perceptions and knowledge in various tools like Git, Ansible, Jenkins. With the proficient learning of DevOps course, a student will be able to work in all the above tools and become a trained practitioner in the integration and monitoring of software. DevOps Tool is an application that helps the software development process to industrialize. It mainly focuses on communication and collaboration between product management, software development, and operations professionals. The objective of this course is to discuss and implement the various tools usage and internals practically. |                 |  |
| Course Objective  | The objective of the course Introduction to DevOps is SKILL DEVELOPMENT of student by using PARTICIPATIVE LEARNING techniques   |                 |  |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Apply the features and common Git workflow [Apply]</li> <li>Practice the Docker container and Saving Changes To A Docker Container [Apply]</li> <li>Practice the filters and plugins to populate, manipulate, and manage data used by Ansible Playbooks. [Apply]</li> <li>Interpret the installation and features of Jenkins and build jobs. [Apply]</li> </ul>  |                 |  |
| Course Content:   |   |                 |  |
| Module 1  | Introduction to DEVOPS and GIT Operations   | Assignment      | Introduction to DEVOPS and GIT Operations<br>12 Sessions |
| Topics:<br>Basic Linux Commands, Software Development Lifecycle, Waterfall Model, Agile Model, Lean Methodology, Waterfall Vs Agile Vs Lean, Devops and its tools. Version Control With Git, Introduction to Git, Features of Git, Benefits, Workflow, Git vs GitHub, Installation of Git on Windows/Linux and Environment set up, All Git Commands-Working with local and remote repositories, Running first Git command, Fundamentals of Repository structure and file status life cycle, Working locally with staging, unstaging and commit. |   |                 |  |
| Module 2  | Containerization Using Docker   | Quiz/Assignment | Containerization Using Docker<br>10 Sessions             |
| Topics:<br>Docker Life Cycle, Docker Installation, Docker Operations, Docker Concepts - Registry, Repository, Tag, Image and Containers, Create A Docker Hub Account, Docker Images and Containers, Pushing Docker To Container Hub, Docker File.   |   |                 |  |
| Module 3  | Ansible   | Assignment      | Ansible<br>10 Sessions                                   |
| Topics:<br>Ansible Workflow, Architecture, Installation in Linux/Windows, ad-hoc Commands, Playbooks, Tower, Roles, Variables open link, Tags, Galaxy, Commands Cheat Sheets, Modules, Shell, Templates, YAML, Inventory, Debug, Apt, Lineinfile, Copy, Command, File, Vault, Windows, Yum, AWX, Unarchive, Ansible Pip   |   |                 |  |
| Module 4  | Jenkins   | Assignment      | Jenkins<br>13 Sessions                                   |
| Topics:<br>Introduction To Continuous Integration, Jenkins Architecture, Managing Nodes On Jenkins, Jenkins Master Node Connection, Jenkins Integration With Devops Tools, Understanding CI/CD Pipelines, Creating A CI/CD Pipeline   |   |                 |  |

## **Track 2 - AIML and Data Science**

**CSA3400 Computational Data Modelling and Visualization**

|  |  |            |  |             |
|--|--|------------|--|-------------|
| Course Code:<br>CSA3400  | Course Name: Computational Data Modelling and<br>Visualization<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 1-0-4-3  |             |
| Version No.  | 1  |            |  |             |
| Course Pre-requisites  | Python Programming   |            |  |             |
| Anti-requisites  | NIL  |            |  |             |
| Course Description   | The purpose of the course is to install a strong foundation of scientific process orientation that is the cornerstone of effective data handling, and creative design thinking appended with strong programming skills to create meaningful visualizations of data. The student should have prior knowledge of python programming and basic knowledge of data concepts. The associated laboratory provides an opportunity to strengthen student's skillset in the arena of Data Preprocessing and Visualization. With a good knowledge in the fundamental concepts of the various libraries for handling and visualizing data the student can gain a stronghold in Data Science enabling the student to be an effective analyst for prospective employers. |            |  |             |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Data Analysis and Visualization and attain EMPLOYABILITY through Experiential Learning techniques.   |            |  |             |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Understand the various types of data, apply and evaluate the [Apply] principles of data visualization.</p> <p><b>CO2</b> Acquire skills to apply visualization techniques to a problem and its [Apply] associated dataset.</p> <p><b>CO3</b> Create interactive visualization for better insight using various [Apply] visualization tools</p> <p><b>CO4</b> Implement the visualization concepts practically using Python [Apply]</p>   |            |  |             |
| Course Content:  |  |            |  |             |
| Module 1   | Introduction to Data Modelling (Python Basics & EDA)   | Assignment | Introduction to Data Modelling (Python Basics & EDA) | 20 Sessions |
| <p><b>Topics:</b><br/>Introduction to Data Science &amp; Python, Overview of Data Modeling &amp; Statistical Analysis, Python Libraries: NumPy, Pandas, Matplotlib, Seaborn, Data Importing &amp; Preprocessing, Handling Missing Values &amp; Outliers, Feature Engineering &amp; Feature Selection, Exploratory Data Analysis (EDA)</p>  |  |            |  |             |
| Module 2   | Statistical Data Modelling & Machine Learning  | Assignment | Statistical Data Modelling & Machine Learning        | 25 Sessions |
| <p><b>Topics:</b><br/>Probability Distributions: Normal, Binomial, Poisson, Hypothesis Testing (t-test, ANOVA, Chi-Square), Correlation and Regression Analysis (Linear, Multiple, Polynomial), Principal Component Analysis (PCA) &amp; Linear Discriminant Analysis (LDA), Time Series Analysis &amp; Forecasting, Market Basket Analysis (Association Rule Mining).</p>   |  |            |  |             |
| Module 3   | Data Visualization Techniques  | Assignment | Data Visualization Techniques                        | 15 Sessions |
| <p><b>Topics:</b><br/>Introduction to Data Visualization, Visualization Libraries in Python (Matplotlib, Seaborn, Plotly), Basic Plots (Bar, Line, Scatter, Histogram, Pie), Advanced Plots (Heatmaps, Boxplots, Violin Plots), Time Series Visualization, Geographic &amp; Financial Data Visualization, Dashboard Development with Plotly Dash.</p>  |  |            |  |             |
| Module 4   | Big Data Handling in Python  | Assignment | Big Data Handling in Python                          | 15 Sessions |
| <p><b>Topics:</b><br/>Big Data Handling in Python (Dask, Spark), Clustering Techniques (K-Means, Hierarchical Clustering), Deep Learning for Data Analysis (Introduction to TensorFlow/PyTorch), Streaming Data Visualization (Real-time data analysis), Financial Data Analysis &amp; Visualization, Final Project: End-to-End Data Science Pipeline.</p>   |  |            |  |             |
| <p><b>List of Laboratory Tasks</b></p> <p>Labsheet -1<br/>Working with Numpy Functions<br/>Labsheet -2<br/>Pandas functions<br/>Labsheet -3<br/>Acquiring and plotting data.<br/>Labsheet -4<br/>Practicals based on Data Cleaning and Preparation<br/>Labsheet -5<br/>Practicals based on Data Wrangling<br/>Labsheet -6<br/>Statistical Analysis - such as Multivariate Analysis, PCA, LDA, Correlation regression and analysis of variance<br/>Labsheet - 7<br/>Practicals based on Data Visualization using matplotlib</p> |  |            |  | 109         |

