Bachelor of Technology Degree

Program Regulations and Curriculum 2019-2023

B. Tech. (Computer Science and Engineering)

2019-2023

Regulations No.: PU/AC-20.3/SOCSE01/CSE/2019-2023

Resolution No.3 of the 20th Meeting of the Academic Council held on 15th February 2023, and ratified by the Board of Management in its 21st Meeting held on 22nd February 2023.

FEBRUARY 2023

REGISTRAR

Bachelor of Technology Degree Program Regulations and Curriculum, 2019-2023

In exercise of the powers conferred by and in discharge of duties assigned under the relevant provision(s) of the Act, Statutes and Academic Regulations, 2019 of the University, the Academic Council hereby makes the following Regulations, namely;

Preliminary:

Short Title and Commencement

- (a) These Regulations shall be called the **Bachelor of Technology Degree Program Regulations and Curriculum 2019-2023**.
- (b) These Regulations are subject to, and, pursuant to the Academic Regulations, 2019
- (c) These Regulations (with amendments) shall be applicable to the ongoing Bachelor of Technology Degree Programs of the 2019-2023 batch and to all other Bachelor of Technology Degree Programs which may be introduced in future.
- (d) These Regulations (with amendments) shall supersede all the earlier Bachelor of Technology Degree Program Regulations and Curriculum, along with all the amendments thereto.
- (e) These Regulations (with amendments) shall come into force from the Academic Session 2019-20.

Definitions:

In these Regulations, unless the context otherwise requires:

- a) “Academic Council” means the Academic Council of the University;
- b) “Academic Regulations” means the Academic Regulations, 2019 of the University;
- c) “Academic Term” means a Semester or Summer Term;
- d) “Act” means the Presidency University Act, 2013;
- e) “Board of Examinations (BOE)” means the Board of Examinations of the University;
- f) “Board of Management (BOM)” means the Board of Management of the University;
- g) “CGPA” means Cumulative Grade Point Average as defined in the Academic Regulations, 2019;
- h) “Clause” means the duly numbered Clause, with Sub-Clauses included, if any, of these Regulations;
- i) “Course” means, a specific subject usually identified by its Course Code and Course Name, with specified Credit Structure and Credits, Course Description/ Content/ Syllabus, a set of textbooks/ references, taught by assigned Course Instructor(s) to a specific class (group of students) during a specific Academic Term;
- j) “Course Instructor” means the faculty member who is the Teacher/ Course Instructor of the concerned Course;

REGISTRAR

- k) “DAC” means, the Departmental Academic Committee;
- l) “Dean” means the Dean of the concerned School;
- m) “HOD” means the Head of the concerned Department;
- n) “Parent Department” means the department that offers the Degree Program that a student undergoes;
- o) “Program” means the Bachelor of Technology (B.Tech) Degree Program;
- p) “Program Regulations” means the Bachelor of Technology Degree Program Regulations and Curriculum 2019-2023;
- q) “Registrar” means the Registrar of the University;
- r) “SGPA” means the Semester Grade Point Average as defined in the Academic Regulations, 2019;
- s) “School” means a constituent institution of the University established for monitoring, supervising and guiding, teaching, training and research activities in broadly related fields of studies;
- t) “Section” means the duly numbered Section, with Clauses included in that Section, of these Program Regulations;
- u) “Statutes” means the Statutes of Presidency University;
- v) “Sub-Clause” means the duly numbered Sub-Clause of these Program Regulations;
- w) “Summer Term” means an additional Academic Term conducted during the summer break (typically in June-July) for a duration of about eight (08) calendar weeks, with a minimum of thirty (30) University teaching days, and,
- x) “University” means Presidency University, Bengaluru;

1. INTRODUCTION:

- 1.1. The **Academic Regulations, 2019** are applicable to all existing Degree Programs of the University. The Academic Regulations, and any amendments made therein, shall also be applicable to new Degree and Diploma Programs that may be offered by the University in future.
- 1.2. The **Bachelor of Technology Degree Program Regulations and Curriculum 2019-2023** are subject to, and, pursuant to the Academic Regulations, 2019.
- 1.3. These Program Regulations shall be applicable to the following **Bachelor of Technology (B.Tech) Degree Programs of 2019-2023:**
 - 1.3.1. Bachelor of Technology in Civil Engineering, abbreviated as B.Tech (Civil Engineering);
 - 1.3.2. Bachelor of Technology in Computer Science and Engineering, abbreviated as B.Tech (Computer Science and Engineering);
 - 1.3.3. Bachelor of Technology in Electronics and Communication Engineering, abbreviated as B.Tech (Electronics and Communication Engineering);

- 1.3.4. Bachelor of Technology in Electrical and Electronics Engineering, abbreviated as B.Tech (Electrical and Electronics Engineering);
 - 1.3.5. Bachelor of Technology in Mechanical Engineering, abbreviated as B.Tech (Mechanical Engineering);
 - 1.3.6. Bachelor of Technology in Petroleum Engineering, abbreviated as B.Tech (Petroleum Engineering);
 - 1.3.7. Bachelor of Technology in Computer Engineering, abbreviated as B.Tech. (Computer Engineering);
 - 1.3.8. Bachelor of Technology in Computer and Communication Engineering, abbreviated as B.Tech. (Computer and Communication Engineering).
 - 1.3.9. Bachelor of Technology in Information Science and Engineering, abbreviated as B.Tech. (Information Science and Engineering); and,
 - 1.3.10. Bachelor of Technology in Information Science and Technology, abbreviated as B.Tech. (Information Science and Technology).
- 1.4. These Program Regulations shall be applicable to other similar programs, which may be introduced in future.
 - 1.5. These Program Regulations may evolve and get amended or modified or changed through appropriate approvals from the Academic Council, from time to time, and shall be binding on all concerned.
 - 1.6. The effect of periodic amendments or changes in the Program Regulations, on the students admitted in earlier years, shall be dealt with appropriately and carefully, so as to ensure that those students are not subjected to any unfair situation whatsoever, although they are required to conform to these revised Program Regulations, without any undue favor or considerations.
 - 1.7. These Program Regulations are structured as follows:
 - 1.7.1. **Part A:** Specific regulations relevant to the Bachelor of Technology (B.Tech) Degree Programs in pursuant of the provisions in Section 6.0 of the Academic Regulations, 2019 of the University.
 - 1.7.2. **Part B:** Program Curriculum for the specific ongoing Bachelor of Technology (B.Tech) Degree Program of study as enumerated and named in Clause 1.3.

REGISTRAR

2. PART A: PROGRAM SPECIFIC REGULATIONS

2.1. Program Description and Duration

B.Tech. Degree Programs are offered in the following branches/ disciplines by the respective parent Departments as indicated in Table 2.1 below:

Table 2.1	
B. Tech Degree Programs and respective Parent Departments	
<i>B.Tech Program (Branch/ a)</i>	<i>Parent Department</i>
B.Tech (Civil Engineering)	Department of Civil Engineering
B.Tech (Computer Science and Engineering)	Department of Computer Science and Engineering
B.Tech (Electronics and Communication Engineering)	Department of Electronics and Communication Engineering
B.Tech (Electrical and Electronics Engineering)	Department of Electrical and Electronics Engineering
B.Tech (Mechanical Engineering)	Department of Mechanical Engineering
B.Tech (Petroleum Engineering)	Department of Petroleum Engineering
B.Tech (Computer Engineering)	Department of Computer Science and Engineering
B.Tech (Computer and Communication Engineering)	Department of Computer Science and Engineering
B.Tech (Information Science and Engineering)	Department of Computer Science and Engineering

REGISTRAR

B.Tech (Information Science and Technology)	Department of Computer Science and Engineering
B.Tech (Electronics and Computer Engineering)	Department of Computer Science and Engineering

Bachelor of Technology Degree Program is a Four-Year, Full-Time Semester based program. The minimum duration of the B.Tech Program is four (04) years and each year comprises of two academic Semesters (Odd and Even Semesters) and hence the duration of the B.Tech program is eight (08) Semesters.

2.2. Admission Criteria to the Four-Year Bachelor of Technology (B.Tech) Degree Programs

The University admissions shall be open to all persons irrespective of caste, class, creed, gender or nation. All admissions shall be made on the basis of merit in the qualifying examinations; Provided that forty percent of the admissions in all Programs of the University shall be reserved for the students of Karnataka State and admissions shall be made through a Common Entrance Examination conducted by the State Government or its agency and seats shall be allotted as per the merit and reservation policy of the State Government from time to time.

The admission criteria to the B.Tech Program are listed in the following Sub-Clauses:

- 2.2.1. An applicant who has successfully completed Pre-University course or Senior Secondary School course (+2) or equivalent such as (11+1), 'A' level in Senior School Leaving Certificate Course from a recognized University of India or outside or from Senior Secondary Board or equivalent, constituted or recognized by the Union or by the State Government of that Country for the purpose of issue of qualifying certificate on successful completion of the course, may apply for and be admitted into the course.
- 2.2.2. Provided further, the applicant must have taken Physics and Mathematics as compulsory subjects in the Pre-University/ Higher Secondary / (10+2) / (11+1) examination, along with either Chemistry/ Biology/ Electronics/ Computer Science/ Biotechnology subject, and, the applicant must have obtained a minimum of 45% of the total marks (40% in case of candidates belonging to the Reserved Category as classified by the Government of Karnataka) in these subjects taken together.
- 2.2.3. The applicant must have appeared for Joint Entrance Examinations (JEE) Main / JEE (Advanced) / Karnataka CET / COMED-K, or any other State-level Engineering Entrance Examinations.
- 2.2.4. Reservation for the SC/ ST and other backward classes shall be made in accordance with the directives issued by the Government of Karnataka from time to time.
- 2.2.5. Admissions are offered to Foreign Nationals and Indians living abroad

REGISTRAR

accordance with the rules applicable for such admission, issued from time to time, by the Government of India.

- 2.2.6. Candidates must fulfil the medical standards required for admission as prescribed by the University.
- 2.2.7. If, at any time after admission, it is found that a candidate had not in fact fulfilled all the requirements stipulated in the offer of admission, in any form whatsoever, including possible misinformation and any other falsification, the Registrar shall report the matter to the Board of Management (BOM), recommending revoking the admission of the candidate.
- 2.2.8. The decision of the BOM regarding the admissions is final and binding.

2.3. Lateral Entry

The University admits students directly to the second year (3rd Semester) of the B.Tech Degree program as per the provisions and/ or regulations of the Government of Karnataka pertaining to the “Lateral Entry” scheme announced by the Government from time to time.

Further, the general conditions and rules governing the provision of Lateral Entry to the B.Tech Program of the University are listed in the following Sub-Clauses:

- 2.3.1. Admission to 2nd year (3rd Semester) of the B.Tech Degree program shall be open to the candidates who are holders of a 3-year Diploma in Engineering (or equivalent qualification as recognized by the University), who have secured not less than forty five percentage (45%) marks in the final year examination (fifth and sixth Semesters of the Diploma Program) in the appropriate branch of Engineering. Provided that, in case of SC/ ST and OBC candidates from Karnataka the minimum marks for eligibility shall be forty percent (40%).
- 2.3.2. Provided further that, candidates seeking lateral entry may be required to complete specified bridge Courses as prescribed by the University. Such bridge Courses, if any, shall not be included in the CGPA computations.
- 2.3.3. All the existing Regulations and Policies of the University shall be binding on all the students admitted to the Program through the provision of Lateral Entry.
- 2.3.4. The Course requirements prescribed for the 1st Year of the B.Tech Program shall be waived for the student(s) admitted through Lateral Entry and the duration of the B.Tech Program for such students is three (03) years, commencing from the 3rd Semester (commencement of the 2nd Year) of the B.Tech Program and culminating with the 8th Semester (end of the 4th Year) of the B.Tech Program.
- 2.3.5. The existing Program Regulations of the concerned Program to which the student is admitted through the provision of Lateral Entry shall be binding on the student with effect from the 3rd Semester of the Program. i.e., the Program Structure and Curriculum from the 3rd to 8th Semesters of the Program concerned shall be binding on the student admitted through Lateral Entry. Further, any revisions

amendments made to the Program Regulations thereafter, shall be binding on all the students of the concerned Program.

