## YOU, ME AND PCOS AND ITS PREVENTION: THE TRUTH

September 1st signifies the start of the PCOS (Polycystic ovary syndrome) awareness month and this year, it also marks the start of the 'World PCOS Day of Unity' event, organized by the PCOS Challenge: The National Polycystic Ovary Syndrome Association. PCOS Awareness Month is a federally preferred event, and its aim is to inflate awareness and help improve the lives of those concerned by PCOS through overcoming symptoms and changing the lifestyle that leads to PCOS.

**What is PCOS?**

Polycystic ovary syndrome (PCOS) is a condition in which the ovaries produce an abnormal number of androgens, male sex hormones that are usually present in women in small amounts. The name polycystic ovary syndrome describes the numerous small cysts (fluid-filled sacs) that form in the ovaries. However, some women with this disorder do not have cysts, while some women without the disorder do develop cysts.

So today we are going to talk only about preventions and the truth about PCOS.

**How can polycystic ovary syndrome be prevented?**

There is no known prevention for PCOS. However, thanks to good nutrition and weight management, many women with PCOS can prevent the development of diabetes and cardiovascular problems.

**How is polycystic ovary syndrome diagnosed?**

Most cases can be diagnosed with an in-depth review of your medical history and symptoms, as well as a physical exam. A blood test may be required to measure the levels of various hormones. In some cases, ovarian ultrasound may help with diagnosis.

**How is polycystic ovary syndrome treated?**

A minor surgery called laparoscopic ovarian drilling (LOD) may be a treatment option for PCOS-related fertility issues that do not respond to medications.

Under general anaesthesia, your physician will make a small cut in your lower belly and will pass a long, thin microscope called a laparoscope through your abdomen. The ovaries will then be treated by surgery using heat or a laser to destroy the tissue that produces androgens (male hormones). LOD has been found to reduce levels of testosterone and

2

lutinizing hormone (LH) and increase levels of follicle-stimulating hormone (FSH). This corrects your hormonal imbalance and can re-establish normal functioning of your ovaries.

**Key points**

- PCOS is a very common hormonal issue among women of reproductive age.
- Women with PCOS may not ovulate, have elevated androgen levels, and have many small cysts on the ovaries.
- PCOS can lead to missed or irregular periods, excessive hair growth, acne, infertility and weight gain.
- Women with PCOS may be at higher risk for type 2 diabetes, high blood pressure, heart problems and cancer of the endometrium.
- The kinds of treatment for PCOS may depend on a woman's intention to become pregnant. Women who are considering becoming pregnant in the future can take different types of medicines.

## **NATIONAL WEBINAR ON 'BREAK THE BIAS AND CHANGE THE EQUATION'**

DATE: 07-03-2022

Presidency University, School of Law in collaboration with DSA organized a National webinar on "Break the bias and change the equation" on the 7<sup>th</sup> of March 2022.

International Women's Day (March 8) is a global day celebrating the social, economic, cultural, and political achievements of women. The day also marks a call to action for accelerating women's equality. IWD has occurred for well over a century, with the first IWD gathering in 1911 supported by over a million people. Today, IWD belongs to all groups collectively everywhere. Every year, as a convention, United Nations celebrates International Women's Day, and the theme for International Women's Day, 8 March 2022 (IWD 2022) is, "Gender equality today for a sustainable tomorrow", recognizing the contribution of women and girls around the world, who are leading the charge on climate change adaptation, mitigation, and response, to build a more sustainable future for all.

In conformity with the United Nations, the school of Law in collaboration with DSA is celebrating IWD by organizing Webinar Series themed:

The theme of the webinar is **"Biological Discommode of Women in work space"**. The resource person of the webinar is Dr. Bharathi Rajshekar, Medical Director & Ob-Gyn Consultant, Secure Hospital, Hassan Professor, and also awarded by Rajyotsava Award. The second Resource person is Adv. Sahara Gopal RTI Advisor to Department of NEWS and Public relations, Karnataka State Legal Advisor -Karnataka Film Chambers.