## **CSA3401-Information Retrieval**

|  |   |                     |   |
|--|---|---------------------|---|
| Course Code:<br>CSA3401  | Course Name: Information Retrieval<br>Type of Course: Theory Course   | L- T-P- C           | 3-0-0-3   |
| Version No.  | 1   |                     |   |
| Course Pre-requisites  | ML USING PYTHON Basics of Data mining such as classification and clustering techniques  |                     |   |
| Anti-requisites  | NIL   |                     |   |
| Course Description   | <p>The course is an intermediary course and aims to provide students with an in-depth understanding of design and implementation of data warehousing and data mining. The course will help students to enhance their understanding of various classification, clustering and outlier analysis methods. An interest to understand the concepts of data warehousing, data mining and a desire to be a successful data scientist are key to enable students to complete the course successfully. Topics include: Data Model for Data Warehouses, data extraction, cleansing, transformation and loading, data cube computation, materialized view selection, OLAP query processing. Data mining-Fundamentals. Mining Techniques and Application: Classification, Clustering, Outlier analysis.</p> |                     |   |
| Course Objective   | The objective of the course is SKILL DEVELOPMENT of student by using PARTICIPATIVE LEARNING techniques  |                     |   |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Define basic concepts of information Retrieval [Remember]</li> <li>Calculate the effectiveness and efficiency of different information retrieval methods [Apply]</li> <li>Calculate the effectiveness and efficiency of different information retrieval methods [Apply]</li> <li>Classify different recommended system and its aspect. [Understand]</li> </ul>   |                     |   |
| <b>Course Content:</b>   |   |                     |   |
| Module 1   | Introduction to Information Retrieval   | Assignment          | Introduction to Information Retrieval<br>10 Sessions                      |
| <p>Topics:</p> <p>Information Retrieval: Web Search, Other IR Applications, Information Retrieval Systems: The Software Architecture, Documents and Update, Performance Evaluation, Open Source IR Systems: Lucene, Indri, Wumpus, Basic Techniques: Inverted Indices, Retrieval and Ranking, Evaluation.</p>  |   |                     |   |
| Module 2   | Indexing<br>Assignment Case studies / Case let 12 Sessions  | Quiz/<br>Assignment | Indexing<br>Assignment Case studies / Case let 12 Sessions<br>10 Sessions |
| <p>Topics:</p> <p>Static Inverted Indices: Index Components and Index Life Cycle, The Dictionary, Postings Lists, Interleaving Dictionary and Postings Lists, Index Construction, Other Types of Indices, Query Processing: Query Processing for Ranked Retrieval, Lightweight Structure, Index Compression: General-Purpose Data Compression, Symbol-wise Data Compression, Compressing Postings Lists, Compressing the Dictionary, Dynamic Inverted Indices: Batch Updates, Incremental Index Updates, Document Deletions, Document Modifications.</p> |   |                     |   |
| Module 3   | Retrieval and Ranking   | Assignment          | Retrieval and Ranking<br>12 Sessions                                      |
| <p>Topics:</p> <p>Probabilistic Retrieval: Modeling Relevance, The Binary Independence Model, The Robertson/Sparck Jones Weighting Formula, Document Length - BM25, Field Weights - BM25F, Language Modeling and Related Methods: Generating Queries from Documents, Language Models and Smoothing, Ranking with Language Models, Kullback-Leibler Divergence, Divergence from Randomness, Passage Retrieval and Ranking, Categorization and Filtering: Classification, Probabilistic Classifiers, Linear Classifiers, Similarity-Based Classifiers.</p> |   |                     |   |
| Module 4   | Evaluation  | Assignment          | Evaluation<br>13 Sessions   |
| <p>Topics:</p> <p>Measuring Effectiveness: Traditional Effectiveness Measures, The Text Retrieval Conference, Using Statistics in Evaluation, Minimizing Adjudication Effort, Nontraditional Effectiveness Measures, Measuring Efficiency: Efficiency Criteria, Queuing Theory, Query Scheduling, Caching .</p>  |   |                     |   |
| <p>Text Book</p> <ul style="list-style-type: none"> <li>Stefan Buttcher, Charles L. A. Clarke, Gordon V. Cormack, "Information Retrieval - Modern Information Retrieval: The Concepts and Technology behind Search", 3rd Edition, ACM Press Books, 2018</li> </ul>   |   |                     |   |

## **CSA3402-Statistical Analysis using R Programming**

|  |  |            |  |
|--|--|------------|--|
| Course Code: CSA3402   | Course Name: Statistical Analysis using R Programming<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 1-0-4-3                                  |
| Version No.  | 1  |            |  |
| Course Pre-requisites  | Nil  |            |  |
| Anti-requisites  | Nil  |            |  |
| Course Description   | This course introduces fundamental and advanced statistical techniques using R Programming for data analysis. Students will learn data manipulation, visualization, hypothesis testing, regression analysis, and machine learning techniques in R. The course covers both descriptive and inferential statistics, enabling students to interpret real-world datasets effectively. Hands-on sessions with R packages like ggplot2, dplyr, and caret will enhance analytical skills. By the end of the course, students will be able to apply statistical methods to solve complex data-driven problems. |            |  |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of Statistical Analysis using R Programming attain Employability Skills through Experiential Learning techniques.   |            |  |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Apply basic R functions pertaining to fundamental data analysis. [Apply]</p> <p><b>CO2</b> Interpret data using appropriate statistical methods [Apply]</p> <p><b>CO3</b> Demonstrate the decision trees concept with the given dataset. [Apply]</p> <p><b>CO4</b> Demonstrate the Mining concepts for both Data and Text. [Apply]</p>   |            |  |
| <b>Course Content:</b>   |  |            |  |
| Module 1   | Introduction   | Assignment | Introduction<br>25 Sessions              |
| <b>Topics:</b><br>Introduction to R, Overview of data analysis, Working with directory in R, Loading and handling data in R, Data Visualization with ggplot2, Data Transformation with dplyr.  |  |            |  |
| Module 2   | Exploratory Data Analysis  | Assignment | Exploratory Data Analysis<br>15 Sessions |
| <b>Topics:</b><br>Exploring a new dataset, Anomalies in numerical data, Visualizing relations between variables, Assumptions of Linear Regression, Validating Linear Assumption, Missing Values, Covariation, Patterns and Models, ggplot2 Calls.  |  |            |  |
| Module 3   | Regression Analysis  | Assignment | Regression Analysis<br>20 Sessions       |
| <b>Topics:</b><br>Introduction, Types of Regression Analysis Models, Linear Regression, Simple Linear Regression, Non-Linear Regression, Regression Analysis with Multiple Variables, Cross Validation, Principal Component Analysis, Factor Analysis.   |  |            |  |
| Module 4   | Classification   | Assignment | Classification<br>15 Sessions            |
| <b>Topics:</b><br>Introduction, Different types of Classification, Logistic Regression, Support Vector Machines, K-Nearest Neighbors, Naïve Bayes Classifier, Decision Tree Classification, Random Forest Classification, Evaluation.  |  |            |  |
| <b>List of Laboratory Tasks</b>  |  |            |  |
| <ol style="list-style-type: none"> <li>1. Using with and without R objects on console</li> <li>2. Using mathematical functions on console</li> <li>3. Write an R script, to create R objects for calculator</li> <li>4. Write an R script to find basic descriptive statistics using summary, str, quartile function on mtcars&amp; cars datasets.</li> <li>5. Reading different types of data sets (.txt, .csv) from Web and disk and writing in file in specific disk location. b. Reading Excel data sheet in R</li> <li>6. Find the data distributions using box and scatter plot.</li> <li>7. Find the outliers using plot.</li> <li>8. Plot the histogram, bar chart and pie chart on sample data</li> <li>9. Find the correlation matrix.</li> <li>10. Plot the correlation plot on dataset and visualize giving an overview of relationships among data on iris data</li> <li>11. Create a regression model for a given dataset</li> <li>12. Install relevant package for classification.</li> <li>13. Choose classifier for classification problem. c. Evaluate the performance of classifier.</li> <li>14. Install relevant package for classification.</li> <li>15. Choose classifier for classification problem. c. Evaluate the performance of classifier.</li> </ol> |  |            |  |