- 2.3.6.** All the Courses (and the corresponding number of Credits) prescribed for the 1st Year of the concerned B.Tech Program shall be waived for the student(s) admitted to the concerned B.Tech Program through Lateral Entry. Further, the *Minimum Credit Requirements* for the award of the B.Tech Degree in the concerned Program shall be prescribed/ calculated as follows:

The *Minimum Credit Requirements* for the award of the Bachelor of Technology (B.Tech) Degree prescribed by the concerned Bachelor of Technology Degree Program Regulations and Curriculum 2019-2023, minus the number of Credits prescribed for the 1st Year (total number of Credits prescribed for the 1st and 2nd Semesters) of the B.Tech Program.

For instance, if the *Minimum Credit Requirements* for the award of the Bachelor of Technology (B.Tech) Degree as prescribed by the Regulations for B.Tech (Computer Science and Engineering) is “N” Credits, and, if the total credits prescribed in the 1st Year (total credits of the 1st and 2nd Semesters) of the Program concerned is “M” Credits, then the *Minimum Credit Requirements* for the award of the B.Tech in Computer Science and Engineering for a student who joins the Program through the provision of the Lateral Entry, shall be “N – M” Credits.

- 2.3.7.** Further, no other waiver except the Courses prescribed for the 1st year of the B.Tech Program of the University shall be permissible for students joining the B.Tech Program through the provision of Lateral Entry.

2.4. Transfer of student(s) from another recognized University to the 2nd year (3rd Semester) of the B.Tech Program of the University

A student who has completed the 1st Year (i.e., passed in all the Courses/ Subjects prescribed for the 1st Year) of the B.Tech / B.E. / B.S., Four-Year Degree Program from another recognized University, may be permitted to transfer to the 2nd Year (3rd Semester) of the B.Tech Program of the University as per the rules and guidelines prescribed in the following Sub-Clauses:

- 2.4.1.** The concerned student fulfils the criteria specified in Sub-Clauses 2.3.1, 2.3.2 and 2.3.3.
- 2.4.2.** The student shall submit the Application for Transfer along with a non-refundable Application Fee (as prescribed by the University from time to time) to the University no later than July 10 of the concerned year for admission to the 2nd Year (3rd Semester) B.Tech Program commencing on August 1 on the year concerned.
- 2.4.3.** The student shall submit copies of the respective Marks Cards/ Grade Sheets/ Certificates along with the Application for Transfer
- 2.4.4.** The transfer may be provided on the condition that the Courses and Credits

completed by the concerned student in the 1st Year of the B.Tech/ B.E./ B.S. Four Degree Program from the concerned University, are declared equivalent and acceptable by a Committee constituted by the Vice Chancellor for this purpose. Further, the Committee may also prescribe the Courses and Credits the concerned students shall have to mandatorily complete, if admitted to the 2nd Year of the B.Tech Program of the University.

- 2.4.5. The Branch/ Discipline allotted to the student concerned shall be the decision of the University and binding on the student.

2.5. Change of Branch/ Discipline

A student admitted to a particular Branch of the B.Tech Program will normally continue studying in that Branch till the completion of the program. However, the University reserves the right to provide the option for a change of Branch, or not to provide the option for a change of Branch, at the end of 1st Year of the B.Tech Program to eligible students in accordance with the following rules and guidelines: framed by the University from time to time.

- 2.5.1. Normally, only those students, who have passed all the Courses prescribed for the 1st Year of the B.Tech Program and obtained a CGPA of not less than 6.00 at the end of the 2nd Semester, shall be eligible for consideration for a change of Branch.
- 2.5.2. Change of Branch, if provided, shall be made effective from the commencement of the 3rd Semester of the B.Tech Program. There shall be no provision for change of Branch thereafter under any circumstances whatsoever.
- 2.5.3. The student(s) provided with the change of Branch shall fully adhere to and comply with the Program Regulations of the concerned Branch of the B.Tech Program, the Fee Policy pertaining to that Branch of the B.Tech Program, and, all other rules pertaining to the changed Branch existing at the time.
- 2.5.4. Change of Branch once made shall be final and binding on the student. No student shall be permitted, under any circumstances, to refuse the change of Branch offered.
- 2.5.5. The eligible student may be allowed a change in Branch, strictly in order of *inter se* merit, subject to the conditions given below:
- 2.5.5.1. The actual number of students in the third Semester in any particular Branch to which the transfer is to be made, should not exceed the intake fixed by the University for the concerned Branch; and,
- 2.5.5.2. The actual number of students in any Branch from which transfer is being sought does not fall below 75% of the total intake fixed by the University for the concerned Branch.
- 2.5.6. The process of change of Branch shall be completed within the first five days of Registration for the 3rd Semester of the B.Tech Program.

2.6. Professional Practice Courses

Registrar
PRESIDENCY UNIVERSITY
BANGALORE

Professional Practice Courses (Professional Practice – I and Professional Practice – II) are practice based Courses with the objective to equip students with the skills of problem identification, root cause analysis and problem solving, innovation and design thinking through industry exposure and project based learning. The expected outcomes are first level proficiency in problem solving and design thinking skills to better equip B.Tech graduates for their professional careers.

The method of evaluation and grading for the Professional Practice Courses shall be prescribed and approved by the concerned Departmental Academic Committee (refer Annexure A of the Academic Regulations, 2019). The same shall be prescribed in the Course Handout.

2.7. Professional Practice – I

Professional Practice – I is a 5 Credit Course. This first level practice based course is conducted after the 4th Semester of the B.Tech Program, during the summer break (usually June – July), in accordance with the following options and guidelines:

2.7.1. Internship Program in an Industry/ Company:

A student may undergo an Internship Program for a period of 6 – 8 weeks in an industry/ company, subject to the following conditions:

2.7.1.1. The Internship Program shall be conducted in accordance with the Internship Policy prescribed by the University from time to time.

2.7.1.2. The selection criteria (minimum CGPA, pass in all Courses as on date, and any other qualifying criteria) as applicable/ stipulated by the concerned Industry/ Company for award of the Internship to a student;

2.7.1.3. The number of Internships available for the concerned Academic Term. Further, the available number of internships shall be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfils the criteria, as applicable, specified by the Industry/ Company providing the Internship, as stated in Sub-Clause 2.7.1.2 above.

2.7.1.4. A student may opt for Internship in an Industry/ Company of her/ his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her/ his own. Provided further, that the Industry/ Company offering such Internship confirms to the University that the Internship program shall be conducted in accordance with the Program Regulations and Internship Policy of the University.

2.7.1.5. A student selected for an Internship in an industry/ company shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.

2.7.2. Project Work:

A student may opt to do a Project Work in an Industry/ Company/ Research Laboratory or the University Department(s), subject to the following conditions:

[Handwritten Signature]

2.7.2.1. The Project Work shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.

2.7.2.2. The student may do the project work in an Industry/ Company/ Research Laboratory of her/ his choice subject to the above mentioned condition (Sub-Clause 2.7.2.1). Provided further, that the Industry/ Company/ Research Laboratory offering such project work confirms to the University that the project work will be conducted in accordance with the Program Regulations and requirements of the University.

2.8. Professional Practice – II

Professional Practice - II is an intensive practice based course with 15 Credits offered during the final (4th) year of the B.Tech Program. Students may register for Professional Practice – II in either the 7th Semester or the 8th Semester of the B.Tech Program, in accordance with the following guidelines:

Internship Program in an Industry/ Company:

A student may undergo an Internship Program for a period of about 15 weeks in an Industry/ Company, subject to the following conditions:

2.8.1.1. The Internship Program shall be in conducted in accordance with the Internship Policy prescribed by the University from time to time.

2.8.1.2. The selection criteria (minimum CGPA, pass in all Courses as on date, any other qualifying criteria) as applicable/ stipulated by the concerned Industry/ Company for award of Internship to a student;

2.8.1.3. The number of Internships available for the concerned Academic Term. Further, the available number of Internships will be awarded to the students by the University on the basis of merit using the CGPA secured by the student. Provided further, the student fulfills the criteria, as applicable, specified by the Industry/ Company providing the Internship, as stated in Sub-Clause 2.8.1.2 above.

2.8.1.4. A student may opt for Internship in an Industry/ Company of her/ his choice, subject to the condition that the concerned student takes the responsibility to arrange the Internship on her/ his own. Provided further, that the Industry/ Company offering such Internship confirms to the University that the Internship program shall be conducted in accordance with the Program Regulations and Internship Policy of the University.

2.8.1.5. A student selected/ awarded an Internship Program in an Industry/ Company shall adhere to all the rules and guidelines prescribed in the Internship Policy of the University.

2.8.2. Project Work and Dissertation:

REGISTRAR

A student may do an extensive Project Work (with a Dissertation) in an Industry/ Company/ Research Laboratory or the University Department(s), subject to the following conditions:

2.8.2.1. The Project Work shall be approved by the concerned HOD and be carried out under the guidance of a faculty member.

2.8.2.2. The student may do the Project Work in an Industry/ Company/ Research Laboratory of her/ his choice subject to the above mentioned condition (Sub-Clause 2.8.2.1). Provided further, that the Industry/ Company/ Research Laboratory offering such project work confirms to the University that the Project Work will be conducted in accordance with the Program Regulations and requirements of the University.

2.9. Social Immersion Courses

The objective of a Social Immersion Course (SIC) is to sensitize and inculcate commitment to social and environmental issues and make a contribution through service and experiential learning. The outcome is to produce graduates who are sensitized and committed to serving the social and environmental needs of society.

The SIC is a 1- Credit Course coordinated by the parent Department or a group of Departments and the student is required to complete this course ideally during any of the Semesters of the 2nd or 3rd Year of the B.Tech Program. The nature and details of the SIC shall be approved by the concerned Departmental Academic Committee (DAC). As per the Academic Regulations, the 'S' grade is awarded for "satisfactory completion" of the Course and 'NC' grade is awarded for "non-completion" of the Course. The student who receives the "NC" grade shall repeat the SIC (it may be another type of SIC as approved by the concerned DAC) until the concerned student secures the "S" grade in the SIC. The "S" and "NC" grades do not carry grade points and hence not included in the SGPA, CGPA computations.

2.10. Open Electives

Open Electives are Courses offered by any Department/ School of the University. The primary objective of offering Open Electives is to provide interdisciplinary/ transdisciplinary learning experiences. The outcome is a graduate with a fair exposure to disciplines beyond the chosen Branch in the B.Tech Program.

Open Electives offered by any Department/ School of the University are listed in the Course Structure under the Open Elective category and offered to students of any Department including the parent Department/ School.

The Course details and method of evaluation shall be clearly prescribed in the concerned Course Handout.

2.11. Specific Regulations regarding Assessment and Evaluation

(Refer Section 8.5 to 8.8 of the Academic Regulations 2019)

REGISTRAR

The components of continuous assessments, weightage for each component and the method of evaluation shall be assigned considering the nature of the Courses in terms of the pedagogy and outcomes.

