ABOUT PRESIDENCY UNIVERSITY

Presidency University aspires to be among the best universities in the world in the shortest span possible with focus on innovative and research oriented teaching methodology, state-of-the-art facilities, industry-friendly curriculum with concrete action plans and an unwavering commitment to the pursuit of excellence. The University believes in nurturing talents amongst all those who join the University. The University is a part of Presidency Group of Institutions (PGI), which constitutes of 7 Schools and a College. Within a short span of three decades, PGI has created a niche for itself as one of the top-notch institutions in Bengaluru. Presidency Group of Institutions (PGI) was bestowed with the "Most Promising Institute in South India" award at the British South India Council of Commerce and Business Meet 2014. The University is carrying the legacy through its close nurturing and mentoring of talent and skills in each individual, the University aims to transform students to become successful professionals and responsible citizens.

ABOUT THE SCHOOL:

The School of Computer Science and Engineering and School of Information Science is a renowned school in Presidency University. With the vision to produce professionals, researchers, innovators and

socail responsibilities. The School is committed to encourage students to carry out innovative research in trending technologies.

OBJECTIVE:

The Course is intended to teach the students the basic concepts of database (MySQL) connectivity using JAVA and PHP. As part of the Course, students will gain the knowledge of concepts such as installation of XAMPP Server.

TOPICS COVERED:

1. Database (MySQL) Connectivity using PHP.
2. Database (MySQL) Connectivity using JAVA.

REGISTRATION:

The registration for each participants may be done by Filling up the form and submit to course coordinator

Presidency Group of Institutions (PGI) was bestowed with the "Most Promising Institute in South India" award at the British South India Council of Commerce and Business Meet 2014. The University is carrying the legacy through its close nurturing and mentoring of talent and skills in each individual, the University aims to transform students to become successful professionals and responsible citizens.

ABOUT THE SCHOOL:

The School of Commerce of Presidency University offers Programmes in B.Com, B.Com (Honours), B.Sc Economics, BBA, BBA Aviation Management and BBA Industry 4.0 Programs to those aspiring to become leaders in the field of Commerce, economics and management. The focus is on creating a talent pool for new generation industry globally in the domains of finance and

accounting, aviation management, marketing, human resources, e-commerce and supply chain management, entrepreneurship, economics and business analytics. Programs offered under the banner of School of Commerce equips the students with a wide range of knowledge, skills and most important the desired attitude of a student, while building competence in a particular area of commerce. School ensures that in addition to their regular core courses the students are exposed to human values, ethics, individual responsibility towards society and nature. Value added courses are given in all semesters to make students corporate ready.

OBJECTIVE:

Course is descriptive and practical in nature, students will be able to gain insight about variables, types of variables, usage and applicability of statistical variables and its applicability in decision making.

TOPICS COVERED:

1. Basic categories of research
2. Data set, variable names, value labels

The University is carrying the legacy through its close nurturing and mentoring of talent and skills in each individual, the University aims to transform students to become successful professionals and responsible citizens.

ABOUT THE SCHOOL:

Design is essentially a synthesizing discipline. It does not have its repository or knowledge bank, like for example in law, medicine etc. Design draws its knowledge base from almost all other disciplines because of its

generalist and multidisciplinary approach. Hence, design education is highly experiential in nature, which in turn necessitates an evaluation system which is not inclusive of written or oral examination only.

OBJECTIVE:

The objective of this value-added course is to offer a basic understanding of fibres, yarns/filaments and fabrics as the major resources and products of textiles and apparel industries.

TOPICS COVERED:

1. Various fibres, yarns, filaments and fabrics
2. Constructions, features and real-time applications of Nomex and Kevlar
3. Related documentaries/videos

ABOUT THE SCHOOL:

The Petroleum Engineering Department in Presidency University is dedicated to the teaching and research in both upstream and downstream areas of Petroleum Engineering. The department offers the first degree

programme with the modular structure and various flexibilities, including Electives, Industrial Practice components etc.

OBJECTIVE:

This course gives particular emphasis on the design aspect of the distillation column and the problems that occur and how to solve them. It provides an opportunity to develop a working knowledge of key techniques that can promote trouble-free operation and reduce distillation cost.

TOPICS COVERED:

1. Introduction to Distillation
2. Types of Distillation Columns
3. Modelling of Distillation Column
4. Distillation Column Troubleshooting