## **CSA3403-Natural Language Processing**

|                        |   |                 |                                     |             |
|------------------------|---|-----------------|-------------------------------------|-------------|
| Course Code: CSA3403   | Course Name: NATURAL LANGUAGE PROCESSING<br>Type of Course: Theory Course   | L- T-P- C       | 3-0-0-3                             |             |
| Version No.            | 1   |                 |                                     |             |
| Course Pre-requisites  | Artificial Intelligence and Machine Learning  |                 |                                     |             |
| Anti-requisites        | NIL   |                 |                                     |             |
| Course Description     | The purpose of this course is to introduce students to the science of natural language processing (NLP). NLP is the science of extracting information from unstructured text. It is basically how we can teach machines to understand human languages and extract meaning from text. In addition to regular theory, the course also involves: Programming Assignments Regular Quiz Tests (once a week and once after every module)                          |                 |                                     |             |
| Course Objective       | The objective of the course is to familiarize the learners with the concepts of Natural Language Processing attain Skill development through Experiential Learning techniques   |                 |                                     |             |
| Course Outcomes        | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Understand the fundamental concepts of Natural Language Processing. [Understand]</li> <li>Read corpora and train models for different NLP tasks [Apply]</li> <li>Use word embeddings for solving an NLP Application [Apply]</li> <li>Understand sequence to sequence modeling as used in machine translation. [Apply]</li> </ul> |                 |                                     |             |
| <b>Course Content:</b> |   |                 |                                     |             |
| Module 1               | Introduction  | Assignment      | Introduction                        | 12 Sessions |
| Topics:                |   |                 |                                     | Topics:     |
| Topics:                | Introduction. History. Text Analytics. Various tasks in NLP. Sentence boundary Detection. Edit distance. Introduction to word embeddings, PoS tagging, chunking, parsing, machine translation.  |                 |                                     | Topics:     |
| Module 2               | Word and Text Representations   | Quiz/Assignment | Word and Text Representations       | 12 Sessions |
| Topics:                |   |                 |                                     | Topics:     |
| Topics:                | Logistic Regression and Naïve Bayes classification. Vector semantics and embeddings. Neural Networks and Neural Language Models. Text representations and classification. Deep learning architectures for sequence processing (CNN and LSTM).   |                 |                                     | Topics:     |
| Module 3               | oS Tagging, NER Tagging and Parsing   | Assignment      | oS Tagging, NER Tagging and Parsing | 10 Sessions |
| Topics:                |   |                 |                                     | Topics:     |
| Topics:                | Part-of-Speech Tagging – using NLTK and spacy. Building a PoS Tagger using existing data and Hidden Markov Model. Named Entity Recognition. Relationship between NER tagging and PoS tagging. Constituency Parsing.   |                 |                                     | Topics:     |
| Module 4               | NLP Applications  | Assignment      | NLP Applications                    | 11 Sessions |
| Topics:                |   |                 |                                     | Topics:     |
| Topics:                | Lexical Resource Creation. Sentiment Analysis. Machine Translation. Word Sense Disambiguation and WordNet. Question Answering.  |                 |                                     | Topics:     |
| Text Book              | <ul style="list-style-type: none"> <li>Daniel Jurafsky, and James Martin. "Speech and Language Processing" (3rd edition, 2022)</li> </ul>   |                 |                                     |             |

## CSA3430 - Data Analytics and Business Intelligence

|                                       |   |            |                  |                    |
|---------------------------------------|---|------------|------------------|--------------------|
| <b>Course Code:</b><br><b>CSA3430</b> | <b>Course Title:</b> <b>Data Analytics and Business Intelligence</b><br><b>Type of Course:</b> <b>DE</b>  |            | <b>L-T-P-C</b>   | 1-0-4-3            |
| <b>Version No.</b>                    | 1.1   |            |                  |                    |
| <b>Course Pre-requisites</b>          | Basics of Python Programming and simple database concepts.  |            |                  |                    |
| <b>Anti-requisites</b>                | <b>Nil</b>  |            |                  |                    |
| <b>Course Description</b>             | This is an introductory course to data science and it covers the mathematical foundations of data science, techniques for data collection, pre-processing and visualizing data. Concepts discussed in this course will be supplemented with hands on data science tools in Data Science Lab course. This course also enables students to learn and understand the fundamentals of Business Intelligence and also Describes how Data Integration is achieved using SSIS. |            |                  |                    |
| <b>Course Objective</b>               | The objective of the course is to familiarize the learners with the concepts of <b>Data Analytics and Business Intelligence</b> and attain <b>Skill Development</b> through <b>Experiential Learning</b> techniques.  |            |                  |                    |
| <b>Course Outcomes</b>                | On successful completion of the course the students shall be able to:<br><br>CO1: Describe the fundamentals of Data Analysis and Business Intelligence Technologies. (Understand)<br>CO2: Implement data visualization techniques to analyze Datasets. (Apply)<br>CO3: Apply ETL tools to integrate data in a warehouse. (Apply)  |            |                  |                    |
| <b>Course Content:</b>                |   |            |                  |                    |
| <b>Module 1</b>                       | Introduction to Data Analysis and Visualization   | Assignment | Programming Task | <b>20 Sessions</b> |
| <b>Topics:</b>                        | Introduction to Data Analysis – Python Libraries for Data analysis – Data-types of variables – Continuous and Discrete variables – Data sampling – Pandas Data Structures – Data Visualization – Matplotlib Histograms – Line charts – Pie charts – Multiple bar graphs – Box plots – Scatter plots – Sea born plots – Bokeh plots.   |            |                  |                    |
| <b>Module 2</b>                       | Data collection   | Assignment |                  | <b>20 Sessions</b> |
| <b>Topics:</b>                        | Data Collection – Data Cleaning – Data munging – Web Scrapping – Rescaling and Dimensionality Reduction – Feature Selection – Feature Extraction – Principal Component Analysis.  |            |                  |                    |
| <b>Module 3</b>                       | Introduction to Business Intelligence   | Assignment |                  | <b>20 Sessions</b> |

|  |                               |            |  |                    |
|--|-------------------------------|------------|--|--------------------|
| <b>Topics:</b><br>Types of digital data - Introduction to OLTP - OLAP and Data Mining. BI Definitions & Concepts - Business Applications of BI - BI Framework - Role of Data Warehousing in BI.  |                               |            |  |                    |
| <b>Module 4</b>  | Classification and clustering | Assignment |  | <b>15 Sessions</b> |
| Decision tree Induction - Bayesian classification - Model evaluation and selection techniques to improve classification accuracy. Clustering Analysis - portioning method - Hierarchical methods   |                               |            |  |                    |
| <b>Targeted Application &amp; Tools that can be used:</b><br>Applications in Systems containing Multi-Force Members, Frames, Trusses, Machines, Cable Bridges etc.   |                               |            |  |                    |
| <b>Professionally used software</b> - Staad Pro/ETABS  |                               |            |  |                    |
| <b>Project work/Assignment:</b><br>To understand the application of the forces on rigid bodies, the students should draw the free body diagrams and calculate the magnitudes and directions of forces acting on the body.<br>Assignment: 1] Determine the resultants for the Problems using MATLAB functions<br>Assignment: 2] Determine the support reactions for the beams using MS Excel based on the given data. |                               |            |  |                    |