2.11.1 Normally, for the Courses that have only the Lecture and Tutorial Credit Structure (L – T – 0)/(L – 0 – 0), with no Practical component, the components of Continuous Assessment and the distribution of weightage among the components of continuous assessment and duration of the examination/ assessment shall be as detailed in the Table 2.11.1 below:

Table 2.11.1 Method of Assessment for Courses with Credit Structure (L – T – 0) / (L – 0 – 0)			
Components of Continuous Assessments		Weightage (% of Total Marks)	Duration of Assessment
1	Mid Term Exam	30%	1.5 hours
2	Continuous Assessment 3: This component of continuous assessment shall consist of at least TWO (02) of the following: (1) Assignments (2) Quiz (3) Technical Seminar/report (4) Attendance/Class Participation (5) Assessment on Self learning topics (6) Any other type of assessment as prescribed in the concerned Course Handout.	20%	NA
3	End Term Final Examinations	50%	3 hours
Total		100%	
<p>Note :</p> <p>(i) An additional Test 3 may be conducted as an optional test to allow for improvement. If a Test 3 is provided, then the higher marks obtained in any two tests shall be considered for evaluation.</p> <p>(ii) Normally, the End Term Final Examination shall cover the entire course coverage as prescribed in the course handout.</p>			

2.11.2. Normally, for Practical Courses that have only the Practical Credit Structure (0 – 0 – P), or Practical Courses with a Credit Structure (L – 0 – P), the components of continuous assessment

and the distribution of weightage among the components of continuous assessment and duration of the examination/ assessment is detailed in the Table 2.11.2 below:

Table 2.11.2 Method of Assessment for Laboratory/Practice Based Courses with Credit Structure (0 – 0 – P) / (L – 0 – P)			
Components of Continuous Assessments		Weightage (%of Total Marks)	Duration of Assessment
1	Continuous Assessment 1 Laboratory work/Practical Exercises, conducted in every laboratory/practice session/activity, including laboratory records, practice/project reports, attendance/class participation as applicable and as prescribed by the course handout..	30%	NA
2	Continuous Assessment 1 Practical Test/Viva voce/Quiz/Practice Assignments /Presentations and other assessments as prescribed in the Course Handout.	20%	NA
3	End Term Final Practical Examinations: Practical experiments/ Practice Test(s) with Viva-voce, Jury or any other type of assessment as prescribed in the course handout.	50%	3 hours
Total		100%	

2.11.3. Normally, for Practice/ Skill based Courses, without a defined credit structure (L – T – P), but with assigned credits, (as defined in Clause 5.2 of the Academic Regulations, 2019), the method of evaluation shall be based only on Continuous Assessments. The various components of Continuous assessments, the distribution of weightage among such components, and the method of evaluation/assessment, shall be prescribed in the concerned Course Handout. There shall be no component of End Term Final Examinations for such Courses.

2.11.4. In case any exception is required for a particular Course, where the methods of assessment prescribed in the specific regulations mentioned above in Sub-Clauses 2.11.1, 2.11.2 and 2.11.3 are not suitable/ relevant for the assessing the performance in the concerned Course, the BOS shall recommend the appropriate method of assessment for approval of the Academic Council.

2.12. Course Handout

 REGISTRAR

The Course Handout (Refer Clause 6.2 of the Academic Regulations, 2019) is a comprehensive document describing the Objectives/ Outcomes of the Course, the detailed syllabus (with the prescribed Text Book(s) and Reference Material), the Lesson/ Session-wise Plan, and all the relevant and necessary details regarding the pedagogy, expectation from the students regarding preparation, participation and self-learning, components of continuous assessment and respective weightage (in percentage (%)) of the total marks of all components of assessment) given to the components, and the method of evaluation. The guidelines for preparation of the Course Handout, its approval and delivery are listed in the following Sub-Clauses:

- 2.12.1. The Course Handout will be prepared as per the Outcome Based Education Guidelines of the University.
- 2.12.2. Normally the Course Handout is prepared by the Course Instructor(s) assigned to teach the Course. In cases of multiple sections of students registered for the same Course, an Instructor In-Charge, assigned by the DAC, shall prepare the Course Handout in consultation with the other Course Instructors assigned to the concerned Course.
- 2.12.3. The DAC shall examine each Course Handout and arrange for necessary deliberations as required. On acceptance of the completeness and quality of the Course Handout, the DAC shall approve the Course Handout.
- 2.12.4. A consolidated printed/ soft copy of the Booklet of all Course Handouts corresponding to the concerned Semester of a particular Program of Study shall be provided to every student concerned on the first day/ Registration day of the concerned Semester.
- 2.12.5. The Course Handout Booklet is a very important guide for the students registered in the concerned course. The students are expected to use the Course Handout Booklet to prepare regularly and benefit from each session (lecture/ tutorial/ practical) of the Course(s) and perform well in the continuous assessments and End Term Final Examination, as applicable. Every student shall read and adhere to all the guidelines prescribed in the Course Handout Booklet.

2.13. Rules and Guidelines for Transfer of Credits from Massive Open Online Courses

(Refer Section 18.0 of the Academic Regulations, 2019.)

The provisions and rules pertaining to the transfer of credits through Massive Open Online Courses are outlined in Section 18.0 of the Academic Regulations, 2019.

With reference to Clause 18.2 of the Academic Regulations, the rules and guidelines for transfer of credits specifically from Study Webs of Active-Learning for Young Aspiring Minds-National Program on Technology Enhanced Learning (SWAYAM-NPTEL) are as stated in the following Sub-Clauses:

- 2.13.1. A student may complete SWAYAM-NPTEL courses and transfer equivalent credits to partially or fully complete the mandatory credit requirements of Discipline Elective Courses and/or the mandatory credit requirements of Open

Srinivas
REGISTRAR
UNIVERSITY OF APPLIED SCIENCES
BANGALORE

Elective Courses and/or the mandatory credit requirements of Management Sciences Courses as prescribed in the concerned B. Tech. Program Regulations and Curriculum. However, it is the sole responsibility of the student to complete the mandatory credit requirements of the Discipline Elective Courses, the Open Elective Courses and the Management Sciences Courses as prescribed by the Program Regulations and Curriculum of the concerned B. Tech. Program.

- 2.13.2. Approved SWAYAM-NPTEL Courses shall be included as annexes to the Program Regulations and Curriculum for the concerned B. Tech. Program and shall be announced through University Notifications to the students from time to time. A student shall only request for transfer of credits from such approved/notified SWAYAM-NPTEL Courses as published by the concerned Departments.
- 2.13.3. SWAYAM-NPTEL Courses are considered for transfer of credits only if the concerned student has successfully completed the SWAYAM-NPTEL Course(s) and obtained the SWAYAM-NPTEL Certificate to this effect.
- 2.13.4. A student cannot transfer credits from SWAYAM-NPTEL Courses to earn the mandatory credits assigned for any other type of Courses (other than Discipline, Open Elective Courses and Management Sciences Courses) as prescribed in the concerned Program Regulations and Curriculum. However, a student may complete SWAYAM-NPTEL Courses and transfer equivalent credits in excess of the required mandatory Credits (and Courses). In the case of such transfers beyond the mandatory Credits the transferred Credits will be included in the calculations of SGPA and CGPA.
- 2.13.5. Before the commencement of each Semester or during Pre-Registration schedule as per the Academic Calendar, Parent Departments may release a list of SWAYAM-NPTEL courses approved as Discipline Elective courses for each B. Tech. Program offered by them. In addition, Departments may also release a list of Open Elective courses offered for all B. Tech. Programs.
- 2.13.6. Students may Pre-Register for the approved SWAYAM-NPTEL Courses in the respective Departments and register for the SWAYAM-NPTEL Courses as per the schedule announced by SWAYAM-NPTEL.
- 2.13.7. The credit equivalence of the SWAYAM-NPTEL Courses are based on course durations and/or as recommended by SWAYAM-NPTEL. The Credit Equivalence mapped to SWAYAM-NPTEL course durations for transfer of credits is summarised in Table 2.13.1 below.

Table 2.13.1 SWAYAM-NPTEL Course Durations and Credit Equivalence		
S. No.	Course Duration	Credit Equivalence for Transfer of Credits
1	4 Weeks	1 Credit
2	8 Weeks	2 Credits

PRESIDENCY UNIVERSITY
BANGALORE

Table 2.13.1 SWAYAM-NPTEL Course Durations and Credit Equivalence		
S. No.	Course Duration	Credit Equivalence for Transfer of Credits
3	12 Weeks	3 Credits

2.13.8. A student who has successfully completed the approved SWAYAM-NPTEL Course(s) and wants to avail the provision of transfer of equivalent credits to fulfil (partially or fully) the mandatory credit requirements of the Discipline Electives and/or Open Electives and/or Management Sciences Courses as prescribed in the concerned Program Regulations and Curriculum, must submit the original SWAYAM-NPTEL Course Certificates to the Head of the Parent Department concerned, with a written request for the transfer of the equivalent credits. On verification of the SWAYAM-NPTEL Course Certificates and approval by the Head of the Department concerned, the SWAYAM-NPTEL Course(s) and equivalent Credits will be included in Course (with associated Credits) Registration of the concerned student in the Semester immediately following the completion of the SWAYAM-NPTEL Course(s).

2.13.9. The grading system for such SWAYAM-NPTEL Courses with transfer of credits is specified in Table 2.13.2 below.

Table 2.13.2 Grading System for SWAYAM-NPTEL Courses		
S. No.	Final Score on the SWAYAM-NPTEL Certificate	Grade Awarded
1	90% and above	O
2	From 80% to 89%	A+
3	From 70% to 79%	A
4	From 60% to 69%	B+
5	From 50% to 59%	B
6	From 40% to 49%	C

2.13.10. A student may submit a request for credit transfer from SWAYAM-NPTEL Courses before the last instruction day of the seventh (7th) Semester of the B.Tech. program as specified in the Academic Calendar. Requests for credit

transfers shall not be permissible in the eighth (8th) semester.

2.13.11. The maximum permissible number of credits that a student may request for transfer in a Semester is ten (10) credits.

2.13.12. The University shall not reimburse any fees/expense, a student may incur for the SWAYAM-NPTEL Courses.

3 PART B: PROGRAM CURRICULUM

BACHELOR OF TECHNOLOGY DEGREE PROGRAM IN COMPUTER SCIENCE AND ENGINEERING B.TECH (COMPUTER SCIENCE AND ENGINEERING) 2019-2023

B.Tech in Computer Science and Engineering is a program that is offered by the Department of CSE, SOE. The faculty work with motivation and dedication to impart the best knowledge to the budding thoughts admitted in our department. A wide range of courses is offered to students to help them in the understanding of the various intricacies involved in computing. The courses are designed in a way to invoke students' ability to think originally and creatively. The faculty members of CS department are trained to produce computer engineers with the ability to design and develop systems involving the integration of software and hardware devices. The department is equipped with modern computer labs with well-trained lab assistants to empower students with a better understanding of the theory lecture sessions and to give them an exposure to practical problem solving.

The program will also prepare students for postgraduate studies and helps in cracking different national and international aptitude tests for getting admission to IITs, NITs as well as different top ranked Universities in countries like USA, Australia, Singapore and Europe. The students are encouraged to take online courses, from SWAYAM, NPTEL at national level and MOOCs from Harvard, MIT, Microsoft and other top universities and institutions across the World. The program also includes value added courses like SIC and NSS activities that help the students to build moral and ethical standards and also to inherit qualities such as integrity, transparency, respect, professionalism and teamwork.

The Program Educational Objectives, Program Outcomes, Program Specific Outcomes and Learning Objectives of the B.Tech. Program in Computer Science and Engineering at Presidency University are as follows.

Program Educational Objectives (PEO)

After the completion of B.Tech. Program in Computer Science and Engineering from Presidency University, the graduates shall:

PEO1: Demonstrate success as a Computer Engineer with innovative skills, having moral and ethical values.

