Dear Sir,

Greetings of the Day from Presidency University, Bengaluru!!!

We are very honored to introduce ourselves to you as Department of Electronics and Commination Engineering, School of Engineering, Presidency University, Bengaluru.

We are one of the most renowned Institutes for higher Education in India. Presidency University is a constituent of the Presidency Group of Institutions [PGI], which has and continues to be active for more than a decade and half in higher education.

We are grateful to you for accepting our invitation as a resource person for a invited talks on “Infrastructure for 5G and IOT operation and evolution” on 11th Jan 2020 (Saturday) between 10.00AM to 12.00PM. This event is organized to create the awareness in present technologies of Industry and IoT in Engineering Applications.

As you are one amongst the well-known in the area of your specialization and expertise, we are very sure your deliberation and participation will surely benefit the participants. The target audience will be faculty members of various colleges, research scholars and students. We believe this interaction will continue for long fruitful educational and professional exchanges.

We believe this date will suit you and your acceptance at the earliest is highly appreciated. We look forward to the limitless possibilities of this relationship. With great happiness we are looking forward for your session.

With Kind Regards

Dr. Rajiv Ranjan Singh
SMIEEE, FIE
HoD - Department of ECE

Invited talk on “Infrastructure for 5G and IOT operation and evolution”

With reference to the above subject, we are happy to inform you that a webinar and panel discussion on “Infrastructure for 5G and IOT” by the resource person Dr. Jonathan W. Bredow on 11th January 2020 for the students of 2nd Year from 10AM to 12. All faculty members and students of second year are invited.

Date: 11th January 2020
Day: Saturday
Time: 10:00 am to 12:00 pm
Venue: Auditorium

Convener - Dr. Rajiv Ranjan Singh
Faculty Coordinators - Mr. Tirumala Vasu

Introduction about speaker:

The speaker for this event Dr. Jonathan W. Bredow, Professor chairs Department of Electrical Engineering at University of Texas Arlington. He has a PhD in Electrical Engineering from University of Texas, 1989 and MS in Biomedical Engineering from Iowa State University 1980. His RESEARCH INTERESTS are Antennas and antenna systems, RF circuits and systems, wireless sensing.

PRESIDENCY UNIVERSITY

(Private University Estd. In Karnataka State by Act No. 41 of 2013)

The program was graced by the presence of the Pro-Vice Chancellor Dr. M. Ishwara Bhat, Dr. C Prabhakar Reddy, (Dean School of Engineering), Dr. C S Ramesh Dean(Research and Innovation), Dr. Shilpa Mehta (HOD ECE Department), Professor Rajiv Ranjan Singh and teaching staff of Presidency University Bangalore. The talk focused on the smart perspectives of IoT and 5G Communication. The talk started with the basic Concepts like Topology of IOT and 5G networks, communications and powering considerations, the gateways and protocols used along with their applications.

IoT integrates different technologies and has a non-negligible impact on a variety of applications in different fields. With such capabilities, IoT has also opened interesting research opportunities in practically relevant fields such as healthcare, smart environments, smart cities, vehicle to vehicle communication and manufacturing. The current demand in manufacturing Industry, Database access, Virtual Reality and machine-human interaction has resulted in a variety of communication technologies with diverse service requirements to achieve the modern IoT vision. Various applications of IoT were introduced to students helping them to understand what technology demands in future. The advances in IOT and 5G, 5G versus other IOT connectivity options and how there has been a vast increase in capability achieved with the cellular infrastructure were discussed. The students were also told about the technical challenges which are to be addressed in developing such an infrastructure and the four technical advancements in 4G/ 5G which have been done. They were also introduced to the concept of backhaul, Beamformer which could be used to enhance system performance and to avoid fading how one can use multiple subcarriers rather than one carrier (OFDM). The talk concluded with the 5G future and implications for IoT and what are the technologies/ techniques/ infrastructure are supporting the advance in cellular communication and how it is going to impact on the performance.