## CSA3428      Ethical aspects of AI

|                         |   |           |         |
|-------------------------|---|-----------|---------|
| Course Code:<br>CSA3428 | Course Name: Ethical aspects of AI<br>Type of Course: Theory Course | L- T-P- C | 3-0-0-3 |
|-------------------------|---|-----------|---------|

|             |   |
|-------------|---|
| Version No. | 1 |
|-------------|---|

|                       |     |
|-----------------------|-----|
| Course Pre-requisites | Nil |
|-----------------------|-----|

|                 |     |
|-----------------|-----|
| Anti-requisites | Nil |
|-----------------|-----|

|                    |   |
|--------------------|---|
| Course Description | Students will develop fluency reading material drawn from a variety of fields, including computer science, philosophy, legal and media studies. Students will practice ethical and critical thinking skills, such as weighing the rights of different stakeholders, and thinking through the consequences of technological innovations. |
|--------------------|---|

|                  |  |
|------------------|--|
| Course Objective | The objective of the course is to familiarize the learners with the concepts of Ethical aspects of AI attain Skill development through Participative Learning techniques |
|------------------|--|

|                 |   |
|-----------------|---|
| Course Outcomes | <p><b>On successful completion of the course the students shall be able to:</b></p> <ul style="list-style-type: none"> <li>Understand the fundamental concepts of Natural Language Processing. [Understand]</li> <li>Read corpora and train models for different NLP tasks [Apply]</li> <li>Use word embeddings for solving an NLP Application [Apply]</li> <li>Understand sequence to sequence modeling as used in machine translation. [Apply]</li> </ul> |
|-----------------|---|

|                 |  |  |  |  |
|-----------------|--|--|--|--|
| Course Content: |  |  |  |  |
|-----------------|--|--|--|--|

|          |                           |            |                        |             |
|----------|---------------------------|------------|------------------------|-------------|
| Module 1 | Introduction to AI Ethics | Assignment | Key Ethical Principles | 10 Sessions |
|----------|---------------------------|------------|------------------------|-------------|

|  |  |  |  |  |
|--|--|--|--|--|
| Topics:<br>Definition and Importance of Ethics in AI, Ethical Theories and AI, Key Ethical Principles: Transparency, Fairness, Accountability, and Privacy, Ethical Dilemmas in AI, Case Studies: AI Bias and Discrimination |  |  |  |  |
|--|--|--|--|--|

|          |                |                 |                |             |
|----------|----------------|-----------------|----------------|-------------|
| Module 2 | AI and Society | Quiz/Assignment | AI and Society | 12 Sessions |
|----------|----------------|-----------------|----------------|-------------|

|   |  |  |  |  |
|---|--|--|--|--|
| Topics:<br>AI's Impact on Employment and Economy, Ethical Considerations in Autonomous , AI in Healthcare: Ethical Challenges and Solutions, Misinformation and Deepfakes- Case Studies: Social Media Algorithms and Their Ethical Impact |  |  |  |  |
|---|--|--|--|--|

|          |                                 |            |                  |             |
|----------|---------------------------------|------------|------------------|-------------|
| Module 3 | Regulatory and Legal Frameworks | Assignment | Legal Frameworks | 13 Sessions |
|----------|---------------------------------|------------|------------------|-------------|

|  |  |  |  |  |
|--|--|--|--|--|
| Topics:<br>Topics:<br>AI Governance and Policies, Global AI Ethics Guidelines, Data Protection Laws (GDPR, CCPA) and AI, Intellectual Property Rights and AI, Ethical AI Development Practices in Industry |  |  |  |  |
|--|--|--|--|--|

|          |                      |            |                |             |
|----------|----------------------|------------|----------------|-------------|
| Module 4 | Future of Ethical AI | Assignment | Explainable AI | 10 Sessions |
|----------|----------------------|------------|----------------|-------------|

|   |  |  |  |  |
|---|--|--|--|--|
| Topics:<br>AI and Human Rights, Explainable AI (XAI) and Ethical AI Design, AI in Warfare: Autonomous Weapons and Ethical Challenges, Sustainability and AI's Environmental Impact, Case Studies: Ethical AI Practices in Leading Companies |  |  |  |  |
|---|--|--|--|--|

### Track 3 - Cyber Security and Multimedia

#### CSA3406 Cryptography and Network security

|  |   |                         |                                |                    |         |
|--|---|-------------------------|--------------------------------|--------------------|---------|
| <b>Course Code:</b><br><b>CSA3406</b>  | <b>Course Title:</b> Cryptography and Network Security.<br><b>Type of Course:</b> Discipline Elective   |                         |                                | <b>L- T- P- C</b>  | 3-0-0-3 |
| <b>Version No.</b>   | 1   |                         |                                |                    |         |
| <b>Course Pre-requisites</b>   | Nil   |                         |                                |                    |         |
| <b>Anti-requisites</b>   | Nil   |                         |                                |                    |         |
| <b>Course Description</b>  | The Course covers the principles and practice of cryptography and network security, focusing in particular on the security aspects of the web and Internet.   |                         |                                |                    |         |
| <b>Course Objective</b>  | The objective of the course is to familiarize the learners with the concepts of <b>Cryptography and Network Security</b> . and attain <b>Employability Skill</b> through <b>Participative Learning</b> techniques.  |                         |                                |                    |         |
| <b>Course Out Comes</b>  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1:</b> Identifies the basic concept of Cryptography (<b>Remember</b>)</p> <p><b>CO2:</b> Express the different types of Cryptographic Algorithms (<b>Understand</b>)</p> <p><b>CO3:</b> Recognize the Public key Cryptographic Techniques for various applications.<br/><b>(Understand)</b></p> <p><b>CO4:</b> Apply the network security concepts during their implementation of network security application developments. (<b>Apply</b>)</p> |                         |                                |                    |         |
| <b>Course Content:</b>   |   |                         |                                |                    |         |
| <b>Module 1</b>  | <b>Introduction to Cryptography and types of Ciphers</b>  | Assignment              | Data Collection/Interpretation | <b>10 Sessions</b> |         |
| <p><b>Topics:</b> Introduction to Cryptography, Model of Network Security, OSI Security architecture, Security Attacks: active attacks, passive attacks, services: Authentication, Access Control, Data Confidentiality, Data Integrity, Nonrepudiation, Substitution Ciphers : Caesar, Mono alphabetic, Polyalphabetic, Play-fair and Hill Cipher, Introduction to Block Cipher and Stream Cipher, Feistel Structure.</p> |   |                         |                                |                    |         |
| <b>Module 2</b>  | <b>Private Cryptography Key and Number Theory</b>   | Case studies / Case let | Case studies / Case let        | <b>11 Sessions</b> |         |

**Topics:** Symmetric Encryption Algorithms : Data Encryption Standard, Introduction to Galois Field, Advanced Encryption Standard, Modular Arithmetic, Prime numbers, Fermat's little theorem, brief about primality testing and factorization, Discrete Logarithmic Problem, Euclidean and Extended Euclidean Algorithm, Euler Totient Function, Chinese Remainder Theorem.

|                 |   |      |                         |                    |
|-----------------|---|------|-------------------------|--------------------|
| <b>Module 3</b> | <b>Public Key Cryptography and its Applications</b> | Quiz | Case studies / Case let | <b>10 Sessions</b> |
|-----------------|---|------|-------------------------|--------------------|

**Topics:** Overview of Public Key Cryptography, RSA, Diffie - Helman Key exchange, Man in the middle attack, Cryptographic Hash functions, Secure Hash Algorithm, Message Authentication Codes - HMAC, Digital Signature, Discussion on real time practices of Cryptography.

|                 |                         |      |                         |                    |
|-----------------|-------------------------|------|-------------------------|--------------------|
| <b>Module 4</b> | <b>Network Security</b> | Quiz | Case studies / Case let | <b>14 Sessions</b> |
|-----------------|-------------------------|------|-------------------------|--------------------|

**Topics:** Network Security fundamentals, Network Security applications: Authentication: Kerberos, PKI, Network Security applications: e-mail security by: PGP, MIME, Network Security applications: IP Security: IP Sec architecture, Network Security applications: Web Security.