PEO2: Engage in lifelong learning through research and professional development.

PEO3: Serve as a leader in the profession through consultancy, extension activities and/ or entrepreneurship.

Program Outcomes (PO)

Graduates of the B. Tech. Program in Computer Science and Engineering will acquire:

REGISTRAR
PRESIDENCY UNIVERSITY
BANGALORE

PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

REGISTRAR

Program Specific Outcomes (PSO)

At the end of the B. Tech. Program in Computer Science and Engineering the students shall:

PSO1: Design and develop computer programs/computer-based systems in the areas related to algorithms, networking, web design, cloud computing, IoT and data analytics of varying complexities.

PSO2: Apply standard software engineering practices and strategies in real-world project development.

PSO3: Exhibit professional ethics, effective communication skills and excellent team work in their professional career.

Learning Outcome (LO)

LO1: To gain recognition as a Department of Excellence.

LO2: To provide opportunity to students to excel in curricular, extra-curricular and co-curricular activities.

LO3: To provide students an environment of innovation and train students to pursue research.

LO4: To equip students to face societal challenges.

3.1 PROGRAM CURRICULUM

3.1.1 Mandatory Courses and Credits

The B.Tech (Computer Science and Engineering) Program structure (2019 – 2023) consists of 180 credits.

Table 3.1.1 summarizes the type of Courses, number of Courses under each type and the associated credits that are mandatorily required for the completion of the Degree.

S. No.	TYPE OF COURSES	NO. OF COURSES	CREDITS
1	Humanities (HS)	2	5
2	Management Sciences (MS)	2	6
3	Basic Sciences (BS)	9	29
4	Engineering Sciences (ES)	7	21

5	Core (Professional) Course (CC)	27	76
6	Discipline (Professional) Elective (DE)	6	16
7	Open Elective (OE)	3	9
8	Professional Practice (PP)	2	13
9	Personal and Professional Skills (PPS)	4	4
10	Social Immersion Course (SIC)	1	1
TOTAL		63	180
The mandatory minimum credits required for the award of the B. Tech. (Computer Science and Engineering) Degree is 180 Credits.			

The Table 3.1.1 is indicative of various components such as Foundation Courses (Basic Sciences, Engineering Sciences, Humanities, Social Sciences and Management Sciences), Professional Core, Discipline and Open Elective Courses. The unique feature of this Program is Professional Practice - I of 6-8 weeks during the end of 4th Semester and before the commencement of 5th Semester for the student to have industry exposure. The Professional Practice - II will be during their 7th / 8th Semester for about 15 weeks. Social Immersion Course, which is mandatory, is introduced in the curriculum for the student to give value of social service such as community service, clean and green, NSS, Protection of environment and health hazards, etc.

Table 3.1.1 lists the mandatory Courses, type of Courses, number of type of Courses and the associated credits required for the completion of the B.Tech (Computer Science and Engineering) Program.

3.1.2 B.Tech (Computer Science and Engineering) Program Suggested Year Wise Structure

First Year		Second Year		Third Year		Fourth Year	
Sem. 1	Sem. 2	Sem. 3	Sem. 4	Sem. 5	Sem. 6	Sem. 7	Sem. 8
BS-3	BS-4	BS-1	BS-1	CC-6	CC-4	CC-4	PP-II-1
ES-4	ES-3	CC-6	CC-7	MS-1	MS-1	DE-2	DE-2
HS-1	HS-1	PPS-1	PPS-1	DE-1	SIC-1	OE-1	OE-1
PPS-1	PPS-1				OE-1		
Summer Term		Summer Term/PP-I		Summer Term		Summer Term	

Mandatory Minimum Credits required for the award of the
B.Tech (Computer Science and Engineering) Degree: 180

Nomenclature:

- BS - Basic Sciences
- ES - Engineering Sciences
- HS - Humanities
- MS - Management Sciences
- CC - Core Course
- DE - Discipline/Professional Electives
- OE - Open Electives
- PP-I/PP-II - Professional Practice
- PPS - Personal and Professional Skills
- SIC - Social Immersion Course

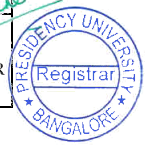

In the entire Program, the practical and skill based Course component contribute to an extent of approximately 30% out of the total credits of 180 for B.Tech (Computer Science and Engineering) Program of four years duration.

3.3 COURSE DESCRIPTION AND SYLLABUS

Course Name:	Calculus and Linear Algebra					
Course Code:	MAT 101	Credit Structure :	L	T	P	C
			3	1	0	4

Course Description: The objective of this course is to model engineering problems, understand the applications of continuous functions and obtain solutions of real world problems. Calculus is the backbone of any engineering applications and hence this course is an extension of senior secondary or PUC level. This course introduces the concept of successive differentiation, properties of polar curves, expansion of function involving one variable and evaluation of indeterminate forms. Further, the students are exposed to partial differentiation techniques, its applications, differentiation of vector and scalar functions along with their applications, reduction formulae and evaluation of integrals with standard limits, and solution of first order and first degree differential equations with their applications. Also, the course provides the knowledge of matrices and system of equations.

Textbooks:

			4	0	0	4

REGISTRAR

Course Description: The main objective of this course is to study the basic concepts of physics that helps developing the ability to identify, formulate and apply to engineering applications. This course covers the areas, namely, applied physics and modern physics. The course includes the concepts of free electron theory, electrical properties and applications of contemporary and useful materials such as semiconductors, superconductors and dielectric materials are discussed in detailed manner. It also emphasizes on modern concepts such as the concepts of lasers and its applications in the field of optical fiber communication system and other areas. Finally, the need of quantum mechanics, the quantum approach concepts like, matter waves, Heisenberg's uncertainty principle, Schrodinger's time independent equation and application of Schrodinger's wave equation are discussed.

Course Name:	Elements of Electrical Engineering					
Course Code:	EEE 101	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The course aims at nurturing the students with the significance of Electrical Engineering. The course provides exhaustive knowledge about the basic laws of electrical sciences, AC/ DC circuit analysis, AC & DC machines. It also includes Measuring Instruments, Earthing, Electrical wiring and safety measures.

Textbook:

1. John Hiley, Keith Brown and Ian McKenzie Smith, "*Hughes Electrical and Electronic Technology*", Pearson.

Reference Books:

1. K Uma Rao and A Jayalakshmi, "*Basic Electrical Engineering*" 2016 Revised Edition, I K International Publishing House Pvt. Ltd.

Course Name:	Elements of Civil Engineering					
Course Code:	CIV 101	Credit Structure :	L	T	P	C

			3	0	0	3
--	--	--	---	---	---	---

Course Description: The objective of this Course is to make students learn the basics of Civil Engineering concepts, role of civil engineers, infrastructure development, sustainability, and solve problems involving forces, loads and moments and know their applications in allied subjects. It is a pre-requisite for several Courses involving Forces and Moments.

The students should have a prior knowledge of basic mathematics and physics to pursue the Course. The Course consists of an introduction of civil engineering through an exposition of its disciplines, types of Infrastructure, different types of construction materials, composition of forces, concepts of resultants and equilibrium of forces.

After successful completion of the Course, the students would acquire knowledge on the basics of Civil Engineering, its scope of study, knowledge about green buildings, roads, airports, bridges and dams. They would be able to comprehend the action of Forces, Moments and other loads on systems of rigid bodies; Compute the reactive forces and the effects that develop as a result of the external loads.

Course Name:	Engineering Graphics					
Course Code:	MEC 152	Credit Structure :	L	T	P	C
			2	0	4	4

Course Description: The course is designed with the objective of giving an overview of engineering drawing with the help of software tools. It is introductory in nature and acquaints the students with the techniques used to create engineering drawings with computerised drafting tools. Computerised drafting provides accurate and easily modifiable graphic entities, easy data storage, easy retrieval facility and it enhances creativity. It will expose students to the concept of engineering drawing and teach them to draw different views of planes and solids in different orientations.

The course will teach students to use AutoCAD to produce engineering drawings. They will learn to create drawing layouts, dimensioning, the theory of projection, orthographic projection of points, lines, planes and solids, isometric projection and be introduced to the development of surfaces.

Textbook:

Course Name:	Technical Written Communication					
Course Code:	ENG 103	Credit Structure :	L	T	P	C
			2	1	0	3

Course Description: A course on Technical Written Communication facilitates writing skills; letters, emails, notice, agenda, minutes of the meeting, reports, etc. The course will train the students to write better English and face the corporate world with determination and self belief. The course includes theoretical session on communication, reading and writing skill with special emphasis on letters, emails and reports. Practical sessions in form of tutorials will help the students to practice vocabulary, reading, common errors, sentence transformations, etc.

			4	0	0	4

REGISTRAR

Course Description: The primary objective of the course is to introduce the students to the concepts and applications of chemistry in Engineering. It should cultivate in them an ability to identify chemistry in each piece of finely engineered products used in households and industry. It aims to strengthen the fundamental concepts of chemistry and then builds an interface with their industrial applications. It deals with applied and industrially useful topics, such as Water Technology, Engineering materials such as Polymers & Liquid crystals, Introduction to Computational Chemistry, Electrochemistry principles & its application to batteries, Corrosion and its control, Fuels and combustion.

Course Name:	Elements of Electronics Engineering					
Course Code:	ECE 101	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The course aims at nurturing the students with the fundamental principles of electronics engineering, prevailing in various engineering applications. The course begins with the fundamentals of electronic systems and some basic laws of electricity. The topics include: classification of materials, types of Semiconductor materials, p-n Junction, Diodes, Characteristics, Rectifiers, Junction Transistor, BJT Configurations, Characteristics, BJT Biasing basics, Transistor Applications. Subsequently the student is introduced to Digital Electronics – Codes and Number systems – viz. Decimal, Binary and hexadecimal systems, conversions. 1’s and 2’s complements, binary addition. Boolean logic, basic gates and Universal Gates, and laws for reduction of the logic expressions, implementation using basic gates. Basics of communication systems, introduction to microprocessors and its applications.

Course Name:	Elements of Mechanical Engineering					
Course Code:	MEC 101	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This course is designed to acquaint students with the fundamentals of mechanical engineering by covering some basics of thermal engineering, design engineering and manufacturing processes.

The discussion on thermal engineering includes the study of different forms of energy, the laws of thermodynamics, properties of steam, heat engines, heat pumps, steam boilers and an introduction to fluid properties and machinery. The discussion on design engineering covers transmission of motion and power. The discussion on manufacturing processes includes metal cutting and machines tools.

Course Name:	Environmental Science and Disaster Management					
Course Code:	CIV 102	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The overall objective of the course is to provide clear understanding of natural resources, environment, its maintenance and the basic concepts of disaster management. The course consists of the concepts of renewable and non-renewable resources, conservation of these resources, ecosystems, role of human being in maintaining a clean and useful environment for the future generations, maintaining ecological balance and conservation of biodiversity. It includes causes of environmental deterioration and its control; human environmental disturbances, water and air pollution, mitigation measures, disaster and waste

management etc. After successful completion of the course, the students would be able to understand the various types of natural resources and problems due to over exploitation. Also gain knowledge about the different components of the ecosystem, their interrelation, various hazards, natural disasters, their effects and management.

Course Name:	Computer Programming
---------------------	-----------------------------

Course Code:	CSE 151	Credit Structure :	L	T	P	C
			2	0	4	4

Course Description: This course will provide an introduction to foundational concepts of computer programming to students of all branches of Engineering. This module includes a mix of traditional lectures and laboratory sessions. Each meeting starts with a lecture and finishes with a laboratory session. Topics covered in this course are problem formulation and development of simple programs, Pseudo code, Flow Chart, Algorithms, data types, operators, decision making and branching, looping statements, arrays, functions, pointers, structures, union and basic file operations. In the lab session students are required to solve problems based on the above concepts to illustrate the features of the structured programming.