The Resource person in the deliberation highlighted the point that only Women's Day celebration can't solve the problem of inequality at the workplace. There is unseen and unheard violence facing the women folk in workplaces, particularly in the unorganized sectors, was her thought-provoking point. The Local Complaints Committee is silent on this issue and hence they should be made active by the government, she felt. Moreover, the laws and policies for women should be pertinent to India rather than copying from foreign countries, was her concluding observation. The Webinar witnessed 88 participants.

The theme of the webinar is **“Contemporary evil practices against women in South-East Asian Countries”**. The resource person of the webinar is Star Speaker T.K. Rajalakshmi, Senior Deputy Editor, Frontline.

She analyses critically, at the policy and grass-roots levels, issues relating to labour, land, industry, gender, and the social sector (health and education), besides keeping a sharp watch on national and regional politics and documenting from time-to-time violence against specific social groups.

The Resource person in the deliberation highlighted the point that only Women’s Day celebration can’t solve the problem of inequality at the workplace. ## Women Empowerment Club

*The concept of empowering women is to give a woman the ability to make decisions for herself and to remove gender inequality present in the society. Women face a wide range of problems starting from being restricted only to domestic work to struggling for equal pay and recognition if given the opportunity to work outside. The concept of gender roles is also very narrow minded and are discriminatory in nature without any justification behind associating such roles. In order to change this, uplifting of the whole female gender is a need of the hour. The Women Empowerment Club, Presidency University, Bangalore aims to do its part in being the voice of women.*

As a part of awareness of gender sensitization, the Legal Aid Service of the Presidency University organized a webinar on July 23rd, overall strength of 40 people attended the session and the Chief guest gave a brief about the present era of globalization, the values of gender equality are being accepted and promoted in almost all regions of the world. There are inherent cultural differences in different communities. Gender Sensitization is one basic requirement for the normal development of an individual. Without being sensitive to the needs of a particular gender, an individual may refrain from understanding the opposite gender and in some acute cases even him or herself. Sensitization through education can induce restructuring of gender roles based on efficiency and can help realize higher productivity of men and women in the household and outside work through rational and effective use of resources including available time.

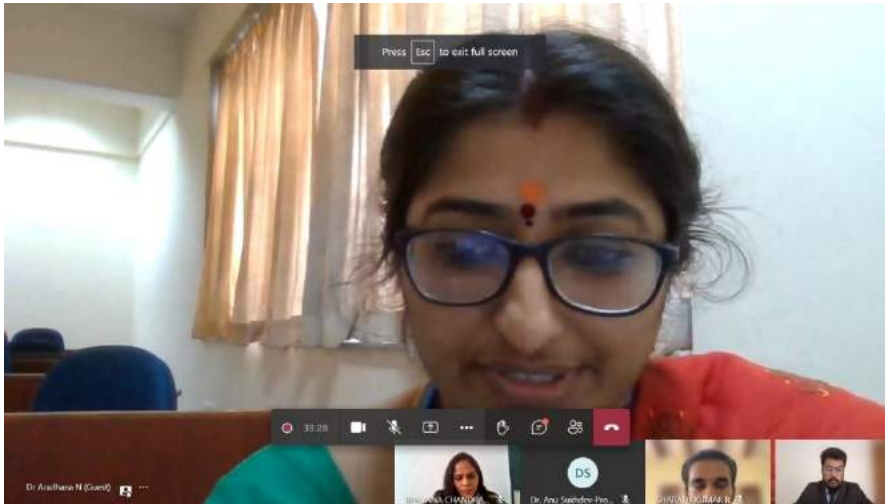

There were about 10 volunteers who made this event a success. The focus of the webinar is essentially to review existing policies, rules, regulations, and procedures with a view to encompassing gender values, needs, and aspirations.

The entire event was closely monitored and queries were also patiently clarified by the honorable Chief Guest Dr. Aradhana Nair.