**Targeted Application & Tools that can be used:** Kali Linux

#### **Project work/Assignment:**

**Project:** Malware detections, IDS and IPS for IOT devices using wire shark, NMAP etc.

**Assignment:** Review on types of attacks in networks, Article review, quiz, written assignments

## CSA3407 Ethical Hacking

|   |  |                   |                      |                 |
|---|--|-------------------|----------------------|-----------------|
| <b>Course Code:</b><br>CSA3407  | <b>Course Title:</b> Ethical Hacking<br><b>Type of Course:</b> Discipline Elective   | <b>L- T- P- C</b> | 3-0-0-3              |                 |
| <b>Version No.</b>  | 1.0  |                   |                      |                 |
| <b>Course Pre-requisites</b>  | basic networking tools knowledge and Cryptography & Network Security   |                   |                      |                 |
| <b>Anti-requisites</b>  | NIL  |                   |                      |                 |
| <b>Course Description</b>   | This course introduces students to a wide range of topics related to ethical hacking. It also provides an in-depth understanding of how to effectively protect computer networks. These topics cover some of the tools and penetration testing methodologies used by ethical hackers and provide a thorough discussion of what and who an ethical hacker is and how important they are in protecting corporate and government data from cyber-attacks. |                   |                      |                 |
| <b>Course Objective</b>   | The objective of the course is to familiarize the learners with the concepts of <b>Ethical Hacking</b> attain <b>Employability</b> through <b>Experiential Learning</b> techniques.  |                   |                      |                 |
| <b>Course Outcomes</b>  | On successful completion of this course the students shall be able to:<br>1] Illustrate the importance of ethical hacking [Understand]<br>2] Categorize the various techniques for performing reconnaissance. [Understand]<br>3] Demonstrate various types of system scanners and their functions. [Understand]<br>4] Demonstrate the function of sniffers on a network. [Understand]  |                   |                      |                 |
| <b>Course Content:</b>  |  |                   |                      |                 |
| <b>Module 1</b>   | <b>Introduction to Hacking</b> (Knowledge, Application)  | Assignment        | Programming activity | <b>12 Hours</b> |
| Topics:<br>Introduction to Hacking-Important Terminologies - Asset - Vulnerability - Penetration Test - Vulnerability Assessments versus Penetration Test - Penetration Testing Methodologies - Categories of Penetration Test. |  |                   |                      |                 |
| <b>Assignment:</b> Different phase methodologies on penetration testing   |  |                   |                      |                 |
| <b>Module 2</b>   | <b>Linux Basics</b>  | Assignment        | Programming activity | <b>10 Hours</b> |
| Topics:<br>Major Linux Operating Systems - File Structure inside of Linux - BackTrack - Changing the Default Screen Resolution - Some Unforgettable Basics.   |  |                   |                      |                 |
| <b>Assignment:</b> Penetration testing distribution   |  |                   |                      |                 |

|   |  |            |                      |                 |
|---|--|------------|----------------------|-----------------|
| <b>Module 3</b>   | <b>Information Gathering Techniques</b>                | Assignment | Programming activity | <b>11 Hours</b> |
| <p>Topics:<br/>Sources of Information Gathering - Copying Websites Locally - NeoTrace - Xcode Exploit Scanner - Interacting with DNS Servers - DNS Cache Snooping - DNS Lookup with Fierce - SNMP - SMTP.<br/><b>Assignment:</b> Domain internet groper</p>                                   |  |            |                      |                 |
| <b>Module 4</b>   | <b>Target Enumeration and Port Scanning Techniques</b> | Assignment | Programming activity | <b>13 Hours</b> |
| <p>Topics:<br/>Target Enumeration and Port Scanning Techniques - Host Discovery - Scanning for Open Ports and Services - Types of Port Scanning - Vulnerability Assessment.<br/><b>Assignment:</b> Demonstrations for port scanning</p>   |  |            |                      |                 |
| <p><b>Targeted Application &amp; Tools that can be used:</b> Application Software and open source tools</p>   |  |            |                      |                 |
| <p><b>Project work/Assignment: Mention the Type of Project /Assignment proposed for this course</b></p>   |  |            |                      |                 |
| <p>Any appropriate tool can be given to demonstrate i.e Sql injections.</p>   |  |            |                      |                 |

### CSA3408 Data Security and Privacy

|                                       |   |                   |         |
|---------------------------------------|---|-------------------|---------|
| <b>Course Code:</b><br><b>CSA3408</b> | <b>Course Title:</b> Data Security and Privacy<br><b>Type of Course:</b> Theory | <b>L- T- P- C</b> | 3-0-0-3 |
| <b>Version No.</b>                    | 1.0   |                   |         |
| <b>Course Pre-requisites</b>          |   |                   |         |
| <b>Anti-requisites</b>                | <b>NIL</b>  |                   |         |

|  |   |                  |   |                   |
|--|---|------------------|---|-------------------|
| <b>Course Description</b>  | The purpose of this course is to sensitize security in Big Data environments. This course will discover cryptographic principles, mechanisms to manage access controls in Big Data system. This course teaches the principles and practices of big data for improving the privacy and the security of computing systems. Big data is being applied in areas where there is great commercial advantage to be had, and consequently, attacks and failures have become a serious concern. It delves into a set of techniques for defending big data techniques against breaching of big data (the privacy aspect) and against malicious attacks (the security aspect). |                  |   |                   |
| <b>Course Objective</b>  | The objective of the course is to familiarize the learners with the concepts of <b>BIG DATA SECURITY AND PRIVACY</b> and attain <b>Skill Development</b> through <b>Participative Learning</b> techniques.  |                  |   |                   |
| <b>Course Outcomes</b>   | <b>On successful completion of this course the students shall be able to:</b> <ol style="list-style-type: none"> <li>i. Define cryptographic principles and mechanisms to manage access controls in Big Data system.[Knowledge]</li> <li>ii. Explain security risks and challenges for Big Data system.[Knowledge]</li> <li>iii. Recognize all security related issues in big data systems . [Comprehension]</li> <li>iv. Apply Kerberos configuration for Hadoop ecosystem components. [Application]</li> </ol>  |                  |   |                   |
| <b>Course Content:</b>   |   |                  |   |                   |
| <b>Module 1</b>  | Big Data Privacy, Ethics And Security   | Assignment/ Quiz | Big data security- organizational security                          | <b>12 classes</b> |
| <b>Topics:</b><br>Privacy – Reidentification of Anonymous People – Why Big Data Privacy is self regulating? – Ethics – Ownership – Ethical Guidelines – Big Data Security – Organizational Security.<br>Assignment: Big data security-organizational security                                |   |                  |   |                   |
| <b>Module 2</b>  | Security, Compliance, Auditing, And Protection  | Assignment       | communication protocols for each of the Hadoop ecosystem components | <b>10 classes</b> |
| <b>Topics:</b><br>Steps to secure big data – Classifying Data – Protecting – Big Data Compliance – Intellectual Property Challenge – Research Questions in Cloud Security – Open Problems.<br>Assignment: communication protocols for each of the Hadoop ecosystem components                |   |                  |   |                   |
| <b>Module 3</b>  | Hadoop Security Design, Hadoop Ecosystem Security   | Case study       | Kerberos configuration for ecosystem tools                          | <b>12 classes</b> |
| <b>Topics:</b><br>Kerberos – Default Hadoop Model without security - Hadoop Kerberos Security Implementation & Configuration. Configuring Kerberos for Hadoop ecosystem components – Pig, Hive, Oozie, Flume, HBase, Sqoop.<br>Assignment: Kerberos configuration for Hadoop ecosystem tools |   |                  |   |                   |
| <b>Module 4</b>  | Data Security & Event Logging   | Case study       | Event monitoring in Hadoop cluster                                  | <b>11 classes</b> |
| <b>Topics:</b><br>Integrating Hadoop with Enterprise Security Systems - Securing Sensitive Data in Hadoop – SIEM system – Setting up audit logging in hadoop cluster<br>Assignment: Event monitoring in Hadoop cluster   |   |                  |   |                   |

**Assignment:**

1. Book/Article review: At the end of each module a book reference or an article topic will be given to an individual or a group of students. They need to refer the library resources and write a report on their understanding about the assigned article in appropriate format. [Presidency University Library Link](#) .

2. Presentation: Group presentation, where the students will be given a topic. They will have to explain/demonstrate the working and discuss the applications for the same.