Course Name:	Engineering Chemistry Lab					
Course Code:	CHE 151	Credit Structure :	L	T	P	C
			0	0	2	1

Course Description: The lab course intends to train the students to develop their experimental skills and apply fundamental chemical principles in problems related to chemistry in engineering. The experiments are designed to support the theory lectures and the hands-on experience will thus enhance students’ understanding the concepts.

The course includes the estimation of total hardness of water by EDTA complexometric method, determination of the total alkalinity of a given water sample, estimation of Iron (II) in Mohr’s salt, estimation of calcium oxide in cement, determination of Chemical Oxygen Demand (COD) of Industrial Waste Water sample, determination of pKa value of weak acid using pH meter, Estimation of copper colorimetrically, determination of Iron (II) by potentiometry, determination of viscosity co-efficient of a liquid using Ostwald’s Viscometer, estimation of strength of mixture of acids by conductometry method.

Course Description: This course is also commonly designed for all engineering branches and the contents learned in the previous semester are the prerequisite for this course. Probability theory is of great use in understanding and modeling phenomena that exhibit random behavior and the emphasis is on real-world applications to engineering problems. The topics covered include basic concepts of probability and conditional probability, Baye’s law and correlation analysis, Linear Regression and method of least square, Solution of second and higher order, linear ordinary differential equations with constant and variable coefficients. Formation of Partial Differential Equations (PDE), solution of homogeneous and non-homogeneous PDEs and the application of PDEs. Evaluation of double and triple integrals, change of order of integration, change of coordinates, beta and gamma functions, line integral, surface integral and volume integral of vector and scalar functions. Laplace transforms of functions and properties; Laplace transform of periodic and unit step functions. Inverse Laplace Transforms, Application of Laplace transforms and solution of differential equations.

Course Name:	Data Structures					
Course Code:	CSE 201	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The purpose of this Course is to provide the students with solid foundations in data structures and algorithms. It focuses on logical structures of data, their physical representation, design of algorithms and techniques for program development and debugging. Emphasis is placed on the appropriate use and choice of standard data structures.

Topics include: ADT, lists, stacks, queues, trees, heaps, hash tables, and graphs.

Text Book(s):

Richard F Gilberg and Behrouz A Forouzan, “Data Structures: A Pseudocode Approach with C”, Cengage learning.

Reference Book(s):

Course Name:	Digital Design					
Course Code:	CSE 202	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course will provide the fundamental background needed to understand how digital systems work and how to design digital circuits. Students will gain experience with several digital systems, from simple logic circuits to programmable logic devices.

Topics include: Number systems and codes, Boolean algebra, logic circuits and minimization, Combinational and sequential logic circuits, Programmable Logic devices, State table and state diagrams, Counters and shift registers, Arithmetic operations and algorithms, fault diagnosis and tolerance.

Text Book(s):

1. Mano, M. Morris and Ciletti Michael D., “Digital Design”, Pearson Education.
2. Biswas N N ,”Logic design Theory”,Seagull Publishing.

Reference Book(s):

2. Roth, Charles H., Jr and Kinney Larry L., “Fundamentals of logic Design”, Cengage Learning.
3. Floyd T 1 ,”Digital fundamentals”,Pearson.

Course Name:	Discrete Mathematics					
Course Code:	CSE 203	Credit Structure :	L	T	P	C
			3	1	0	4

Course Description: Discrete Mathematics must be a core subject in computer Science as per ACM and IEEE. In contrast to calculus (for all engineering Courses), Discrete Mathematics is the back bone for Computer Science.

Topics include: Propositional logic, Predicate logic, Sets, functions, sequences and sums, Basic and Advance counting techniques, Induction and Recursion, Fundamental Algorithms, the integers, Matrices and Relations

Text Book(s):

Kenneth H Rosen “Discrete Mathematics and its Applications”,McGraw Hill.

Reference Book(s):

Course Name:	Design Thinking And Team Building					
Course Code:	PPS 107	Credit Structure :	L	T	P	C
			0	0	2	1

Course Description: This Course is directed towards making students perform in teams, become an asset for a team and develop the Leadership Skills needed for today's time. It gives participants an understanding of their self-esteem level and how to have high self-esteem. The Course helps the participants to understand their level of assertiveness and helps them to develop their assertiveness in different situations. This Course also includes training on how to connect to team people, how to resolve conflicts among team members and how to lead oneself and a group of people. It covers details about different types of leadership, situational leadership and the situations where these different types of leadership are applicable.

Course Material: "Professional and Business Skills - I training material", Presidency University.

Course Name:	Social Immersion Course					
Course Code:	SIC 501	Credit Structure :	L	T	P	C
			-	-	-	1

Course Description: Social Immersion Course is one credit Course which includes the knowledge, skills and competencies embedded within every aspect of the college to inspire and enhance each student's transferable learning skills. It represents the broad categories of competence that enable students to be successful in further education, careers, as citizens and in their personal lives. Students will effectively express and exchange ideas through listening, speaking, reading, writing and other modes of interpersonal expression. Students will be able to gather and synthesize relevant information, evaluate alternatives and implement creative and effective solutions. Students will be prepared to practice community engagement that addresses environmental responsibility, social justice and cultural diversity. Students will become independent learners who understand and express the lifelong skills necessary for physical, social, economic, mental and emotional health.

Course Name:	Engineering Mathematics-IV					
Course Code:	MAT 104	Credit Structure :	L	T	P	C
			3	1	0	4

Course Description: The objective of Engineering Mathematics – IV is to equip the students with adequate knowledge of basic mathematics that will enable them in formulating problems and solving them analytically as well as numerically in their Engineering programme. The course enables students to incorporate the knowledge of complex variables and their significance in engineering, Numerical methods and sampling theory to support their concurrent, subsequent engineering studies to explore complex systems, physicists, engineers and mathematicians require computational methods since mathematical models are rarely solvable analytically. This course provides an introduction to basic numerical methods such as fitting of various curves.

interpolation, differentiation, integration. This course also provides an introduction to numerical solution of algebraic and transcendental equations, ordinary differential equations such as Taylor’s series method, modified Euler’s method and Runge-Kutta Methods. The course aims at introducing students to quantitative uncertainty analysis and risk assessment for engineering applications. Probability theory is of great use in understanding and modeling phenomena that exhibit random behavior and the emphasis is on real- world applications to engineering problems. sampling distributions of means and variances, chi- squared, t and F distributions, methods of estimation, estimating means, proportions and variances, maximum likelihood estimation, tests of hypothesis on means, proportions and variances, chi- squared test of goodness of fit.

Course Name:	Computer Organization and Architecture					
Course Code:	CSE 205	Credit Structure :	L	T	P	C
			3	1	0	4

Course Description: This Course introduces the modern computer organization and architectures. The emphasis is on understanding the interaction between computer hardware and software at various levels. The students will learn the concepts of computer technology, performance evaluation, instruction set design, computer arithmetic, data path and control unit design of processors and enhancing performance with pipelining.

Topics include: Introduction to Computer Arithmetic, Instruction sets, Computer organization, CPU Design, Memory system, Input-Output Interface, Asynchronous Data Transfer, Programmed I/ O, Interrupts, Direct Memory Access, Basic Input / Output Structure, serial and parallel communications, Device Drivers, Buses, Introduction to Parallel Processing: Evolution of computer systems (RISC vs. CISC), Parallelism in uniprocessor systems, Architectural classification schemes, Principles of Pipelining and Vector processing.

Text Book(s):

Course Name:	Graph Theory and Combinatorics					
Course Code:	CSE 209	Credit Structure :	L	T	P	C
			3	1	0	4

Course Description: Combinatorics and Graph Theory is a blend of the mathematical techniques applicable to Computer Science, Information Technology and Statistics. Combinatorics is a study of different enumeration techniques of finite but large sets.

Topics include: Principle of inclusion and exclusion, generating functions and methods to solve difference equations. Graph theory- trees and networks, Euler formula, Hamilton paths, planar graphs and coloring problem, the use of trees in sorting and prefix codes, algorithms on networks such as shortest path, minimal spanning tree and min-flow max-cut algorithms.

Text Book(s):

Course Code:	CSE 254	Credit Structure :	L	T	P	C
			0	0	2	1

Course Description: Familiarize the architecture of 8086 processor, assembly language programming and interfacing with various modules. Students will get hands on experience of 8086 instruction set, Addressing modes, Macro, string operations, DOS interrupt, BIOS interrupt, and interfacing using assembly language.

Text Book(s):

1. Muhammad Ali Mazidi, “*Microprocessors and Microcontrollers*”, Pearson.
2. Douglas V Hall, “*Microprocessors and Interfacing, Programming and Hardware*”, Tata McGraw Hill.

Course Name:	Being Corporate Ready					
Course Code:	PPS 108	Credit Structure :	L	T	P	C
			0	0	2	1

Course Description: This Course is directed towards making students perform in teams, become an asset for a team and develop the Leadership Skills needed for today’s time. It gives participants an understanding of their self-esteem level and how to have high self-esteem. The Course helps the participants to understand their level of assertiveness and helps them to develop their assertiveness in different situations. This Course also includes training on how to connect to team people, how to resolve conflicts among team members and how to lead oneself and a group of people. It covers details about different types of leadership, situational leadership and the situations where these different types of leadership are applicable.

Course Name:	Operating Systems					
Course Code:	CSE 210	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: Operating systems being central to computing activities, this Course provides understanding of the functions and functional modules of operating systems. The design and implementation of Operating systems is also covered.

Topics include: Core concepts of operating systems, such as processes and threads, scheduling, synchronization, memory management, file systems, input and output device management and security. Students should have previous familiarity with programming in a high-level language, assembly language programming, CPU organization, instruction sets and registers.

Text Book(s):

Course Name:	Analysis of Algorithms					
Course Code:	CSE 212	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course introduces techniques for the design and analysis of efficient algorithms and methods of applications. Deals with analyzing time and space complexity of algorithms, and to evaluate trade-offs between different algorithms.

Topics include: Asymptotic Notations and its properties, Mathematical analysis for Recursive and Non-recursive algorithms. Algorithm design techniques-Brute force- Travelling Salesman, Knapsack Problem, Divide-and-conquer- Merge sort, Quick sort, Binary search. Dynamic programming and greedy technique Prim’s, Kruskal’s, Dijkstra’s Algorithm, Coping with the limitations of algorithm- Backtracking – n-Queens problem.

Text Book(s):

Course Name:	Object Oriented Analysis and Design					
Course Code:	CSE 213	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The Course covers the analysis and design methodology in sufficient depth to convey a good understanding of object oriented analysis and design using the unified process. Student should be able to analyze requirements using a use case model, identify the classes and their responsibilities, using interaction models to capture the requirements and the design of the solution. The application of the design axioms and the iterative nature of the process are emphasized.

Topics include: Object Oriented Information Systems, Software Development Life Cycle, Object Oriented Methodologies, Unified Modelling Language (UML), Object Oriented Analysis, Object Oriented Design, Access layer and View Layer, Application of Design Patterns, Architecture and Framework, Software Quality Assurance.

TextBook(s):

Simon Bennett, Steve McRobb, Ray Farmer, “*Object Oriented Systems Analysis and Design using UML*”, McGrawHill Education

Reference Book(s):

1. Craig Larman, “*Applying UML and Patterns*”, Pearson Education.
2. Grady Booch, “*Object Oriented Analysis and Design with Applications*”, Addison-Wesley.
3. Ali Behrami, “*Object Oriented Systems Development using Unified Modeling Language*”, McGraw Hill International Edition.