The online program was graced by the presence of Dr. Rajiv Ranjan Singh, Professor & Head, Department of ECE and Dr. Shilpa Mehta, Member Secretary – ISTE Chapter, Professor, ECE. The program was coordinated by ECE department Forum Coordinators Dr. M S Divya Rani, Ms. Aruna M, Ms Samreen Fiza and Ms. Anupama Sindgi. It was attended by 1st semester M. Tech and 6th semester students with a count of 296.

The session started at 9:30 AM with the blessings and wishes from Dr. Rajiv Ranjan Singh, Professor & Head, Department of ECE and Dr. Shilpa Mehta, Member Secretary – ISTE Chapter, Professor, Department of ECE. Ms Samreen Fiza welcomed the guest with welcome speech. Followed by this formal inauguration, the speaker Mr. Vijay took over the session and introduced the audience to Antilock Braking System (ABS). The antilock braking system (ABS) prevents the wheels from locking and enables safe braking. Locking wheels reduce the adhesion between tires

and the road surface and make the vehicle unsteerable. The antilock braking system (ABS) prevents the wheels from locking and enables safe braking. The speaker also spoke about how to grab opportunities, and the skills needed to be employable and message at the end which says practice is the right approach for enabling students to be Industry Ready.

The speaker encouraged students to ask clarifications wherever required and students were equally enthusiastic in the questions raised and answers received. The program concluded with a vote of thanks proposed by Ms. Anupama Sindgi (Asst. professor ECE Dept). Some screenshots from the event are attached

Dear Sir,

Greetings of the Day from Presidency University, Bengaluru!!!

Presidency University is a constituent of the Presidency Group of Institutions [PGI], which has and continues to be active for more than a decade and half in higher education.

We are happy invite you as our resource person for the online webinar and panel discussion on “Skills and pathway towards Embedded Software Industry for ECE students ” on 10th April 2021 as a part of annual series of events conducted by the department of Electronics & Communication Engineering, Presidency University, Bengaluru. This event is organized to facilitate research activities on recent socio-technical advancements in the field of electronics engineering.

We request you to accept our invite for your session on **10th April 2021**, saturday from **10.00 am -12.00 pm**. The Inauguration of the program is scheduled between **10.00am to 10.20 am**

We look forward to the limitless possibilities of this relationship. With great happiness we are looking forward for your session.

Note: Meeting will be scheduled in Ms teams and will be communicated by our faculty co-ordinator.

With Kind Regards

Dr. Rajiv Ranjan Singh

Report on webinar & panel discussion on skills and pathway towards Embedded Software Industry