**CSA3409-2D Graphics Design**

|  |  |            |                                     |
|--|--|------------|-------------------------------------|
| Course Code:<br>CSA3409  | Course Name: 2D Graphics Design<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 1-0-4-3                             |
| Version No.  | 1  |            |                                     |
| Course Pre-requisites  | NIL  |            |                                     |
| Anti-requisites  | NIL  |            |                                     |
| Course Description   | This course introduces students to the principles, tools, and techniques of 2D graphic design. Participants will learn how to create visually compelling designs for print, web, and digital media using industry-standard software. The course covers essential topics such as color theory, typography, layout design, vector and raster graphics, and visual storytelling. Through hands-on projects, students will develop the skills to design logos, posters, brochures, digital illustrations, and more. Whether you're a beginner or looking to enhance your design portfolio, this course provides a solid foundation in 2D design concepts and creative problem-solving. |            |                                     |
| Course Objective   | The objective of the course is to familiarize the learners with the concepts of 2D Graphics Design and attain Employability Skills through Experiential Learning techniques.   |            |                                     |
| Course Outcomes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Summarize fundamentals of 2D graphics design [Understand]</p> <p><b>CO2</b> Explain typography and layout design [Understand]</p> <p><b>CO3</b> Develop pictures using digital tools [Apply]</p> <p><b>CO4</b> Construct portfolio designs using digital tools [Apply]</p>   |            |                                     |
| Course Content:  |  |            |                                     |
| Module 1   | 2D Graphics and Design Fundamentals  | Assignment | 2D Graphics and Design Fundamentals |
| <p><b>Topics:</b><br/>Overview of 2D graphic design and its applications. Grids, Golden Ratio, Modular Grids, Warm vs. Cool Colors, Retouching, Rule of Thirds, Visual Flow, White Space. Understanding design principles: balance, contrast, alignment, repetition, and proximity. Basics of color theory and its psychological impact. Introduction to file formats: vector vs. raster graphics</p>  |  |            |                                     |
| Module 2   | Typography and Layout Design   | Assignment | Typography and Layout Design        |
| <p><b>Topics:</b><br/>Exploring typography: fonts, typefaces, Visual Hierarchy in Layout Design, Composition and Proportion, User Experience (UX) and Layout Design and hierarchies. Principles of effective text placement and readability. Creating balanced layouts using grids and alignment. Designing for print and digital platforms</p>  |  |            |                                     |
| Module 3   | Mastering Tools and Techniques   | Assignment | Mastering Tools and Techniques      |
| <p><b>Topics:</b><br/>Introduction to industry-standard software (e.g., Adobe Illustrator, Photoshop, or equivalent). Data Analysis Tools, Audio and Video Editing Tools, Business and Productivity Tools, Cloud Computing Tools and Techniques, Working with layers, shapes, and paths. Designing with vector and raster tools: logos, icons, and illustrations. Image editing and enhancement: cropping, masking, and retouching</p>   |  |            |                                     |
| Module 4   | Projects and Portfolio Development   | Assignment | Projects and Portfolio Development  |
| <p><b>Topics:</b><br/>Creating a GitHub Portfolio for Developers, Project Portfolio for Architects and Engineers Concept development and storyboarding for design projects. Designing promotional materials: posters, flyers, and social media content. Branding and identity design: creating logos and business cards. Assembling a professional portfolio for future opportunities</p>  |  |            |                                     |
| <p><b>List of Laboratory Tasks</b></p> <p>Experiment No. 1: Create a simple design applying balance, contrast, and alignment.<br/>Level 1: Use Adobe Photoshop to create a simple design<br/>Level 2: Make design with multiple layers</p> <p>Experiment No. 2: Color Theory Exercise<br/>Level 1: Develop a color palette<br/>Level 2: apply it to a basic design composition</p> <p>Experiment No. 3: Convert an image between raster and vector formats<br/>Level 1: Convert an image between raster and vector formats<br/>Level 2: analyze the differences</p> <p>Experiment No. 4: Typography Exploration using different fonts, weights, and styles.<br/>Level 1: Design a simple typographic poster.<br/>Level2: Design a complex typographic poster with template</p> <p>Experiment No. 5: Text Layout Exercise</p> |  |            |                                     |

## **CSA3410-Multimedia Data Compression and Storage**

|   |  |            |   |
|---|--|------------|---|
| Course Code: CSA3410  | Course Name: Multimedia Data Compression and Storage<br>Type of Course: Lab / Lab Integrated Course  | L- T-P- C  | 1-0-4-3   |
| Version No.   | 1  |            |   |
| Course Pre-requisites   | Nil  |            |   |
| Anti-requisites   | Nil  |            |   |
| Course Description  | This laboratory-based course provides a practical understanding of multimedia data compression and storage techniques. Students will explore various methods for efficiently encoding, storing, and transmitting multimedia content, including images, audio, and video. The course covers lossless and lossy compression algorithms, entropy coding, transform coding, and predictive coding techniques. Hands-on experiments with industry-standard tools and programming exercises will allow students to implement and evaluate compression methods such as JPEG, PNG, MP3, AAC, and H.264. Additionally, students will learn about storage architectures, file formats, and data retrieval strategies. By the end of the course, students will be equipped with the skills to optimize multimedia storage and transmission for real-world applications. |            |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Multimedia Data Compression and Storage and attain Employability Skills through Experiential Learning techniques.  |            |   |
| Course Out Comes  | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Explain the principles of multimedia compression [Understand]</p> <p><b>CO2</b> Explain image and audio compression methods [Understand]</p> <p><b>CO3</b> Develop storage and transmission strategies for multimedia content [Apply]</p> <p><b>CO4</b> Develop algorithms optimize multimedia data storage and retrieval [Apply]</p>  |            |   |
| Course Content:   |  |            |   |
| Module 1  | Fundamentals of Multimedia Compression   | Assignment | Fundamentals of Multimedia Compression<br>20 Sessions |
| <p><b>Topics:</b><br/>Introduction to multimedia data types (text, images, audio, video). Compression Performance &amp; Evaluation, Peak Signal-to-Noise Ratio (PSNR) and Structural Similarity Index (SSIM), Need for compression: storage and transmission efficiency. Basics of lossless vs. lossy compression. Introduction to entropy coding (Huffman coding, arithmetic coding).</p>  |  |            |   |
| Module 2  | Image and Audio Compression Techniques   | Assignment | Image and Audio Compression Techniques<br>20 Sessions |
| <p><b>Topics:</b><br/>Lossless image compression: Run-Length Encoding (RLE), Huffman Coding, Arithmetic Coding, Lempel-Ziv-Welch (LZW), Lossy Image Compression Methods, Transform Coding (e.g., Discrete Cosine Transform - DCT in JPEG), Vector Quantization, Fractal Compression, Wavelet Transform (e.g., JPEG 2000) PNG, GIF, and TIFF formats. Lossy image compression: JPEG, WebP, and their encoding principles. Audio compression basics: PCM, ADPCM, and psychoacoustic models. Lossy audio compression: MP3, AAC, and Ogg Vorbis.</p>  |  |            |   |
| Module 3  | Video Compression and Storage Systems  | Assignment | Video Compression and Storage Systems<br>20 Sessions  |
| <p><b>Topics:</b><br/>Basics of video representation and frame structures (I, P, and B frames). MPEG (MPEG-1, MPEG-2, MPEG-4), H.264/AVC (Advanced Video Coding), H.265/HEVC (High-Efficiency Video Coding), Motion Estimation and Compensation, Quantization and Entropy Coding, Rate-Distortion Optimization, AV1 and VP9 (Modern Open-Source Codecs) Popular video compression standards: H.264, H.265, VP9. Motion estimation and predictive coding in video compression. Storage architectures: file formats (MP4, AVI, MKV), metadata, and streaming considerations.</p>  |  |            |   |
| Module 4  | Optimization of Compression Algorithms   | Assignment | Optimization of Compression Algorithms<br>15 Sessions |
| <p><b>Topics:</b><br/>Hands-on implementation of compression algorithms using programming tools. Parallelization and GPU Acceleration of Compression Algorithms, Web Optimization (Brotli, Zstandard), Cloud Storage and Data Deduplication, Real-Time Streaming and Low-Latency Compression, Hardware-Based Compression Optimization (ASIC, FPGA), Trade-offs Between Speed and Compression Ratio Comparative analysis of compression techniques based on quality and efficiency. Data retrieval, storage optimization, and cloud-based multimedia storage solutions. Case studies and real-world applications of multimedia compression in streaming, gaming, and broadcasting.</p> |  |            |   |