Course Name:	Principles of Programming Languages					
Course Code:	CSE 214	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The Course covers features of programming languages and introduces different programming paradigms, and their semantics.

Topics include: Data types and Data Abstraction, Scope and Parameter passing and Concurrency related features. Various aspects of runtime environments like global and local data, code, function call stacks, dynamically allocated data, exceptions and threads, formal elements of lambda calculus, functional paradigm .Logic programming paradigm, Scripting as a paradigm. Domain specific languages.

Text Book(s):

Robert W. Sebesta, “*Concepts of Programming Languages*”, The Benjamin Cummings Publishing Company Inc.

Course Name:	Entrepreneurship					
Course Code:	MGT 101	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The objective of the Course on entrepreneurship will be on creating a learning system through which engineering students can acquaint themselves for starting new ventures and introducing new product and service ideas.

 REGISTRAR

Entrepreneurship is the most powerful economic force known to humankind. The process of transforming creative ideas into commercially viable business continues to be a major force in today's world economy. Successful entrepreneurship requires more than merely luck and money. It is a cohesive process of creativity, risk taking, and planning. This Course gives an overall basic framework for understanding the process of entrepreneurship.

The Course includes topics such as Understanding the entrepreneurial mind set, Launching Entrepreneurial Ventures, The Search for Entrepreneurial Capital, Formulation of Entrepreneurial Plan.

Course Name:	Professional Practice - I						
Course Code:	PIP 101	Credit Structure :	L	T	P	C	
			-	-	-	5	

Course Description: The Professional Practice (PP) links the university with the professional world, by infusing the reality of the world of work into the educational process. The classroom is shifted for a period of two months in PP- I and another two months in PP-II to a professional location where the students, under the supervision of the faculty, are involved in applying the knowledge acquired in the classroom to finding solutions to real life problems. The PP programme has two components, namely PP-I of two months duration implemented during the summer following the 2nd year and PP- II two months duration implemented during either of the semesters of the final year.

PP-I is the first exposure to the world of work, necessary for the subsequent problem solving experience during PP-II. It is implemented at large industrial complexes, research and development centres, software development houses, pharmaceutical companies, etc. While the general aim of PP-I is to afford an opportunity for the student to learn how work is organized and carried out; by a process of observation and participation, the learning can be quite varied and exhaustive depending on the nature of the organization. It provides an opportunity for a detailed understanding of vast engineering operations and its various facets such as inventory, productivity, management, information systems, human resource development, etc.

Course Name:	Cryptography and Network Security						
Course Code:	CSE 215	Credit Structure :	L	T	P	C	
			3	0	0	3	

Course Description: The Course covers the principles and practice of cryptography and network security, focusing in particular on the security aspects of the web and Internet.

Topics include: The cryptographic tools such as shared key encryption, public key encryption, key exchange and digital signature are explored. The use and utilization of the internet protocols and applications such as

SSL/ TLS, IPSEC, Kerberos, PGP, and S/ MIME,SET are reviewed. System security issues such as viruses, intrusion and firewalls.

Course Name:	Network Programming Lab					
Course Code:	CSE 257	Credit Structure :	L	T	P	C
			0	0	4	2

Course Description: Network Programming intends to explore the opportunities for developing, maintaining and supporting distributed and network applications. The Course covers the basics of computer networks to designing and implementing network servers such as web and mail server.

Topics include: Overview of computer networks; inter-process communication; network programming; Socket interface; client-server computing model; design issues, concurrency in server and clients; external data representation; remote procedure calls. The network programming paradigms such as RPC are also studied. Various well known protocols like TELNET, HTTP, FTP, SMTP, NFS etc are discussed to demonstrate the network programming concepts.

Text Book(s):

Course Name:	Engineering Economics					
Course Code:	MGT 102	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The objective of this Course is to enable engineering students to analyze cost / revenue data and make an economic analysis, which can help in the decision making process either to justify or reject alternative projects. This Course is designed to present the concepts and techniques of economic analysis needed in the decision making process. The emphasis is on the analytical analysis of money and its impact on decision making

The Course introduces the student to the discipline of economics and its application in the field of engineering. The Course examines the concept of time value of money and how engineers can apply it for making economic decisions. It also explains how interest rates and different compounding periods influence

the value of various capital expenditures. The Course also deals with the effect of depreciation, taxes and inflation on capital expenditure decisions. .

Text Book (s):

Niall M Fraser, “*Engineering Economics*”, Pearson.

Reference Book (s):

1. Jose Sepulveda, “*Schaum's Outline of Engineering Economics*”, McGraw-Hill.
2. Tara Chand, “*Engineering Economics*”, Vol-1, Nem Chand and Brothers.

Course Name:	Human Computer Interaction					
Course Code:	CSE 218	Credit Structure :	L	T	P	C
			3	0	0	3
					2	

Course Description: The Course is intended to introduce the students to the basic concepts of human-computer interaction. It will cover the theory and methods that exist in the field. Human-computer interaction is an interdisciplinary field that integrates theories and methodologies from computer science, cognitive psychology, design, and many other areas. HCI is concerned with the joint performance of tasks by humans and machines. It stresses the importance of good interfaces and the relationship of interface design to effective human interaction with computers. Specifically, we concentrate on so-called interactive systems.

Topics include: Human Perception, Ergonomics, Cognition, and Psychology, Task Analysis, User Interface Design, Interface Programming, System Evaluation. Types of Applications Covered: Information Presentation, Graphical User Interfaces, The Web Mobile Devices, Groupware, Spoken Language Interfaces and Multi-Modal Interaction.

Text Book(s):

1. Ben Shneiderman and Catherine Plaisant, “*Designing the User Interface*”. Addison Wesley.
2. Dix A. et al. “*Human-Computer Interaction*”, Prentice Hall.

Reference Book(s):

Yvonne Rogers, Helen sharp, Jenny Preece, “*Interaction Design: Beyond Human Computer interaction*”, Wiley.

Course Name:	Big Data Analytics					
Course Code:	CSE 219	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description: This Course shall provide the fundamental knowledge to equip students being able to handle real world big data problems including the three key sources of Big Data: people, organizations, and sensors. With the advance of IT storage, processing, computation, and sensing technologies, Big Data has become a novel norm of life.

Topics include: Big data and its importance, Four v’s , big data analytics and applications. Big data technologies, data discovery, open source technology for big data analytics, cloud and big data, predictive analytics, mobile business intelligence and big data ,crowd sourcing analytics, inter- and trans- firewall

analytics, information management, Processing big data, Hadoop mapreduce, implementation of big data analytics, big data convergence, analytics business maturity model. big data tools and techniques, installing and user defined functions, data processing operators, Sample projects using tools.

Text Book(s):

1. Big Data and Analytics- Seema Acharya, Subhashini Chellappan-2015, Wiley Publication.
2. Analytics in a Big data world- Bart Baesens- Wiley Publication.

Reference book (s):

1. Big data analytics, Radha Shankarmani and Vijalakshmi 2nd edition , Wiley Publications.
2. Big data, Anil Maheshwari, Mc Graw-Hill Education.
3. Tom White, “Hadoop: The Definitive Guide”, O’reilly.
3. Tom White, “*Hadoop: The Definitive Guide*”, O’reilly.

Course Name:	Internet of Things					
Course Code:	CSE 220	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description: The Internet of Things (IoT) is an emerging paradigm combining heterogeneous devices at an unprecedented scale, thereby enabling individuals and organizations to gain greater value from networked connections among people, processes, data, and things. The Internet of Things (IoT) is a Course of objects interacting with people, with information systems, and with other objects. The Course will focus on creative thinking, IoT concepts. IoT technologies.

Topics include: IoT definition and characteristics, physical design , Logical design , IoT enabling technologies, levels and Deployment, Domain specific IoTs, IoT and M2M, Simple Network Management Protocol, Iot platforms Design Methodology, IoT physical devices and Endpoints-introduction to Raspberry Pi, Cloud storage Models and Communication APIs, Tools for IoT and case studies

Text book(s):

ArshdeepBahga and Vijay Madiseti, “*Internet of Things a hands –on approach*”. University press

Reference Book(s):

Course Name:	Professional Practice - II					
Course Code:	PIP 102	Credit Structure :	L	T	P	C
			-	-	-	1 5

Course Description: Professional Practice- II is the necessary for the subsequent problem solving experience after PP-I. Students observe science and technology in action, develop an awareness of the method of scientific experimentation, and often get an opportunity to see, study and operate sophisticated and costly equipment. They also learn about the implementation of the principles of management they have learnt in class, when they observe multidisciplinary teams of experts from engineering, science, economics, operations research, and management deal with techno-economic problems at the micro and macro levels. Finally, it enables them to develop and refine their language, communication and inter-personal skills, both by its very nature, and by the various evaluation components, such as seminar, group discussion, project report preparation, etc. The broad-based core education, strong in mathematics and science and rich in analytical tools, provides the foundation necessary for the student to understand properly the nature of real-life problems.

3.3 COURSES FOR DISCIPLINE ELECTIVES

Course Name:	Programming in Advanced Java					
Course Code:	CSE 301	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description: This intensive, hands-on Course explores advanced Java features and packages. Students will learn Multi-threaded applications, client server programming and JDBC connection. This Course provide in-depth knowledge in JAVA programming - advanced concepts in java , packages and applets, GUI concepts in java-swing, java database connectivity, servlets, J2EE framework, java script and XML.

Text Book(s):

Cay S Horstmann and Cary Gornell, “*CORE JAVA volume II-Advanced Features*”. Prentice Hall.

Reference Book(s):

1. Cay S. Horstman and Gary Cornell, “Core Java Volume I-Fundamentals”, ,Prentice Hall.
2. Schildt Herbert, “*Java 2: The Complete Reference*”, Tata McGraw-Hill.
3. DeitelandDeitel, “*Java How to Program*”, Pearson Education Asia.

Course Name:	Programming in C# and .NET Framework					
Course Code:	CSE 302	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description: This Course deals with the programming skills that are required for developers to create Windows applications using the C# language. Helps the students to build an application that incorporates

several features of the .NET Framework. C# and .NET is Microsoft's entry into the world of managed programming.

The Course introduces many of the techniques and technologies employed by modern desktop and enterprise applications, including- fundamentals of C# programming in Visual Studio. Overview of C#, CLR-Architecture, Object Oriented aspects of C#, Accessing data with ADO.NET, and Web based applications.

Text Book(s):

1. J. Liberty, "Programming C#", O'Reilly.
2. Andrew Troelsen, "Pro C# 10 and .NET 4 Platform", Apress.
3. Herbert Schildt, "The Complete Reference: C#", Tata McGraw-Hill.

Reference Book(s):

1. Robinson et al, "Professional C#", Wrox Press.
2. E. Balagurusamy, "Programming in C#", Tata McGraw-Hill.
3. S. ThamaraiSelvi, R. Murugesan, "A Textbook on C#", Pearson.

Course Name:	Mobile Communications					
Course Code:	CSE 304	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The Course helps the students to apply the engineering principles in the specification, design, development and deployment of mobile communications. Students will develop a detailed knowledge and critical understanding of the core skills in mobile communications and networks.

Topics include: Fundamental knowledge of wireless and mobile networks, mobile communication systems / networks / architecture. The cellular communications ,mobile networks, including wireless transmission technology, wireless PAN/ LAN/ MAN/ WAN, Mobile IP, AdHoc networks, sensor networks, wireless mesh networks

Text Book(s):

Jochen Schiller, "Mobile Communications", Pearson Education.