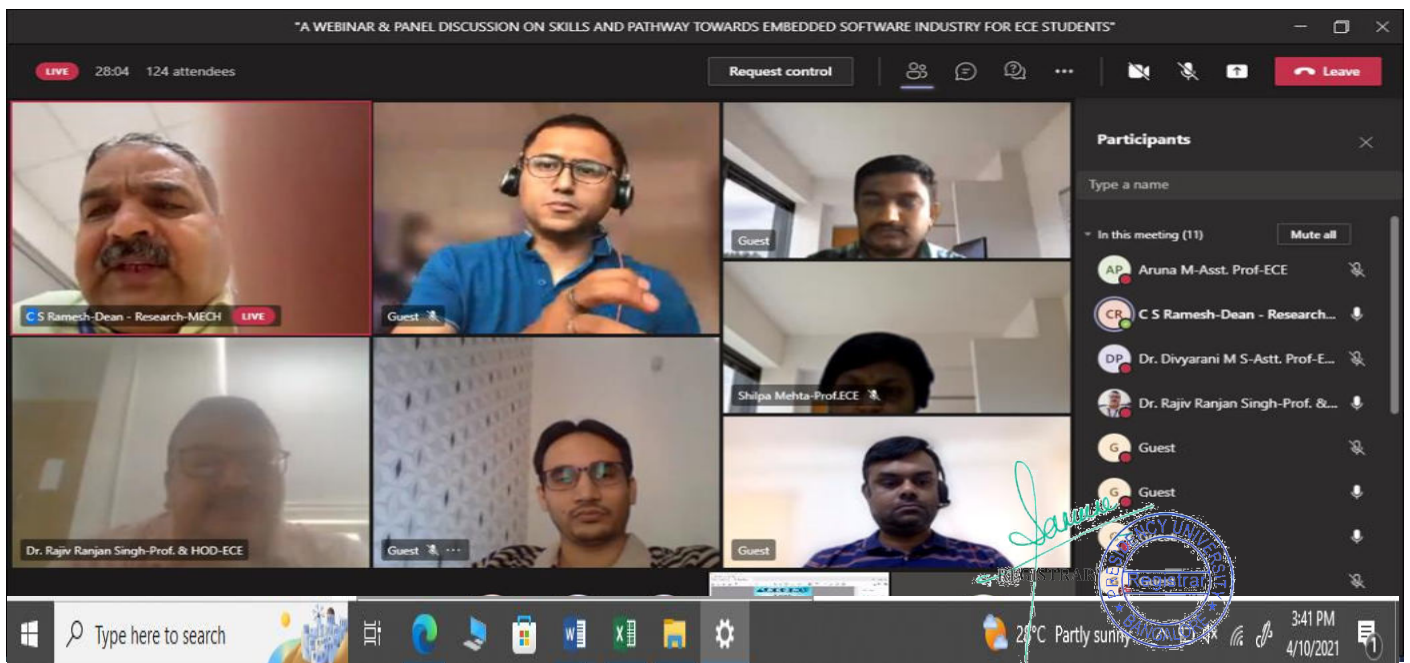

The department of Electronics and Communication Engineering organized a live online **webinar & panel discussion on skills and pathway towards Embedded Software Industry for ECE students** by resource persons **Mr. Saurav Kumar Singh**, Senior Software Engineer, Broadcom Inc., Bangalore, **Mr. Devesh Kumar Gupta**, Senior Software Engineer, IBM, Bangalore, **Mr. Narayan Kittur**, R&D SW Management, Data Center Solutions Group, Broadcom, Taiwan, **Mr. Rakendra Thapa**, Senior Member, Technical Staff, VMware Inc., Bangalore on 10th April 2021 for its ECE students of 2nd and 3rd Year.

The program was graced by the presence of Dr. C S Ramesh (Dean, Research and Innovation), Dr. P S Venkataramu (Dean, Academics), Dr. Rajiv Rajan Singh (HOD, ECE Department), Dr. Shilpa Mehta (Professor, ECE Department) and teaching staffs of Presidency University, Bangalore. The talk focused on embedded system, embedded software, current trends and career paths in the field of embedded software industry. The talk spoke about the companies in embedded system and future of embedded system.

The speakers started off with the basics of embedded systems technology, how this is going to make a change in lives of the people and also the world. Students were told about embedded systems being used in a wide range of technologies across an array of industries. Some examples include: Automobiles, mobile phones, industrial machines, medical equipment etc. Students were briefed about the working and characteristics of embedded system.

Some pictures taken during this online webinar.

Finally this session had given an insight to students about how embedded automation systems are leveraging machine learning, artificial intelligence, and data analytics to help monitor and make recommendations to operators acting as the human interface was discussed. A clear idea about how embedded system specialize in tasks such as monitoring or controlling of the systems and designed to maximize performance, improve power efficiency and control processes while operating in demanding environments was explained by the speakers.

The session ended with a panel discussion on tools used by professionals in the field of embedded systems which includes version control (git,svn), editor for high productivity (vim, emacs, vscode), debugging(gdb), unit testing (check, unity, cunit), browsing a big code base (ctags, cscope, gtags, ccls, clangd) to name a few. The students actively participated in this discussion.