### List of Laboratory Tasks

Experiment No. 1: Implementation of Huffman Coding.  
Level 1: Encode a given text using Huffman coding  
Level 2: Decode a given text using Huffman coding

127

Experiment No. 2: Arithmetic Coding Experiment

## **CSA3411-Multimedia and Animation**

|   |  |            |   |
|---|--|------------|---|
| Course Code: CSA3411  | Course Name: Multimedia and Animation<br>Type of Course: Lab / Lab Integrated Course   | L- T-P- C  | 1-0-4-3   |
| Version No.   | 1  |            |   |
| Course Pre-requisites   | Nil  |            |   |
| Anti-requisites   | Nil  |            |   |
| Course Description  | This laboratory-based course provides hands-on experience in multimedia production and animation techniques. Students will work with industry-standard software to create and manipulate various multimedia elements, including text, images, audio, video, and interactive content. The course covers essential animation principles, such as keyframing, motion graphics, and character animation, in both 2D and 3D environments. Through practical exercises and projects, students will develop skills in digital storytelling, video editing, and interactive media design. By the end of the course, students will have a portfolio of multimedia and animation projects, preparing them for careers in digital media, entertainment, and advertising industries. |            |   |
| Course Objective  | The objective of the course is to familiarize the learners with the concepts of Multimedia and Animation and attain Employability Skills through Experiential Learning techniques.   |            |   |
| Course Outcomes   | <p><b>On successful completion of the course the students shall be able to:</b></p> <p><b>CO1</b> Summarize multimedia editing techniques [Understand]</p> <p><b>CO2</b> Explain principles of 2D animations and motion [Understand]</p> <p><b>CO3</b> Develop 3D models with texturing, lighting, and rendering techniques [Apply]</p> <p><b>CO4</b> Create interactive multimedia applications [Apply]</p>   |            |   |
| Course Content:   |  |            |   |
| Module 1  | Fundamentals of Multimedia Production  | Assignment | Fundamentals of Multimedia Production<br>20 Sessions          |
| <p><b>Topics:</b><br/>Introduction to multimedia elements: text, images, audio, video, and animation. Image editing and optimization using tools like Adobe Photoshop or GIMP. Emerging Technologies in Multimedia, Animation &amp; Motion Graphics, Audio editing and enhancement using software like Audacity or Adobe Audition. Video editing basics with Adobe Premiere Pro or DaVinci Resolve</p>  |  |            |   |
| Module 2  | 2D Animation and Motion Graphics   | Assignment | 2D Animation and Motion Graphics<br>20 Sessions               |
| <p><b>Topics:</b><br/>Principles of 2D animation: keyframes, tweening, and frame-by-frame animation. Creating animated characters and objects using Adobe Animate or Krita. Motion graphics and kinetic typography using After Effects. Interactive animations for web and multimedia applications.</p>   |  |            |   |
| Module 3  | 3D Animation and Modeling  | Assignment | 3D Animation and Modeling<br>20 Sessions                      |
| <p><b>Topics:</b><br/>Introduction to 3D modeling and texturing with Blender or Autodesk Maya. Rigging and character animation fundamentals. Lighting, rendering, and camera animation for realistic effects. Simulation of physics-based animation (e.g., cloth, particles, and fluids).</p>   |  |            |   |
| Module 4  | Interactive Multimedia and Project Development   | Assignment | Interactive Multimedia and Project Development<br>15 Sessions |
| <p><b>Topics:</b><br/>Designing interactive multimedia applications using Adobe XD or Unity. Game asset creation and animation for interactive environments. Final project: Creating an animated short film or interactive multimedia presentation. Portfolio compilation and project presentation.</p>   |  |            |   |
| <p><b>List of Laboratory Tasks</b></p> <p>Experiment No. 1: Image Editing and Manipulation<br/>Level 1: Edit images<br/>Level 2: Optimize images for streaming requirements</p> <p>Experiment No. 2: Audio Editing and Mixing<br/>Level 1: Edit audio clips<br/>Level 2: Enhance audio clips</p> <p>Experiment No. 3: Video Editing Basics<br/>Level 1: Cut, merge, and apply effects to video clips<br/>Level 2: Optimize video for streaming</p> <p>Experiment No. 4: Multimedia Integration<br/>Level 1: Combine images, audio, and video to a multimedia file<br/>Level2: Optimize multimedia file for streaming</p> <p>Experiment No. 5: Frame-by-Frame Animation<br/>Level 1: Duplicate a simple frame-by-frame animation</p> |  |            |   |
|   |  |            | 129   |

## Value Added Courses

### CSA1204 Design thinking and Innovation

|                                |  |            |                               |                 |
|--------------------------------|--|------------|-------------------------------|-----------------|
| <b>Course Code:</b><br>CSA1204 | <b>Course Title:</b> Design thinking and Innovation<br><b>Type of Course:</b> Theory   |            | <b>L-T-P- C</b>               | 2-0-0-2         |
| <b>Version No.</b>             | 1.0  |            |                               |                 |
| <b>Course Pre-requisites</b>   | NIL  |            |                               |                 |
| <b>Anti-requisites</b>         | NIL  |            |                               |                 |
| <b>Course Description</b>      | The course aims to introduce students to the fundamental principles and processes of Design Thinking and will learn to apply Design Thinking methodologies to real-world challenges. The course emphasizes empathy, creativity, and collaboration, equipping students with essential skills for successful engineering practice. |            |                               |                 |
| <b>Course Objective</b>        | This course is designed to develop and familiarize the learners with the concepts of Design thinking and Innovation and attain Skill Development by using Participative Learning techniques.   |            |                               |                 |
| <b>Course Outcomes</b>         | On successful completion of the course the students shall be able to:<br>1) Understand the concept and importance of Design Thinking. [Understand]<br>2) Differentiate between traditional problem-solving and Design Thinking. [Understand]<br>3) Identify the core stages of the Design Thinking process. [Understand]         |            |                               |                 |
| <b>Course Content:</b>         |  |            |                               |                 |
| <b>Module 1</b>                | Introduction to Design Thinking  | Assignment | Importance of Design Thinking | <b>3 hours</b>  |
| Topic                          | 1) Definition and Introduction to Design Thinking<br>2) Understand the Design Thinking Process   |            |                               |                 |
| <b>Module 2</b>                | Design Thinking in Action  | Assignment | use cases of Design thinking  | <b>12 hours</b> |
| Topics:                        | 1) Introduction to the steps of Design Thinking Process<br>2) Understand use cases of Design thinking<br>3) Design Thinking and Research Tools pertaining to Consumer Tech. , Home Tech. , Personal  |            |                               |                 |

Tech. , Auto Tech. or Extended Reality.