Reference Book(s):

1. William Stallings, "Wireless Communications and Networks" Pearson Education
2. C.K.Toh, "AdHoc Mobile wireless Networks", Pearson education

Course Name:	Parallel Computing					
Course Code:	CSE 305	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The Course gives introduction to parallel computing; Models of parallel computers, Interconnection networks, basic communication operations, Introduction to parallel algorithms, Parallel programming paradigms, issues in implementing algorithms on parallel computers, Parallel programming with message passing interface, Performance analysis, Scalability analysis, Basic design technique for parallel algorithms, Parallel algorithms for selected topics like sorting, searching and merging, matrix algebra, graphs.

Text Book(s):

Ananth Grama, Anshul Gupta, George Karypis and Vipin Kumar, "Introduction to Parallel Computing", Pearson Education.

Reference Book(s):

1. M J Quinn, “*Parallel computing: Theory and practice*”,MGH.
2. M.J.Quinn, “*Parallel Programming in C with MPI and OPENMP*”, Jaico Books,
3. F.Thomson Leighton, “*Introduction to Parallel Algorithms and Architectures : Arrays, Trees, Hypercubes*”, Morgan Kaufmann.

Course Name:	Cloud Computing					
Course Code:	CSE 306	Credit Structure :	L	T	P	C
			3	0	0	3

Course description: This Course is designed to introduce the concepts of Cloud Computing as a new computing paradigm. Cloud Computing has emerged in recent years as a new paradigm for hosting and delivering services over the Internet. The students can explore various Cloud Computing terminology, principles and applications. Understanding different views of the Cloud Computing such as theoretical, technical and commercial aspects.

Topics include: Evolution of cloud computing and its services available today, Introduction, Architecture of cloud computing, Infrastructure, platform, software, Types of cloud, Business models, cloud services, Collaborating using cloud services, Virtualization for cloud, Security, Standards and Applications.

Text Book(s):

John Rittinghouse and James Ransome, “*Cloud Computing, Implementation, Management and Strategy*”, CRC Press.

Reference Book(s):

1. David E.Y. Sarna, “*Implementing and Developing Cloud Application*”, CRC press
2. Anthony T Velte, Toby J Velte, Robert Elsenpeter, “*Cloud Computing : A Practical Approach*”, Tata McGraw-Hill

Course Name:	Data Mining					
Course Code:	CSE 307	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course covers theory and practice of extremely large information storage (warehousing) and analysis (mining) mechanisms, with data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.

Topics include: Data Model for Data Warehouses, data extraction, cleansing, transformation and loading, data cube computation, materialized view selection, OLAP query processing. Data mining-Fundamentals, data mining process and system architecture, relationship with data warehouse and OLAP systems, data pre-processing. Mining Techniques and Application: association rules, mining spatial databases, mining multimedia databases, web mining, mining sequence and time-series data, text mining.

Text Book(s):

T1. Tan P. N., Steinbach M & Kumar V. “*Introduction to Data Mining*”, Pearson Education, 2016.

 REGISTRAR

Course Name:	Artificial Intelligence					
Course Code:	CSE 308	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course will introduce the basic principles in artificial intelligence. It will cover representation schemes, problem solving paradigms, constraint propagation, search strategies, knowledge representation, natural language processing, Expert systems, vision and robotics will also be delivered.

Topics include: AI methodology and fundamentals, intelligent agents, search algorithms, game playing, supervised and unsupervised learning, decision tree learning, dimensionality reduction, clustering, support vector machines, uncertainty and probability theory, probabilistic reasoning in AI, Bayesian networks, statistical learning, fuzzy logic. Several assignments will be given to enable the student to gain practical experience in using these techniques

Text Book(s):

3. N J Nilsson “*Principles of Artificial Intelligence*”, Springer.

Course Name:	Mobile Applications Development					
Course Code:	CSE 310	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description The main objective of the Mobile Application Development Course is to teach students the basis of android platform and application life cycle. Students will develop a mobile app with Android containing at least one of the following phone material components: GPS, accelerometer or phone camera, use simple GUI applications and work with database to store data locally or in a server.

Topics will include memory management; user interface design; user interface building; input methods; data handling; network techniques and URL loading; GPS and motion sensing. Android application framework and deployment. Power management, Screen resolution, Touch interface, Store data on the device

Text book(s):

Online manuals for Mobile Applications development.

Course Name:	Web Services				
Course Code:	CSE 311	L	T	P	C

		1	0	4	3
--	--	---	---	---	---

Course Description: The course includes the basic principles of service oriented architecture, its components and techniques. It provides an understanding of the architecture, technology, underlying service design and development aspects of web services. The students will also gain knowledge on the operational aspects of cloud services, which form the basic building blocks of cloud computing.

Topics include: Introduction to Service Oriented Architecture, Web Service fundamentals, WS-* extensions, Building Service Oriented Architecture, Web Services framework, Service Descriptions (WSDL), Messaging (SOAP & REST), Web Service Transactions, Orchestration and Choreography, Policies, Security.

Text book(s):

Thomas Erl, “*Service-Oriented Architecture: Concepts, Technology, and Design*”, Pearson Education.

Reference Book(s):

1. Heather Williamson, “*XML, The Complete Reference*”, McGraw Hill Education.
2. Frank. P. Coyle, “*XML, Web Services And The Data Revolution*”, Pearson Education.
3. James Snell, Doug Tidwell, Pavel Kulchenko, “*Programming Web Services with SOAP*”, O’Reilly publishers.

Course Name:	Storage Area Networks					
Course Code:	CSE 313	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The course aims to equip students with basic introduction to Storage Area Networks, including storage architectures, logical and physical components of a storage infrastructure, managing and monitoring the data center and basic Disaster Recovery principles

Topics include:

Evolution of Storage Technology and Architecture, Data Center Infrastructure, Key Challenges in Managing Information, Information Life Cycle, Components of Storage System Environment, Data Protection, Intelligent Storage System, Implementation of RAID, Direct Information Storage, to understand the role of objects in software process models, impact on testing. Content-Addressed Storage, Storage Virtualization, Business Continuity, Backup and Recovery, Local Replication, Remote Replication, Securing the Storage Infrastructure, Managing the Storage Infrastructure

Text Book(s):

1. G. Somasundaram, AlokShrivastava “*Information Storage and Management*”, EMC Education Services, Wiley India.

Reference Book(s):

2. Rebert Spalding “*Storage Networks The Complete Reference*”, TataMcGraw Hill.
3. Richard Barker and Paul Massiglia “*Storage Area NetworksEssentials A Complete Guide to Understanding and ImplementingSANs*”, Wiley. India.

Course Name:	Programming in Python
---------------------	------------------------------

Course Code:	CSE317	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description:

Python software provides the opportunity for the students of Computer Science engineering to develop scripts using its powerful programming features. This course enables the students to familiarize the Python IDLE and write simple Python code using the Python Shell. The students will also be trained on developing Python scripts using its powerful programming features like lists, sets, tuples and dictionaries.

Text Book(s):

1. Charles Dierbach Introduction to computer Science using python wiley
2. Mark Lutz, Learning Python, 5th Edition, O'Reilly
3. Al Sweigart, Invent Your Own Computer Games with Python, 4th Edition, 2016, No Starch Press.

Course Name:	Machine Learning					
Course Code:	CSE319	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description:

The Course aims at to introduce students to the concepts and techniques of Machine Learning, study the various probability based learning techniques and the graphical models of machine learning algorithms.

This course includes the theoretical versus practical spectrum. Concepts behind several machine learning algorithms without going deep into the mathematics, gaining practical experience by applying them. Covering Pattern recognition and artificial intelligence perspectives and to have a thorough understanding of the Supervised and Unsupervised learning techniques, building ensembles, and practical limitations of predictive models. Correlations and regressions.

Text book/Reference Book(s):

1. Ethem Alpaydin, *Introduction to Machine Learning*, Second Edition.
2. Stephen Marsland, *Machine Learning: An Algorithmic Perspective*, Springer, 2014.

Course Name:	Robotic Process Automation					
Course Code:	CSE 321	Credit Structure	L	T	P	C
			3	0	0	0

Course Description:

Robotic Process Automation (RPA) enables automating business processes using software robots. Software robots interpret, trigger responses, and communicate with other systems just like humans do. Robotic processes and intelligent automation tools can help businesses improve the effectiveness of services faster and at a lower cost than current methods. *Robotic Process Automation (RPA)* is an advanced technology that automates huge quantities of redundant tasks by applying artificial

intelligence (AI). *RPA* can be used for *processing* transactions, manipulating data, triggering responses and communicating with other digital systems.

Topics to Include:

Introduction Robotic Process Automation, UiPath programming techniques to deploy robot configurations, data extraction techniques, Debug a programmed robot including logging and exception handling, Maintain code version and source control, Record and Play, Data Manipulation, Taking Control of the Controls, Handling User Events and Assistant Bots, Exception Handling, Debugging, and Logging, Managing and Maintaining the Code, Deploying and Maintaining the Bot.

Text Book(s):

Course Name:	Introduction to Bio Informatics					
Course Code:	CSE 325	Credit Structure :	L	T	P	C
			3	0	0	3

COURSE DESCRIPTION:

This course is designed to provide the knowledge of the concepts related to bioinformatics. The course is aimed at understanding the DNA and Protein sequences and databases. It also deals with Pairwise comparison and calculating the scoring matrix. Further, it focuses on Sequence Alignment techniques, discovering the Motifs in the sequence. Students will also learn the overview of Structural Bioinformatics and Genome sequencing.

Text Book(s):

1. Bioinformatics: Sequence and Genome Analysis, David W. Mount, Cold Spring Harbor Laboratory Press, 2004.
2. Introduction to Bioinformatics, Arthur Lesk, Fifth Edition, Oxford University Press, 2019

Course Name:	Programming In GO						
Course Code:	CSE 399	Credit Structure :	L	T	P	C	
			3	0	0	3	

COURSE DESCRIPTION: Go is an open source programming language created by Google. Some of the unique features of this language are fast execution, static typing, interfaces to write modular and testable codes, has packages to handle web server using JSON format, enables us to write our own test routines, has static code analysis tools like “go vet” and “go import”, garbage collection.

concurrent programming using Go routines and channels and scalable. It is gaining popularity and it is continuing to grow rapidly in industries such as Dropbox, Uber etc.

This course will provide an introduction to the Go programming essentials to students of Engineering through lecture hours with demonstrations. Topics covered in this course are Program Structure; data types and control statements; Composite Types – arrays, slices, strings, runes, bytes, hash maps; functions; methods; garbage collection essentials – pointers, structs, interfaces; error handling; Concurrency – go routines and channels, Packages – import and create custom packages and applications of Go.

Topics include: Introduction to Go Programming Language, Composite types and functions, Pointers, Structs and Interfaces, Concurrency and Applications.

Course Name:	Front-end Full Stack Development					
Course Code:	CSE390	Credit Structure :	L	T	P	C
			0	0	4	2

COURSE DESCRIPTION:

This intermediate course enables students to perform front-end full stack development, with emphasis on employability skills. The course covers key technologies and architectures that enable the student to design and implement front-end. On successful completion of this course, the student shall be able to pursue a career in full-stack development. The students shall develop strong problem-solving skills as part of this course.

Course Name:	ETHICS IN ENGINEERING PRACTICE					
Course Code:	CSE357	Credit Structure :	L	T	P	C
			2	0	0	2

Course Description: The course deals with the responsibilities of an engineer towards the society. Engineering as a profession is meant to serve the public by strictly adhering to codes of conduct and placing paramount the health, safety and welfare of public. Engineering ethics is the study of moral issues and decisions confronting individuals and organizations engaged in engineering and the study of related questions about the moral ideals, character, policies and relationships of people and corporations involved in technological activity. To prepare students for their professional responsibilities as Engineers. To help them recognize and think through ethically significant problem situations that are common in Engineering and to evaluate the existing ethical standards for Engineering Practice.