Introduction about speaker:

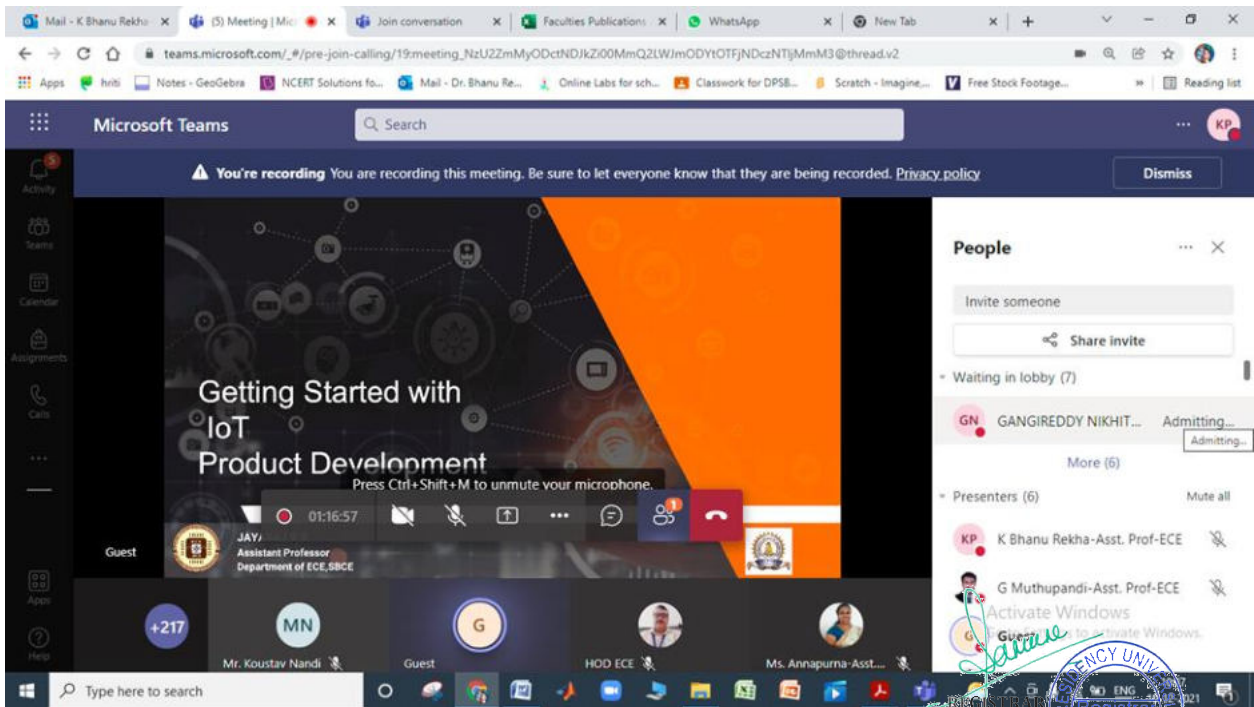

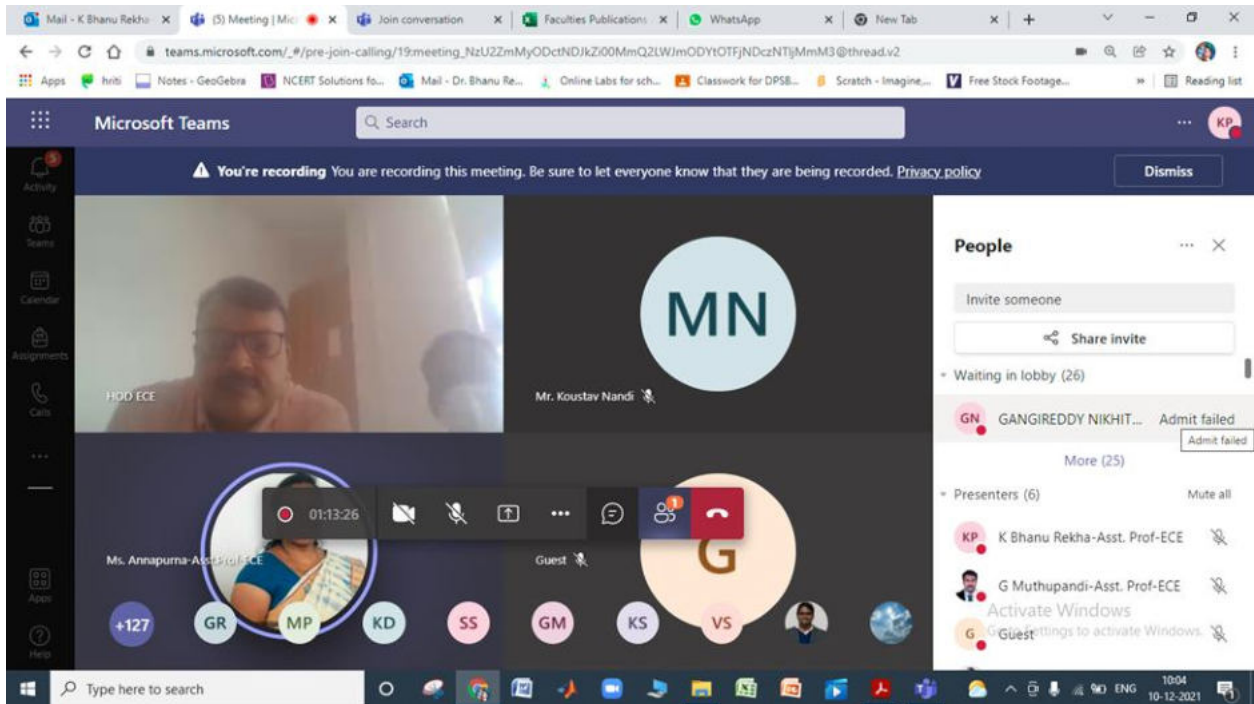

The speaker for this event Mr. Jayaraj V S currently working as Assistant Professor, Department of ECE, Department of Electronics and Communication Engineering, Sree Buddha College of Engineering, Kerala.

V. Jayaraj is currently working as a Lecturer in the department of Electronics and Communication Engineering, Sri Krishna College of Engineering and Technology, Coimbatore, India. He obtained his Bachelor's degree in Electronics and Communication Engg from Amrita Institute of Technology and Science, Coimbatore and Master's degree in VLSI design from Kongu Engg College, Perundurai. He is pursuing his doctoral degree in the area of Non-linear Image processing from Anna University, Coimbatore. His research interests are Nonlinear Image processing and VLSI signal processing.

His RESEARCH INTERESTS are Antennas and antenna systems, RF circuits and systems, wireless sensing, IOT and Embedded system.

The program was graced by the presence of Dr. Rajiv Ranjan Singh (HOD, ECE Department), teaching staffs and students of 3rd and 7th semester of ECE department, SoE, Presidency University, Bangalore. The program began with a welcome speech given by Mrs Annapurna H S. The workshop began with introducing students to how is IoT landscape keeps evolving in terms of providing tools and platforms for connected end-user products. AI is used within retail and supply chain industries alongside machine learning and data analysis to

understand the pattern of purchase in developing personalized experiences for the online end-user. The speaker introduces to NodeMcu-Open Source firm based on ESP8266.

The speaker also provided hands on session ESP8266 which can connect objects and let data transfer using the Wi-Fi protocol. In addition, prototype implementation that enables monitoring several Hardware components. The prototype was realized using ESP8266 hardware modules

The speaker ended the session with a brief talk IoT Based Home Automation Project using Blynk & NodeMCU ESP8266. By Home Automation for controlling lighting, climate, entertainment systems, and appliances without a manual switch. It also included include home security such as access control and alarm systems. When connected with the Internet, home devices are an important constituent of the Internet of Things ("IoT"). Finally resource person answered all the quires related to the projects carried out by 7th semester studies providing them with technical ideas.

A vote-of-thanks was proposed by Ms. Annupama at the end of the event. The event was organized meticulously by the Workshop Team of ECE department which comprises of faculty members Dr K Bhanu Rekha, Dr Muthupandi G and Mr Tirumala Vasu.