**Targeted Application & Tools that can be used:**

- 1) Design ideation tools like Miro , SCAMPER etc.
- 2) Research Tools for Human Centric Design using forecasting tools like WGSN
- 3) Feedback tools like Google Forms , etc.
- 4) Expert Lectures

**Text Book**

- 5) Thinking Design by S Balaram. New Delhi [India]: Sage Publications Pvt. Ltd. 2010. eBook.,

## Mandatory Courses (MAC)

### CHE7601 - Environmental Studies

|                                       |  |                   |   |   |   |   |
|---------------------------------------|--|-------------------|---|---|---|---|
| <b>Course Code:</b><br><b>CHE7601</b> | <b>Environmental Studies</b><br><br><b>Type of Course:</b> MOOC course   | <b>L- T- P- C</b> | 0 | 0 | 0 | 0 |
| <b>Course Pre-requisites</b>          | NIL  |                   |   |   |   |   |
| <b>Anti-requisites</b>                | NIL  |                   |   |   |   |   |
| <b>Course Description</b>             | This course aims to familiarize students with fundamental environmental concepts and their relevance to business operations, preparing them to address forthcoming sustainability challenges. It is designed to equip students with the knowledge and skills needed to make decisions that account for environmental consequences, fostering environmentally sensitive and responsible future managers. <b>This course is designed to cater to Environment and Sustainability</b>  |                   |   |   |   |   |
| <b>Course Objective</b>               | The objective of the course is 'SKILL DEVELOPMENT' of the student by using 'PARTICIPATIVE LEARNING' techniques   |                   |   |   |   |   |
| <b>Course Outcomes</b>                | On successful completion of this course the students shall be able to: <ol style="list-style-type: none"> <li>1. Describe the basic environmental concepts and issues relevant to the business and management field.</li> <li>2. Recognize the interdependence between environmental processes and socio-economic dynamics.</li> <li>3. Explain the role of business decisions, policies, and actions in minimizing environmental degradation.</li> <li>4. Identify possible solutions to curb environmental problems caused by managerial actions.</li> <li>5. Convert skills to address immediate environmental concerns through changes in business operations, policies, and decisions.</li> </ol> |                   |   |   |   |   |

|  |   |  |  |  |
|--|---|--|--|--|
| <b>Course Content:</b>   |   |  |  |  |
| <b>Module 1</b>  | <b>Understanding Environment, Natural Resources, and Sustainability</b>       |  |  |  |
| <b>Topics:</b><br>Classification of natural resources, issues related to Population growth and their overutilization, and strategies for their conservation. Water, air, soil, mineral, energy and food source. Effect of human activities on natural resources.<br>Concept of sustainability- Sustainable Development Goals (SDGs)- targets and indicators, challenges and strategies for SDGs; Sustainable practices in managing resources, including deforestation, water conservation, Desalination - types, energy security, and food security issues, Life Cycle thinking and Circular Economy.  |   |  |  |  |
| <b>Module 2</b>  | <b>Ecosystems, Biodiversity, and Sustainable Practices</b>                    |  |  |  |
| <b>Topics:</b><br><b>Ecosystems and ecosystem services:</b> Various natural ecosystems, Major ecosystem types in India and their basic characteristics; forests, wetlands, grasslands, agriculture, coastal and marine; Ecosystem services- classification and their significance.<br>The importance of biodiversity, Biodiversity and Climate Change, the threats it faces, hotspots, and the methods used for its conservation. Strategies for in situ and ex situ conservation, nature reserves, and the significance of India as a mega diverse nation.  |   |  |  |  |
| <b>Module 3</b>  | <b>Environmental Pollution, Waste Management, and Sustainable Development</b> |  |  |  |
| <b>Topics:</b><br>Types of pollution- Chemical, - Biological, Biomedical, noise, air, water, soil, thermal, radioactive and marine pollution, and their impacts on society. Urbanization and Urban environmental problems; effects, and mitigation.<br>Causes of pollution, such as global climate change, ozone layer depletion, the greenhouse effect, and acid rain, with a particular focus on pollution episodes in India. Importance of adopting cleaner technologies; Solid waste management;<br><b>Sustainable Materials and Technologies:</b> Biodegradable and compostable materials, Recycled and reclaimed materials (E-waste management), Sustainable manufacturing processes.  |   |  |  |  |
| <b>Module 4</b>  | <b>Social Issues, Legislation, and Practical Applications</b>                 |  |  |  |
| <b>Topics:</b><br>Overview of key environmental legislation and the judiciary's role in environmental protection, including the Water (Prevention and Control of Pollution) Act of 1974, the Environment (Protection) Act of 1986, and the Air (Prevention and Control of Pollution) Act of 1981. Environmental management system: ISO 14001. National Biodiversity Action Plan (NBAP), Environmental Impact Assessment (EIA): Objectives of EIA, Environmental Impact Statement (EIS), Life cycle Assessment (LCA) and application.<br><b>Major International Environmental Agreements:</b> Convention on Biological Diversity (CBD), United Nations Framework Convention on Climate Change (UNFCCC); Kyoto Protocol; Paris Agreement.<br><b>Major International organisations and initiatives:</b> United Nations Environment Programme (UNEP), United Nations Educational, Scientific and Cultural Organization (UNESCO), Intergovernmental Panel on Climate Change (IPCC). |   |  |  |  |
| <b>Targeted Application &amp; Tools that can be used:</b><br>Application areas are Energy, Environment and sustainability<br><b>Tools:</b> Online Tools – NPTEL and Swayam.  |   |  |  |  |
| <b>Project work/Assignment:</b>  |   |  |  |  |
| <b>Assessment Type</b> <ul style="list-style-type: none"> <li>Online end term exam will be conducted by the department of Chemistry</li> </ul>   |   |  |  |  |
| <b>NPTEL/SWAYAM Link*:</b> <ol style="list-style-type: none"> <li><a href="https://nptel.ac.in/courses/109105203">https://nptel.ac.in/courses/109105203</a>, NPTEL course: Environmental Science, Lecture by Dr.</li> </ol>  |   |  |  |  |

| <b>Course Pre-requisites</b>  | NIL  |            |                                  |                    |
| <b>Anti-requisites</b>  | NIL  |            |                                  |                    |
| <b>Course Description</b>   | <p>This course provides a comprehensive understanding of the Indian Constitution and its foundational elements. It begins with a critical analysis of the historical background, the Preamble, Fundamental Rights, and the basic structure doctrine, enabling students to appreciate the constitutional vision of justice, liberty, equality, and fraternity. The course then delves into the framework of governance at both the central and state levels, highlighting the roles, responsibilities, and interplay between key institutions such as the President, Prime Minister, Parliament, Governors, Chief Ministers, and State Secretariats. Additionally, the course offers insights into the structure and functioning of local self-governments, including District Administration, Municipal Corporations, and Zila Panchayats, thus fostering an understanding of grassroots democracy. Finally, the course assesses the pivotal role of the Election Commission in safeguarding democratic values through the conduct of free and fair elections.</p> |            |                                  |                    |
| <b>Course Objective</b>   | <p>This course is designed to improve the learners' <b>Employability Skills</b> by using <b>Participatory Learning techniques</b>.</p>   |            |                                  |                    |
| <b>Course Outcomes</b>  | <p>On successful completion of the course, the students shall be able to:</p> <p><b>CO1.</b> To analyse the history, Preamble, Fundamental Rights, and basic structure of the Indian Constitution.</p> <p><b>CO2.</b> To describe the roles of the President, Prime Minister, and legislative bodies (Lok Sabha and Rajya Sabha).</p> <p><b>CO3.</b> To examine the powers and functions of the Governor, Chief Minister, and State Secretariat</p> <p><b>CO4.</b> To assess the functioning of local government bodies like District Administration, Municipal Corporations, and Zila Panchayats.</p> <p><b>CO5.</b> To analyse the role of the Election Commission in conducting free and fair elections.</p>  |            |                                  |                    |
| <b>Course Content:</b>  |  |            |                                  |                    |
| <b>Module 1</b>   | <b>The Constitution - Introduction</b>   | <b>CO1</b> | <b>Lectures &amp; Discussion</b> | <b>08 Sessions</b> |
| <p>History of the Making of the Indian Constitution, Preamble and Basic Structure, and its interpretation, Fundamental Rights and Duties and their interpretation, State Policy Principles.</p> |  |            |                                  |                    |
| <b>Module 2</b>   | <b>Union Government</b>  | <b>CO2</b> | <b>Case Study/Group</b>          | <b>08 Sessions</b> |

| <b>Discussion</b>  |                             |            |                       |                    |
|--|-----------------------------|------------|-----------------------|--------------------|
| Structure of the Indian Union, President – Role and Power, Prime Minister and Council of Ministers, Lok Sabha and Rajya Sabha.   |                             |            |                       |                    |
| <b>Module 3</b>  | <b>State Government</b>     | <b>CO3</b> | <b>Research paper</b> | <b>06 Sessions</b> |
| Governor – Role and Power, Chief Minister and Council of Ministers, State Secretariat.   |                             |            |                       |                    |