Course Name:	DATA SCIENCE FOR ENGINEERS					
Course Code:	CSE359	Credit Structure :	L	T	P	C
			2	0	0	2

Course Description: The course deals with the study of data to extract meaningful insights for business. The course introduces R as a programming language, mathematical foundations required for data science, first level algorithms, data analytics problem solving framework and practical capstone case study.

Text/ Reference Books:

1. Introduction to Linear Algebra - by Gilbert Strang
2. Applied Statistics and Probability for Engineers - by Douglas Montgomery

REGISTRAR 

Course Name:	INTRODUCTION TO SOFT COMPUTING					
Course Code:	CSE360	Credit Structure :	L	T	P	C
			2	0	0	2

Course Description: The course deals with soft computing based on some biological inspired methodologies such as genetics, evolution, ant's behaviors, particles swarming, human nervous systems, etc. Now, soft computing is the only solution when we don't have any mathematical modeling of problem solving (i.e., algorithm), need a solution to a complex problem in real time, easy to adapt with changed scenario and can be implemented with parallel computing. It has enormous applications in many application areas such as medical diagnosis, computer vision, hand written character recondition, pattern recognition, machine intelligence, weather forecasting, network optimization, VLSI design, etc.

Text/ Reference Books:

3.4 COURSES FOR OPEN ELECTIVES

Course Name:	Image Processing					
Course Code:	CSE401	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course is an introduction to image processing and image analysis techniques and concepts. Image processing has found much more wider applications not only in the space program, but also in the areas such as medicine, biology, industrial automation, astronomy, law enforcement, defense, intelligence. With the progress made in multimedia these days, digital image processing has become an indispensable part of our digital age.

Topics include: Fundamentals, Applications, Human Visual Perception, Image Formation, Sampling and Quantization, Binary Image, Three-Dimensional Imaging, Image file formats. Color and Color Imagery: Perception of Colors , Image Transformation: Fourier Transforms, Discrete Cosine Transform, Discrete Wavelet Transform: Wavelet Transform, Extension to 2D Signals, Lifting Implementation of the Discrete Wave Transforms ,Image Enhancement and Restoration , Image Restoration, Image Reconstruction, Image Segmentation, Recognition of Image Patterns,

Text Book(s):

Tinku Acharya and Ajoy K. Ray, “*Image Processing Principles and Applications*”, John Wiley and Sons publishers.

Reference Book(s):

1. Maria Petrou and Costas Petrou , “*Image Processing the Fundamentals*”, John-Wiley and Sons Publishers.
2. Rafael C. Gonzalez , Richard E. Woods, Steven L. Eddins, "*Digital Image Processing Using MATLAB*", Gatesmark Publishing.

Course Name:	Data Structures					
Course Code:	CSE402	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The purpose of this Course is to provide the students with solid foundations in data structures and algorithms. It focuses on logical structures of data, their physical representation, design of algorithms and techniques for program development and debugging. Emphasis is placed on the appropriate use and choice of standard data structures.

Topics include: ADT, lists, stacks, queues, trees, heaps, hash tables, and graphs.

Text Book(s):

Richard F Gilberg and Behrouz A Forouzan, “*Data Structures: A Pseudocode Approach with C*”, Cengage Learning

Reference Book(s):

1. Robert L Kruse, Bruce P Leung and Clovis L Tondo, “*Data Structures and Program Design in C*”, Pearson.
2. Seymour Lipschutz, “*Data Structures with C(Schaum’s Outline Series)*”, McGraw Hill Education.

Course Name:	Software Testing and Quality Assurance					
Course Code:	CSE403	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course is designed to make the students understand the strategies, methods and the technologies of software testing effectively. It aims at Designing test plans and test cases, doing automatic testing; reporting on software defectives; assessing the software product correctly; and distinguish the relationship between software testing and quality assurance. In addition, students are expected to do a group assignment on software testing tools of their choice.

Topics include: Testing techniques, integration, code inspection, peer reviews, verification and validation, statistical testing methods, preventing and detecting errors, selecting and implementing project metrics, and defining test plans and strategies that map to system requirements. Testing principles, formal models of testing, all aspects of quality assurance, performance measuring and monitoring

Text book(s):

1. SrinivasanDesikan and Gopaldaswamy Ramesh, “*Software Testing – Principles and Practices*”, Pearson Education,
2. Daniel Galin, “*Software Quality Assurance: From Theory to Implementation*”, Pearson.

Reference Book(s):

1. Aditya P. Mathur, “*Foundations of Software Testing _ Fundamental Algorithms and Techniques*”, Pearson Education.
2. KshirasagarNaik, PriyadarshiTripathy “*Software Testing and Quality Assurance Theory and Practice*”, Wiley and sons.

Course Name:	Social Network Analytics					
Course Code:	CSE404	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The Course Social Network Analysis is to provide students with essential knowledge of network analysis applicable to real world data, with examples from today’s most popular social networks. The Course presents mathematical methods and computational tools for Social Network Analysis (SNA). Students learn how to identify key individuals and groups in social systems, to detect and generate fundamental network structures, and to model growth and diffusion processes in networks.

Topics include: Introduction to social network analysis, Descriptive network analysis, Network structure, Node centralities and ranking on network, Network communities , Affiliation networks , Information and influence propagation on networks , Network visualization , Social media mining , SNA in real world.

Text Book(s):

Stanley Wasserman and Katherine Faust. "Social Network Analysis. Methods and Applications." Cambridge University Press.

Reference Book(s):

1. David Easley and John Kleinberg. "*Networks, Crowds, and Markets: Reasoning About a Highly Connected World.*" Cambridge University Press.
2. Eric Kolaczyk, Gabor Csardi. "*Statistical Analysis of Network Data with R (Use R!)*".Springer.

Course Name:	Digital and Mobile Forensics					
Course Code:	CSE405	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: The use of Mobile phones and digital devices across the globe has increased dramatically. These devices are more susceptible to information security attacks and thus they also possess huge evidences which shall be used during crime scene investigation. This makes the Course on mobile and digital forensics an inevitable one for the security professionals. This Course on mobile and digital forensics will provide a better understanding on different forms of evidences in many digital devices, collection and interpretation of the same.

Topics include: Wireless technologies and security-wireless protocols, wireless threats, cell phones and GPS, SMS and data interception in GSM. Mobile phone forensics - files present in SIM card, device data, external memory dump, Android forensics. Digital forensics:- evaluating digital evidence, Digital forensics examination principles.

Text Book(s):

Gregory Kipper, "*Wireless Crime and Forensic Investigation*", Auerbach Publications.

Reference Book(s):

- 1.Losif I. Androulidakis, "*Mobile phone security and forensics: A practical approach*", Springer publications.
2. Andrew Hoog, "*Android Forensics: Investigation, Analysis and Mobile Security for Google Android*", Elsevier publications.
3. Angus M.Marshall, "*Digital forensics: Digital evidence in criminal investigation*", John – Wiley and Sons.

Course Name:	Database Management Systems					
Course Code:	CSE406	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course aims at developing and managing efficient and effective databases. It helps the students to learn and practice data modelling using the entity-relationship diagrams and developing database designs using structured query languages.

Topics include: Introduction to Database systems, Data modelling, Relational Database design, Various Database Languages, Relational Database Issues , Transaction Management, File structure Techniques, Query processing and optimization, Advanced topics- introduction to distributed databases and spatial-temporal databases.

Text Book(s):

Silberschatz A, Korth H F and Sudarshan S, "*Database System Concepts*", McGraw Hill Education.

Reference Book(s):

1. Elmasri R and Navathe S B, “*Fundamentals of Database System*”, Pearson Education.
2. Hector G Molina, Jeffrey D Ullman and Jennifer Widom, “*Database Management Systems*”, McGraw Hill Education.

Course Name:	Multimedia and Animations					
Course Code:	CSE 407	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course aims to equip students with the fundamental skills in traditional and digital Multimedia and Animation techniques. It emphasizes on practical applications. It will also help the students to develop creativity and conceptualizing ability, effective communication and presentation skills.

Topics include: Introduction to multimedia, Design fundamentals, Image editing techniques, Graphic design techniques, Fundamentals of engineering graphics. Fundamentals of art , Concepts of storyboarding, Principles of animation, Interactive animation techniques, Programming fundamentals, 2D Animation. Digital Media Fundamentals, Modelling and Texturing, Audio Editing Techniques, Video Editing Techniques, Lighting and Rendering, 3D Animation.

Text Book(s):

Ralf Steinmetz , klara Naestedt, “*Multimedia Fundamentals: Vol 1- Media Coding and Content processing*”, PHI.

Reference Book(s):

1. Prabhat K. Andleigh, kiran Thakrar, “*Multimedia Systems Design*”, PHI.
2. Ze-Nian Li-Mark S Drew, “*Fundamentals of Multimedia*”, PHI.
3. Donald Hearn and M. Pauline Baker, “*Computer Graphics C Version 1*”, Pearson Education.

Course Name:	Programming in Java					
Course Code:	CSE 408	Credit Structure :	L	T	P	C
			3	0	0	3

Course Description: This Course is designed for students who have basic programming knowledge. It introduces the object-oriented programming concept using Java.

Topics include: Introduction to JAVA, Class Fundamentals, Method Overriding, Inheritance, Packages, Exception Handling, Multithreading, Input and Output Stream Classes, Utility Packages, Applets, Swings, Database Connectivity, Servlet and JSP.

Text book(s):

Course Name:	Data Visualisation					
Course Code:	CSE 399	Credit Structure :	L	T	P	C
			1	0	4	3

Course Description: This course provides an introduction to turning data into presentable graphics. Data Visualization is important today as the usage of data is growing in many different fields. Data visualization techniques help people to better understand this data. The goal of this course is to introduce students to data visualization including principles, techniques and algorithms, to create effective visualizations based on principles from graphic design, visual art, perceptual psychology, and cognitive science. Students will learn the value of visualization, specific techniques in data visualization, grammar of graphics and how to leverage visualization tools.

Text Book(s):

Course Name:	Object Oriented Design and Analysis using UML					
Course Code:	CSE 248	Credit Structure :	L	T	P	C
			3	0	0	3

REGISTRAR  REGISTRAR

Course Description: The course covers the analysis and design methodology in sufficient depth to convey a good understanding of object oriented analysis and design using the unified process. Student should be able to analyze requirements using a use case model, identify the classes and their responsibilities, using interaction models to capture the requirements and the design of the solution. The application of the design axioms and the iterative nature of the process are emphasized.

Text Book(s):

Ali Behrami, “Object Oriented Systems Development using Unified Modeling Language” McGraw Hill International Edition.

Reference Book(s):

Course Name:	Front-end Full Stack Development					
Course Code:	CSE390	Credit Structure :	L	T	P	C
			0	0	4	2

COURSE DESCRIPTION:

This intermediate course enables students to perform front-end full stack development, with emphasis on employability skills. The course covers key technologies and architectures that enable the student to design and implement front-end. On successful completion of this course, the student shall be able to pursue a career in full-stack development. The students shall develop strong problem-solving skills as part of this course.

Course Name:	ETHICS IN ENGINEERING PRACTICE					
Course Code:	CSE357	Credit Structure :	L	T	P	C
			2	0	0	2

Course Description: The course deals with the responsibilities of an engineer towards the society. Engineering as a profession is meant to serve the public by strictly adhering to codes of conduct and placing paramount the health, safety and welfare of public. Engineering ethics is the study of moral issues and decisions confronting individuals and organizations engaged in engineering and the study of related questions about the moral ideals, character, policies and relationships of people and corporations involved in technological activity. To prepare students for their professional responsibilities as Engineers. To help them recognize and think through ethically significant problem situations that are common in Engineering and to evaluate the existing ethical standards for Engineering Practice.
