3) Describes the comparison between Logistic Regression and Random Forest using Classification examples.

**Industry Support:** Should be of interest to companies trying to employ engineers familiar with Machine Learning

**Course Content:** [Briefly mention all the important topics to be covered in this course]

Fundamentals and basic building blocks of both statistics and Machine Learning. Compares the differences

and draws parallels between statistical modeling and machine learning using linear regression and lasso/ridge regression examples. Describes the comparison between logistic regression and random forest using a classification example, explaining the detailed steps in both modeling processes.

# PRESIDENCY UNIVERSITY

(Established under the Presidency University Act, 2013 of the Karnataka Act 41 of 2013)

**Name of the School: School of Information Science**

**Name of the Department: Bachelor of Computer Applications**

**Area of Specialization: Software Engineering**

**Name of the Faculty Member: Ms. Amirtha Preeya V**

**Title of the Value Added Course: Software Testing**

**Course Duration: [ 30hours ] [From 10 feb 2022to 5 March 2022 ]**

**Course Code: CSE V 182**

**Introduction to the Course:**

This Course is designed to make the students understand the strategies, methods and technologies of software testing effectively. It aims at Designing test plans and test cases, doing automatic testing; reporting on software defects; assessing the software product correctly; and distinguish the relationship between software testing and quality assurance. In addition, students are expected to do a group assignment on software testing tools of their choice.

**Course Pre-requisites: Software Engineering**

**Course Outcomes: On successful completion of the course the students shall be able to :**

1. Describe the fundamentals of software testing for software assurance.
2. Select the appropriate testing type to test applications
3. Report the bugs found in testing.

**Course Content:**

**Module 1: BASICS OF SOFTWARE TESTING**

Phases of software Project- Quality – Quality Assurance and Quality control – Testing –Verification and validation – Life cycle Models.

**Module 2: TYPES OF TESTING**

Introduction to White box testing- static testing – structural Testing . Challenges in White box testing – Fundamentals of Black box testing – When and how to do black box testing.

Integration Testing- As a phase of testing – System Testing\_ Functional and Non functional Testing – Acceptance Testing.

**Module 3: SPECIALIZED TESTING TECHNIQUES**

Performance Testing- Regression Testing - Internationalization Testing, Ad-hoc testing -Defect Life Cycle.

**Name of the School:** School of Information Science

**Name of the Department:** Bachelor of Computer Application

**Area of Specialization:** Network Security

**Name of the Faculty Member:** N Nasurudeen Ahamed

**Title of the Value Added Course:** BLOCKCHAIN BASICS

**Course Duration:** [ 30 hours]

**Course Code:** CSEV177

**Introduction to Blockchain Basics:** The Blockchain Basics course provides an introduction to the foundational concepts of blockchain technology. Blockchain is a distributed and decentralized ledger technology that allows secure and transparent transactions without the need for a central authority.

- Programming languages used for smart contract development (e.g., Solidity).
- Blockchain Applications:
- Challenges and potential solutions for scalability and interoperability in blockchain systems.
- Regulatory and Legal Implications:
- Regulatory considerations and legal challenges surrounding blockchain and cryptocurrencies.

The Blockchain Basics course aims to provide a comprehensive introduction to blockchain technology, allowing students to grasp the fundamental concepts, evaluate its potential applications, and understand the challenges and opportunities presented by this transformative technology
